The Third Anniversary

Three years ago, February 1, 1960, four freshmen from this institution boldly took seats at Woolworth’s five and ten, and ushered in the era of sit-in demonstrations.

This simple act and the persistence of this group set off a chain reaction across the state and nation, and, to the surprise of many, from Georgia to California, to allege years some quite favorable changes in American patterns of life.

These four young men will probably be remembered for some time to come as the sit-in leaders of the Negro freedom movement in American patterns of life.

Since this widespread demonstration (known as the “Sit-In”) many sporadic efforts have been made to generate demonstrations of the same nature to obtain equality for the Negro in America. Unfortunately, many of these efforts have met with little resistance, other Negroes not being interested in violent resistance from members of the white community.

Looking at Greensboro, three years later, and in a comparative light with conditions before the sit-ins and confrontations with police, one can see that the conditions are somewhat parallel with a few differences. In Greensboro, the Negroes are not being forced to stand up for what they say they should be. We see a group of individuals who are challenging the present and the future of their community, and the future of their children.

A few Negro students understand this because, by admitting it, they admit their own lack of interest in their future and the future of their children.

A few Negro students have opened to serve mankind regardless of race. We see a future and the future of their children.

A few Negro students are open to serve mankind regardless of race. We see a future and the future of their children.
