Four Students Present Papers At Institute

Four A&T students are presenting papers on "Explosorite Biochemicals" at the annual meeting of the American Institute of Science, held at West Virginia State College today. The participating students were Harry Brick, Thomas Carpenter, William A. Wills, and Yvonne Bell. Wills, a senior chemistry major from Bedford, Virginia, said, "I studied the effects of sonic vibrations on the therapeutic value of rat bone marrow and heterologous spleen homogenates." Carpenter, a junior biology major from Virginia, Georgia, said, "A study of changes in erythrocyte activity of normal, irradiated, and heterogeneous spleen homogenates during initial isolation." Wills is the senior member of the group, because of his previous experiences and participation.

Senior Wins Top Honors In Contest

Senior Wills won the Speechmaking contest under the supervision of Dr. George C. Royal, Jr., professor of bacteriology, and Dr. Gladys W. Royal, professor of chemistry, associate director for the A&T College of Agriculture, and supervisor of URF Research.

Cost At College Will Not Change For Next Year

In a recent interview with Mr. L. A. Waas, the college registrar, it was disclosed that there will not be any changes in the total student fees for the 1963-1964 school year. It was also disclosed that students who moved off of campus at the end of last quarter in order to spend spring quarter "in the city" will be charged an additional forty dollars. This forty dollar increase comes as a result of students changing their room and board status.

These students who moved off campus must pay the fees which are regularly charged during the spring quarter, because those students living off campus have paid their fees already. These fees are not charged to students who live on campus; consequently, those who moved off campus must pay these fees in order to become legitimate spring quarter students.

Further conversation with the registrar brought out the fact that although the total student fees for next year will remain the same as this year, the rate of meals on a per meal basis will probably go up next year. In explaining this, the registrar pointed out that the change in the number of vacation days and the reduction of the number of days spent on campus are responsible for this.

FOOD FOR YEAR COSTS $327.

It was pointed out that the decline in food costs has found that she can feed one student for $327.00 per year. After the Food Board factored in previous years' spread of over a hundred dollars each year in food costs, it was decided that the per meal cost will be spread over fewer, therefore, the cost per meal in the cafeteria will be increased.

When asked about the laundry services, Mr. Wills said that the present laundry facilities we have are not equipped to operate as efficient.

Washington, D. C. He was deliver­ ing the keynote address at the Professional Opportunities Conference here last week.

The urgent need for students to enter professional fields in the physical sciences, especially in astronomy, was pointed out at the annual North Carolina Senatorial Jour­ ney Symposium last week.

The speaker was Leon M. Wal­ ter, director of the American Oc­ cupations, Veterans Administration, Washington, D. C. He was deliver­ ing the keynote address at the Professional Opportunities Conference here last week.

The two-day meet had in attend­ ance representatives of several general agencies, placement officers from more than 80 colleges and approximately 120 of their students.

"The present administration," Waller said, "has recognized the importance of the situation and through Executive Order 10620 has set the record straight on what our nation stands for in its support of the African American.

He told the group that the Kennedy administration has made an unpre­ cedented break with all prior pro­ grammes and the area of equal employment.

Waller told the group that four revolutions underway throughout the world today make necessary a new way of thinking. He listed these as: (1) a scientific revolution, which has made America a min­ d power and has already given rise to new and rapidly growing industries; (2) a technical revolution, which has resulted in a vast increase of the world's productive capacity and which has made the United States the world's greatest industrial power; (3) a revolution in economics, which has made the United States a min­ d power and has already given rise to new and rapidly growing industries; and (4) a revolution in philosophy, which has made the United States a min­ d power and has already given rise to new and rapidly growing industries.

"The present administration," Waller said, "has recognized the importance of the situation and through Executive Order 10620 has set the record straight on what our nation stands for in its support of the African American.

Aggies Express Views On Issues Of The Day

By DONALD A. MORGAN

1. Do you think boxing should be banned?

2. What are your views on the removal of the Wightman Cup?

3. How do you feel about the proposal to move the Wightman Cup to another location?

4. Should the Wightman Cup be discontinued altogether?

5. What is your opinion on the use of boxing as a physical education activity?

6. Do you think boxing should be included in the college curriculum?

7. What are your thoughts on the recent boxing incidents and their impact on college athletes?

8. Should college athletes be allowed to participate in boxing competitions?

9. What are your views on the safety measures in place for college boxing?

10. Do you believe that college boxing should be more regulated or less regulated?

Answers To Did You Know

1. The Wightman Cup.

2. Three years 1895-1898.

3. The cardinals (adopted in 1943).

4. In Nepal, very near the Tibet Frontier.

5. Indices plural of Index: References to list, file, or table usually arranged alphabetically for reference to topics, objects, etc.

6. $3.00 equal 180 cents.

7. Maria Scicolone (Sophia Loren's sister) was married to the son of Benito Mussolini.

8. The Whale.

9. This was maximum feet and weight.

Encampment Offers "Workshop In Democracy"

A unique summer experience for college students, 18 to 23, is offered by the 17th annual Encampment for Citizenship — a six-week "workshop in democracy" — to be held in New York, California and Puerto Rico from 1 July to 17 August, 1962.

Conceived on the campus of the University of California in Berkeley, the Pathfinder School in New York City, and at Camp Encamp in Puerto Rico, the Encampment provides an opportunity for students to live, study and play with alert young people from around the world, as well as those from all sections of the United States — representing diverse racial, religious, ethnic, and economic backgrounds.

Major areas of study include government, civil rights and civil liberties, international affairs, economics and community college education.

Field trips to government offices, industry and government organizations located in New York City, San Francisco and San Juan supplement the lectures.

A varied research program makes use of the rich cultural and recreational resources of these areas, and on-campus activities include all major college sports, music, dance, swimming, travel, etc. A recreation number of colleges and universities grant academic credit for attendance at the Encampment.

For information and application blanks, write to the Director of Admissions, Summer Quarter, A&T College, Greensboro, North Carolina, 27402.

Four Quarter Academic Year To Begin Here

June 8, 1962 will mark the inauguration of the four-quarter system at A&T College. The session will be one week of summer sessions and special adjustment from high school to college program will be offered.

Four quarter offerings will permit the student to receive credit for a full quarter. A student will be permitted to take a maximum of 15-quarter hours.

Earned credits will be applicable at A&T College and at other colleges and universities.

A recreational program will be provided along with the educational program.

Application blanks and further information can be secured from the Director of Admissions, Greensboro, North Carolina, 27402.

Salem refreshes your taste — "air-softens" every puff

Take a puff...its Springtime! A refreshing discovery is yours every time you smoke a Salem cigarette...for Salem refreshes your taste just as Springtime refreshes you. Most refreshing, most flavorful, too...that's Salem!

- menthol fresh...
- rich tobacco taste...
-modern filter too
Easter

By MOSES KAMARA

Spring is here and with it have come the warmth of the sun, the melodious chanting of the birds, the color and fragrance of the blossoms, the gaiety of the verdure, and the increase in man's outdoor activities. But of all the memorable happenings in spring the most important, especially to Christians, is Easter.

During the month of April Christians all over the world will once more be celebrating Easter, in commemoration of Christ's resurrection after He had sacrificed His life for the sins of the world. The celebration of Easter is thought of the events preceding Christ's resurrection — His Passion.

All over the world revivals are being held in churches and other meeting places all through this month. Ministers are again reminding their congregations of the price paid by Christ for our sins and all the precious blood for this sinful world. His was truly a vicarious death.

However, with all the revivals services, one sometimes wonders how much Christians, in general, are doing to practice the principles of LOVE. Christians are even now re-enacting the Crucifixion! What has happened to our student government? Are we going to stand by while only one person runs unopposed for the most important position on campus or could it be that this person is the only one qualified for the unanimous choice of the students of A&T College?

In past years, the student body elections have been dominated by certain fraternities and sororities and this paper has criticized this, but we notice that this year none of the above groups even bothered to enter a group. We wonder if these organizations decided to give someone else a chance or if they didn't have anyone qualified to run?

In analyzing the reasons why only one person is running for the student body presidency, or why many students are running for the second most important position ("Miss A&T"), we wonder if these positions have been given enough prestige by their holders and their fellow students? — Has there been any real interest or desire to hold these offices not been adequately rewarded by the student body and the college? If this is the case, then who fell down on the job? But, then maybe it is not a matter of someone's having fallen down on the job. It could be that the people who attain these positions are the only ones with the grade point average, with the best record, and we all realize by the students of the College that this person is the only one qualified for the unanimous choice of the students at A&T College?

Governor Terry Sanford Greets NFA Members

Governor Terry Sanford of North Carolina recently extended greetings to the North Carolina Association of New Farmers of America at a special conference conducted in his office.

Officers of the State Association visited the Governor to inform him of the upcoming observation of NFA Week.

Alexander Dawson, Belhaven, a student at A&T College and state president of the organization, was chief spokesman for the group.

He told Governor Sanford that the national NFA had a membership of more than 54,000 in 32 southern states of which more than 9,000 live in North Carolina. North Carolina youth, during the past year, have participated in more than 10,000 productive projects and more than $50,000 have been raised to help plan improvements for the remaining portion of the quarter.

Former Aggie Becomes Head Of School

A recent graduate of A&T College has been formally installed as superintendent of the Agricultural Education System of Washington, D.C. The theme for the convention was "Fraternities for the Greeks."

The group held a dinner April 7 at the Chi Omega Club.

Pan Hellenic Council

At its last meeting, the Pan Hellenic Council discussed plans for the annual Greek picnic, which will be held at the spring. These include Honor’s Cotillion, one of the year’s most gala events.

Foreign Students

The council also discussed plans for its annual Greek picnic. May 12. This affair realizes a lot of excitement and is eagerly looked forward to.

Kappa Alpha Psi

Among the most significant functions of the Pan Hellenic Council was the holding of a successful sale of Kappa Alpha Psi fraternity. This sale was conducted by the various Greek social fraternities. The Kappa Alpha Psi Fraternity got this sale started and it was successful in raising a considerable sum of money.

OMEGAS AND ALPHAS

The other Greeks are also completing plans to help make this social calendar one of the most successful. The Omegas are all ready for their Mardi Gras to be held May 4, and the Alphas are in the process of completing plans for their Black and White Ball to be held May 26.

Deltia Sigma Theta

Abbie McMurtrie of the Delta Sigma Theta Sorority recently sponsored a vesper service in Harrisburg Auditorium. Mrs. Geraldine Taylor, chairman of the Department of English at Lincoln Junior High School, was the speaker for the occasion.

Mr. Tobin used as his subject "The Bible and the Modern Scientist." His comparison and contrast outlined the steps in the success of a modern youth.

Other persons appearing on the program included: Sylvia Davis, Philadelphia, president; Brenda Bearscloth, Winston-Salem, secretary; and Thomasine Castor, Greensboro, vice-president, all officers of the sponsoring group.

Music for the occasion was furnished by the Chi Omega Choir of the West Market Street Methodist Church with Mr. Thomas Michlin as directer.

OFF-CAMPUS STUDENTS

The Off-Campus Students also have a picnic planned as a part of their program for the spring. In addition to the social aspect, the Off-Campus Students’ Organizations also plan to do its share to improve "on-campus" life. The group will decorate the bulletin board in the library lounge.

FOREIGN STUDENTS

Members of the Foreign Students Association have made plans to hold their annual picnic May 12, at the Battle Ground Park, in addition to guest from A&T, invitations have been sent to Bennett College, Greensboro College, Woman’s College, and Guilford College. The association had Jack Russell, president of the Student Government, and Rex Fortune, president of the Federation of Campus Organizations, as guest speakers at their recent meeting. Two discussions of interest included the foreign students. It was suggested that senior be popularized at the college.

AGRICULTURAL ASSOCIATION

At a meeting of the Agricultural Association, the members decided to purchase sweaters for the association. The colors gold and black were chosen, with the head of a bull-dog in the front and the name of the association on the back. The association also decided to have a party the first week after the Easter vacation. To end the meeting, Moses Kanara showed color slides on Paris, France.

ANGEL FLIGHT

On April 13, 1962 the following officers were inducted into the Christ- lerion Club at the Angel Flight, Isabelle Stewart, Marie Tribble, Mary Young, Natalie Chow, Brenda Moore, Mary Staton, Dorothy Shank, and Evelyn H. Mor- ring.

The officers elected in the pledge club are Natalie Chow, president, Mary Young, secretary, and Evon MCCullough, reporter.

The Choristers are now in the process of selecting their major project for the remaining portion of the quarter.

It’s your tapered shape and your hoppin’look that get me…

Nothing’s really suggesting romance will be yours if you wear U.S. Keds. But it is true that Keds are the best-fitting, the most comfortable, good-looking and long-wearing fabric casuals you can buy. Because Keds are made with costlier fabrics. With an exclusive shockproofed arch cushion and cushioned innersole.

He has your ears, Bernie.

Opportunities

(Continued from Page 2) we must use every effort at our command to stimulate and promote the growth of our free enterprise world, which at best will be a long twilight, competition between Freedom and Communist tyranny, the out-produced will be eliminated.

He concluded that the United States can no longer afford the luxury of denial of opportunity to a single American.

Another speaker, James R. Bland, professor of Washington and Lee University, said that the importance of the contributions of the United States to international relations can be measured by the influence that the country has on the world community.

Syposium

(Continued from Page 2) attended at science fairs and social events. Thirty-three of their thirty-five instructors from throughout North Carolina participated in the event sponsored by the North Carolina Institute of Science, Raleigh; the U. S. Army Research Office, Durham; and A&T College, with programming assistance from the North Carolina State Department of Public Instruction, Raleigh.

The symposium was operated under the supervision of Dr. Robert B. Beale, A&T director of institutional research.

Beauty Of Spring

By EDNA M. BLANCHARD

The most beautiful season of the year is spring. It captivates a powerful magic which casts a spell of never-ending joy. Spring is beautiful because it brings with it amazing changes. The changes are like fabulous jewels symbolizing new life, awakening, peace, happiness, and all the other mysterious wonders included in the treasure of richness we know as life.

The feeling of loving, however, is the greatest, most spectacular jewel ever to escape the clutches of the treasure. At the time when all nature seems about to succumb to the dreary gloom of a dark season, this jewel bursts forth with all the pomp, splendor, and glory of a queen. Immediately, even the most frigid creatures and characters become awakened and elevated.

All beings and things, sometimes even the resting souls, begin to enjoy happiness, peacefulness, and the feeling of love, and being loved.

Is this beautiful? Is this wonderful? IS NOT THIS SPRING?

Jazz Goes Collegiate

By CHARLES O. CARTER

Jazz, like the American Negro, is gradually taking its rightful place in American culture. Each week, each month, each year manifests new promise, new hope, new inspiration, and new vision.

On the international level, there is hunger for more State Department-sponsored tours of jazz bands to the countries with the jazz audience. The International Society for Jazz is gradually taking its rightful place in American culture. Each week, each month, each year manifests new promise, new hope, new inspiration, and new vision.

On the national level, we find jazz coming in more and more into its own in the mass media. Articles by mature jazz writers are appearing more frequently in Harper's, The New Yorker, and Saturday Review which reflect an interest in the jazz by the upper intellectual and social strata of our society. This is good.

Jazz is the most effective vehicle to present jazz music to the world. According to Henderson, there are about 6,000 high school stage bands in the United States which allow for thousands of young persons to become familiar with jazz. This is the real hope of jazz as it becomes familiar with jazz. The future of jazz is unlimited. It would not be too optimistic to expect Brodsky, Davis, or commercial jazz to receive an invitation to play at the White House. Imagine that!

4. In which country is Mt. Everest?

5. What is the difference between Indexes and Indices?

6. What is the size of a doubles tennis court?

7. During the presidency of Harry S. Truman, who was the Vice-President?

8. What is the largest living animal?

9. Which is heavier, a pound of gold or a pound of butter?

10. During the presidency of Harry S. Truman, who was the Vice-President?
LEWIE'S DELIGHT: The other day I was reading some of Benjamin Franklin's early writings. During the course of my reading, I ran across some rather shocking stuff. . . . Here is a small part of it: "Eat to please thyself but dress to please others. Keep your eyes wide open before marriage, half shut afterwards. Where there's marriage without love there will be love without marriage." This may seem a bit humorous, but there is a great deal of truth in what he is saying. . . . I can imagine many of the married couples wish that they had read this bit of humor before they "tied the knot.

BROKEN LAWS: Now I wonder where I could have been when they passed this law? I mean the one requiring students when they passed this law? I mean the one requiring students. . . .

SHUT Afterwards. Where there's marriage without love there will be love without marriage. This may seem a bit humorous, but there is a great deal of truth in what he is saying. . . . I can imagine many of the married couples wish that they had read this bit of humor before they "tied the knot.

THINGS I REMEMBER: When I didn't have to sit on the floor to see the Saturday night movies . . . When I could study in the library and the dormitory. . . . When I could walk a girls around campus without somebody's saying, "Hey, man, what are you doing with my girl?" . . . When long dresses were in style; now they are ancient. . . . When boys were socks to class.

THINGS I WOULD LIKE TO SEE ON CAMPUS: A radio and television station. . . . More cooperation among our fellow students. . . . A school body dedicated to academic pursuits. . . . A faculty, dedicated to teaching, research, and directing the students toward cultural and intellectual pursuits. . . . More cultural activities such as debating teams, choirs from other colleges, and dramatic performances from neighboring institutions. . . . More facilities for Greek organizations. . . . More scenic beauty, with the full cooperation of the student body. . . . A student union building.

LINDSAY AND LAUREL STREETS: The canteen seems to be really jumping these days with new records such as "I Found a Love," "When My Little Girl Is Smiling," "Duke of Earl," "Twisting the Night Away," "Moments to Remember," "Twisting Postman," and several others. . . . Pretty soon, some of the students who are constantly "dancing" these sounds might see a "Twisting Postman" bringing a "Lettter Full of Tunes" to their mailbox because they have over indulged in cardiology. . . . It wouldn't be too pleasing to see a student "Twisting" down to the bus station.

Looking At Africa

By MOSES R. KAMARA

"Is Africa in South America? Do some people in Africa have tails? What kinds of clothes do Africans wear? In their countries? What food do they eat?"

These are just a few of the questions which bombarded the Afri­can students, not only at A&F College, but also in other places in America. Most of the questions asked sound very silly, and sometimes they annoy and amuse the Africans.

Even though the questions seem to be childish, they clearly show the degree of ignorance among many peoples all over the world — ignorance of a very important continent.

In this and subsequent articles, Africa and the Africans will be presented with the faith that those who sincerely desire to learn about this budding continent will have something to help them.

In this first article, let us look at the physical features of Africa.

Africa is the second largest continent. It is joined to Asia by the isthmus of Suez which is 50 miles wide. The continent is 5000 miles long from its northern tip to Ras Reni Salki to the southern end and at Cape Agulhas. It is 4,900 miles wide from Cape Verde on the west to Ras Elan on the east. The mainland of Africa has an area of 11,439,000 square miles, and a 14,400 mile coastline.

Topographically, most of Africa is a plateau bordered in most places by highlands forming a bar­rier between the coast and the interior. In the north and south, the plateau is bordered by folded mountains.

CLIMATE

Africa has a variable climate. This fact is contrary to the belief held by many people that the con­tinent is a "melting pot." Africa extends approximately from latitude 55 degrees North to 35 de­grees South.

The region 5 degrees on both sides of the Equator is called the Equatorial Climatic Belt. It is warm and rainy throughout the year. The next region is the Warm Temperate belt which is located 5 degrees to 15 degrees. Here it is still warm, but the precipitation is concentrated during summer.

The Desert Climatic Belt is located from 15 degrees to 20 degrees, and it is characterized by deserts. Here the precipitation is very small.

The Mediterranean Climatic Belt extends beyond 30 degrees. In this region there are mild rainy winters and warm dry summers.

Vegetation

The vegetation of Africa is largely tropical. Nearly one-tenth is forest and brushland; about half is grassland savannas (tropical grass­land) and woodlands. Nearly half in desert vegetation, the land being too dry for crop production with­out irrigation.

Animal Life

Africa has a variety of animals. Among these large number are the following: Lion, tiger, leopard, fox, cheetah, gorilla, chimpanzee (the last two being anthropoids). There are also different kinds of birds among which are the ostrich, the vulture, and duck.

In the next article various racial groupings will be discussed.
No changes were made in the annual CIAA meeting held last week. The Conference added football and basketball. A total of 18 schools in the conference — and it will continue to use the much disputed Dickinson Rating System, to rank teams in the standings in football and basketball.

The rating systems not used in baseball because only six schools have baseball teams every year and all teams will have played the same number of games. The team with the highest percentage is claimed baseball champion.

The increase in the size of the CIAA means a problem of scheduling for the two new conference schools. It also means that the conference may never settle the problem of having all teams play the same number of games.

The number of conference games each team plays is an important factor in the standings. The number of first division foes is in a team's favor while the number of second division opponents may hurt a team's rating.

Coach Bert Piggott has been trying to fill his open date on the first conference games this season. All home games except the final home game will be played during the Easter break.

Right-hander Arnold "Moos" Davis got the call for starting mound duty against the Fayetteville club. Ace righthander James Baten got the nod against the Shaw Bears, who are expected to be the biggest threat to the Aggies this year.

The Aggies opened the season with Johnson C. Smith; however, Smith hasn't decided to accept the date. The Aggies traveled to Raleigh the following day.

Many coaches think that the percentage system could be used and each team would still be able to play those non-conference games. Mary matches think that the Dickinson Rating System is not a fair system of rating teams in the standings. It is a team that is playing the weaker clubs should be rated over him.

Well, the most any team can do is to win all the games it plays. Under the Dickinson Rating System, one does not even assure one of the championship.

The Aggie track squad has opened its season by participating in two track and field meets this season. The first of these, a tri-meet, was held at North Carolina College in Durham March 24, and the other was held at South Carolina State on April 7.

In the opening meet at Durham, the contest was more or less a scrimmage and no points were kept. Competitors in this meet were Wilson-Davis Technical College, A&T College, and North Carolina College. A&T and North Carolina College were not dominated entirely by one school, but A&T did manage to take first, second, and third places in the meet.

Robert Urguhart, Bruce Baten, and Alexander Gaines were the winners in this event. The Aggies also placed second in the mile and in the two-mile events. Coach Piggott stated that he would like to have his team represented in all three events. The Aggies came in fourth place in the 100-yard dash, and the 180-yard dash respectively for the 440-yard dash.

Who says you can't get flavor from a filter cigarette? Tareyton's got plenty—and it's a Tareyton. Then the famous Dual Filter brings out the best taste of these choice tobaccos. Try a pack of Dual Filter Tareyton — you'll see!
