REGISTER

"The Cream of College News"

*Season's
Greetings*

Registration Dilemma

None, it appears, is satisfied with the way winter quarter registration turned out. Students were peeved at the amount of time it took them to register and the seeming prevalence of disorganization. For many of them who are seniors, the affair was reminiscent of the hectic days of their freshman year when chaos at registration was the rule of the day. Faculty and administration, on the other hand, were undoubtedly annoyed by the delay and disruption caused in classes and other areas of the college.

Many arguments will be advanced concerning the failure of registration. Many accusations about who is to blame will be made. A close scrutiny of the operation will reveal, however, that no one person or cause can be pinpointed to explain the failure. It was rather a series of unforeseen events which wrecked everybody's plans.

It is true that personnel in charge did not maintain control of the situation at all times. This was due in part to the choice of location. Even though the library is centrally located and appeared to be a good site, events of last week prove that it is inadequate under present procedures to handle crowds occasioned by registration. Congestion was encouraged by the labyrinth of tables and lack of space on the first floor section.

Students cannot escape some of the blame for the failure. The pushing, shoving, and cutting of lines witnessed Friday were uncalled for. That a door was torn from its hinges makes one shudder at the impact of such barbaric behavior. While the chances of getting closed out of classes obviously prompted some students, such behavior cannot be tolerated. Indeed, it did much to make bad matters worse.

Who was right and who was wrong then becomes secondary. What is of primary concern is that we take steps to insure that such confusion is eliminated at subsequent registration periods. While it is agreed that no foolproof system is devisable, surely one which will be improvement over the last can be devised.

At any rate, it will take efforts by all of us — students, as well as administrative personnel — to insure the success of any venture.

On The Selection Of Who's Who

The thirty-six A&T students who have been selected to appear in the next edition of WHO'S WHO AMONG STUDENTS IN AMERICAN UNIVERSITIES AND COLLEGES are to be congratulated. Such selection is a distinct honor, for it places this group among the elite in collegiate circles across the nation.

At the same time we are congratulating these students we should examine the present mode of selection. Such examination is desirable not because those who were selected are unqualified; for surely they are, but rather because the present method has proved to be inefficient and inadequate.

Under the present system used by the Student Council, a list is circulated and students who meet the qualifications sign their names. Present qualifications are a 3.00 overall grade average, a clear record of department, and participation in at least one major extra-curricular activity.

That the names of persons with the barest minimum average to remain at the institution and the names of such far-fetched personalities as Castro and Billy the Kid also appear on the list indicate that the present means of selection results in delay and embarrassment. It further illustrates that some among us are unschooled as far as the significance of the selection is concerned. It is apparent that a more feasible means of selection to rid us of such wastefulness is desirable.

It is significant that the College Council is presently exploring the matter. Composed of students as well as faculty and administrators, the Council should be able to arrive at a solution which is agreeable to all segments of the community.

THE STAFF WISHES YOU A MERRY CHRISTMAS

The True Meaning Of Christmas

By MOSES KAMARA

Christmas is here again, and the new year is fast approaching.

Once more the world has plunged itself into many and sundry activities all purported to celebrate the birth of our Lord Jesus Christ.

Cities, towns, villages in every corner of the globe are being decorated with such magnificent splendor that surpasses the outward beauty during the first Christmas. People everywhere both Christians and non-Christians are making plans to commemorate the day.

It is altogether fitting and proper to celebrate this important day in the history of Christianity with pomp and merriment.

However, as we celebrate this anniversary of our Lord's birth let us recapitulate the message of the angel brought to the shepherds in the fields on that first Christmas. "Glory to God in the highest! Peace on earth toward goodmen."

In this day and age this message is no less important to us than to those shepherds over one thousand years ago.

Today, individuals are in conflict with themselves, people of various ideologies and religious beliefs are vying with each other for supremacy or domination.

Racial and social groups which have long suffered degradation and subjugation have demanded their rights. They have raised such loud cries that attempts to ignore their legitimate demands would spell anarchy.

This year saw losses of outstanding personalities who struggled for their countries and also for the good of mankind in general.

The most recent loss was President John F. Kennedy whose death is a dismal loss to the whole world. John Kennedy, America's first Twentieth century martyred leader, was the embodiment of youth and vitality, and a great force toward world peace.

If this year has seen turmoil and loss it has also witnessed gains. The limited test ban treaty was approved by many states. This treaty has been seen as a step in easing international tension, and a precursor to complete disarmament.

In religious affairs definite steps have been taken towards reform in the Roman Catholic Church. These reforms are believed to be a furtherance of the unity of the universal church. Other achievements have been made in science and technology, and numerous other areas of endeavor which make this year indeed memorable.

Therefore, as we celebrate Christmas and usher in a new year, let us think of the true meaning of the

Christmas message. There is great need for goodwill among men everywhere. For there could be no peace on earth unless and until there is goodwill, and love in the hearts of men which will replace hate, lust, greed, and all the time-old forces of evil which are canker-worms eating into our social and spiritual fabric.

Let us therefore resolve that 1964 will not see the unleashing of dogs to tear down freedom seekers; that rights of people all over the world regardless of race, creed and religious grouping will be safeguarded as taught by Christ and furthered by countless numbers both living and dead.

Let the past be a guide to our future, and as expressed by Oliver Wendell Holmes, "I find the greatest thing in his world is not so much where we stand, as in what direction we are moving."

Merry Christmas and a happy New Year to all readers!

Yuletide Fashions

By BRENDA MOORE

The Christmas season is a time of gay festivities, and what girl doesn't want to look her festivity best when she steps into one of the Yuletide parties?

If you want to be really stunning, here are a few suggestions:

First start with a fanny hairdo. Try a bewitching style with hair swept up away from the face and pinned with a hairpiece or a plumed hair style with lots of long sleek banks; or hair combed away from the face and fastened toosely with a pretty pin; or a simple, smart, smooth cocochon cut with long, thick bangs, and flowers added for interest.

With the popularity of the many fabrics this year, you may change your dress fabric as often as you change your mind. A floor length jewel-embroidered alabaster satin dress would be beautiful; silver brocade will be stunning; a bouyant jacketed silk evening dress will be majestic; while a long white ottoman dress would be simply lovely.

There is practically no limit to the choice of shoes. There are festive shoes in brocades, satins, and peade soies thta can be tinted to your favorite hue — be it silver tinsels or candle gold. For at home parties, why not try the jeweled evening sandal?

To add that special finishing touch use jewelry with lots of glitter. Add jewelry to shoes, bag, hair, clothes, or use necklaces, earrings, or bracelets.

Are you the hostess of the party? Look very dramatic in a long white wool skirt, ruffle-cuff silk shirt, and shinny cobra vest. Or wear a sweeping cotton organdy apron over a Christmas-red velvet dress. Not dramatic enough? Well, try a slim, supple column of midnight-black sequins.

MERRY CHRISTMAS!!

Campus Pulse

The REGISTER encourages letters to the Editor, but reserves the right to EDIT them. No letter will be considered for printing unless it is signed.

Editor of THE REGISTER:

I know that you are receiving many comments and criticisms concerning situations on our campus. This criticism concerns the cafeteria.

We, the students at the Agricultural and Technical college, are now young ladies and gentlemen; therefore, we should have some pride and dignity about us. There is no reason, as far as I am concerned, why students should consistently leave their plates and eating facilities on the dining hall tables, when they know that others have to use the tables as well. It would seem as though the notices in the cafeteria pertaining to this situation would be of some help, but they are not.

The cafeteria is a place designated for eating purpose and it should, without any doubt, be the cleanest building on our campus. Certainly the food isn't that bad, as to keep one from taking his plate and eating facilities to the dispensary.

Not all of our students are guilty of this offense, but the majority of them are.

Probably, the minority could devise methods of reminding the offenders to clear their tables.

Wilbert Lennon

Dear Editor:

I think registration this quarter was a riot!! If you weren't six feet tall, and weighed two hundred pounds, you were trampled to death by the crowds!

The problem seemed to be a lack of organization. I don't think students should have to wait in 30° weather for three hours or more to register! I would honestly be ashamed to tell anyone, outside of the A&T family, of our winter quarter registration.

Very truly yours,
Jacqueline Green

P.S. I still haven't registered!

tional Council of Teachers of English, Another article by Dr. Turner, "Smoke from Melville's Chimney," will be published in the winter issue of the Journal. The second article explicates the symbolism in Melville's "I and My Chimney."

DOWDY REELECTED

Dr. L. C. Dowdy, dean of instruction at A&T College, was recently reelected to a second term as secretary of the Arts and Sciences Division of the Association of State Universities and Land Grant Colleges.

Immediately following the elections conducted at the Association annual meeting in Chicago, Dr. Dowdy was named to the Executive Board of the division.

The Association has a membership of 125 state supported colleges and universities.

Dowdy, who came to A&T in 1961 as professor of education, was promoted to dean of the college's School of Education and General Studies in 1956. He served as acting president from January, 1962, through September, 1963.

LISTON LISTED IN PUBLICATION

Mrs. Hattie H. Liston, assistant professor of psychology, has received notification that she has been selected to appear in the 4th edition of WHO'S WHO OF AMERICAN WOMEN (AND WOMEN OF CANADA).

Mrs. Liston is a member of Alpha Kappa Alpha Sorority, Kappa Delta Pi Honorary Society in Education, and other professional, civic and social organizations.

Kenya: A Land Of Variety

Editor's note: Kenya was announced independent on Midnight, December 11, 1963. In celebration of the great event, Kenyan students studying in North Carolina will convene on this campus for an independence celebration.

The following article was written by Obadiah Ngayu, a sophomore at this institution from Nyeri, Kenya.

For more than forty years shrewd African politicians like Jomo Kenyatta, now the Prime Minister of Kenya, have been attempting to free their fellow Africans from the domination of British imperialists. I am proud to say humarrh because the date of Kenya Independence was December 12, 1963.

Briefly speaking, the story of the struggle for Kenya independence has been slow or hasty due to many factors. Some of these factors need to be mentioned here: (1) favorable location and first European exploiters; (2) favorable climate for people and animals; (3) groups of people of different background.

Kenya is located on the eastern coast of Africa and is bisected by the equator. On the east is the Indian Ocean and the Somali Republic. On the north is Ethiopia and Sudan. On the west is Uganda and on the south is Tanganyika.

Nairobi is located on the main railroad line about 300 miles from Mombasa. It is also 5500 feet high above sea level and on major highway running east to west. It is one of the largest integrated cities in Africa.

Most visitors are startled by its size and modern appearance for they do not expect to find skyscrapers, new housing projects, traffic lights, neon signs, and theaters. Yet that is what they see, for Nairobi is a modern, metropolitan city, the capital of Kenya and the commercial center of East Africa. Such development makes it easy for more inventors to come,

while, on the other hand, it makes it hard for the imperialists to give up their imperialism.

In the eastern part of Kenya much of the transportation is done by steamship, with Mombasa and Malindi as the chief ports. These serve as natural seaports and gateways of East Africa.

In 1493, the famous explorer Vasco da Gama appeared at Mombasa seaport with four Portuguese ships on his way to India. In 1593 the Portuguese built Fort Jesus in Mombasa as a fortress against the Arabs who had arrived on the eastern coast of Africa to trade in about A.D. 900.

Meanwhile a flourishing slave trade had been carried on in East Africa with the Island of Zanzibar as its center.

The nineteenth century was the era of European explorers in East Africa. A German traveler was the first European to see Mount Kilimanjaro the fourth highest mountain in the world. Dr. Johana Krapf signed Mount Kenya. These discoveries heightened the interest of Europeans in East Africa. The expeditions of David Livingstone did much to farther arouse curiosity about this part of the globe.

Missionaries began to come to Kenya in increasing numbers. Most of them combined their books with the opening of schools. Some critics say that the schools were opened only for the sake of teaching Africans how to read the Bible. Nevertheless, most of the schools now, which teach more than reading the Bible, are run by missionaries with the help of the Kenya Government.

Many European missionaries have sacrificed a great deal to help the African, and European farmers have endeavored and endured hardships of many kinds to build homesteads in Kenya. These and people like them have contributed greatly to the life of Kenya.

Others, however, came to seek a fortune or a place to lead a comfortable life with plenty of servants. Or they came with an attitude of

race superiority and snobbery. Some have been eccentrics who could not get along at home and wanted to try their luck in an African land. Such persons have made it difficult for Africans to gain their independence. They have been liabilities rather than assets to Kenya.

One is surprised to see the larger number of Asians in Kenya until one learns that these Indians and others came first as rail road workers, just as the Chinese came to the United States to help build our railroad.

The African chiefs who by then knew little about European imperialism received all these people in loving kind hearts. Then Kenya was proclaimed a British Colony in 1920 with little or no consent from its citizens.

Just like others nations of the world some African tribes were fighting between themselves, from time to time with the spirit of uniting or centralizing their socialistic ideology. Yet the colonialists used their policy of "divide and rule" to disunite Africans. Therefore Kenya was divided into tribal provinces which made it rather tough for Kenyatta and his colleagues to unite Africans.

This dynamic leader with the help of his colleagues had been preaching unity and equality among all Kenyans through many hardships. He is an eight years prisoner graduate, 73 years old, and the press calls him "Burning Spear" for his political mystery. His fruits were shown on December 12, 1963, when Kenya became independent.

If you want to see the world on a small scale, the country of Kenya in Africa is a good place to go. It is shaped like a shield and is little larger than France. Kenya's total area is 225,000 square miles.

The topography or landscape is varied. A large part of the country in the northern border is arid. The rest of the other parts in the country have beautiful mountains, rivers, lakes, craters, valleys, fertile plains, plateaus, and other interesting geological features. There is almost every stage of economics and social development in Kenya, from the nomadic tribes of the north to the city dwellers of Nairobi, Mombasa, Nakuru, Kisumu, and other towns.

The British settlers who then thought they had found free land were challenged by Kikuyu. As time went on British settlers seized more land than they could cultivate. In addition to that they named them "White Highlanders."

The resentment of the Kikuyu people toward British was not great at first, but over the years it grew until many of them took part in Mau Mau movement of the 1950's which brought heavy bloodshed of both Europeans and Africans.

THE SAFE WAY to stay alert without harmful stimulants

NoDoz keeps you mentally alert with the same safe refresher found in coffee and tea. Yet NoDoz is faster, handier, more reliable. Absolutely not habit-forming.

Next time monotony makes you feel drowsy while driving, working or studying, do as millions do . . . perk up with safe, effective NoDoz tablets.

Another fine product of Grove Laboratories.

NEW CHEVELLE!

BY CHEVROLET

The kind of go—6 or V8—you'd expect from one of Chevy's great highway performers. Come on down and drive it.

The kind of comfort you'd expect in a large interior. Come on down and sit in it.

The kind of fresh styling—inside and out—that makes it the year's smartest surprise. Come down and stare at it.

New Chevelle Malibu Sport Coupe

Now—Chevy spirit in a new kind of car!

We built this one to do more than just stand around looking beautiful. Held its weight down in the 3,000-pound range. Then built four lusty engines—two sixes and two V8's—with output all the way up to 220 horses*!

And if that makes you think this is one frisky car, you've got the right idea.

You've also got a roomy car here. Yet its 115-inch wheelbase keeps it highly maneuverable in traffic and very easy to park.

With its Full Coil suspension, it's got a ride that reminds you of the Jet-smooth kind the

way it muffles noise and cushions bumps.

And the fine hand of Body by Fisher craftsmen shows up beneath this one's suave good looks, too.

Sound good? There's more. Like the fact that Chevelle comes in three series with eleven models—convertibles, sport coupes, sedans, wagons, even Super Sport models with front bucket seats. Like the fact that (and see if this isn't one of the nicest surprises of all) the new Chevelle comes at an easy-to-take price!

Like to hear more? The listening's wonderful at your Chevrolet dealer's—and so's the driving.

*Optional at extra cost

See five entirely different kinds of cars at your Chevrolet Showroom—CHEVROLET, CHEVELLE, CHEVY II, CORVAIR & CORVETTE

Styling At The
Slack Shop

301 South Elm St.

Basketball Picture Looks Promising

By REGINALD HUGHES

It is basketball time in Aggie Land once again and this year's crop of cagers look extremely talented in some positions and some what in experience in others.

The Aggie big men seem to be in excellent shape as far as experience is concerned. Led by James Jackson, a starter last season, who averaged about 16 points a game, the Aggies should have no trouble in the rebounding and scoring departments.

Warren Davis, 6-5, a freshman sensation during the 61-62 season is back and in excellent shape and from his performance thus far will be rough off the boards and present quite a scoring touch from the pivot.

Irving Mulcare, a 6-4 forward with two years of playing experience, should blend well with the Aggie big men as he is a very aggressive rebounder and holds his own in the scoring column as well.

James Webber, 6-5, who was forced to sit out last season with a broken ankle, is in top shape this season and is sure to be a big asset to his team from his pivot or forward position as he is quite capable of playing both spots.

Ted Campbell, a 6-5 freshman from Philadelphia, Pa., is a sure prospect to see much action before this season is over. He is the possessor of a fine scoring touch and

is an excellent rebounder. He too can play either forward or the center spot.

Tony Skinner, 6-4, is a very good rebounder and though his shooting leaves something to be desired at times he is a great asset with his passes from his forward slot. Before this season is over Tony could be a very good corner man for Coach Irwin.

The back court men are perhaps the most inexperienced men on the square but they are showing rapid signs of progress.

Wylie Briggs returned to the square after a year's absence and is now leading the corps of back court aspirants. Briggs is a sure ball handler, and adept shooter and drives well. He is also capable of taking his man inside and scoring very effectively.

Robert Saunders, a sophomore this season, is a very adept shooter as witnessed by his 14 points against Fayetteville and is also improving with his ball handling. Rob should settle down after a few games and become an excellent back court man.

George "Red" Mack, a 6-2 freshman from Philadelphia, Pa., is setting the nets on fire with his deadly scoring touch from all over the court and is improving with his ball handling. Many observers believe that Mack could be one of the greatest back court men in Aggie history. He drives well, has

a fine scoring touch and is still improving his defensive game.

Walter Holland, a sophomore this season, still has not blossomed into the player Coach Irwin expects him to but he is definitely showing signs of improvement. Walt drives well and has a fine scoring touch but his defensive work leaves something to be desired.

Maurice McHartley, a senior, is out of action with a broken wrist sustained in the Blue and Gold game. He should be ready in about five or six weeks to anchor this fine back court aggregation. Maurice is an excellent shooter and defensive ball player and should give that added zip to the club.

While Coach Irwin won't give any predictions about his club, he will say however that the club should be a very representative one capable of playing excellent ball before this season is over.

The teams to watch this season should be North Carolina College, J. C. Smith, Winston-Salem and Virginia State who is our next opponent after the holidays. The State Trojans are a bunch of excellent players and they gave the Aggies fits last season in their meeting here. This should be quite a contest as it will be our toughest opponent and perhaps our first chance to see what the Aggies can do against a championship contender.

Aggie Swimmers To Participate In Nine Meets

The A&T College tank team will participate in nine dual swim meets in the season which opens this month.

The home schedule, all set for the Charles Moore Gymnasium, lists: Tuskegee Institute, November 30, 2:00 P.M.; Morgan State College, January 18, 2:00 P.M.; Howard University, January 28, 4:00 P.M.; Hampton Institute, February 3, 7:30 P.M. and Johnson C. Smith University, February 8,

7:00 P.M.

The road schedule includes: Hampton Institute, December 14; Johnson C. Smith University, December 16; Howard University, January 10, and Morgan State College, January 18.

The team will also participate in the CIAA Swimming Championships to be held in Washington, D. C., February 20-22.

Forrist Willis is head swimming coach for the Aggies.

'TIS THE SEASON TO BE JOLLY

If you have been reading this column—and I hope you have; I mean I genuinely hope so; I mean it does not profit me one penny whether you read this column or not; I mean I am paid every week by the makers of Marlboro Cigarettes and my emolument is not affected in any way by the number of people who read or fail to read this column—an act of generosity perfectly characteristic of the makers of Marlboro, you would say if you knew them as I do; I mean here are tobaccoists gray at the temples and full of honors who approach their art as eagerly, as dewy-eyed as the youngest of practitioners; I mean the purpose of the Marlboro makers is simply to put the best of all possible filters behind the best of all possible tobaccos and then go, heads high, into the market place with their wares, confident that the inborn sense of right and wrong, of good and bad, of worthy and unworthy, which is the natural instinct of every American, will result in a modest return to themselves for their long hours and dedicated labors—not, let me hasten to add, that money is of first importance to the makers of Marlboro; all these simple men require is plain, wholesome food, plenty of Marlboros, and the knowledge that they have scattered a bit of sunshine into the lives of smokers everywhere; if, I say, you have been reading this column, you may remember that last week we started to discuss Christmas gifts.

Do you know someone who is interested in American history?

We agreed, of course, to give cartons of Marlboro to all our friends and also to as many total strangers as possible. Today let us look into some other welcome gifts.

Do you know someone who is interested in American history? If so, he will surely appreciate a statuette of Millard Fillmore with a clock in the stomach. (Mr. Fillmore, incidentally, was the only American president with a clock in the stomach. James K. Polk had a stem-winder in his head, and William Henry Harrison chimed the quarter-hour, but only Mr. Fillmore, of all our chief executives, had a clock in the stomach. Franklin Pierce had a sweep second hand and Zachary Taylor had seventeen jewels, but, I repeat, Mr. Fillmore and Mr. Fillmore alone had a clock in the stomach. Some say that Mr. Fillmore was also the first president with power steering, but most historians assign this distinction to Chester A. Arthur. However, it has been established beyond doubt that Mr. Fillmore was the first president with a thermostat. Small wonder they called him Old Hickory!)

But I digress. To get back to welcome and unusual Christmas gifts, here's one that's sure to please—a gift certificate from the American Chiropractic Society. Accompanying each certificate is this winsome little poem:

Merry Christmas, Happy New Year,
Joyous sacro-iliac!
May your spine forever shine,
Blessings on your aching back.
May your lumbar ne'er grow number,
May your backbone ne'er dislodge,
May your caudal never dawdle,
Joyeux Noel! Heureux massage!

© 1963 Max Shulman

The makers of Marlboro, who take pleasure in bringing you this column throughout the school year, would like to join with Old Max in extending greetings of the season.

Don Holt's career is off to a fast start

at Western Electric

D. M. Holt, B.A., Lincoln University (Missouri), '62, joined Western Electric immediately upon graduation. He wanted challenging, diversified work in computer technology—and he wanted it fast. Don was not disappointed. Right now, he's on a 10-man Engineering Research team. This group is developing and implementing a computerized production control system that will bring about both man-power and manufacturing economies. Don is currently creating and programming two important manufacturing and material files on magnetic computer tape and will be responsible for their maintenance. Also appealing to Don at W.E. were advanced study opportunities through numerous management courses and a Company-paid Tuition Refund

Plan. Don is happy with his progress and is sure Western Electric is the right place for him. What about you? If you set the highest standards for yourself, enjoy a challenge, and have the qualifications we're looking for—we want to talk to you! Opportunities for fast-moving careers exist now for physical science, liberal arts and business majors, as well as for electrical, mechanical and industrial engineers. For more detailed information, get your copy of the Western Electric Career Opportunities booklet from your Placement Officer. Or write: Western Electric Company, Room 6405, 222 Broadway, New York 38, N.Y. And be sure to arrange for a personal interview when the Bell System recruiting team visits your campus.
