Board Of Trustees Approves Raise In Student Fees

Dr. L. C. Dowdy, acting president of the college, recently told reporters that, at the last meeting of the Board of Trustees of the college, an increase in the total fees for next school term was approved.

Although the board of trustees approved increases in some fees, still others were decreased, with some being eliminated altogether.

Those fees which were increased include the registration fee which was increased from \$6.00 to \$6.60, the medical fee which was increased from \$15.00 to \$18.00, and the student aid fund which was increased from \$.50 to \$.60. The laundry fee for female students was increased from \$18.00 per year to \$27.00 per year.

There will also be an increase in the fee for lodging if the state appropriates funds for two new dormitories that the college is seeking. The fee for lodging was approved to be raised from the present \$128.25 to \$150.00 per year.

Among those fees which were reduced were the athletic fee of \$25.00 which was reduced to \$24.00 per year; the lecture fee was reduced from \$4.00 to \$3.90; and the fees for boarding were reduced from \$272.00 per year to \$270.00 per year.

Those fees which were eliminated were the \$.50 fee for pictures, the mail box fee of \$1.00.

These four students at A&T College are involved in scientific research in the field of foods and nutrition in the Undergraduate Research Participation Program, supported at the college by the National Science Foundation.

In the group, from left to right are Ivy M. Woolcock, Jamaica, West Indies; Larry Graddy, Washington; Minnie Ruffin, Tarboro; and Lawrence Siebles, Greensboro.

The program is being conducted under the supervision of Dr. Cecile M. Edwards, professor of home economics and research.

Recruiters To Begin Interviewing Engineers For Job Opportunities

With the beginning of the new year, seniors at A&T College will be very busy, for during the first few months of 1963 many recruiters will converge on this campus in search of young talented college seniors to fill vacancies with many different firms.

The seniors who are likely to be kept busiest are without doubt the students from the school of engineering. During the next three months, some fifteen recruiters will set up shop at the college with a primary interest in electrical, and mechanical engineering majors, physics majors, mathematics majors, business majors, and chemistry majors.

Recruiters from the U. S. Department of Commerce, Washington, D.C. will visit the campus January 16, with an interest in electrical engineering, mechanical engineering, architectural engineering, SAS-Chemistry, and physics majors.

January 17, NASA George C. Marshall Space Flight Center, Huntsville, Alabama will be recruiting for all engineering students; and February 5, Harry Tyler-TVA will pay a visit to the campus with an interest in students from all the fields of engineering. February 6, will find re-

Notes From The Registrar SENIORS

ALL PERSONS who expect to graduate at the end of the winter quarter will please report to the OFFICE OF ADMISSIONS top floor, Dudley Building, before January 29, to fill out applications for graduation and to list names the way they are to appear on diplomas.

FOREIGN STUDENTS

The United States Government requires every person who is not a citizen of the United States to report his address to the Government each January. Special cards for doing this are to be obtained at the Greensboro Post Office, West Market Street, filled in, and returned there.

Report to Room 109, Greensboro Post Office.

ALL STUDENTS

Your attention is directed to the following deadline date during the Winter Quarter for services by the Office of Admissions:

- Removal of Incompletes Jan. 29
- Change of Major Jan. 29
- Application for Graduation Jan. 29
- Application for Estimate of Credits Jan. 29
- Averages for Club Initiations Jan. 29
- Requests for Draft Board Deferments Jan. 29

(CONTINUED ON PAGE 4)

College Will Sponsor Freshman Career Week January 14th Thru 22nd

"Today's Freshman . . . Tomorrow's Merit Employee" Is Selected Theme

Teacher's Exam To Be Given February 16

The National Teacher Examination will be held on February 16, 1963, for students who are planning to be teachers. Students here at A&T College are urged to make plans for taking this examination. The examination will be divided into two parts: a common examination and an optional examination.

The fees for the examination are as follows: a common examination and one optional, \$11; a common examination and two optionals, \$13; one optional, \$7; two optionals only, \$9. The fee for late registration from January 19 through February 1, 1963, is \$3 extra.

The last day for sending in applications is January 18, 1963. All students interested in taking this examination may stop by the office of The Department of Education and Psychology at any time during the day before January 18, 1963.

"Today's Freshman-Tomorrow's Merit Employee" will be the theme of the Annual Freshman Career Week, January 14-22.

This theme will be developed through a series of programs, all part of the continuous program of Freshman Orientation which began September, 1962.

The purpose of the Career Week is to help freshmen to select more wisely their major fields of concentration by informing them of opportunities in their interest areas.

This year's Career Week will feature Mrs. Sarah Herbin, merit employee consultant of the American Friends Service Committee. Mrs. Herbin will deliver the keynote address at the regular assembly hour, Tuesday, January 15, in Harrison auditorium.

At group sessions, beginning January 14 and continuing throughout the week, consultants, faculty members included, will present a variety of different career opportunities.

The week will be brought to a climax with the winter quarter convocation when Attorney Hobart Taylor, Jr., executive vice-chairman of the President's Committee

(CONTINUED ON PAGE 3)

James Lawrence, a 1957 graduate of A&T College, now an analyst-chemist with the U. S. Food and Drug Administration, Washington, D. C., returned to his Alma Mater recently to interest student majors in seeking employment with his agency.

He explains his job to Dr. L. C. Dowdy, center, acting president, and W. I. Morris, right, A&T placement director.

National Science Foundation Awards College \$124,300 Grant

A&T College has been awarded grants totaling \$124,300, by the National Science Foundation, for the operation this year of two summer institutes for teachers of science in high schools.

Announcements of the grants was made by Dr. L. C. Dowdy, acting president of the college.

One of the offerings, the Summer Institute for Teachers of Science, is identical with one which has been operated for the past four years.

The second, the Summer Institute for High School Teachers of Chemistry, was operated here for the first time two years ago. It differs from the other by offering courses in Chemistry paralleling those required for a major in chemistry given in sequential order leading to the Master of Science degree in four summers. The chemistry institute, to be conducted for nine weeks, beginning on June 10 and extending through August 9, will permit the participant to earn up to 15-quarter hours each

summer toward the graduate degree.

Applicants who have attended one of the Institutes at A&T College, or have completed essentially the same courses at another National Science Foundation sponsored institute, will receive priority in selection as participants. Applicants who have had similar required courses at other institutes, or at graduate schools without NSF support, will also be considered.

Both programs have as their objectives: (1) to improve the quality of high school science instruction, the latter, specifically in chemistry, by offering opportunities to participants whose training is inadequate, or outdated, and (2) to stimulate in high school students greater interest in the sciences by improving the quality of instruction.

The Summer Institute in Science, to be conducted for only six weeks, beginning June 10 and ending July

(CONTINUED ON PAGE 4)

Lieutenants Arthur T. Liggins, left, Covington, Va., and James E. Brown, Asheville, who graduated from A&T College recently, have their bars pinned on following their commissioning as officer of the U. S. Air Force. Johnnie Nelson, left, Roxboro, and Barbara Rainey, Newport News, Va., both A&T coeds do the honors.

The two new officers, who completed the A&T Air Force ROTC program, are to report for active duty in January.

Forty-Four Complete Requirements For Graduation At End Of Fall Term

Forty-four persons completed the requirements for graduation from the Agricultural and Technical College of North Carolina at the end of the fall quarter.

Of the students graduating at the end of this term, the school of engineering led, with 24 receiving degrees. The School of Education and General Studies was second with 11 receiving degrees, while the School of Agriculture was last with only 9 receiving degrees.

Of the School of Engineering's 24 graduates, 6 received degrees in mathematics; 7, in business education; 3, in business administration; 2, in mechanical engineering; 2, in electrical engineering, 2, in industrial arts; 1, in architectural engineering; and 1, in engineering mathematics.

From the School of Education and General Studies, 4 persons received degrees in social studies;

2, in French; 2, in sociology; and 1, each, in physical education, music education, and English.

The School of Agriculture had persons earning degrees as follows: biology, 3; agricultural education, 3; nursery school education, 1; and animal husbandry, 1.

Those persons completing requirements for degrees were John Thomas Atkins, Raleigh, industrial arts; Steve L. Boney, Wallace, business education; Laura M. Boykin, Charlotte, business education; and George Franklin Covington, Monroe, mathematics. William Lionel Currence, Charlotte, electrical engineering; Girth G. Deans, Warsaw, business education; Cate G. Devane, Wallace, business administration; Doris C. Dunnegan, Hillsboro, mathematics; Joseph B. Ferguson, South-

A & T In 1963 . . . ?

The new year is upon us and certainly we are optimistic about the developments which are due to come about at A&T College during 1963. But as optimistic as we can be, there is still that small shadow of pessimism which we cannot overlook.

How can we be both optimistic and pessimistic at the same time? A very good question, but we find that while we want to be optimistic about the things in store for this college, we are forced to face reality and see that unless some miracle comes about we will go on much as we have in the past with very little changes being made unless there is an electrifying jolt given to our students and to some of our faculty population.

CULTURAL TONE LOW

Time after time we have heard the statement "We are lacking in cultural climate," or "The cultural tone of the campus is low." These statements may or may not have some validity, but we have no more time to waste arguing about the validity of the statements. We must begin to do some work. We must begin to develop a cultural program for this campus which is second to none. We must develop a program new in its entirety. Copying anyone else's program may not be the answer, for we are already too far behind the national average. We must work to catch up and to catch up in the next few years; otherwise there will be no need for our most fervent efforts.

The college's theme for the year is "Academic Excellence." We need academic excellence, yes; but academic excellence is not much good if we do not know what it is or how it can be achieved. Academic excellence or the whole idea which it encloses is defeated if a person suddenly does something that he should have done years ago and then has the audacity to stand upon his self-righteous pillow of indignation and declare that this is academic excellence simply because he has suddenly been awakened.

We contend that academic improvement and cultural improvement go hand in hand and one is not much good without the other. We believe that in order to improve oneself academically, he cannot do so without improving himself culturally. Unfortunately this is where our thinking and that of our colleagues part, for it seems that the popular belief is that one should be aware only of his own intellectual ability (if it is such) when it has been publicized.

STRATEGIC PLACE

Now A&T College holds a very strategic place in this city, this community, and this state. It should and could very well be the cultural, academic, and intellectual center of this area. Very few people, however, seem willing to assume the responsibility for seeing that it becomes such. Very few people are willing to spend a few hours working on some program which would improve the cultural tone of the campus.

Now the constant argument is that no one is interested in attending the programs, or attendance at those which have been planned has been poor. This is probably true, but we wonder if anyone has taken the time to explain to the students why they should attend or give them some background as to what they will be seeing, hearing, or participating in? Has anyone taken the time to generate a profound interest in any topic and then followed it up with a discussion, seminar, or program of some kind with this as the main highlight?

Except on a very small scale, the answer is obvious; and it will continue to be the same until these persons who should be responsible come down from their ivory towers and begin to take notice of exactly what is going on around them.

STUDENTS HAVE FORGOTTEN

The student body is so concerned with having a dance in Moore Gymnasium and is too busy trying to have the dance that it has forgotten what it came to college for. The student body has forgotten that its original purpose for coming to college was to get an education, a well-rounded education. It has become so involved in the obtaining of a degree that it has left the idea of education to be thought about by someone else.

We cannot and will not believe that the satisfaction of the requirements for a degree whether it be the B.S. or the Ph.D. is enough to say that a person is educated.

DEGREE NOT ENOUGH

We believe that when we spend enough time at a college, it happens to be A&T College in this case, and receive a degree and receive no appreciation for the things around us or the things that we are likely to encounter later, we have defeated our purpose. We are no better off than we were the first day that we entered the institution and after graduation we might as well turn around and apply for admission all over again although we may not be accepted a second time.

With the beginning of 1963, we believe that we still have time to change for the better and set new goals and ideals for a greater academic, cultural, and intellectual community in the place where the old A&T College used to be.

Press Offers \$100 For Best Application

A prize contest open only to college students has been announced by the Grove Press.

According to information received by this newspaper, Grove will award the \$100 prize to the person who sends in the best letter of application by Kitten, heroine of Robert Grover's current bestseller, **One Hundred Dollar Misunderstanding**, for admission to a mythical southern university.

One Hundred Dollar Misunderstanding is a novel about the misadventures of J. C., a white college sophomore, and Kitten, a young and beautiful Negro prostitute.

Entries for the contest must be no more than 100 words in length and must be written in Kitten's own style, of which a sample (taken from the book) is given below:

"Course, he dum, ain his fault, I spose. Maybe he jes born dum. Maybe he jes born Whitefolks dum, so's he kin lissen t' that big-word tee vee preachin, an so's he kin dig that shottin and fighting an ack mean an maybe even kill somebody human, but not so's he kin do nothin much else, like talk sweet an play nice."

The 100 runners-up in the contest will receive a full year's subscription to the bi-monthly magazine, **Evergreen Review**.

Entries will be judged by a board appointed by the publisher, and all entries will become the property of the publisher. Entries should be submitted to Kitten Contest Editor, Grove Press, Inc., 64 University Place, New York 3, N. Y., and must be postmarked no later than January 31, 1963.

Committee Proposes Changes For Greek Organizations

Greek letter organizations and the Student Aid Fund were main items on the agenda when the College Council had its last meeting.

Convening in the conference room of F. D. Bluford Library, the Council continued its discussion of proposed regulations concerning social fraternities and sororities. A committee report which outlined regulations was presented.

The committee, composed of Mrs. Ann Graves, Dr. Gladys Royal, Sarah Rearden, Cary Bell, and Anthony Dudley, had been formed at a previous meeting. It recommended that the term Social Greek Letter Organization be applied to those groups to differentiate them from other Greek letter groups.

A recommendation that initiation activities take place within a ten day period with no more than an accumulated total of eighty hours was also presented. The recommendation also included that periods of rest and study which conform to college regulations be established during the period of initiation.

Another proposal concerning membership provided that the Dean of Students put forth a minimum number of students which constitute an active organization. The group averages would be computed on the basis of a list of active members submitted to the Dean of Students at the beginning of the quarter.

The committee also strongly recommended that each group have one adviser and an alternate and that what is commonly known as secret probation be dropped.

Realizing that service groups and other organizations often enter the realm of social fraternities and sororities, the committee further recommended that a statement governing these groups also be developed.

The lengthy discussion of the Student Aid Fund centered around the difficulty for students to locate co-signers. It was concluded that the difficulty arises because co-signers have no way of knowing whether or not borrowers will repay debts; consequently they are apprehensive about signing request blanks.

Suggestions that certain qualifications be met by borrowers; that parents of students be contacted prior to the loan approval; and that the Bursar's records be available to co-signers were also submitted.

Looking At Africa

MOSES KAMARA

Thirty-three African countries, excluding segregationist South Africa, are now independent; however only political independence has been achieved. In fact there are a number of countries still struggling to free themselves from the colonial hawks.

These states realize that to consolidate their political independence they need to have economic independence. With this realization, vigorous steps are being taken to reach the desired goal. One of the most important steps being taken is in education. The following accounts show some of the bold steps being taken in the field of higher education throughout the continent. Outside help from the U. S., the U. S. S. R., Europe and other countries is playing a great role in these efforts.

EDUCATION

Professor William Leo Hansberry, former Assistant Professor of African History at Howard University in Washington, D. C. and a member of the Board of the African-American Institute since its inception, has accepted the chair of African Studies in the Hansberry College of Nigeria in Nsukka. Dr. Hansberry will assume his duties this month. He has taught for 30 years and has recently completed a three-volume study of Africa History which will be published by Random House of New York.

GHANA UNIVERSITY HAS PRESS

The Ghana Universities Press has been recently established at the University of Ghana. It will print and publish books of general educational interest for universities, colleges, higher schools, and the public. Later it intends to publish books for primary and

secondary schools as well, but it will not handle novels or magazines of purely entertainment value.

UNIVERSITY OF LIBERIA MOVING TO NEW CAMPUS

The University of Liberia is in the process of moving from Monrovia, the nation's capital, to a new 5,000 acre site approximately 11 miles outside the city. The move will enable the University to erect more modern facilities, to expand its physical plant, to broaden its educational programs, and to enroll more students.

Cornell University in Ithaca, New York will assist the University and Liberian Government officials in making the move and improvements, and will also aid in the assembling of a larger and stronger faculty. The agreement under which Cornell will assist the University of Liberia was negotiated by the Government of Liberia and the U. S. Agency for International Development.

\$25 Award May Be Won By Student

THE REGISTER has been singled out as one of 150 leading college and university newspapers to participate in a contest which offers a cash prize to one student at each of the colleges and universities.

Jack Wohl, of J. W. Books, New York City recently informed members of the REGISTER staff that the contest is ridiculously easy; it is based upon the latest humor book hit, **Dolls My Mother Never Gave To Me**.

Dolls My Mother Never Gave To Me is distributed by Pocket Books, Inc., New York City at \$1.50 and may be purchased at local bookstores; but it is not necessary to purchase the book in order to enter the contest. A copy of the book which is to be used as reference for the contest may be seen in the office of the REGISTER located at 169 Carver Hall.

According to Wohl, everyone thinks that he can write a funnier gag line than one he has seen printed; consequently, any student at A&T College who comes up with a funnier gag line than those printed in **Dolls My Mother Never Gave To Me** will be given an award of \$25.00. In case of a tie between writers from this college, each person will receive \$25.00.

All entries for the contest must be postmarked no later than January 15, 1963. The decision of the judges will be final.

KAMPUS BEAT

By LEWIE

CORNER OF LINDSAY AND LAUREL STREETS: Not so long ago I saw some students coming to the corner for their daily papers . . . It seems as if they didn't know that the school is using the honor system as far as the papers are concerned.

BROKEN LAWS: Now I wonder where I could have been when they passed this rule . . . I mean the one requiring all young ladies to remain at all social functions until they terminate . . . It all comes back to me now. . . It must have been while I was away attending the convention opposed to the integrity of girls. . .

NEW YEAR RESOLUTIONS: Last week I made a brief survey of some students to find out just what they had resolved for the new year. . . Here are the results: "I will try harder in school to be more determined to succeed," said one student. . . Another student said that he was going to study his books more than the girls in '63. . . A prospective senior girl told me that she has resolved not to leave A&T College without an Aggie man on her arm. . . How's that for a new year's resolution? . .

THINGS THAT DIDN'T HAPPEN YET: A radio station on campus. . . More cooperation on the REGISTER.

The A & T College REGISTER

Published weekly during the college year by the students of A&T College. Second-class postage paid at Greensboro, North Carolina.

Subscription rate \$5.00 per year. Address all communications and checks to THE REGISTER, A&T College, Greensboro, North Carolina.

Member: Associated Collegiate Press Association, Intercollegiate Press.

ROTC Grads Are Commissioned At End Of The Fall Quarter

Five fall-quarter graduates of A&T were recently granted commissions in the armed forces. The commissions were granted upon completion of their ROTC training. Of the new second lieutenants, three received commissions in the army and two in the air force. Those receiving commissions were Army — James Hines, Fenness T. Morris, Henry E. Fenner; Air Force — Arthur Liggins and James E. Brown.

Hines, an engineering math, major from Greenville, and Morris, a biology major from Elizabeth City, both received commissions in the Signal Corps. Fenner, a biology major from Havelock, was commissioned in the Quartermaster Corps. Col. E. P. McConnell of the 12th U. S. Army Corps, Atlanta, Georgia, presented the commissions. Brown, Asheville, and Liggins, Covington, Virginia, will both depart to active duty this month.

Col. E. P. McConnell of the 12th U. S. Army Corps, Atlanta, Ga., and Major William Goode, professor of military science at A&T College, both at left, present commissions to four U. S. Army officers who graduated from A&T College last month. The new officers are, from left to right: Henry Fenner, Havelock; James M. Hines, Greenville; Fenness Morris, Elizabeth City; and Naclave Waugh, Asheville. The four completed the U. S. Army ROTC program at the college.

Dowdy Cites Improvements For College

Improvements planned for A&T College during 1963, calling for giant steps in the college's program, "Academic Excellence," have been outlined. Dr. L. C. Dowdy, in a year-end message, listed plans which call for several improvements in the instructional program. These include the addition of several new courses and new and expanded physical facilities, all to be implemented early this year. Contracts are to be let shortly for the construction of the half-million dollar Hines Hall Annex Building for additional instructional facilities in chemistry. The building is to be constructed on an appropriation of \$450,000 from the State of North Carolina, plus a grant of \$88,076 from the National Science Foundation for additional space and facilities for chemistry research. Other physical improvements call for renovations to Morrison Hall, \$72,000; improvements to the college athletic field, \$91,500; receipt for title to the Lutheran College property, including several buildings and two other tracts of land being purchased from the Greensboro Urban Renewal Development, and the installation of a new IBM 1620 Computer. The Computer, to be used for instruction, will make possible the offering of some additional courses.

A GUIDE FOR THE UNMONEYED

R. L. Sigafos was a keen, ambitious lad, and when he finished high school he wished mightily to go on with his education. It seemed, however, a forlorn hope. R. L.'s father could not send the boy to college because a series of crop failures had brought him to the brink of disaster. (R. L.'s father raised orchids which, in North Dakota, is a form of agriculture fraught with risk.) It was, therefore, squarely up to R. L. He could go to college only if he worked his way through. This was a prospect that dismayed him. He had a deep-seated fear that the task would be too great, that he would never be able to carry on a full, busy college life and still find time to do odd jobs and make money. Racked with misgivings, R. L. paced the streets, pondering his dilemma. One day, walking and brooding, he came upon a park bench and sat down and lit a Marlboro cigarette. R. L. always lit a Marlboro when he was low in his mind. R. L. also always lit a Marlboro when he was merry. The fact is there is no occasion—happy or sad, pensive or exuberant, cheery or solemn—when Marlboro with its fine filter and fine flavor is not entirely welcome, as you will discover when you go to your favorite tobacconist and buy some, as we—the makers of Marlboro and I and R. L. Sigafos—hope you will do real soon. Sitting and thinking and smoking a Marlboro on the park bench, R. L. was suddenly interrupted by a small, quavering voice which said, "My boy, you are troubled. Can I help?"

I gave a fencing lesson to the Dean of Women

Seated beside R. L. was a tiny, gnarled man with wispy, snow-white hair. His skin was almost transparent, showing a delicate tracery of fragile bones beneath. His back was bent, and his hands trembled. But his eyes were bright and clear. R. L. looked into those eyes, into the wrinkled face. He saw wisdom there, and experience, and kindness. "Do you think, sir," said R. L., "that a boy can work his way through college and still enjoy a rich, full campus life?" "Why, bless you, son," replied the stranger with a rheumy chuckle, "of course you can. In fact, I did it myself." "Was it very hard?" asked R. L. "Yes, it was hard," the stranger admitted. "But when one is young, all things are possible. I, for example, used to get up at five o'clock every morning to stoke the furnace at the SAE house. At six I had to milk the ewes at the school of animal husbandry. At seven I gave a fencing lesson to the Dean of Women. At eight I had a class in early Runic poets. At nine I gave haircuts at the Gamma Phi Beta house. At ten I had differential calculus. At eleven I posed for a life class. At twelve I watered soup at the Union. At one I had a class in Oriental languages. At two I exercised the mice in psych lab. At three I gave the Dean of Women another fencing lesson. At four I had qualitative analysis. At five I went clamming. At six I cut meat for the football team. At seven I ushered at the movies. At eight I had my ears pierced so that at nine I could tell fortunes in a gypsy tearoom. At ten I had a class in astronomy. At eleven I tucked in the football team. At twelve I studied and at three I went to sleep." "Sir," cried R. L., "I am moved and inspired by your shining example!" "It was nothing," said the stranger modestly, shaking his frail white head. "It was just hard work, and hard work never hurt anybody." "Would you mind telling me, sir," said R. L., "how old you are now?" "Twenty-two," said the stranger.

You don't have to be a rich man's son or daughter to enjoy Marlboro cigarettes, available in soft-pack or flip-top box at your favorite tobacco counter.

Freshman Career Week

(CONTINUED FROM PAGE 1) on Equal Employment opportunities, Washington, D. C., will be the guest speaker.

The Convocation will be held Tuesday, January 22 at 9:00 A.M. in Charles Moore Gymnasium.

Group sessions, Monday, January 14, at 7:00 P.M. include the following:

Group I, Taylor Art Gallery, Bluford Library, Communicative Arts: English and Related Areas, Mrs. Gertrude Johnson; Foreign Language and Related Areas, Miss Annette Williams.

Group II, Women's Lounge, Bluford Library, Music and Related Areas, Mr. Howard Pearsall.

Group III, Bluford Library auditorium, Social Science and Related Areas, Mr. Donald Addison; Economics and Related Areas, Dr. J. O. D. Tate.

Group sessions, Tuesday, January 15, Bluford Library at 7:00 P.M. include:

Group IV, auditorium, Accounting and Related Areas, Mr. Francis Boston, chief, Training Branch, United States Department of Internal Revenue, Greensboro; Insurance and Related Areas, Mr. D. D. Coley, district manager, Greensboro Division, North Carolina Mutual Life Insurance Company.

Group V, Women's Lounge, Physical Education and Related Areas, Mr. Melvin Grooms.

Group VI, Taylor Art Gallery, Technical Jobs as Related to Technical Institute Offerings, Mr. Wilbur Wright, District Office of the North Carolina Employment Service, Greensboro.

Sessions Wednesday, January 16, at 7:00 P.M. also in the Bluford Library are these:

Group VII, auditorium, Engineer-

ing and Related Areas, Mr. Osburn C. Stafford, electrical engineer, Greensboro Division of Western Electric Company.

Group VIII, Women's Lounge, Industrial Education and Related Areas, Mr. Franklin Brown, Dudley High School, Greensboro.

Group IX, Taylor Art Gallery, Fine Arts and Related Areas, Mrs. Alberta Stuart, Art Department, Dudley High School, Greensboro.

FOR OTHER SESSIONS, SEE BULLETIN BOARDS.

These are the newly elected officers of the A&T College Women's Council. They are, from left to right: Catherine Ramey, Jackson, president; Betty Price, Madison, secretary; Patricia Lawson, Danville, Va., vice president; Mary Hill, Philadelphia, Pa., treasurer; Genevieve L. Jones, Bronx, N. Y., assistant secretary; Ethel Turner, Moyock, chairman, Awards Committee, and Yvonne Setzer, Hickory, chairman, Program Committee.

Graduation

(CONTINUED FROM PAGE 1) ern Pines, mechanical engineering; and Margaret Capson, Maysville, mathematics.

James Gill, High Point, mechanical engineering; Raphael G. Glover-Asheville, architectural engineering; Emma Head, High Point, business education; James M. Hines, Greenville, engineering mathematics; Roscoe Hines, Florence, S. C., business administration; Jerry Hogan, Roseboro, business education; Archie Johnson, Winston-Salem; mathematics; Vivian Johnson, Greensboro, mathematics; Arthur Liggins, Covington, Virginia, electrical engineering; Virginia L. Oates, Shelby, business administration; Thomas Pigford Wallace, industrial arts; Clarence Richardson, Tabor City, business education; Shirley Rogers, Mebane, business education; and Richard Wilson, Kannapolis, mathematics.

Among those graduating from the School of Education and General Studies were Sim H. Bowden, Sanford, physical education; David William Chapman, Kinston; sociology; Frances L. Cooke, Greensboro, Charleston, S.C., social studies;

boro, French; Marion Craven Asheboro, English; Emily M. Gibbs, Edward Lee Jones, Greensboro, social studies; Rosa Lee Lyles, Winston-Salem, social studies; Thurgood Stanton Melton, Cofield, music education; Worth D. Moore, Burlington, social studies; Edward Taylor, Shallote, sociology; and Bessie Wingate, Iron Station, French.

Those graduating from the School of Agriculture included James Edward Brown, Asheville, biology; John Leonard Chesnut, Clinton, agricultural education; Carolyn Sue Davidson, Statesville, nursery school education; Henry Edward Fenner, Havelock, biology; Bernard Ralph Hall, Chinquapin, biology; Alfonzia Knight, Halifax, agricultural education; Rudyard Taylor, Bronx, New York, animal husbandry; and Harvey McCleese Winslow, Belvidere, agricultural education.

The Technical Institute listed only one person graduating at the end of the fall quarter. Leander King of Kinston completed the requirements for graduation with a major interest in clothing.

For information concerning summer employment with the U. S. Department of Agriculture, see Mr. W. I. Morris, Placement Officer, Dudley Building.

Two Aggies Make All American Grid Team

The dust has cleared, the mud has frozen, and the gridiron uniforms are clean. Slipping out of all this were two Aggies, Richard Westmoreland and Joseph Henderson, who were chosen to their respective positions on the Negro All-American squad.

Westmoreland, 180 pound half-back, was one of the best all-round players that the college has had in a number of years. He was a fast, hard runner and once given a little room, he was shifty enough to elude would-be tacklers. A sure-handed pass receiver, he led the team in that department. Westmoreland is also a wonderful punter and led the team in that department also.

Henderson is a 200 pound guard from Freehold, N.J. He has been one of the most aggressive players on the Aggies' front wall. Using all the tricks of the trade, he packed dynamite. What this fine athlete lacked in size was more than made up for in dogged determination and skill.

Both of these athletes are seniors and are on tap for pro action next year.

NSF Grant

(CONTINUED FROM PAGE 1)

19, seeks also to improve the training of science teachers in the areas of biology and physics. In general, a participant in this program will be eligible to take three courses, two of his choice in biology or chemistry and the third in physics. Graduate credit of nine quarter hours will be earned and may be applied toward the Master of Science Degree.

The Summer Institute in Chemistry has been awarded a grant of \$64,300 in support of forty participants. A grant of \$60,000 has been awarded to the Summer Institute in Sciences in support of sixty participants.

Dr. Gerald A. Edwards, professor and chairman of the Chemistry Department and who has headed these Institutes in the past, is to be director of both Institutes. Dr. Artis P. Graves, professor and chairman of the Biology Department, was named associate director of the Summer Institute in Sciences.

Inquiries, indicating the choice of Institute, should be directed to Dr. Gerald A. Edwards, A&T College, Greensboro.

Applications must be postmarked prior to February 15, 1963, to assure consideration.

Recruiters

(CONTINUED FROM PAGE 1) representatives from the David Taylor Model Basin in search of Scientific and Technical Candidates and engineers on this campus.

February 8, a recruiting team from the General Dynamics Astronautics Corporation will be searching for possible employees among the students enrolled in the different fields of engineering at the college. The National Aeronautics and Space Administration, Langley Field, Virginia will have representatives on the campus February 12, in search of engineers, mathematicians, and physicists.

February 18, the U.S. Atomic Energy Commission will send recruiters to college in search of engineers; and February 19, the U.S. Ordnance and Field Activity, will be interviewing engineering students for possible placement with the Bureau of Ships Weapons Research and Development Headquarters in St. Louis, Missouri and Philadelphia, Pennsylvania.

Searching for engineers also, the General Motors Corporation, Detroit, Michigan, will send representatives to the campus on February 21. February 22, the U.S. Navy Electronics Laboratory, San Diego, California will send representatives to interview engineers and mathematicians.

Four days later, on the February 28 the U.S. Engineers Research and Development Laboratories will set up shop to interview students from all fields of engineering. March 13, the U.S. Air Force Robin Air Force Base, Georgia will send recruiters to interview engineering students also.

Double-Header Will Feature A & T & Dudley

The A&T College Aggies and the Greensboro Dudley High School Panthers, both undefeated as the two teams broke camp for the holidays, will play on a college-high school basketball doubleheader bill here January 14.

The game, set for the Greensboro Coliseum, will feature the Aggies against Johnson C. Smith University and Dudley against the Wilmington Williston High School.

The high school game will get underway at 7:00 P.M., and the college competition is scheduled to start at 8:30.

Officials at both institutions described the doubleheader idea as an effort to develop wider appreciation for basketball among sports lovers in the community, and one of several areas of cooperation being probed by the two for broader contributions to the educational and cultural development of the community.

Faculty Member Joins Staff Of WEAL As Radio Announcer

Mr. R. L. Wynn Takes Post In Nigeria

R. L. Wynn, dairy specialist with the A&T extension service for more than 17-years, has accepted a two-year assignment in Nigeria to help organize the nation's new Program of Continuing Education.

Mr. Wynn will teach at the University of Nigeria, at Nsukka, under the U. S. Agency of International Development (AID) in a contract with, and as a staff member of, Michigan State University.

He reported for his new assignment on January 1, and following a brief orientation period will leave for Africa.

The appointment of Mr. Wynn brings to five the number of A&T staff members now on temporary foreign assignments. The others include Dr. Samuel D. Proctor, president of the college, director of the U. S. Peace Corps, Nigeria, and just recently named associated director of the Peace Corps Program; Dr. William E. Reed, former dean of the School of Agriculture, in Ghana, Africa; Dr. F. A. Williams, former dean of the Graduate School, now at the University of Khartoum, in Sudan, Africa, and Dr. Fenise P. Logan, chairman of the Social Science Department, at Bombay, India.

A member of the A&T College faculty has been appointed an announcer on Radio Station WEAL in Greensboro. The faculty member is Mrs. Lois B. Kinney, a teacher in the English Department.

Mrs. Kinney's broadcasts include a one-hour Gospel Program and two half-hour popular music shows.

The Gospel program can be heard daily from 10:30 to 11:30 in the morning. This program which is composed mostly of sacred music is pre-recorded. The two half-hour shows consist of popular music. The broadcasts can be heard from 2:30 to 3:00 P.M. and from 4:00 to 4:30 P.M.

In an interview, Mrs. Kinney said that she hopes her broadcasts will be highly enjoyable and artistically contributive to auditors.

In later interviews with several students a Register reporter heard very favorable comments about Mrs. Kinney's programs. A typical comment was made by one student who said, "Since I have heard Mrs. Kinney's programs on Radio Station WEAL I have noticed that the language used in announcing the programs has made a turn for the better."

This is not Mrs. Kinney's first appearance on radio. While she was in Atlanta, Georgia, she was a regular announcer on Radio Station WAOK. She also has television and stage experience.

Salem refreshes your taste
—air-softens every puff

Take a puff...it's Springtime!

A Salem cigarette brings you the taste of Springtime...so soft and refreshing. Puff after puff...pack after pack... Salem smokes fresh and flavorful every time. Smoke refreshed...smoke Salem!
