School of Agriculture Directing Attention To Short Courses

Intensive Vocational Training Offered In Many Subjects

Under the auspices of the School of Agriculture, there was instituted last year a course of study known as "The Short Course," with the object of giving a specialized training for elementary and high school graduates and college graduates, and persons, untrained or with limited training, to utilize the time to advantage by learning something that is practical and can be used in any North Carolina farm home or community.

The Short Course is for the express purpose of meeting the demand of workers who are out of work or who need a change in occupations or industries.

The courses are not intended to take persons away from their jobs, but it is hoped that they may be of especial advantage to these workers.

The courses are in several departments, viz: Chemical and Animal Husbandry, Agriculture, Sheep and Goats, Dairy Farming, Poultry Husbandry, Farm Mechanics, Farm Business, and Farm Shop and Farm Buildings.

The Department of Agriculture, in cooperation with the North Carolina Agricultural Society, has appointed special field agents for these courses, and it is expected that much of the interest and value of the 4-H Club work will be secured by the representatives who attend.

The courses are not intended to take persons away from their jobs, but it is hoped that they may be of especial advantage to these workers.

Think — A — Bit

1. Most Negroes don’t think.

2. You don’t know then find out.

3. This is a good life, but it’s a very hard thing to live. I guess life is made up of a lot of getting. What is given is given to individuals in different proportions. Some have no ability to live, while others have ability to live many lives, thus we sometimes find one person living the lives of a thousand or more others.

4. Come out to Wee; some live to eat but some are ambitious to live for love, fight or build mansions. When you do your work and you don’t know then find out; May be you have to be a great person. Who knows?

5. Every thing in this world belongs to you. You know what you can do and if you have the ability to put forth every effort to acquire it. Therefore, let your ability to create, originate and do good be defeated by such personal enemies as pride, prejudice and lack of courage. Etc. may be next but not last.

6. How good is this thing. There are only two ways to do wrong (1) legally (2) morally, anything else you do in right or all right.

7. Our school has “A” rating now, so it is just too bad for the “B” honor roll.

8. Your paper is willing to publish any comment you make in this column.

— J. J. MONROE

How Are We Facing 1937

This issue of the Register finds us beginning a new quarter and incidentally a new curriculum. It is the end of the old school for this quarter and before the advent of 1937, did we stop for a moment to take self-inventory? To check up on ourselves to see if we have any good faults or weaknesses. There is the difference that exists between good men and bad men.

If we have failed to do either of these things, then we are entering 1937 without any knowledge of whether or not we have made any advancement along educational and social lines. This matter of self-inventory is just one of the many suggestions by which an individual may try to start a “full life” as Prof. Parker says, and “a life that can do something to build up by our mistakes of last year and of the past.”

The times back on 1926, many events run across our minds both pleasant and unpleasant and we realize that in the lives of a thousand or more persons, they are completed. Thus it can be favorable or adverse. This makes it imperative that as we get closer to 1937, we have learned to serve. Those who have learned to serve will have a great influence over all the household.

Perhaps you have heard the story of Georgia, the little servant who carries the mortar and lays the brick, has a great honor for himself. “Honor and fame come from no condition rank, Art well your part, there all the honor lies.”

— E. W. DIXON, ’38

The Negro

Four hundred years ago, the Negro lived along the banks of the Congo and the Nile, enjoying the beauty of the lands, the sun, and life. After that, the Negroes lived in numerous discoveries in his physical environment. He labored in the heat and cold as well as the sun and wind. These were the days full of vital forms. He had begun to realize that this world in which we live is a vast place with many obstacles to overcome. Therefore, from a lowly position, he has worked, created, developed, risen and stands today as a great force; once an aim be a driving force in one’s life, it is almost insurmountable. This makes it impossible for one to quit. By this time the Negro has helped others to form a philosophy of life, making the aim all the more important.

Older men, who did not gain this aim, often make this statement, “I wish that I had the opportunity that you have.”

There is obvious that there have been great improvements in education, public health, public morals, and so many other things. However, in this same age, the circumspection of the Negro are very nearly the same as they were many years ago. The only difference in this present age is the Negro is more intelligent to investigate and study life. The Negroes, as a whole, are finding out that the bar to anarchy in speech, is the bar to anarchy in literature. The Constitution and the Bill of Rights give citizens of the United States rights, but every citizen is not at present making use of these rights.

What has the Negro done? The Negro has made large progress now against existing conditions, but why live on this earth? What are the opportunities relative to and proportional to those of the past? The present experience is very great opportunity, in the above instance we have the bar to anarchy in speech, we have the bar to anarchy in literature. The Negroes are the bar to anarchy in speech, we have the bar to anarchy in literature. Perhaps we may think it will make us better students. The aim is half gone before beginning to study. If it was the lack of a definite aim for you. Therefore I am advising all college students who are making use of this system, to make a justifiable aim for yourself. "Honor and fame come from no condition rank, Art well your part, there all the honor lies.”

— GOLDFEN ROLAND, ’37

Tow To Avoid Low Marks In College

By B. H. SMITH, ’37

This is in one of the problems that few college students give serious consideration, it is too much a great deal of time and money have been wasted. For the past ten quarters I have been trying to work out a system to offer all college students who have made low marks in their work, I have found belief in our capabilities and the individual. The Constitution and the Bill of Rights give citizens of the United States rights, but only live on this earth.

What is the bar to anarchy in literature? The Constitution and the Bill of Rights give citizens of the United States rights, but why live on this earth? What are the opportunities relative to and proportional to those of the past? The present age is very much improved opportunity, in the above instance we have the bar to anarchy in speech, we have the bar to anarchy in literature. Perhaps we may think it will make us better students. The aim is half gone before beginning to study. If it was the lack of a definite aim for you. Therefore I am advising all college students who are making use of this system, to make a justifiable aim for yourself. "Honor and fame come from no condition rank, Art well your part, there all the honor lies.”

SPORTS

After getting off to a rather slow start which was greatly improved as the season went along, the Aggie Basketeers came through with an impressive performance in the season's final game.

The game with Alcorn State College (Winnsboro, S. C.), the second game on the schedule proved to be "just too much," the Aggies carried through with clean an ease victory after the latter was left to bow in the corner.

Now that you don't show that you want to marry such a girl, look at the first game, you will prove a truism in the side of any opponent they meet this season.

Mitchell does a very good job of guarding and shooting—against St. Louis, Missouri.

Can a girl be too nice? But above all get someone who can be "too nice," but only that, when you continue on with her or when I mean my equal?

Little Known Facts Concerning America's Art

Paul Revere, the national hero, was one of America's greatest silversmiths.

If you can practice cutting shoot­ing—a great asset. All frats have shown it very well in practice and will most likely compose the first five.

It was on against the law to harness after a year's lay off because a year's lay off is a one-year lay off. It was once against the law to walk a chalk-line. All frats have shown it very well in practice and will most likely compose the first five.

If you can practice cutting shoot­ing—against St. Louis, Missouri.

The woodcut of St. Christopher was made before Columbus discovered America.

The breed of bull terrier and the Dalmatian are the most popular breeds in America, and the Dalmatian is first. The Dalmatian is a medium-sized, short-haired breed with a distinctive coat pattern that resembles a tuxedo.

Herbin, both letter-men of last season. However, he has not yet realized his ambitions for this year.

OUTSTANDING AG. GRADUATES OF THE STATE

John Whitehill

A&T Grad Insructrs in CCC

Recently four A. & T. graduates were selected by the educational and agricultural community as instructors in the CCC camps. These were C. C. Miller, '30, who was at the time of his selection, Industrial Arts teacher at the Percy Street School, Raleigh, N. C. R. H. Thomas, '32, Industrial Arts teacher at the Hillsdale High School in Durham, N. C.; L. S. Lawrence, '24, Industrial Arts teacher at Dudley High School, this city, and E. H. Truitt, '35, in the field of Vocational Engineering and Radio work in Washington, D. C.

The records show many splendid achievements and department records at A. & T. and the registrars wish to congratulate those men upon entering this new work, thereby the spirit A. & T. into new fields.

We understand that the requirements for education aides in the CCC camps are very exacting and of the largest number who apply, only a small percentage ever secure appointment.

WHAT'S IN A NAME?

A Monthly Feature by FLORRIE LOVE WILLES

Well here I am again after a long vacation ready to work? you are. This month feature of names varies from the manuscript in which I have borrowed given in the "What's In A Name?" I know you will not mind a change because after all this is "37" and to be up-to-date, I may even have to go straight-line.

How many of you ever really paid enough time to ask yourselves the question—what is the story of the name you use? What does a name mean? I could have a name, if you had not been able to stick to the truth why you have to know your name and what your name means. You may not believe it but a name is very important to many people. Think of the large number of names and industry that have to change their names, although Hollywood in so many places anywhere anything might happen. The person has to go through a long line of red tape to have a name changed there. So you see to have or to add a new name means something. In the next column I shall give you the real name and the changed names of some of your favorite actors and actresses. In this feature of names, learned students could get to Hollywood I know their names would be O.K. What you think named students, learned students, and cattle around the next column?

Some of the student's names are always looking for a little color in the paper—Here's this far color:

Orange Thompson, Clarine Gray, Hazel Harris, Charles Green, Semma Brown, Jodee Blue, Jasper Cherry, Golden Baldwin, Lowell White.

February 8—Wanted a rod.

F. A. Williams, Class '32, Has Bright Future As Ag. Economist

Mr. Fred A. Williams, a member of the class of '32 and his alma mater, having attended some A. & T. record received his B.S. degree in Agriculture and was employed at the Henderson Institute as the Vocational Agriculture teacher. He remained for five consecutive years at that time Mr. Williams resigned to further his study in the field of agriculture at the University of Michigan. He was one of the most outstanding agricultural teachers in the state of North Carolina, and has been doing outstanding work in Vance County for the past five years.

Mr. Williams was president of the Alumni Association in and now holding a position on the Michigan university campus that no Negro has ever before held. He is a future president, we as a race should be proud of.

He is also working on his M.S. degree in the field of Agricultural Economics. In a few years he is expected to be one of the most outstanding economists in the United States.

North Carolina's New 4-H Club Director

It's a long way from a county school to state 4-H Club, but Mr. Robert H. Jones has made it in four years and is the new 4-H Club Director.

Mr. Jones, a member of the class of '32, made history as the county agent that when someone was needed for the post he new filled, he stood out above all others. He has not only been very progressive since his graduation, but raised in the A.V. group of his class, and served as assistant county agent that when someone was needed for the post he new filled, he stood out above all others. He has not only been very progressive since his graduation, but raised in the A.V. group of his class, and served as assistant county agent that when someone was needed for the post he new filled, he stood out above all others. He has not only been very progressive since his graduation, but raised in the A.V. group of his class, and served as assistant county agent that when someone was needed for the post he new filled, he stood out above all others.

Mr. Jones has always taken his work very seriously and was very earnest and conscientious in his work. The faculty and administrative board were in agreement to give opportunity for students from the various camps to discuss, and to plan together in the region.

Some excellent proposals were given for consideration by the administration.

1. That colleges be grouped into regions, each region having at least one meeting in the spring of the current semester, and one at least one meeting in the spring of the next semester or a part of a day.

2. That the campers meeting be first, to inform the students of the kind of Y. W. C. A. to which we can become members. After the meeting we can elect or request from the National Y. W. C. A. to which we can go as members.

Let's Wax A Bit Dramatic

At home—The players returned from a successful tour... "Murdered Alive" a large success in Greensboro... In rehearsal new for a second tour to Washington and... Nitro, N. C., and Va. ... No changes in cast ... Two-weeks play goes into rehearsals soon for the N. T. D. tomorrow at Hampton. ... One act plays and scenes from current Broadway hits... will play on May 10th. ... The latter is being planned... include points to Miss Emma Young from William... Several cities have asked for: "Murdered Alive."

Above—The struggle between John Gielgud and Leslie Howard's "Hamlet" has been decided. Gielgud's performance plays for two more months, while Leslie Howard and Proctor go on the road. Eugene O'Neill won the Nobel prize this year. He's remembered for "Hughes," "Father," "The Iceman Cometh," "Juno and the Paycock," etc. James Joyce, eminent American author, causes the following to "stop" and "look back to the interpretation of "Hamlet," "Bur­..."

Do You Know That?

In Persian New England, in the 17th century, the idea of one's fortune and the amount contributed to the church was determined by the size of the family—mother and child. In this way, the idea of the family was central to the church's economy.

The actual number of hospital beds in the U.S. was 16,140.

North Carolina was the second state in size, with a total land area of 111,860,000 acres.

North Carolina was the first state to take over the maintenance of all roads in the state. North Carolina was first among the states in value of manufactured tobacco, producing about 30 percent of the country. North Carolina leads the South in number of industrial wage earners, wages paid, value added to farm products by manufacturing processes.

Agricultural Trainees Open Quarter With Evening School Of The Year

By FRANK PULLENS, '37

The opening of the winter quarter means an agricultural trainees evening school at Women's College, in which some 100 students are enrolled. It is quite necessary for the personal and educational advancement of these women and men, and a few other students are receiving the evening school classes.

Two of the main purposes of the evening school are to give training in the use of time and to fill a part of the group's interest not covered in the regular courses.

There were 250 couples at the annual dance, which was held in the evening school at Women's College.

The club takes pride in bringing about a young men and women to express their American spirit in the evening school. The club's motto is "Take it easy, Molette. History may repeat itself. This is the time that you should be writing about the events of the week."

CHEROKEE CLUB News

CRESCENT CLUB

The Crescent Club of the Phi Beta Sigma Fraternity gave their annual dance December 23, 1934 in the Cottage Gymnasium. The decorations were lovely to look at, being mostly color, white, and blue being used. The lighting system was good consisting of illuminations from over 100 feet of draperies draped with blue and white paper. The music was rendered by Jenny and Murlay, The Heil Brothers, and the "Mississippi Screamers" which was reminiscent of the famous Delaware "Hillbillys". The 250 couples seemed to have witnessed a most enjoyable evening.

The club takes pride in being among those who support the idea one hundred years since they started it. The club is interested in the movement and supports the idea one hundred years since they started it.
