## Student Leaders Receive Advice To Help College

A&T College student leaders were last week urged to help the college meet its "expectancies."

Speaking was Dr. L. C. Dowdy, acting president of the college, who delivered the keynote address at a dinner meeting, Friday, September 7, the opening session of a two-day workshop for student counselors.

Speaking from the subject, "Expectancies" in Higher Education, he told the group that A&T College, like other colleges and universities, has its own set of expectations in developing graduates for leadership and service in business, industry and the professions, and in the preparation of young people for high responsibilities in good citizenship.

He said A&T College has also high expectations of its faculty-teachers, who are expected to have the same excitement and enthusiasm for learning as the students they teach, and a group expected to keep high standards in their demands on students.

He concluded by relating that A&T College has also high expectations for its students. Dr. Dowdy said the college expects the student to have enthusiasm for learning, to become deeply involved in his own learning process, to be inquiring, in search of broader implications, to form the habit of cheerful, honest and industrious application to academic and personal responsibilities that will raise the student to a higher level, rather than expect the college to lower its level of expectancy.

The group participated in a panel discussion on Saturday "Relationships Between Student Counselors and Residence Counselors," and heard main addresses by Mr. S. Joseph Shaw, coordinator of the freshman program, and by Mrs. Ruth Gore, educational counselor with the A&T College Guidance Center.

Dr. Dowdy was introduced by Dr. Glen F. Rankin, dean of students.

Fifty-students, who had been elected to serve this academic year, attended the session.

## Two Standards Can Not Exist Says Speaker

The complete elimination of a "double standard" between education for Negro and white youth was urged at A&T College last week.

The speaker was Dr. W. C. Archie, director, North Carolina State Board of Higher Education, Raleigh. He was delivering one of the main addresses at the annual A&T College Faculty Institute.

"If we are going to lift the Negro up," he said, "we will have to give up the double standard." He told the group that it is his opinion that too often requirements expected of the underprivileged student fade into sympathy for his handicaps.

"In general," he said, "the student will do what is expected of him. If little is expected, he will always do little." He added that if more is expected, he may not do all, but will certainly do more.

Dr. Archie was one of four persons who gave main messages during the two day meet, Thursday and Friday, September 6-7.

### NEW STANDARDS

Dr. Winslow Hatch, Division of Higher Education, U. S. Office of Education, Washington, D. C., gave the keynote address. He said that while there is much talk in American schools and colleges about raising standards, not enough is being said about what standards.

(CONTINUED ON PAGE 4)

Ezell Blair, Jr., left, Greensboro, president of the A&T College Student Government; Miss Rosebud Richardson, Wilmington, "Miss A&T" for the current year; and Dr. Glen F. Rankin, dean of students at the college, were principals at the A&T Counselors' Workshop, held last week in preparation for the beginning of the new school year.

Blair, now a senior, is one of the famed A&T freshmen who triggered the nationwide student sit-in movement three years ago.

## Student Body Vice-Prexy Transfers To Temple U.

A few days ago news reached the college that the Aggie family would be losing one of its outstanding student body leaders.

A short time ago Shirley B. Dean, newly elected vice-president of the student body, notified us that she would not return to A&T College this year but would begin studying at Temple University.

Shirley, a very active member of the student body, defeated several candidates for the vice-presidency of the student body last spring.

Other officers elected during last spring's election were Ezell Blair, President of the Student body; Rosebud Richardson, Miss A&T; and Anthony Dudley, treasurer.

Ezell, an applied sociology major from Greensboro, served as president of the junior class last year and was active in many other organizations. Among those which he was most active in were the NAACP, the Alpha Phi Alpha Fraternity, and the student government.

Rosebud is also an applied sociology major. She hails from Wilmington and has also been an active student on campus. Among the organizations she has been most active in have been the fellowship council, the Student Adjustment Committee and the Alpha Kappa Alpha Sorority.

The student body treasurer, Anthony Dudley, a native of Morehead City, served as secretary of the sophomore class, and was active in the Veterans' Association, the Newman Club, and the Alpha Phi Alpha Fraternity.

Shirley Dean's closest opponent was Cary Bell from Jackson who bowed to her by seventy votes.

## \$6,404,500 Is Requested By College

Requests for improvements for A&T College in excess of six million dollars, to be spent during the next biennium, have been received by the North Carolina Advisory Budget Commission.

The requests, totaling \$6,404,500, were presented by Dr. L. C. Dowdy, acting president of the College, as the budget group made its recent visit to the campus. The group was headed by Mr. David S. Coltrane, chairman.

Included in the requests, also, are six new buildings: biology building, \$885,000; dormitory for women, \$550,000; mathematics and business building, \$700,000; student union building, \$1,040,000; dormitory for men, \$1,100,000, and health and physical education building, \$1,030,000.

Other improvements requested, include: heating plant equipment, \$120,000; campus lights, walks and roads, \$55,000; renovation to Graham Building, \$160,000; music and art equipment, \$25,000; Technical Institute equipment, \$130,000; library equipment, \$180,000; and farm and dairy additions, \$59,500.

President Dowdy told the group, "The capital improvement requests have been approached by carefully surveying the needs of the educational program and by conservatively projecting the enrollment of the institution."

He pointed out to the budget group that most of the items had previously been recommended by the North Carolina Advisory Budget Commission and the 1959 North Carolina State Legislature.

## Some Innovations For Student Body Cited By Dr. Dowdy

### Freshman Studies Program Is Introduced At College

Several innovations, with particular benefits to freshman students at A&T College, were described by Dr. L. C. Dowdy, acting president of the college, in a recent television interview.

Leading the list of developments to become effective at the college this year is the Office of Freshman Studies. Dr. Dowdy states that the new office, to be headed by Mr. S. Joseph Shaw, has for its main objectives: to assure the

entering freshman a smooth and rapid adjustment to college academic life, to provide a broad general education for the first year student preparatory to his selection of a major field of study, to provide an accelerated program of studies for high ability freshman students, based on training, test results and other qualifying factors, and to provide information and assistance to aid in the solutions of academic problems peculiar to first year college students.

### NEW APPROACH

"The new approach," Dowdy said, "will expose the new student to a broad general education, with specialized guidance, in preparation for the selection of a major field of study."

He said that the idea is a modification of the usual common freshman year, the plan under which all freshmen take essentially the same courses.

Students who demonstrate readiness rank in the high school graduating class, high performance on the scholastic aptitude test, high school achievement tests, and in the battery of tests to be administered upon arrival at the college,

(CONTINUED ON PAGE 4)

## New Program In Chemistry Is Approved

A graduate program in chemistry, offering the master of science degree, has been approved for A&T College.

Announcement of approval of the program by the North Carolina Board of Higher Education was made by the director, Dr. William C. Archie, Friday morning, September 7, at the regular fall meeting of the A&T College Trustee Board.

Dr. Archie told the board members that the proposal, presented earlier this year by the college, had been carefully examined and evaluated by several disinterested persons, who were qualified to make recommendations in the graduate chemistry field. The proposal had met their approval, and the Board of Higher Education concurred.

Dean L. C. Dowdy, acting president of the college, hailed approval of the new program as both "an opportunity and challenge to serve better and more fully the educational needs of the state."

## Reverend McCoy Delivers Sermon At First Service

Reverend Cleo McCoy, director of the chapel, delivered the message at the annual Freshman Workshop Service Sunday, September 16.

Reverend McCoy used as his theme "Four Things to Remember." Following the example of Henry Van Dyke who reduced his advice to four areas in his poem "Four Things," Reverend McCoy gave the freshmen four things to remember.

The four things that he asked to be remembered were (1) that God is responsible for life and for opportunities for life enrichment; (2) that one is not only a seeker but is also being sought while he is seeking; (3) that God and progress are on the side of the makers of destiny; and (4) that those present have now entered the circle of the makers of destinies and must examine their conscience to determine if they can afford to let this fellowship down.

Using Biblical quotations to develop his topic, Reverend McCoy advised the freshmen "If you have God-given permission to prepare yourself for life, then God has given you the ability to prepare." He further stated that "The distilled wisdom of the world is pointing at you."

Davetta Florance, soprano soloist, and Herman Thomas also appeared on the program.

MISS DIANE BELL

Miss Diane Bell, a June 1962 graduate of A&T College has been awarded a scholarship grant for graduate study.

Miss Bell, Greensboro, a cum laude graduate in applied sociology at A&T College, has accepted a scholarship offer, including an annual stipend of \$1,800, for graduate study at the Howard University, Washington, D. C., School of Social Work. She will begin study this fall.

The daughter of Dr. and Mrs. William M. Bell, Miss Bell last year served as "Miss A&T."

Dr. Bell is chairman of the Physical Education Department and director of athletics at A&T.

## What Are You Going To Do?

Now that the rigors of registration are over; and, for most students, classes have taken on a somewhat busy atmosphere, congratulations are in order for those who are returning members of the Aggie family and also for those who are new members.

This September found many students and would be students not so fortunate as you; consequently, we must ask you — now that you are in college, What are you going to do about it? Are you going to strive to remain in college until your work is completed or are you going to leave soon because you find other things more important than your class work?

Are you going to develop yourselves to the greatest potential, or will you settle for mediocrity?

Will you be the leader or will you settle for a position as follower?

College challenges all of us and especially the freshmen who have the best chance for actually realizing their dreams, their hopes, and their ambitions.

Why, the freshman? — Well, the freshman has three years to work towards making Who's Who, becoming Miss A&T, President of the Student Government, President of the Pan Hellenic Council, Editor of the REGISTER or Editor of the AYANTEE. The challenge is presented early and the man who starts working earliest is the winner.

More important than these achievements is the fact that every freshman is beginning the most important phase of his life. Now is the time for him to choose to be a scholar, to get a full education, and to develop to his fullest capacity. He can afford to do nothing less.

Many upperclassmen started rather late to accept the challenge proffered by the college. For those who have managed to be in college, the challenge may well be found in the answer to this question — What can I do for the college?

If this seems like a strange question, one must realize that only by doing something for the college or others can he do something for himself. For example, instead of misleading the freshmen by means of ill-given advice or poor examples, upperclassmen can reexamine their own conduct and help others to avoid many pitfalls.

Freshmen who may now be somewhat timid and unsure of themselves will find that there is a great deal to be encountered during their four years of "becoming urbanly sophisticated, educated beings."

There will be disciplinary problems, social problems, study problems, and many other kinds of problems; but they will be solved.

## The Original Plan?

This year A&T College has begun a new program designed to "expose the new student to a broad general education, with specialized guidance, in preparation for the selection of a major field of study."

Such a move was not only necessary, but desirable, if the level of performance of our students is to be elevated. Furthermore, such a program can do much to prevent students from remaining here year after year without meeting the requirements for graduation.

On the other hand, the program is not for the purpose of preventing those who are ready from pursuing their majors during their freshman year.

Apparently, however, lines of communications concerning this phase of the program were broken down during the period of registration, for many students who had passed both placement tests were assigned to "Common Year" program without regard for their major fields of interest.

Among the students who will be affected most by spending a full year in the new program are those who expect to major in the sciences and those in engineering. Exceptions were made in the cases of students who plan to major in home economics and in nursing.

Whenever any change occurs, it is likely that someone or something will suffer; but there does seem to be time to reduce needless cases to a minimum.

It is hoped that immediate steps will be taken to see that all students who are now READY to take their basic courses in their major fields of interest will be permitted to do so. This would seem to be in keeping with the spirit of the new program.

## The A & T College REGISTER

Published weekly during the college year by the students of A&T College. Second-class postage paid at Greensboro, North Carolina.

Subscription rate \$5.00 per year. Address all communications and checks to THE REGISTER, A&T College, Greensboro, North Carolina. Member: Associated Collegiate Press Association, Columbia Scholastic Press Association, Intercollegiate Press.

# The Sebastian Infirmary

**EDITOR'S NOTE:** The following is the first of a series of articles to acquaint the college family with the buildings and the persons for whom they were named.

By CECIL BROWN

Our college infirmary, Sebastian Infirmary, was named for Simon Powell Sebastian, a physician surgeon, who was born in Antigua, British West Indies and who spent his early manhood there.

Dr. Sebastian graduated from the Mico Training school, St. John, Antigua, West Indies, and was later principal of the government school of British West Indies.

December 28, 1914 he married Josephine Oxford. To this union were born two sons: Walter J. and Edward Powell.

On coming to the states, Dr. Sebastian taught foreign languages here at A&T, and was secretary to the college president, Dr. James B. Dudley.

Later he enrolled at Shaw University and graduated with honors in 1912 with an M.D. degree. He was the first Negro interne at St. Augustine's Hospital in Raleigh.

After medical school, he returned to Greensboro to practice medicine. For the remainder of his life he served as college physician here and as physician surgeon in the city of Greensboro.

Among his civic deeds, Dr. Sebastian founded the L. Richardson Memorial Hospital, at East Washington Street and Benbow Road. In addition to his service on the executive committee, he was medical director of the hospital.

On May 18, 1827, he and fellow medical associates opened the Trinity Hospital.

The Greensboro News, March 17, 1935, carried the following article exhibiting Dr. Sebastian's humane interest in potential tuberculosis victims:

### MOVEMENT STARTED FOR NEGRO PATIENTS INCREASES ACCOMMODATION FOR TUBERCULOSIS VICTIMS

"Steps to foster a movement for the purpose of increasing accommodations for Negro tuberculosis patients at the Guilford County Sanatorium will be discussed at a meeting called for Monday evening at 8 o'clock in the auditorium of A&T College, according to Dr. S. P. Sebastian who will be in charge of the meeting.

According to Dr. Sebastian, Negroes are more susceptible to tuberculosis than Whites, because it is a disease to which they have not acquired immunity. Nevertheless, he says, only ten (10) beds are available for Negroes at the sanatorium. The White Race who have come in contact with the disease for centuries have developed what is known as a "fibrosis" when at-

tacked by the disease which is nature's creative process. Some Negroes, especially those that are mixed, are developing what is known as a cessation, that is, the lung turns into cheesy mass instead of a fibrous condition.

This cheesy condition is easily broken down with the result they eventually die.

This being so, it would seem that the Negro needs greater and quicker protection against the disease than Whites, but though the fact is preached all the time that Negroes are more susceptible to tuberculosis, no adequate provisions have been made to protect them, while the Whites have very elaborate and adequate protection.

"We wish to approach the subject in an intelligent way and to solicit the interest of the good White people of this county, who, perhaps have not been thinking along this subject, and we feel that when such an interest is secured, that we will get the provision."

And as a result of Dr. Sebastian's article, the beds for Negroes in the sanatorium were increased.

Dr. Sebastian received the LEWIS AWARD for his work in the diseases of the eye and ear and the Tucker Award for his study in gynecology.

Such was the magnanimous footprints of Simon Powell Sebastian on the sands of time.

## Letters To The Students

### Greetings!

Dear Aggies,

Greetings from the A&T College Student Government! The purpose of this letter is twofold: First, to commend you for making A&T your choice of college; second, to welcome your participation on several committees sponsored by our student government.

As President of the A&T College Student Government for 1962-1963, I congratulate you for making such a wise choice by selecting our college as the school to continue your quest for academic and cultural excellence. I am confident that you, just as I have, will grow to love the scholarly and cultural atmosphere which gives one a sense of belonging from the very moment he arrives on campus.

I am positive that you, as a member of our student body, will be an asset, not only to the student body, but to the college, the city of Greensboro, and the state. It is through students of your continuous calibre that our college will remain among the top institutions of learning in our state and nation.

Second, I invite you to become an active participant of the student government and any of the sixty-seven different organizations existing on our campus. As in educational organ within an educational community, student government has a commitment to help provide an environment which will be most conducive to the intellectual growth of the student body. This includes academic, cultural, athletic and social affairs, for each contributes to the forming of the student.

A factor which should not be overlooked is the valuable experiences gained by the individuals participating directly in the process. Leadership development and citizenship training are integral parts of the total purpose of student government. Therefore, it is imperative that you, as a future "Aggie," feel the student government to be of, by, and for you. Always feel that you are a part of student government.

In fact, if you wish to become a working part of the student government, please send your letter of application to: Chairman of the Personnel Committee, A&T College Student Government, Greensboro, North Carolina. Include in the letter your reason for desiring to serve on the student government, your qualifications, past experience, and special abilities or skills (such as public speaking, typing, art, operator of movie projector, tape recorder, public sound equipment, stage management, or photographer).

You will be notified at a later date when to appear before the personnel committee for an interview. I am confident that with your participation the coming school year will be the greatest in the history of our school.

Ezell A. Blair, Jr., President of the Student Government

### Best Wishes!

Dear Aggies:

I find that with mixed emotions I must tell you that you will have to re-elect a Vice-President of your student government for the school year of '62-'63. Inasmuch as I am no longer a member of the Aggie family, I may not validly hold the title and position as your Vice-President.

My best wishes are extended you and the student government for a very successful and productive year in all your political intercourses. Further, I trust that all of you will lend your sincere and earnest support to your elected officers that their resulting leadership will be supremely gratifying to all.

I have written a letter to President Blair and notified him of all the suggestions of future improvements which I received from some of you last year. In like manner, I have made known to him what my plans as Vice-President, if executed, would have been. This final contribution was made because the matters which I discussed with President Blair are both exigent and of a constructive nature.

God be with you in your most serviceable efforts.

Very sincerely,  
 Shirley B. Dean  
 Philadelphia, Pennsylvania

## News Briefs

### MYRNA SPENCER JOINS PEACE CORPS

Miss Myrna Spencer, a June, 1962 graduate of A&T College, has been accepted for training as a Peace Corps volunteer in Chile, South America. Miss Spencer reported to Puerto Rico early in July to begin training for her assignment.

Miss Spencer, a Foods and Nutrition major at the College, conducted research during the Russian atomic tests and discovered that the tests produced far less contaminated fall-out than was originally expected.

### A&T GRADUATE BECOMES FOODS SPECIALIST

A recent graduate of A&T College has been employed as a foods specialist in Oregon.

Miss Pearl Douce, Kingston, Jamaica, British West Indies, a summa cum laude graduate in home economics, was recently employed as a foods demonstrating specialist with the Fred Myers Company, Portland, Oregon. The Fred Myers Company is a firm which operates restaurants and processes foods.

Miss Douce was recently granted a fellowship for graduate study at the Oregon State University at Portland.

### '49 GRADUATE ATTAINS MANAGEMENT POSITION

Alexander Hastie has been promoted to a management position with the Defense Electronics Supply Center, Dayton, Ohio.

Hastie's new position, places him as chief of the Passive Devices Branch in the center's Engineering and Standardization Directorate.

Hastie received his BS degree in electrical Engineering from A&T College in 1949.

### GEORGE N. MILLER BECOMES CHIEF AT DEFENSE SUPPLY AGENCY

George N. Miller, a graduate at A&T College, was recently named chief of the Materials and Parts Branch in the Electro-Mechanical Division of Defense Supply Agency.

Miller, a 1949 graduate of the College, moved up to this management position after being transferred to DSA from the Armed Services Electro Standards Agency. He holds the BS degree in electrical engineering from A&T College.

# New Students Receive Weeklong Orientation

When approximately 900 new students converged on the campus last week, a full week of orientation activities had already been mapped out. This program sought to see that the new students were well oriented into the college's overall program.

To start the week, groups held discussions in the various residence halls. Using the topic "What is College," student counselors who had returned earlier to aid in orientation, served as group leaders. Freshmen were given information concerning the college and its facilities.

## OFFICERS INTRODUCED

At the first general assembly, new students were given an introduction to the administrative officers by Dr. G. F. Rankin, dean of students. Later, a panel discussion on "Living Away From Home," was presented by a group of student counselors. Wilhelmina Perry served as moderator; other panelists were Herman Thomas, Diane Echols, Bette Barr, Cary Bell, and Elijah Thorne.

## "KNOW YOUR COLLEGE"

One of the highlights of the week's activities was a speech by Dr. Warmoth T. Gibbs, president emeritus of the college. Speaking on the topic, "Know Your College," Dr. Gibbs presented some

of A&T's historical background and traditions.

After placement testing and ROTC assignment, the freshmen experienced a night with the Student Council. In a short program preceding the dance, Ezell Blair, Jr., president of the Student Council, and Rosebud Richardson, Miss A&T, introduced the Council officers and their functions to the freshman class. Walter Johnson, former student body president and now a student at Duke University School of Law, also appeared on the program.

## HOW TO STUDY

To further orientate the freshmen, an assembly was devoted to the subject of "How to Study." Films on the proper study procedures were followed by remarks by Dr. L. H. Robinson, Dr. Albert Spruill, Mrs. Katie Dorsett, Mr. Leo Williams, Mr. Robert P. Belle, Dr. Alfred Hill, and Mrs. Patricia Trice.

Another highlight of the week was a freshman banquet in Murphy Hall which was given in two sections. At the first section of the banquet Dr. Charles Hayes, chairman of the Department of Education and Psychology, was principal speaker. The second section had as its principal speaker, Mrs. Anita Rivers of the Department of Mathematics.

# ROTC Cadet Is Killed In Crash

Claude Scales, named corps commander of the Army and Air Force ROTC units at A&T College was killed in an accident last month.

It was not until school reopened that many Aggies learned that Scales was killed in Virginia in a collision between his motorcycle and another vehicle.

Scales, a quiet, but friendly and active young man, had only a few days earlier completed his ROTC summer camp training. At the completion of camp, he rated as number three in his platoon and the top A&T College cadet.

Very active in extra curricular activities, Scales was known best for his command of the nationally famous A&T College Army ROTC drill team.

Aside from being drill team commander, Cadet Lt. Colonel Scales was winner of the distinguished military student designation and the superior cadet award as a junior.

The rising senior from Stoneville, had been chosen as corps commander for the Army and Air Force ROTC units for the coming year.

At A&T Cadet Scales enjoyed membership in the Physical Education Major's Club, the Pershing Rifle Society, and the Scabbard and Blade Honor Society.

## An Unforgettable Character

# Readers Digest Features Life Of A&T Graduate

A graduate of A&T College, whose college career covered 23 summers, is the subject of a feature in the September issue of Readers Digest.

The life of Oddie Cox, deceased and former principal of the Ashe County School located deep in the Blue Ridge Mountains of North Carolina, is described in the magazine's regular feature, "The Most Unforgettable Character I've Met."

Writer of the feature, Sam Shumate, a rising senior at Appalachian State Teachers College, Boone, grateful for the influence which the late Mr. Cox had on his life, and others, describes his as, "one of the biggest and widest persons I've known."

The story related that Cox started teaching at 18, without a college degree, in a "one room mockery of a school, the type he had attended himself," and along the line of a 45 year teaching career, had been named principal.

"Mr. Oddie," as he was affectionately called by all the citizens of Ashe County, had taught at the school without any college training for 28 years. He entered A&T College as a freshman at the age of 46.

"Continuing for 23 summers," the article continues, "he had taken on one of the darndest hodgepodes of courses (87 of them in all) ever attempted by a student at

the College." In the earlier years, he had taken courses in spelling, writing, and arithmetic, and later, in subjects like geography, biology, botany, chemistry, history, and child psychology.

"You see," explained A&T's acting president, Mr. L. C. Dowdy, "Oddie Cox was always trying to learn so many things at once that none of them added up to a degree in any one field. His grades were not the best, either. He chose the subjects he knew the least about, and naturally these were the hardest for him. But Mr. Cox wasn't particularly interested in amassing credits for himself. What he was interested in was learning every thing he could so he could teach it to those children up there where he lived."

"Last summer," President Dowdy said, "we decided to give Mr. Cox his degree on the basis of what he had accomplished. He said he'd rather wait until Next June to receive his diploma formally, in cap and gown and all. He added he had some friends in the mountains he'd like to bring down to see him get it. But then, of course, there was that fire. . . ."

The fire to which he referred burned to the ground the neat home in which "Mr. Oddie" had lived. His body was found in the ashes.

The degree was mailed by the college to his family.

# NSF Awards College Grant

A&T College was awarded an institutional grant of \$5,330 by the National Science Foundation to help meet the college's needs in science.

Receipt of the grant was announced during the summer.

A&T is one of the 302 colleges and universities in the nation receiving a total of \$3,730,634, "as a means of strengthening their ability to create new scientific knowledge and to educate scientists and engineers essential to national well-being."

The statement, released by the Washington Office of the National Science Foundation, indicated that the funds are "undesignated" and may be used for any purpose to provide general and flexible support to develop and maintain sound, well-balanced programs of research, education, or related activities in the sciences.

The grants were allocated on a formula which allowed 100 per cent of the National Science Foundation basic research grant payment up to \$5,000, during the 12-month period ending March 31, 1962, plus five per cent of those payments in excess of \$5,000.

The grant to A&T was made on the basis of a proposal made by Dr. George Royal, dean of the Graduate School and program supervisor of the Undergraduate Research Participation Program in Radiation.

The Foundation is supporting, at A&T, research projects in physics and agronomy, summer institutes in biology and chemistry, an academic year institute, an in-service institute for teachers, and undergraduate research participation programs in physics and home economics, in addition to radiation.

**Salem refreshes your taste**

Dr. Winslow Hatch, left, Division of Higher Education, U. S. Office of Education, Washington, D. C., who keynoted the annual A&T College Faculty Institute, chats with Dr. Cecile H. Edwards, professor of home economics and research and chairman on arrangements for the Institute, and Mr. E. W. Waddell, Albermarle, vice chairman of the A&T College Trustee Board. The three got together following the annual Faculty Luncheon.

## Two Standards

(CONTINUED FROM PAGE 1)

"These new standards," he told the group, "must be spelled out and we must now begin to arrive at new ground rules."

In a second address, delivered at the annual faculty luncheon at Friday noon, Dr. Hatch asked the A&T faculty to "loosen up the program so that all can run and all are challenged."

He told the luncheon audience that too many colleges have tight programs, not flexible enough to allow students to develop to their fullest capacity.

A third speaker, Lt. Col. M. E. Bingham, of the Academic Instructor and Allied Officer School, The Air University, Montgomery, Ala., who spoke on, "Guided Discussion as a Teaching Method," said, "Free exchange of ideas is now, and will continue to be, an effective means of learning."

Dr. L. C. Dowdy, acting president of the college, said in the opening address on Thursday morning, "The single purpose of any college is education; its only commodity, ideas; and its only product, people. We, here at A&T, cannot retire to complacent isolationism."

### INSTITUTE FEATURES SYMPOSIUM

The Institute also features a symposium, "Modern Techniques

of Instruction," conducted by panelists: Dr. J. R. Feldmeier, associate director of research, and Mr. Lewis J. Carter, Jr., employee relations specialist, both of the Philco Corporation, Philadelphia, Pa.; Dr. Arnold Perry, dean, School of Education, University of North Carolina, Chapel Hill, and Dr. J. A. Bryant, Jr., chairman, Department of English, Woman's College at Greensboro. Moderator for the symposium was Dr. Arthur F. Jackson, director, A&T College Guidance Center. The panelists later served as consultants in area discussion sessions.

Presentations were also made by Dr. E. W. Rushton, superintendent of the Roanoke (Va.) Public Schools, the school system which has received national publicity on its success in the use of teaching machines and programmed instruction. His demonstrations were also attended by superintendents, supervisors, principals and teachers from public schools in the area.

### EXHIBIT ALSO HELD

An exhibit of modern teaching devices and other educational equipment was held in connection with the Institute.

The Institute was conducted under the supervision of a committee on arrangements headed by Dr. Cecile H. Edwards, professor of home economics and research.

## Dr. Edwards Is Named To NSF Review Panel

Dr. Gerald Edwards has been named a member of the Review Panel of the National Science Foundation, Washington, D. C., to review proposals and requests for grants from colleges and universities.

Dr. Edwards, professor and chairman of the A&T College Department of chemistry, has accepted an invitation to serve on the panel to review and make recommendations regarding proposals for National Science Foundation sponsored Summer Research Participation Programs for High School Teachers.

The new appointment marks the fifth time that Dr. Edwards has served on review panels for the NSF. During 1960-1961, he was a panelist to review proposals for support of programs in: Undergraduate Instructional Scientific Equipment, Academic Year Institutes, Summer Institutes for High School and College Teachers, and, again last year, for the Summer Research Participation Programs for High School Teachers.

Dr. Edwards is co-director, with his wife, Dr. Cecile H. Edwards, in a research project, a study of "The Utilization of Methionine by the Adult Rat" being supported by the National Institute of Health. He is also director of the A&T College Summer Institute for High School Science Teachers and of the A&T College Academic Year Institute for High School Teachers of Science, both supported by the National Science Foundation.

He was named last year, by Governor Sanford, a member of the North Carolina Atomic Energy Committee.

## The Best Sellers

### FICTION

- Ship of Fools by Katherine Anne Porter
- Dearly Beloved by Anne Morrow Lindbergh
- Youngblood Hawke by Herman Wouk
- Another Country by James Baldwin
- The Reivers by William Faulkner
- The Prize by Irving Wallace
- Uhuru by Rober Ruark
- Act of Anger by Bart Spicer
- Portrait in Brownstone by Louis Auchincloss
- The Agony and the Ecstasy by Irving Stone

### NON-FICTION

- The Rothschilds by Frederic Morton
- My Life in Court by Louis Nizer
- O Ye Jigs and Juleps! by Virginia Cary Hudson
- Travels With Charley by John Steinbeck
- The Guns of August by Barbara Tuchman
- Men and Decisions by Lewis L. Strauss
- Veeck — As in Wreck by Bill Veeck
- Sex and the Single Girl by Helen Gurley Brown
- Who's in Charge Here? by Gerald Gardner
- In the Clearing by Robert Frost

## Army Cadets Rank High At Camp

This year's senior ROTC class was able to keep the name of A&T College high on the list of achievements at this year's summer camp.

Although a great deal of practical work was demanded of the cadets, the Aggie group took it as veterans. The instruction and exercises given to them by last year's senior class probably prepared them for the hard work at summer camp and helped to give them a slight edge on their fellow cadets.

### LOOK AT RECORD

Looking over the summer camp record, one continues to see improvement in the calibre of cadets A&T College produces.

A quick glance at the records shows that out of the few thousand cadets A&T College placed four cadets in the upper third of their units. A further glance shows that not one of the cadets from A&T College was disqualified on the rifle marksmanship examination.

### FIELD DAY

In the annual field day competition, the Aggies boasted of Cadet Lloyd Smith's holding first base on the winning softball team.

Although these are only a few of the Aggie triumphs at summer camp, they indicate that the cadets from A&T College "walked hard, talked loud, and stood tall" in their efforts to show the world that A&T College is one of the best schools in the nation.

### CADETS ATTENDING

Cadets attending summer camp at Fort Bragg were Alfred Catlin, Claude Scales, Frederick Artis, Ronald Booker, James Bristow, James Davis, Theodore Foreman, David Foy, James Garrett, William Gore, Wiley Harris, and Charles Keck.

In addition were Decosta Lind say, James Malloy, Dewitt Mathis, Bobby Parker, Robert Riddick, Ernest Simmons, Vincent Spaulding, Vernell Stallings, Robert Stokes, Stevon Sutton, Carol Sykes, Clyde Taylor, and Richard Westmoreland.

Others were Berkley Tatum, Arthur Brown, Arthur Costin, Gary Goode, Ernest Harding, Leroy Hicks, David Howell, Ralph Hunt, Willie Riche, Alfred Sellars, Lloyd Smith, and Lawrence Wooten.

Based on their performances at summer camp and their records at the college, Alfred Catlin will serve as Corps Commander this year and William Gore will serve as Battalion commander.

## KAMPUS BEAT

BY MAC

**LEWIE'S DELIGHT:** School is back in full swing again this year with the usual complaints about "this and that" . . . for instance, I heard one student say that he had worked so hard this summer that he was going to take his vacation during the fall quarter. . . . another student commented that he had made out a schedule in the spring during pre-registration, but after he received his grades during the summer it was a waste of time to pre-register. . . . He flunked three of four courses he was taking.

**AT CORNER OF LINDSAY AND LAUREL STREETS:** The canteen has really been jumping the past few days. . . . there has been standing room only in the place. . . I wonder if some of these same students will be that eager to get into their fall quarter classes? . . . I doubt it. . . . It looks as if the young men are back to their old game again SPONSORING. . . . I saw one sponsor coming out of the canteen with four bags. . . . A very attractive young lady was tagging along behind him with sparkles in her eyes.

**SPOTLIGHT OF THE WEEK:** Just for fun I asked several freshmen students what they thought about the dormitory facilities, food and the college in general. . . one bright-eyed coed had this to say, "I'm really satisfied with the food and the dormitory. I always get enough to eat." . . . A husky male student said the food has good taste, but that he just can't get enough of it. . . . This same student said that his only complaint so far has been the organization of things on campus. . . . such as the procedures for procuring things. . . . In general, however, our new students seem to be very much pleased with their new surroundings. If this continues, there shouldn't be too many freshmen dropping out because of distaste for the college and its rules.

**BROKEN LAWS:** . . . . Now I wonder where I could have been when they passed this law. . . . I mean the one requiring female students to live in a dormitory that has been condemned by the cultural and moral standards of man. . . . Oh, it all comes back to me now. . . . It must have taken place while I was away attending the convention opposed to safety and welfare.

## Some Innovations

(CONTINUED FROM PAGE 1)

will be permitted to select majors during the freshman year. Others will await the completion of the first year of study.

The acting president stated that a new reading program aimed at lifting the level of achievement of those students who show reading deficiencies, is also to be conducted this year.

### FOUR-QUARTER SYSTEM

The four-quarter system, being introduced this year, will enable this year's freshman students to graduate within three-calendar years. "This," explained President Dowdy, "will permit the college to use its classrooms and

other facilities on a year-round basis to help serve a constantly increasing enrollment."

The acting president listed as the final development a substantial increase in the offerings of the Evening Classes program. The program, now in its third year, was opened for the benefit of those unable to attend classes during the day.

This year the program will be broadened to provide advanced courses for those who are progressing the Evening Classes and to day students who would prefer to take some of their subjects in the evenings.

The new freshman class began classes Monday, September 17.

Cadet Joseph McNeil climbs into an Air Force T-33 trainer for an orientation ride as a part of his summer training at Otis Air Force Base, Mass. Other Air Force ROTC cadets from A&T College also received the same kind of experience at other bases across the nation.

McNeil, a senior from Wilmington, is a member of the Air Force Reserve Officers Training Corps at the College.

# College Offers Many Worthy Organizations

By CARY P. BELL

By now most of the Freshmen are well-established in the swing of things here in Aggie land. With registration and orientation over, they are now ready to take an active part in campus affairs.

An essential part of A&T life is the many organizations which are maintained on campus. These range from the sororities and fraternities to the religious affiliated groups. Since many freshmen will eventually seek membership in these organizations and would like to keep abreast of what they are doing, this article is for the purpose of informing them of the affairs of the various groups.

## STUDENT COUNCIL

The Student Council or Student Government is one of the most important bodies on campus. Composed of a president, vice-president, and treasurer (elected by the student body) and representatives from each class, this group represents all students in its many functions. It has the important role of acting as an intermediary between the students and the administration and of presenting the students' point of view.

In addition to these functions, the Council is responsible for a large portion of campus social life. It plans and coordinates the social activities which are open to all students. Among the many affairs sponsored by the Student Council are the annual Sweethearts Ball and Klod Hop, as well as other dances, and weekly movies. It also governs student elections, conducts tutorial sessions, and supervises other matters pertaining to student life.

Last May, Ezell A. Blair, Jr., was elected by the students to head the council. Blair, nationally known as one of the leaders of the "sit-ins," is a senior majoring in social studies. Assisting him will be Cary P. Bell, acting vice-president; Anthony Dudley, treasurer; Rosebud Richardson, "Miss A&T"; and the various class representatives.

## RELIGIOUS ORGANIZATIONS

Religious activities are an important segment of any student's life. Several religious organizations are maintained for the representatives of the various denominations. Among these are the Baptist Student Union; the Canterbury Club; the Newman Club; and the Wesley Foundation.

One of the largest organizations on campus, the Baptist Student Union, constitutes an important part of the Baptist student's life. It is an important link in his spiritual and social development. Throughout the year, the BSU provides a well-rounded program of religious and social activities for its members.

The Canterbury Club is composed of Episcopalians. Its purposes are to bring together members of this faith into a common bond. The Canterburyans are a vital segment of the college community.

Composed of members of the Catholic faith, the Newman Club is also an important force in the spiritual life of the campus. Its members endeavor to develop better communication between the different denominations.

For the Methodist, the Wesley Foundation is maintained. Seeking to establish a religious home away from home, the members apply religious concepts and attitudes to their cultural, academic, and social life.

In addition to these several non-denominational organizations are also maintained. Among these are the Sunday School, the Fellowship Council, YMCA and YWCA.

## HONOR SOCIETIES

Since scholarship is the primary

reason for attending college, excellence in this area is of extreme significance. For students who excel in academic pursuits, several honor societies are maintained. Though most groups are open only to juniors and seniors who qualify, they give the Freshmen something to strive for.

## ALPHA KAPPA MU

Alpha Kappa Mu National Honor Society is perhaps the leading group of this nature on campus. Composed of juniors and seniors, this group derives its membership from all areas of academic pursuits. A 3.33 overall grade point average is a major prerequisite.

## WHO'S WHO

Another honor group whose membership come from all areas of pursuit is Who's Who in American Colleges and Universities. Membership in this group is also open to juniors and seniors. A 3.00 overall grade point average is a basic requirement.

In addition to these, there are honor societies for personnel in specific areas. Among these are Sigma Rho Sigma in the social sciences; Beta Kappa Chi in the applied sciences; Kappa Delta Pi in education; Pi Delta Pi National French Honor Society; and Pi Omega Pi, National Business Education Fraternity.

## MILITARY ORGANIZATIONS

The Reserved Officers Training Corps offers a wealth of opportunities for participation. In addition to providing military training, the program also allows its participants to develop their leadership and social potential to the best advantage.

Every Aggie is proud of the two famous drill teams. The Army ROTC's Pershing Rifles Drill Team and the Air Force ROTC's Raiders have given A&T the reputation for providing the best drillers in the nation. The Air Force unit is rated the best Air Force Drill team in the country and ranks number two among all teams. The Army unit is ranked fourth in the nation. Last year both teams created a swirl of excitement when they participated in the Cherry Blossom Festival in Washington, D. C.

## OTHER MILITARY SOCIETIES

Other military organizations are the Pershing Rifles Society, the Scabbard and Blades Society, the Arnold Air Society, The ROTC Rifle team, and the Modern Aircraft club.

Just to show that ROTC is not all drill and polished brass, the Corps annually sponsors the Military Ball. This is one of the major social attractions of the year and one of the biggest dances. Cadets then get an opportunity to demonstrate the movements of the "twist" in addition to those they have learned on the drill field.

## FRATERNITIES AND SORORITIES

The fraternities and sororities are among the most colorful groups on campus. Five national fraternities and three national sororities have chapters on campus. The fraternities include: Alpha Phi Alpha, Kappa Alpha Psi, Omega Psi Phi, Phi Beta Sigma, and Alpha Phi Omega. Sororities having chapters are Alpha Kappa Alpha, Delta Sigma Theta, and Zeta Phi Beta.

Though these groups' function on campus is primarily a social one, they still contribute to many other endeavors. They provide volunteer aid at hospitals, conduct clothing drives for needy families, help with Red Cross and other

work, and aid in many other areas.

Along the social line these groups help provide a little spice for the social atmosphere. The Alphas and AKA's Black and White Ball, the Kappa Kruiise, the Omega's and Welta's Mardi Gras, and the Zeta's and Sigma's Blue and White Revue are all swinging affairs. In addition to these the various groups also keep things spinning with dances, smokers, pajama parties, and picnics.

## GREEKS ENCOURAGE SCHOLARSHIP

Even though the Greeks love to party, they don't completely forget scholarship. A 2.50 overall grade point average is a requirement for membership in most groups. To encourage academic excellence, the Pan-Hellenic Council, a federation of all fraternities and sororities, each year provides a scholarship for the Greek with the best overall grade point average above 3.50 and who participates in at least one major extracurricular activity. Thomasine Corbett, a member of Delta Sigma Theta, and Cary P. Bell, a member of Alpha Phi Alpha, were last years recipients.

## OTHER ORGANIZATIONS

Other organizations include: the Collegiate 4-H Club, the Fortnightly club, the Richard B. Harrison Players, the Agricultural Association, the Teloca Club, the Angel Flight, the Physical Education Majors club, the Lettermen's club, the Biology club, and the American Chemical Society, and many more.

## THE REGISTER STAFF

Last, but very far from least of the organizations, is THE REGISTER staff. A good newspaper is an essential on the college campus. Composed of interested stu-

dents and a faculty adviser, THE REGISTER STAFF is responsible for giving the student body the cream of the college news.

THE REGISTER has become one of the best papers of its type imaginable. Membership is maintained in the Intercollegiate Press, the Associated Collegiate Press, and the Columbia Press Association. Last year, THE REGISTER was again awarded a first place rating.

Tommy Gaddie, editor in chief, will be making history this year. He will be the first person, in recent years, to serve as editor for two years. In addition, it will be the first time that the staff will have attempted to put out a weekly publication.

Any persons wishing to join THE REGISTER staff may communicate with the editor through Box E-25, Campus or room 169 Carver Hall.

## ANOTHER YEAR, ANOTHER DOLLAR

With today's entry I begin my ninth year of writing columns in your school newspaper for the makers of Marlboro Cigarettes.

Nine years, I believe you will agree, is a long time. In fact, it took only a little longer than nine years to dig the Suez Canal, and you know what a gigantic undertaking that was! To be sure, the work would have gone more rapidly had the shovel been invented at that time, but, as we all know, the shovel was not invented until 1946 by Walter R. Shovel of Cleveland, Ohio. Before Mr. Shovel's discovery in 1946, all digging was done with sugar tongs—a method unquestionably dainty but hardly what one would call rapid. There were, naturally, many efforts made to speed up digging before Mr. Shovel's breakthrough—notably an attempt in 1912 by the immortal Thomas Alva Edison to dig with the phonograph, but the only thing that happened was that he got his horn full of sand. This so depressed Mr. Edison that he fell into a fit of melancholy from which he did not emerge until two years later when his friend William Wordsworth, the eminent nature poet, cheered him up by imitating a duck for four and a half hours.

But I digress. For nine years, I say, I have been writing this column for the makers of Marlboro Cigarettes, and for nine years they have been paying me money. You are shocked. You think that anyone who has tasted Marlboro's unparalleled flavor, who has enjoyed Marlboro's filter, who has revelled in Marlboro's jolly red and white pack or box should be more than willing to write about Marlboro without a penny's compensation. You are wrong.

Compensation is the very foundation stone of the American Way of Life. Whether you love your work or hate it, our system absolutely requires that you be paid for it. For example, I have a friend named Rex Glebe, a veterinarian by profession, who simply adores to worm dogs. I mean you can call him up and say, "Hey, Rex, let's go bowl a few lines," or "Hey, Rex, let's go flatten some pennies on the railroad tracks," and he will always reply, "No, thanks. I better stay here in case somebody wants a dog wormed." I mean there is not one thing in the whole world you can name that Rex likes better than worming a dog. But even so, Rex always sends a bill for worming your dog because in his wisdom he knows that to do otherwise would be to rend, possibly irreparably, the fabric of democracy.

It's the same with me and Marlboro Cigarettes. I think Marlboro's flavor represents the pinnacle of the tobaccoist's art. I think Marlboro's filter represents the pinnacle of the filter-maker's art. I think Marlboro's pack and box represent the pinnacle of the packager's art. I think Marlboro is a pleasure and a treasure, and I fairly burst with pride that I have been chosen to speak for Marlboro on your campus. All the same, I want my money every week. And the makers of Marlboro understand this full well. They don't like it, but they understand it.

In the columns which follow this opening installment, I will turn the hot white light of truth on the pressing problems of campus life—the many and varied dilemmas which beset the undergraduate—burning questions like "Should Chaucer classrooms be converted to parking garages?" and "Should proctors be given a saliva test?" and "Should foreign exchange students be held for ransom?"

And in these columns, while grappling with the crises that vex campus America, I will make occasional brief mention of Marlboro Cigarettes. If I do not, the makers will not give me any money.

The makers of Marlboro will bring you this uncensored, free-style column 26 times throughout the school year. During this period it is not unlikely that Old Max will step on some toes—principally ours—but we think it's all in fun and we hope you will too.

When Godiva, that famed lady fair,  
Told her husband, "I've nothing to wear,"  
With his Swingline in hand,  
He stapled a band  
And said, "Wear this, my dear, in your hair!"

# WAAA To Air Aggie Games This Season

All A&T College football games, both home and away, will be aired this fall by Radio Station WAAA of Winston-Salem.

The arrangement is a continuation of an agreement between the A&T College Faculty Committee on Athletics and the Winston-Salem radio station, a facility of Laury Associates, incorporated.

The broadcasts are to be handled under the personal supervision of Larry Williams, sports director for the station.

Broadcast time for the games will begin 15-minutes in advance of kickoff.

Broadcasts for the home games will begin promptly at 1:15 P.M. These include Tennessee A&I State University, September 22; Norfolk Division, Virginia State College, October 6; Morgan State College, October 27; and Virginia State College, November 10.

The away broadcast will be as follows: Shaw University, September 29; 1:45 P.M.; Maryland State College, October 13; Winston-Salem Teachers College, October 20, and Florida A&M University, November 3, all at 1:45 P.M. (Standard Time), and North Carolina College, November 22, 1:15 P.M., (Standard Time).

# College Begins New Programs In Residences

In order to make dormitory life more conducive to the overall college program, student counselors are now provided in all male and female residence halls.

To pave the way for the success of the counseling program fifty student counselors reported to the campus for a workshop September 7-8.

Dr. L. C. Dowdy, acting president of the college, spoke at the opening session of the workshop. Speaking on the topic "Expectations of a College," Dr. Dowdy listed three expectations of a college — (1) what the college expects of itself; (2) what the college expects of its students; and (3) what the students expect of the college. Dr. Dowdy further asked the student counselors to strive to live, to learn, and to lead.

The second session of the workshop convened in Bluford Library's Taylor Art Gallery. Mrs. M. K. Brimage, assistant dean of women, presided.

Speaking on the subject, "Some Adjustment Problems of College Students," Mr. S. Joseph Shaw briefed the student counselors on some of the challenges with which they will have to cope. These he divided into three groups: personal, social, and academic. Mrs. Ruth Gore also spoke on the topic "The Educational Objectives of the Residence Halls."

Following an outlined program, attention was next focused on a panel discussion of "Relationships Between Student Counselors and Residence Counselors." Mrs. A. K. Simpson served as moderator. Other members of the panel were Mary Taylor, student counselor; Cary P. Bell, student counselor; Mrs. E. B. Johnson, dean of women; and Mr. Phillip Boone, assistant dean of men.

Mainsprings in the A&T College Aggies middle attack this fall will include, from left to right: Wilbur Mapp, Asheville, 240-lb. center; Willie Ferguson, Waycross, Ga., 6-2, quarterback; and Algustus Lee, Washington, D. C., 220-lb. pile-driving fullback.

All three will see action against Tennessee A&I State University in the opener at Greensboro on Saturday, September 22, at 1:30 P.M.

## Athletic Trainer Returns To College

The former athletic trainer at A&T College was re-employed at the College recently.

Hornsby Howell, who served the post from 1953 through June, 1961, and resigned to take a similar position at Southern University, Baton Rouge, La., returned to work here shortly before training began for the current football season.

Howell, one of the all-time great centers at A&T, graduated from the College in 1950. He has since continued training at the Chicago College of Swedish Massage.

## Football Schedule

### HOME

- Sept. 22 Tennessee State U.
  - Oct. 6 Norfolk Division, Va. State
  - Oct. 27 Morgan State College (HOMECOMING)
  - Nov. 10 Virginia State College
- All home games at Memorial Stadium beginning at 1:30 P.M.

### AWAY

- Sept. 15 Quantico Marines
- Sept. 29 Shaw University
- Oct. 13 Maryland State College
- Oct. 20 Winston-Salem Teachers
- Nov. 3 Florida A&M University
- Nov. 22 North Carolina College

## In Aerial Battle

# Aggie Eleven Bow To Quantico 28-12

In what will probably be noted as one of the greatest aerial battles of the year, the A&T College Aggies bowed to the Quantico Marines by a score of 28-12 last Saturday in Quantico, Va.

Paul Teheres, a Little All-American quarterback from Bucknell, passed for three touchdowns to lead the Marines to the victory over the Aggie eleven.

The contest, the first of the season for the Aggies found the Aggies leading and enjoying their proudest moments in the second quarter when, for a short time, they had a 12-7 lead over the Marines.

It was during the second quarter also, that the Aggies enjoyed all of their glory, for during this time they were able to amass two touchdowns.

Quantico struck first in the second quarter when Teheres fired to end Bill Bartles on a five yard TD pass.

The Aggies bounced back on the first play following the kickoff. Quarterback Willie Ferguson connected with halfback Dick Westmoreland on a 65-yard pass play.

A few minutes later, with quarterback Ferguson spotting Ronald Hart, the A&T eleven picked up another touchdown on a forty-yard

play; but it was Ronald Francis who tallied the touchdown. Francis caught a six yard pitch from Cornell Gordon.

Then came Quantico's touchdowns for a 14-12 lead at halftime, with Teheres tossing to halfback John Prichard on a 50-yard pass play.

Quantico scored in each of the last two quarters. Teheres hit end Ray Ratkowski, former Notre Dame player, on a 43-yard touchdown pass. Then end George Zadjeika completed the scoring, taking a 32-yard strike from Tom Singleton, All-Ivy Leaguer from Yale. Howard Ferguson, who did an outstanding defensive job at guard for A&T, was hurt late in the second half and was taken out.

### HOW IT HAPPENED

A&T		Quantico
13	First Downs	10
87	Rushing Yardage	60
208	Passing Yardage	225
11-31	Passes (att-comp)	12-23
1	Passes Int. by	1
5-36.4	Punts-Average	6-26.0
1	Fumbles Lost	1
50	Yards Penalized	70

### SCORING SUMMARY

A&T	0	12	0	0-12
Quantico	0	14	7	7-28

Hungry for flavor? Tareyton's got it!

Flavor you never thought you'd get from any filter cigarette!

If you're hungry for flavor, Tareyton's got plenty—and it's plenty good! Quality tobaccos at their peak go into Tareyton. Then the famous Dual Filter brings out the best taste of these choice tobaccos. Try a pack of Dual Filter Tareytions—you'll see!

Dual Filter makes the difference
