Alumnus Survives Crash

Lt. Adam C. Mattocks was one of five survivors of the January 30, 1960, World War II Japanese bomber crash at Seymour Johnson Air Force Base. A 1953 graduate of A&T College, Lt. Mattocks served as a navigator through an open hatch in the roof of the bomber which contained the craft's "twin tail" at the time of the crash. He was carrying unexploded nuclear weapons and had been flying for service in Korea and had just returned from a tour in Vietnam where he was flying non-nuclear armed missions.

MATTOCKS IN AIR FORCE

The million-dollar, eight-jet bomber, based at Seymour Johnson, was on an airborne alert when, due to a small engine fire, the aircraft was forced to drop all weapons and make an emergency landing. Lt. Mattocks, who spoke to the students at the ceremony, retired to his Lindsay Street home in Greensboro Wednesday, February 1, to recover from his injuries. The place was just minutes away from a safe landing when it began skidding off the runway.

President Addresses Students

“Ferdinand D. Bluford Memorial Book” which contains information about the late Dr. Ferdinand D. Bluford, now hanging in Bluford Library, was painted by Lois Edwards, who spoke to the students and faculty Thursday, February 3, to introduce the new book. Mrs. Hazel D. Bluford, widow of the late Dr. F. D. Bluford, presided at A&T College from 1925 to 1956. Mrs. Bluford was very timely, for Dr. Bluford, a former first lady of the college, was commissioned to the rank of Brigadier General in the U.S. Air Force Reserve.

Mrs. Bluford stated that she and her husband came to A&T in 1912, and that he was the first president of the college. She stated that most of the students' and faculty's memories of the late President Bluford are some of the impressions of students of the year 1955.

The Bluford home is well appointed with beautiful Chippendale furnishings, which process, store, distribute, and market the products of the farm.

Graduates of this area will be specially prepared for employment as research and technical supervisors with companies that deal with food, fertilizers, food processing, and other such industries. This area will further train one for employment in public relations fields.

AGRICULTURE TECHNOLOGY

Agriculture Technology will give students opportunities to develop knowledge and skill in a specialized area of production. It will place emphasis on the development of management in the operations of commercial farms or related fields that require specialized knowledge and skill. Students in this area will prepare the student for professional work in the "real world." This area will be associated with commercial business or for further graduate work in this field.

Majors in Agriculture Technolog y will be specialized in any of the following areas: Agricultural Engineering, Animal Husbandry, Dairy Husbandry, Forestry, Horticulture, Poultry Husbandry, and related fields of Agriculture.

In fact, the Bluford home is full of memories of the late President Bluford. To learn some of the answers to the questions, "What does a former first lady of a college do in retirement? What an example of how a former first lady and her husband lived in "The Oaks" for only five years?" Mrs. Bluford stated that she and her husband came to A&T in 1912, and that he was the first president of the college. She stated that most of the students' and faculty's memories of the late President Bluford are some of the impressions of students of the year 1955.

...And They Stare

Many articles have been written concerning the College Canteen. Much has been said about our College needing one. Now, we have a College Canteen. What do we do with it?

A number of students sit there from hour to hour staring at the different personalities who visit the canteen. Because of the lack of activity on our campus, several of our fellow classmates have abandoned the use of the College Canteen. Not only the students, but some of our faculty as well.

As you wrote letters and participated in the activities for a College Canteen, others did with the same intention of enjoying its services, is it fair to deny them the opportunity to enjoy its pleasures?

The situation mentioned has been expressed by many students as being the reason for not visiting the College Canteen.

If we had a larger canteen, we would probably have ample space for both eating and socializing. Unfortunately, however, the space exists but not the use we can make of it.

Anyone who visits the canteen, therefore, should eat and leave in order to make room for others who would also like to enjoy the facilities and the low prices.

Another observation, pointed out earlier this year, is that sitting around in the college canteen can bring no grade points, no credit hours, and above all, no degree.

Can Any Harm Be Done?

The proposed regulation to govern class attendance is causing great debate throughout the student body.

Some students have vigorously opposed the new regulation. "It's fair getting excuses because they won't do a student any good under this rule," one said. "We should be allowed and should be able to keep adding quarter hours to students' graduation requirements."

After studying the proposal, one can see that many of these comments and criticisms have resulted from misunderstandings or misinterpretations.

Actually the new regulation is quite understandable and sections of the proposal are quite liberal.

Careful analysis will show that there will be added only if a student takes a particular class more frequently than the number of quarter hours credit, and does not bring an approved excuse. Secondly, it's only when a student does this in more than two classes that he is to be dropped for over cutting.

Thirdly, a student must be present for two-thirds of the classes he takes. It is possible for the making of excused absences, All excuses must be approved by the Dean of Students.

James Blue and Earnest Sherrod were in favor of the rule as stated for offering their interpretation. "Many students are taking classes with the attend­ance as a joke and something de­finitely should be done about it," Sherrod added. "Freshmen shouldn't be allowed any cuts because they need to attend class daily. If they cut excessively, these students will have three years to take those additional hours."

The argument around the student who is3. No student on probation may

A matter that proved to be quite the discussion in the class was the proposed penalty for the成熟 student the responsibility of the tor for consideration:

"Class attendance: It is assumed by the Dean of Students." Our students are taking class attend­ance as a joke and something de­finitely should be done about it," Sherrod added. "Freshmen shouldn't be allowed any cuts because they need to attend class daily. If they cut excessively, these students will have three years to take those additional hours.

The argument around the student who is
to be more rigidly stated than the class attendance. It is assumed by the Dean of Students."

"Class attendance: It is assumed by the Dean of Students."

"Class attendance: It is assumed that when a person sees a college education he intends to learn as much as he can. For this purpose classes are provided under the leadership of an instructor. If the student is eager to learn and the instructor is capable, neither can afford to miss a single opport­unity to engage in the learning process. However, for the mature student the responsibility of the class attendance should be his."

The following regulations are our proposals:

1. No student may cut on the day of, or the day before, or after a vacation.
2. No freshman may cut classes during the first semester of his college career.
3. No student on probation may
class be lowered rather than hours

Dr. Merrill Stafford Read Speaks On Food Irradiation

This was the third in a series of special lectures under the direction of the Undergraduate Research Participation Program. This program is affiliated with the A&T College Atomic Energy Commission Project and sponsored by the National Science Foundation.

Dr. Read joined the staff of the National Dairy Council after having served as visiting professor in the Department of Biochemistry and Nutrition, Virginia Polytechnic Institute.

From 1956 to 1959, he was Chief of the Irradiated Foods Branch, U. S. Army Medical Research and Nutrition Laboratory at Ft. Sam Houston.

He continues to serve as a Nutrition Consultant to the Atomic Energy Commission.

As director of National Dairy Council's Department of Nutrition Research, Dr. Read is concerned with two major activities. These activities are the conduct of NDC grants-in-aid nutrition research program and the interpretation of research findings of interest to the dairy industry.

Dr. Read is a graduate of North Carolina College and received his Master's and Doctor of Philosophy degrees in chemistry at Ohio State University.

DE. MERRILL S. READ

NEGRO HISTORY WEEK PROGRAM ANNOUNCED

.set the stage for a unit of troops belonging to a tribe that was supporting a member of his own tribe for the presidency. Lumumba had once supported this tribe but had subsequently flipped it to support Joseph Kasavubu, who also belonged to another tribe, because of some vital political settlement.

RECOMMENDATIONS

First and foremost, it must be made clear that the meeting was not a clear success, for there had been no decision reached. The following recommendations were approved:

(a) that all Belgian officers should be withdrawn from the Congo;

(b) that every member of the force should be stepped up one grade in rank, and

(c) that Presi dent Kasavubu should be the Commander-in-chief.

This, of course, meant that there would be no privates in the force. But before these reforms could be put into effect, peace and order would have to be restored in the Congo. It is hoped that these reforms will be carried out as soon as possible.

ARMY POLICE FORCE

In brief, this force was founded in 1960. It has always been a combination of both army and police, but since independence began in the Congo, it has developed into a police force.

In brief, it has always been a combination of both army and police, but since independence began in the Congo, it has developed into a police force.

Moreover, there was no prospect of any political reforms taking place in the Congo. But before these reforms could be put into effect, peace and order would have to be restored in the Congo. It is hoped that these reforms will be carried out as soon as possible.

For the fresh softness in Salem's smoke is the rich tobacco taste. Smoke refreshed...smoke Salem!
Richard R. Harrison Players will perform in the presentation of 'The Trial and Death of Socrates,' on Thursday evenings at 8 p.m. in Harrison Auditorium.

To present the celebrated trial and death of Socrates, the play will be performed on Wednesday and Thursday evenings at 8 p.m. in Harrison Auditorium. The play is based on the historical events recorded in Plato's dialogues, "Crito" and "Theaetetus."

The character of Socrates, portrayed by Richard R. Harrison Players, will be brought to life by a talented cast of actors. The play will explore the philosophical and ethical questions raised by Socrates' trial and execution, offering insights into the nature of justice, virtue, and the pursuit of knowledge.

The performance is directed by Dr. David Proctor, who has extensive experience in directing and producing theatre. The cast includes a diverse group of actors, each bringing their unique interpretation to the characters, ensuring a dynamic and engaging performance.

Tickets are available for purchase at the door at a suggested price of $10 for adults and $5 for students. Doors open at 7:30 p.m., and seating is available on a first-come, first-served basis. Special discounts are available for groups of 10 or more. For more information, please call the Box Office at 555-1234.

Song For Angel (No. 3)
by george raleigh
and if we should forget
my dear
the soft conversations of coming dawn
and if we should forget
the lovely glow of passions' candle
and if we should forget
the quiet tears
and soft lips,
the tender caress
of night's lovesong
and if we should forget
the pain
of time my dear
for memory's sake
be kind.

Twilight After The Storm

By Leslie Truesdell Bell
A wrack of dark and angry cloud
As the wild winds that wrap my form
My being to follow, follow in its wake—
My gaze to fasten upon that star—
That unknown something that does compel
A new, a sweet, soul-cleansing calm.
To me—not so—it brings relief,
Which follows any summer storm;
Of me to taste of her mellifluous lips
Tapping: softly to Miles' vastitude of beauty,

Here Lies Love

By Django De Gree
Clothed in negligence of desire
digging now,
Her coal black akses embedded in a sphere of white
Beckoning, adoring, pleading
Of me to taste of her mellifluous lips
Love lies at my foot
Mourk calls and I must answer
for Miserisose demands all of me at once.
Now, even while love grows impatient at my foot
Hot breath and anticipatory sighs distract me
I lash out!
Love retreats through the South dimension
but: I am not perturbed,
Tapping softly to Miles' vastitude of beauty,
Love still lies at my foot.

Beowulf - A Version In Modern English
by Lavovse Madison
Deep down in Drivathg's Kingdom
lived a big to hudge named Grendel. At his description, Grendel, roundabout garbage, misshapen, and asked Hrothgar's huge warriors and did them in. This art he continued for twelve And twenty years.

Word of this terrible deed finally reached my hero Beowulf, who was a Geatan. Immediately he set off to Grendel and his troop set out for Denmark, because the idea alone made his jaw hard.

When Beowulf and his troop reached the shores, they were taken to Hrothgar's high hall and given a party. The splendid hall, with wonderful time for there was plenty of pluck.

On the night of their arrival, my man Grendel tipped on in and took one of Hrothgar's trojps, who had gone for himself when the blood was served. The troop burned so loud when Grendel put the "coward hound" on him, that it was finally registered with Beowulf that something had happened that wasn't too cool. Beowulf broke right dead outside and caught Grendel in his act. Bananised, Beowulf knocked Grendel off his feet. He started to pull an eye out

But settled for Grendel's right arm instead.

Beowulf took Grendel's arm back to the party and hung it on the ceiling. Grendel, after he was cool, ran to his pad and told his mother that he had been misunderstand.

I guess you know that Mrs. Grendel was in for that action at all. She was frenziedly upset. With Beowulf's words, she held out her son to check himself and lay dead, that she would not take the next trip.

Surely enough, Grendel's mother came to the hall on the following night. To find Grendel's arm, and Grendel's right hand man. While she was crying care of business, Beowulf and the fellows were getting

The next morning, Beowulf heard what had happened. He decided that the Grendels went for had and that he would put a stop to that action at all. And he did, he publicly announced that he was going to the waters to do Grendel and his mother in.

Everybody was there, when Beowulf, with a sword, jumped into the marsh. He was bashed by many monsters who went for bad on his thrall, but he held on to his mother. He destroyed everything in his path. He reached the lays where he found his opponent. Beowulf side-stopped Grendel and stabbed his mother. Man really had her horns out because the fight lasted a few shakes.

Finally Beowulf put the "bear hug" on her and she kicked the bucket. Meanwhile Grendel had stopped digging slides and started chopping poles. Grendel was beheaded by my boy, the hero.

Another party was thrown by the King of Hrothgar in honor of Beowulf. After drinking enough comming to get that burn, Beowulf and his troops set out for their home country. The men of the Geats were so carried away behind Beowulf's act in Hrothgar, that they do not want to hear it in their own country.

Last much later in the land of the Geats there was a very rich dragon, who resided under a tree where his treasure and all his fortunes. Along came one of Beowulf's troops, who decided that he must have a gold collar to take to his girl. The troop lay dead until the monster, woke, and found the dragon of the gold collar and burned it. When the dragon awakened, he ran an inventory and found that not a thing was left. He blew his cool and went into an act of Grendel.

Wiglaf went for Beowulf, which he proved through his muscular arms against the stoutest dragon. Beowulf made a wrong move and the dragon took his chops into Beowulf's side. Finally, Wiglaf caught the dragon napping and attacked him viciously with his sword. Beowulf followed through with the backdrop-kicking blow.

Weak, from the loss of blood, Beowulf's lights were slowly being turned out. His last was to give Wiglaf, his main man, a King's collar of gold.

The chicken troop came out trooping hiding and cremated Beowulf's body. From the dragon's lair, they took the treasure and burned it in the great mound built over Beowulf's ashes.

For days the people of the Geats' country mourned the passing of their heroic King.

Let the man who does not wish to be idle fall in love.

Ovid: Amoris

KAMPUS BEAT

DEE'S DELIGHT: Hats should be tipped to the cheerleaders for providing school spirit during the basketball season. That job was well done even if it did wait until the end of the basketball season. It was very surprising to find the meaning of female names, especially for oppheads. Here is how a few shape:

The name Hulda means a weasel while Leila is dark as night. Now suppose your name is Vivian, which means a person of love and remembrance, or even Vivian who is full of life. . .

On the other hand, Hilda is a battle maid and further still, Matilda is a mighty battle maid. Other meanings include Celeste meaning heavenly; Flora; Flowers; Deborah. . . A bee; Delores . . . Sorrows. . .

If you don't know your name is written as a noun, it is a noun.

The matches will be held at the Beowulf Range in Campbell Hall.

Organizational News

By Ernest L. Johnston, Jr.

Campus organizations are in the midst of the pushing the snow and ice aside for a very colorful schedule of events. The schedule includes a variety of activities, such as the upcoming basketball season and the annual banquet on February 10. For those interested in participating, there are many opportunities to become involved and contribute to the success of these events.

Morrison Hall Gets New Look

By Gladys Morris

The hammering of hammers and the scraping of paint by the carpenters of Morrison Hall was heard by all those near the building. The hall was undergoing a major renovation that included new benches for sitting on campus, paved parking facilities, stone walkways, and more privacy for residents on the first floor. The renovation also included bathrooms in keeping with the standards of today's living. The hall was decorated with a light blue dining room, a living room of the same color, and a foyer. The windows were decorated with white satin drapes and the room was furnished with a white satin and black lamp set. The hall was decorated with a white satin and black lamp set. To help present you in the most striking attire for the Sweetheart's Ball, we present our Colorful combination: green plaid dinner jacket with matching tie.
Vansynt Hall Sponsors Pre-Valentine Tea

In what is termed monthly activities for Vansynt Hall, the residence hall will serve strawberry punch for their guests on Sunday for their guests. The party which consisted of 70 people, 11 were present.

EVENTS EXPECTED

For a residence hall entwined with the dormitories, the event was enjoyed by the members. It was a social function that provided an opportunity for persons attending to get acquainted and exchange conversations.

Aggies Lose 12 Point Lead

Bounces Back to Win 68-67

A 12 point lead went down the drain in the second minutes of the game as the Aggies had a lead of 31-34 with 2:34 left in the game. The Aggies were ahead 39-34 with 1:30 left on the clock.

With Aggies leading 68-67, Xavier. turned the table with a 10 point lead in the last 3:10 of the game. The Aggies were ahead 39-34 with 1:30 left on the clock.

At the beginning of the season, it was observed that this year's edition of the A&T College basketball team was lacking one important thing—a playmaker. It was obvious that this year's corps of freshmen was one, the best since Joe (Hall) and company were recruited in 1960, who gave A&T hopes for the title bid despite the fact that the team was in a rebuilding season. Of course the graduation of Dean Attles, now a member of the Philadelphia Warriors' pro basketball team, was a tremendous loss. The 6'1" sophomore quarterback the team's big question mark, the best since the fact that this is a rebuilding year was obvious that this year's corps of freshmen and experienced men was a resounding ability and high scoring potential, but lacked the all important playmaker. The big question was who was going to end up the plays and quarterback the team? At the beginning of the season this seemed to be a very hard problem. In recent games, Hugh Evans has improved at a tremendous pace. The 6'2" sophomore guard from Columbus, N. Y., has gained confidence in himself in handling the ball and setting up his offensive plays. With the aid of coaches guiding and setting up the plays, the Aggies offensive pattern has become more effective. Evans has also come through with some clutch baskets in several key situations. He has gained control of the ball six times by pressure opposing his defensive turf. For a possible chance of winning the conference championship, the Aggies will probably have to win all of their remaining games. That's where Evans and Edwards will play a big role in keeping the team together to avoid blowing up under pressure. Both have tremendous speed and quick hands which are important assets to a good play ball player. For example, here on the home court where he missed only two at a stretch, Evans had a career high. In the last nine games, the opposing teams have outscored the Aggies in the second half and loses the ball frequently in clumsy moves. Evans has hiked his scoring average to make up for some of the shots called by the slump of some of the Aggies' big guns. He is currently averaging 14 points per game. He has scored 68 of 113 shots for a .598 shooting percentage (highest on the team.) If he continues to improve at his present pace, he may give the Aggies just the spark they need on the stretch drive to overtake the keep leading TC Rama. Another man who has been doing a creditable job in Donald "Ruck" Edwards. With his basketball, "know-how", experience, and skill, Edwards is one of the most valuable men in situations, in which A&T is leading by a slim margin in the fading seconds of the game. His take-chance ability enables him to settle the team down to a deliberate style offensive pattern which has been successful in drawing heroic feats from the opponents. Edwards is also an outstanding half-backing defense man. He has gained control of the ball six times by pressure opposing his defensive turf. For a possible chance of winning the conference championship, the Aggies will probably have to win all of their remaining games. That's where Evans and Edwards will play a big role in keeping the team together to avoid blowing up under pressure. Both have tremendous speed and quick hands which are important assets to a good play ball player. Hugh Evans was top scorer of the evening with 19 points. He hit 73% of his shots from the floor as he sank 11 of 14 field goal attempts. Jerry Powell scored 15 points, seven of them from the free throw line where he missed only two attempts for a 77.7% free throw percentage. Herb Gray had 11 points as did James Jackson who hit all five shots from the floor. Gray had 13 rebounds; Wyler Briggs had 11; and Hank Marshall, 11 as the Aggies controlled the backboards, collected 48 against the Bears. Aggies hit 27 of 71 field goal attempts for a 38% shooting percentage while the Bears hit only 15 of 54 for 27.8 percent. A&T got 25 rebounds to 31 for Shaw. Evans, Powell, and Marshall each had five assists during the game.

Second-Half Slump Plagues Aggie Cagers

In the last nine games the second half of a ball game has been disastrous for the A&T Aggies. Two of the three defeats thus far this season have been as a result of second-half slumps. On other occasions, what seemed to be an easy win turned into a ball game. This seemed to be a very hard problem. In recent games, Hugh Evans has improved at a tremendous pace. The 6'2" sophomore guard from Columbus, N. Y., has gained confidence in himself in handling the ball and setting up his offensive plays. With the aid of coaches guiding and setting up the plays, the Aggies' offensive pattern has become more effective. Evans has also come through with some clutch baskets in several key situations.
