World Famous Group To Stage "Rainmaker" Here

On November 26, at 8:00 p.m., the world-famous Carolinas Playmakers will bring their touring production of "Richard Nakhle's mock-tragedy comedy, 'The Rainmaker,'" to the campus auditorium of A&T College, under the sponsorship of Kappa Alpha Psi Fraternity.

At a recent meeting of the Carolina Playmakers, Inc., 60 years old symbol as they pose beautifully for the oratory on "Opportunities in Science" conducted by Vance H. Chavis, associate in Science and Mathematics, and nation-wide tours were heard Charles G. Wilder, Oak Ridge Institute of Nuclear Studies. The program is sponsored by the South Carolina Science Fair Association for its program of local demonstrations and professional guidance and leading, in a nation-wide and international effort to bring TB into the theatre. . . . via 'The Rainmaker,' . . . a stimulating and rewarding experience in play-going. It points the way back in the theatre. The New World Telegram and Sun called "The Rainmaker" a "dash of humor" at Fredrick Taylor, (ex-

Mrs. Bost Urges Support In T B Battle

Raleigh, November 26—Mrs. W. T. Bost today urged the active interest and support, the people of North Carolina in the continuing fight against Tuberculosis in a statement officially releasing the 1953 Christmas Seal. Mrs. Bost, this year's State Chairman, emphasized that 94 per cent of the funds derived from the state-wide sale remains in the state and is used in a program designed to combat the TB problem in North Carolina.

She pointed out that the current rate of TB was four times as high in 1933 as it is today, and that there has been a marked decrease since 1933. She also said that the state-wide sale was not the only program to combat TB and that there were other programs which were equally significant.

Oak Ridge Laboratory Cites Dr. Edwards For Summer Research

An A&T College professor of physics was recently praised by officials of the Oak Ridge National Laboratory for his cooperation given this summer as a research participant. Dr. D. E. Edwards, a member of the faculty here in the School of Engineering, was recommended for the "cooperative cooperation and effective assistance" which he gave as a temporary employee at the laboratory. He was cited in a letter from the laboratory's director, addressed to Dr. D. E. Edwards, who was employed at A&T since 1953.

The letter stated that the college and the Oak Ridge National Laboratory had worked together to provide a student with valuable experience in the field of nuclear research. Mr. Richardson stated that the college students were given the opportunity to work at A&T and at the National Laboratories.

Oak Ridge Laboratory has stated that the college student was given the opportunity to work at A&T and at the National Laboratories.

EXCHANGEING PLEASANTRIES — Dr. Aghalmi Hertrampft, (Second from left), German visitor on tour of U. S. Colleges and Secondary Schools is shown above exchanging a bit of humor with Frederick Taylor, (centre right). Looking on are Mrs. P. G. Bradley, left, of the English Department and Dr. W. N. Rice, Foreign Language Depart-
Book Store Policy
Clarified For Students

In order that all students may reap maximum benefits from the book rental system, the following information is provided by the bookstore.

The number of books being used this quarter ranges from two to several hundred. It is essential, therefore, that the fee charged bring assurance that all students will be

There are cases where students keep the same books for three quarters. However, the fee charged would be based on the end of the school year or upon graduation, if you occur before the school year ends. The entire fee paid during the year is prorated to all the books used during the year.

Technical Institute. Each of the next five editions will carry interesting facts about this unit of the College.

The Technical Institute had its beginning as an independent school in 1861. There were 10 trades offered and 55 students enrolled its first year. In 1863 the Technical Institute was moved to satin Hall, a modern brick building, which is equipped with the latest facilities and equipment found in industry. By the fall of 1863, 46 additional trades were added to our program. The first graduating class numbered 14 students and the enrollment numbered over 40 students.

The Technical Institute has as its overall purpose, the training and development of competent men and women in the various areas of our technical education. To achieve this, the educational program is based on these objectives:

1. To train technicians in the many areas of our technical education. This program is designed for those who wish to major or minor in English. These same courses, however, may be of interest to students who do not wish to major or minor in English. These courses may also be of interest to those who are majoring or minoring in English. The courses aimed at the study of English, and are therefore, open to all students who do not wish to major or minor in English.

2. To prepare for immediate productivity upon completion of training.

3. To encourage speed with precision.

4. To encourage students to take pride in craftsmanship and to strive for excellence in workmanship.

5. To create conditions that foster those qualities of personality and character that are so necessary in American society.

The department of students and instruction is made up of the following faculty members:

Elliott C. N. — The following is in a series of articles about the faculty members of the next five editions will carry interesting facts about this unit of the College.

Let Us Be Thankful

Since the termination of the last Thanksgiving, much has transpired. California has been very successful. The cold snap, which has been lingering in the north, has finally reached us, and all of us are still enjoying the benefits of good health. We have been able to attend various social activities and have not had to worry about the weather. The weather has been perfect for the holiday, and we have been able to participate in all the fun activities that come with it.

The Elusive Peace

ROBERT D. SHAW '56

A newspaper headline: "U. S. To Continue Quest For Peace." This is a situation that the Secretary of State brings back to "news" from the Cannes Conference. It was pointed out that whereas much has not been accomplished, there is a great deal of hope. We must all engage in every individual in this Great America of ours. We must all engage in our lives and the people of the world will be won only by example, and this example can only be good.

What Determines Success

SYLVIA LEE OVERTON '59

Off times we hear a person speak of success. He usually refers to a person who has a certain character, and who has worked hard. But have we ever stopped to think about why he has succeeded? We know that success is not something that comes to a person by chance. It is something that he must work for. He must have the ability to learn, to get along with people, to work constructively, and to develop his ability to learn.

The A&T College

Whether or not being a Greek is a prerequisite for reaching a goal depends on the individual. The answer is no. A social life is required for every student having a first opportunity to knock on his door. He is more than likely to be the person having a first opportunity, but it is not necessary. If you try with hopes of making good grades and your efforts will prove a point. Then try with hopes of making good grades and your efforts will prove a point.

Chapel Organizations

At a special business meeting of the A&T College Chapel, some of the officials on the Executive Board of the Chapel were elected. Newly elected officers are as follows:

Board of Directors: Sarah Coplin, Miss H. E. Goldsmith, and Dr. W. L. Kennedy. President: Dr. J. C. Martin. Secretary: Mrs. Inez H. Goldsmith.

The business meeting included a report from the Executive Committee and a discussion of membership. The officers present were: Dr. W. L. Kennedy, Mrs. Inez H. Goldsmith, Ruth Reese, Dolores Watson; and Sarah Coggins, Evelyn Goodson, Martin, Meredith M. Martin, McKinley Mayes, and Robert L. Stephens.

Other Officers are: Dr. W. L. Kennedy, Mr. J. C. McLaughlin, Phyllis Martin, Meredith M. Martin, McKinley Mayes, Robert L. Stephens. Other Officers were: Dr. W. L. Kennedy, Treasurer and Sade A. L. Brown, Secretary.

Frosh Organizes

Recently, the freshman class met with its advisor, Dr. Walter McAlister, and Howard Short, prefect. The student council for the purpose of electing officers. Those elected as officers are as follows: Walter McAlister, president; Donavan Moore, vice president; Barbara Hill, secretary; Mabel Simons, assistant secretary; Harold Mitchell, treasurer; Thurman Russell, reporter, and Montenia LeNes, secretary. Other officers elected are as follows: President, U.S. L. Jenkins; Secretary, U.S. L. Jenkins; Assistant Secretary, Harold Mitchell; Treasurer, R.H. Stephens. Other Officers are: Dr. W. L. Kennedy, Treasurer and Sade A. L. Brown, Secretary.

Dialogue Team

Urges Help

If you can think and talk, you can debate. Join us on Wednesday evenings at 7:30 o'clock in room 225 of Hobbs Hall.

Resolved: THAT NON-AGRICULTURAL WORKERS SHOULD RECEIVE A GUARANTEED ANNUAL WAGE in the question that will be debated by colleges and universities throughout the United States this year. If A&T College is to be one of these colleges, more students interested in argumentation must become affiliated with the Kappa Phi Rhaps Rhapsody Society.

This organization has enjoyed a successful past with outstanding debaters such as Glen B. Rankin, J. P. Poitier, Pearl R. Garrett, William Gilmore, Frank H. Melane, Andrew A. Betts, James Moore, Al Mikan, and others. These same persons are now successfully using techniques learned and practiced in debating.

This year under the direction of Miss Zoe O. Parks, faculty advisor, and Col. E. D. Brown (principal speaker), Kappa Phi Kappa has made a fine display. A panel discussion of the Kappa Phi Rhaps Rhapsody Society was held during the early in the winter quarter. Trips to other schools are also anticipated.

Here's a Hit-

Lucky Doodles!

WHAT'S THIS? For solution see paragraph below.

YOU ALWAYS COME OUT ON TOP when you light a Lucky because Luckies are tops for taste. Luckies taste better because Lucky Strike means fine tobacco . . . mild, tobacco that's toasted to taste even better. The men in the Doodle above have come out on top, too — in many ways. They are the Doodle Club. The conventional method of making Luckies. Follow their shining example: light up a Lucky yourself. You'll say it's the best-tasting cigarette you ever smoked!

Gridiron Grist

By LEON DIXON

CAROLINA CLASSIC

Although both teams have had comparatively good seasons, the tra­ditional Turkey Day grid battle between the North Carolina College Eagles (4-1-1) and the A&T College Aggies (4-1-1) today is expected to draw a capacity crowd to Memorial Stadium in the final CIAA Conference tilt of the season for both teams. The game marks the twenty-fifth meeting of these two teams in a series Classic which originated in 1928.

Today the Turkey Day battle, featuring these two teams, has become a sort of institution with North Carolina sports fans. For the first time this many teams have shown up practically out of competition for the CIAA flag, having at least one defeat each; but the most avid Tar Heel follower rates the State Championship above that anyway.

The Aggies have scored 292 points, while limiting the Eagles to 212 points. Of these two teams have played 24 games, A&T winning thirteen.

If we dig into the record book and explore the statistics, we will find that these two teams have played 24 games, A&T winning thirteen. On the basis of the wins and losses, there have been two ties in the series.

There have been two ties in the series. Although both teams are practically out of concentration for the Turkey Day battle between the North Carolina College Eagles and five for the Aggies.

Morgan 6 269 873 145.5

Virginia State 7 332 904 147.5

Morgan 6 285 820 143.8

Virginia State 7 367 913 143.8

A&T, on the other hand will lose the services of Frank "Willing" Wilder, Shaw pass receiving leader, James Covial, end, George Myers, tackle and Lawrence Payne halfback.

The two teams are fully manned and in tip-top condition. This "Thanksgiving Day" game is expected to be the greatest yet. Only one thing is certain.

The grid battle between the North Carolina College Eagles and the Virginia State Aggies is expected to be the greatest yet. Only one thing is certain, the two teams will begin battling again Memorial Stadium at 2:00 P.M. on Thanksgiving Day.

AW Shucks! Lawrence Payne, A&T Halfback, is caught and up­ended rather rudely as he receives a pass from Donald House, the Quarterback. Payne, a senior, will be going all out to turn in his best performance today as he bows out of the college gridiron picture. Good Luck, Payne!

All the pleasure comes thru the taste is great!

*A. AND T.*

Curtain Closes On Five Aggies' Grid Careers

PAUL TALBOT

For the last three years Payne has been one of the most consistent performers on the Aggies' squad. In 1953 he led the team in scoring one year. Last year, for example, he was third in individual scoring. He is a shifty second in kickoff returns, third in punting, fifth in punt returns and fifth in pass receiving. He is a “60” minute man and is hardly ever substituted. Payne has proved himself a valuable man on defense as well as on offense. In his role as an all-round player, he has thrown many a key block in the ground gainers of the Aggies and also an honor student academically.

FRANK WILLINGHAM

A native of Lawrenceville, Ga., Frank Willingham is a power runner and determined blocker. In spite of his 5'11", 190 lb. frame, he is as rugged as he come. Not only is he a determined blocker, but an equally determined runner. Everything he carries the mail, he has goal dust in his eyes. Frank is especially good on punt defense and has been used in that role for most of the season. Last year, Willie averaged 14.8 yards per try in rushing. Frank is also an honor student academically and for Student Council President.

GEORGE MAYES

The biggest man in the Aggie backfield is George Mayes. Fast for his 220 lbs., he handles his 6'3" frame with unusual agility. A good tough boy, Mayes likes it rough. As durable as a rock, he plays the full game and is hardly ever substituted. George has played only three years for the Aggies. He transferred from Shaw University where he played for one year. Under CIAA conference rules, although George is a Junior, he played four years conference ball. For those three years, Mayes has been the smoker of the Aggie line and has won praises from coaches and players of other conference teams. George is a native of Oxford, N. C.

EXTRA POINTS

OFFICIAL CIAA STATISTICS

Official CIAA statistics released November 9 give evidence in the assumption that Maryland State will be the grid champions of the conference for 1955. The perennial Heavenly Stew, still unbeaten, have a string of six wins and no ties for the current campaign. A. and T. occupies second place in the standings with a 4 won, 1 loss, 1 tie record. Virginia State is third with 4-0-3 is third, and North Carolina College is fourth with a 3-1-1 record.

During the span of the season, the Aggies have proved themselves to be one of the powers of the conference. Only a breathtaking 5-0 loss to Maryland State mars an otherwise commendable record. Under the able leadership of their erstwhile mentor, Coach Bill Bell, the Aggies have developed into a surprisingly well-balanced team, both offensively and defensively. The backfield, bolstered by the return of J. D. Smith, has provided a scoring punch equal in proportion to the indispensable talents of the defense front.

As a whole, the team has more than lived up to its expectations. As a native of Lawrence, Kansas, one of the reasons for doubt when the season began was the absence of quarterback Howard Battle, a junior who was limited action last year because of an injured leg. He was expected to take over the field general position vacated by Lonnie Hall, but recurrence of his old injury placed his services at a minimum. J.D. Smith, the erstwhile fullback from Burlington, has filled the position admirably. He has finally come into his own. He is as agile as a cat and is a cog in the constellation defensive machinery. James is a Business Administration Major and a member of Sigma Phi Sigma Honor Society. His defensive play at the end position earns him a berth with A&T Greats at that position.

JAMES COVIAL

This 6'0", 200 lb. fullback from Raleigh, North Carolina, is in the vanguard in his freshman year and has been an on the grid. He is on the best defensive ends in the CIAA and a very capable pass receiver. For instance, last year he was one of the receiving end of six records for 109 yards and one touchdown. "The Big Hair", in spite of his size, is as agile as a cat and is 4 legs in the constellation defensive machinery. James is a Business Administration Major and a member of Sigma Phi Sigma Honor Society. His defensive play at the end position earns him a berth with A&T Greats at that position.

Lawrence Payne is a "60" minute man and is hardly ever substituted. Payne has proved himself a valuable man on defense as well as on offense. In his role as an all-round player, he has thrown many a key block in the ground gainers of the Aggies and also an honor student academically.

Frank Willingham is a power runner and determined blocker. In spite of his 5'11", 190 lb. frame, he is as rugged as he come. Not only is he a determined blocker, but an equally determined runner. Everything he carries the mail, he has goal dust in his eyes. Frank is especially good on punt defense and has been used in that role for most of the season. Last year, Willie averaged 14.8 yards per try in rushing. Frank is also an honor student academically and for Student Council President.

George Mayes is the biggest man in the Aggie backfield. He is fast for his 220 lbs., and handles his 6'3" frame with unusual agility. A good tough boy, Mayes likes it rough. As durable as a rock, he plays the full game and is hardly ever substituted. George has played only three years for the Aggies. He transferred from Shaw University where he played for one year. Under CIAA conference rules, although George is a Junior, he played four years conference ball. For those three years, Mayes has been the smoker of the Aggie line and has won praises from coaches and players of other conference teams. George is a native of Oxford, N. C.
