Some Innovations For Student Body Cited By Dr. Dowdy

Freshman Studies Program Is Introduced At College

Several innovations, with particular benefits to freshmen students at A&T College, were described by Dr. L. C. Dowdy, acting president of the college, in a recent television interview.

Lending the list of developments to become effective at the college this year is the OFFICE OF PERSONNEL. Dr. Dowdy states that the new office, to be headed by Mr. S. Joseph Shaw, has for its main objectives: to assure the entry of college students, in a timely manner, and rapid adjustment to college academic life; to provide a broad general education for the first year, students, and not a system of plugging in a major field of study, to provide for present types of studies for high ability freshman students, based on testing, test results and other qualifying factors, and to make the information and assistance to aid in the resolution of academic problems possible.

New Program In Chemistry Is Approved

A graduate program in chemistry, offering the master of science degree to men, was approved by the A&T College Board of Trustees this month.

The complete elimination of a double standard was urged at A&T College last week.

The complete elimination of a double standard was urged at A&T College last week.

Student Leaders Receive Advice To Help College

A&T College student leaders were last week urged to help the college meet the demands of higher education.

Speaking was Dr. L. C. Dowdy, acting president of the college, who delivered the keynote address in developing graduates for higher education, has its own set of expectations, like other colleges and universities, has its own set of expectancies in Higher Education, its own level of expectancy.

A&T College has also high expectations of its students, Dr. Dowdy said the college expects the student to have enthusiasm for learning, to be interested in the learning process, to be inquisitive, to have a questioning attitude, to form the habit of checking, to do their own thinking, to make reflection on academic and personal relationships, to a student to a higher level, rather than expect the college to lower its level of expectancy.

The program will be presented as a panel discussion on Saturday, the Relationship Between Student Council, the A&T College Student Government, and board main addresses by Mr. S. Joseph Shaw, coordinator of freshmen program, and by Mrs. Barbara Shipley, director of the A&T College Guidance Counseling Center.

Dr. Dowdy was introduced by Dr. Martha Baker, dean of students.

Fifty-six students, who had been elected to serve this academic year, attended the session.

Two Standards Can Not Exist Says Speaker

The complete elimination of a double standard between education for the white and white students was urged at A&T College last week.

The speaker was Dr. W. C. Archer, president of the North Carolina State Board of Higher Education, Raleigh. He was delivering one of the three major addresses during the A&T College Faculty Institute.

"If you elect to call it a "double standard," he said, "we will have to give up the concept that there is any real standard of excellence available to the underprivileged student outside the classroom for his groundwork," he added. "In general," he said, "the student is held up as a standard of him. If little is expected, he will do little. If more is expected, he may do more. It is a certainty that there is no double standard.

Dr. Archer was introduced by four persons who gave main messages during the institute, Sunday, Monday, Tuesday and Friday, September 6.

Mr. Wise, Slawson, Division of Higher Education, Raleigh, who will be President Dowdy's assistant in charge of the student body, said that the student body would be remembered were (1) that God is responsible for life, and for success in life, (2) that God is responsible for life, and for success in life, (3) that God is responsible for life, and for success in life, (4) that God is responsible for life, and for success in life.

The four things that he asked to be remembered were (1) that God is responsible for life, and for success in life, that God is responsible for life, and for success in life, that God is responsible for life, and for success in life, that God is responsible for life, and for success in life.

MISS DIANE BELL

Miss Diana Bell, a June 1962 graduate of A&T College has been awarded a scholarship grant for graduate study.

Miss Bell, Greensboro, a cum laude graduate of A&T College, has been accepted a scholarship grant for graduate study at the Howard University, Washington, D. C. School of Social Work. She will begin study this fall.

The daughter of Dr. and Mrs. Roydell Bell, Miss Bell has just completed four years at A&T College.

Dr. Bell is chairman of the Physical Education Department and director of athletics at A&T College.
Among his civic deeds, Dr. Sebastian founded the L. Richard Moore Memorial Hospital, at East Washington Street and Robinson Road. In addition to his service on the executive committee, he was medical director of the hospital.

Dr. Sebastian graduated from A&T's Medical College, which operates hospitals in Greensboro and Washington, where he was named for Simon Powel Sebastian on Washington Street and Benbow Street.

Dear Aggies:

I find that with mixed emotions I must tell you that you will have to start working on your student government for the school year of 1962-'63. As I have no longer a member of the Aggie family. I may not have had all the knowledge and skills to give you, just as I have, to grow to a better individual in the atmosphere which gives one a sense of belonging from the very start of the school year.

I am positive that you, as a student of the A&T College, will be an asset, not only to the student government, but also to the people of Greensboro, and the state. It is my hope that you, as students of this institution, will continue to excel in all that you do during the period of registration, for the purpose of increasing accommodation for Negroes at the sanatorium. Inasmuch as I am not present in person, I would like to express my best wishes to you, just as I have, to grow to a better individual in the atmosphere which gives one a sense of belonging from the very start of the school year.

I hope that immediately upon completion of your last year in high school, you will be ready to pursue your majors during their freshman year.

Among the students who will be affected most by spending a full year in the program are those who expect to major in science and those in engineering. Engineering will be offered in the cases of students who plan to major in home economics and in nursing.

However, since many courses are offered, it is likely that someone or something will suffer; but there does seem to be time to reduce needless cases to a minimum.

The program of studies will be taken to see that all students who are now READY to take their basic courses in their major fields of interest will be permitted to do so. This would seem to be in keeping with the spirit of the new program.

The Sebastian Infirmary

EDITOR'S NOTE: The following is the first of a series of articles to acquaint the college family with the various phases of the hospital to whom they were named.

By CECIL BROWN

Dr. George Sebastian, who passed away in December, 1964, was the first President of A&T's Medical College. He was a native of the state of Georgia and graduated from Emory University School of Medicine in 1927.

Dr. Sebastian was a pioneer in the field of tuberculosis control, and his work in this area earned him national recognition. He was a member of the American Thoracic Society and served as its president from 1943 to 1945.

Dr. Sebastian's contributions to medical education and service were recognized by many honors and awards. He received the ALVA ALLEN MEAD MEDAL FROM THE AMERICAN THORAX SOCIETY in 1951, and the EUGENE A. BLEST MEDAL FROM THE SOCIETY IN 1957.

Dr. Sebastian was also a dedicated Christian and a devoted family man. He is survived by his wife, Dr. Margaret C. Sebastian, and their two children, Dr. Elizabeth Sebastian and Dr. David Sebastian.

The Sebastian Infirmary was opened in 1966 and is located on the campus of A&T College. It is a 100-bed facility that serves as a training center for medical students and as a hospital for the local community.

The Sebastian Infirmary is dedicated to the care of patients with tuberculosis and related diseases. The facility offers a comprehensive range of services, including inpatient and outpatient care, diagnostic testing, and research.

The Sebastian Infirmary is supported by a dedicated staff of professionals who are committed to providing the highest quality care. The facility is accredited by the Joint Commission on Accreditation of Healthcare Organizations (JCAHO).

The Sebastian Infirmary is a testament to the legacy of Dr. George Sebastian and his dedication to the field of medicine. It is a place where patients receive the care and compassion they need, and where the future of medical education and research is shaped.
New Students Receive Weeklong Orientation

When approximately 500 new students converged on the campus last week, a full week of orientation was mapped out. This program sought to orient the students well oriented into the college's overall program. To start the week, groups held discussion sessions in their respective halls. Using the topic "What Is College," student counselors who had been oriented in the session, served as group leaders. Freshmen were given information concerning the college and its facilities.

OFFICERS INTRODUCED

At the first general assembly, new students were given an introduction to the administrative officers by Dr. G. F. Eakin, dean of students. Later, a panel discussion on "Living Away From Home," was presented by a group of student counselors. Williamsburg Poy served as moderator; other panelists were Herman Thomas, Diane Echols, Bette Barr, Cary Spruill, Mrs. Katie Dorsett, Mr. Robert P. Belle, Dr. Alfred Hill, and Mrs. Patricia Trice.

"KNOW YOUR COLLEGE"
One of the highlights of the week was a session on "Knowing Your College," Dr. Gibbons presented some of A&T's historical background and traditions. After placement testing and ROTC assignment, the freshmen experienced a night with the Student Council. In a short program, preceding the dance, Erell Blur, president of the Student Council, and Roselbod Richardson, Miss A&T, introduced the Council officers and their functions to the freshman class. Walter Johnson, former student body president and now a student at Duke University School of Law, also appeared on the program.

HOW TO STUDY
To further orient the freshmen, an assembly was devoted to the subject of "How to Study." Films on the proper study procedure were followed by remarks by Dr. L. H. Robinson, Dr. Albert Sculli, Mrs. Katie Durnett, Mr. Lee Williams, Mr. Robert P. Rollie, Dr. Alfred Hill, and Mrs. Patricia Trice.

Another highlight of the week was the Freshman Banquet in Murphy Hall which was given in two sections. At the first session of the banquet, Dr. Charles Hayes, chairman of the Department of Education and Psychology, was principal speaker. The second session had as its principal speaker, Mrs. Anita Rivers of the Department of Mathematics.

ROTC Cadet Is Killed In Crash

Claude Scales, named corps commander of the Army and Air Force ROTC units at A&T College, was killed in an accident last month.

It was not until school reopened that many Aggies learned that Scales was killed in Virginia in a collision between his motorcycle and another vehicle.

Scales, a quiet, but friendly and active young man, had only a few days earlier completed his ROTC summer camp training. At the completion of camp, he was rated as number three in his platoon and the top A&T College cadet.

Very active in extra curricular activities, Scales was known best for his command of the nationally famous A&T College Army ROTC drill team.

Aside from being drill team commander, Cadet Lt. Colonel Scales was winner of the distinguished military student designation and the superior cadet award as a junior.

The rising senior from Stoneville, the type he had attended school without any college training and the superior cadet award as a junior.

The story related that Cox started teaching at 18, without a college degree, in a "one room mockery of a school. The type he had attended himself," and along the line of his 47 year teaching career, had been named principal.

"Mr. Oddie," as he was affectionately called by all the citizens of Ashe County, had taught at the school without any college training for 28 years. He entered A&T College as a freshman at the age of 46.

"Continuing for 23 summers," the article continues, "he had taken on one of the darndest hedgehogs of courses (if at them I ever attempted by a student at the college." In the earlier years, he had taken courses in spelling, writing, and arithmetic, and later, in subjects like geography, biology, botany, chemistry, history, and child psychology.

"You see," explained A&T's acting president, Mr. L. C. Dowdy, "Oddie Cox was always trying to learn so many things at once that none of them added up to a degree in any one field. His grades were not the best, either. He chose the subjects he knew the least about, and naturally there were the hardest for him. But Mr. Cox wasn't particularly interested in academic credits for himself. What he was interested in was learning every thing he could so he could teach it to those children up there where he lived."

"Last summer," President Dowdy said, "we decided to give Mr. Cox his degree on the basis of what he had accomplished. He said he'd rather wait until Next June to receive his diploma formally, in cap and gown and all. He added he had some friends in the mountains he'd like to bring down to see him get it. But then, of course, there was that fire."

The fire which to him referred burned to the ground the next home in which "Mr. Oddie" had lived. It was thought to have been started in the ashes.

The degree was mailed by the college to his family.

NSF Awards

Grant

A&T College was awarded an institutional grant of $2,330 by the National Science Foundation to help meet the college's needs in science.

Receipt of the grant was announced by Dr. W. M. McDuffie, dean of the school of science. The grants were allocated on a national well-being.

The statement, released by the National Science Foundation, read: "The National Science Foundation is supporting, at the request of A&T College, the following research activities, education, or related activities in the sciences.

Army Cadets
Rank High
At Camp

LEWIE'S DELIGHT: School is back in full swing again this year with the usual complaints about "this and that." For instance, I heard one student say that he had worked so hard this summer that he was going to take his vacation during the fall quarter. Another student commented that he had made out a schedule in the spring during pre-registration, but after he received his grades during the summer it was a waste of time to pre-register. He flunked three of four courses he was taking.

At Camp

Cadets attending summer camp at the Farge Reserve Training Center have been selected by Dr. J. A. Bryant, Jr., chairman, The Institute of Health. He is also director of the A&T College Summer Institute.

Dr. E. W. Rushton, superintendent of schools, air force, and Allied Officer School, The Institute of Health.

Mr. E. W. Waddell, Albermarle, vice chairman of the A&T College Board of Trustees.

Dr. L. C. Dowdy, acting president of A&T College.

The new appointment marks the third appointment of the A&T College Summer Institute.

The Institute was conducted under the supervision of a committee on arrangements headed by Dr. C. B. Edwards, professor of home economics and research.

He was named last year, by Dr. E. W. Rushton, for his services to the A&T College Summer Institute.

The acting president stated that the A&T College Summer Institute will be permitted to select majors at the start of the fall quarter.

The president's report has been written by the vice president of the A&T College Foundation.

McNeil, a senior from Wilmington, is a member of the Air Force ROTC program.

College Offers Many Worthy Organizations

By CARY P. BELL

By the time students at A&T receive their diplomas, they are well-acquainted with the many opportunities for fraternal registration and organization offered. They are now ready to take an active part in the social life of the campus.

An essential part of A&T life is the social life, through which the students affiliate with the religious affiliated groups. Since many freshmen will eventually seek membership in these groups, it is important for them to keep abreast of what they are doing, in order to avoid making mistakes in the complex world of Intercollegiate Fraternities and Sororities.

ALPHA KAPPA MU

Alpha Kappa Mu National Honor Society is perhaps the leading group of this nature on campus. Composite of juniors and seniors, this organization is composed of a president, vice-president, and a group of six members. Their main purpose is to promote scholarship and leadership. They are also responsible for keeping the college informed of the latest developments in the field of education.

HIT’S WHO

Another group whose membership comes from all areas of pursuit is who’s who in the A&T College and Universities. Membership in this group is open to juniors and seniors. A 3.00 overall grade point average is a basic requirement. In addition to these functions, the Committee of Five is responsible for the publication of the Student Council News.

RELIGIOUS ORGANIZATIONS

Religious activities are an important part of campus life. They include weekly services, guest speakers, and tours of various religious institutions. These activities are open to all students, regardless of their religious affiliation. Among the many affiliations of religious groups, the most prominent are the Student Christian Movement, the Student Christian Ministry, and the Campus Crusade for Christ.

MILITARY ORGANIZATIONS

The Reserved Officers Training Corps (ROTC) offers opportunities for participation in military training. In addition to the ROTC program, the Military Band also participates in developing leadership skills. The ROTC is a prestigious organization, and its members are highly respected by the community.

OTHER MILITARY ORGANIZATIONS

Other military organizations are the Pershing Rifles Society, the Combat Cyclery, the Modern Air FORCE and the Army JROTC. Just to show that ROTC is not all drill and polished brass, the Corps annually sponsors the Military Ball, which is the highlight of the social calendar. This event is in the tradition of the annual dancings, and weekly movies. It also gives students an opportunity to meet new friends and tutorial sessions, and supervises service organizations.

OTHER ORGANIZATIONS

Other organizations include the College of Arts and Sciences, the Student Council, and the various class representatives. These organizations provide a wide range of activities that are open to all students.

SCHOLARSHIP

The Register has become one of the best papers of its type in the area of student journalism. Membership is maintained by a board of students and a faculty adviser. The Register staff is responsible for giving the student body the news they need.

THE REGISTER STAFF

Last year, but very far from least of the important organizations, the Register staff is an essential element of the college community. Members of the Register staff are responsible for writing and editing the college newspaper, which is published weekly.

THE MAKERS OF MARLBORO

The makers of Marlboro cigarettes have been creating a swirl of excitement and celebration on campus for over nine years. They have been paying me money. You are shocked. You think that anyone who has tasted Marlboro's unparalleled flavor, who has enjoyed Marlboro's filter, who in the world would not want to die. But, I want to say, you do not know how to enjoy the taste of Marlboro. You are shocks and you are wrong.

Compensation is the very foundation stone of the American Way of Life. Whether you love your work or hate it, you are ensured of a steady income. This is a great honor. You are a treasure to the country. Whether you love your work or hate it, you are an important part of society.

SWMINGLINE STAPLER

It's with the name of me and Marlboro Cigarettes. I think Marlboro's flavor represents the pinnacle of the tobacconist's art. I think Marlboro's filter represents the pinnacle of the cigarette maker's art. I think Marlboro's jolly red and white pack or box should be more than an accessory to many of you. I think that anyone who has tasted Marlboro's unparalleled flavor, who has enjoyed Marlboro's filter, who in the world would not want to die. But, I want to say, you do not know how to enjoy the taste of Marlboro. You are shocks and you are wrong.
College Begins New Programs In Residences

In order to make dormitory life more conducive to the overall college program, student counselors are now provided in all male and female residence halls.

To pave the way for the success of the counseling program fifty student counselors reported to the campus for a workshop September 15-17.

Dr. L. C. Dowdy, acting president of the college, spoke at the opening session of the workshop. Speaking on the topic "Expectations of a College," Dr. Dowdy laid before expectations of a college — (1) what the college expects of itself; (2) what the college expects of its students; and (3) what the students expect of the college. Dowdy further asked the student counselors to strive to live, learn, and lead.

The second session of the workshop concerned Brookfield Library's Taylor Art Gallery. Mrs. M. K. Brimage, assistant dean of women, presided.

Speaking on the subject, "Some Adjustment Problems of College Students," Mrs. N. Joseph Shaw briefed the student counselors on the challenges which they will have to cope. These he divided into three groups: personal, social, and academic. Mrs. J. J. Corry also spoke on the topic "The Educational Objectives of the Residence Halls."

Following an outlined program, attention was focused on panel discussion of "Relationships Between Student Counselors and Residence Counselors." Mrs. A. K. Langford served as moderator; other members of the panel were Desha Tyson, dean of women; J. E. Ray Ratkowski,edar counselor; Mrs. E. J. Johnson, dean of women; and Phillip House, associate dean of men.
