Rankin Named Dean Of Instruction

Two Others Receive Promotions
As Personnel Changes Are Made

A&T Women Challenged To Shoot For The Highest

At A&T College have been promoted in personnel changes announced by Dr. L. C. Dowdy, newly-elected president.

Vance E. Gray, administrative assistant to the president, has been named acting dean of instruction, the position held by Dr. Dowdy prior to his assumption of the presidency. Dr. Dowdy has said that he intends to encourage higher scholastic achievement among A&T students and to emphasize breadth in the liberal arts courses and depth in the technical courses.

The new dean of instruction is a native of Greensboro, North Carolina. As an undergraduate at A&T College, he served as president of the Student Council and as a member of the varsity debating team. He holds the master of science and doctorate degrees from the Pennsylvania State University.

The new dean of instruction is a Polytechnic Institute of Philadelphia, Theater of Operations for which he received two battle stars. He has been employed at A&T College since 1951, first as acting dean of the School of Agriculture, and as an assistant to the president. He became dean of students in another few years. Addressing himself directly to the students, Dowdy said, "Your future will be what you make it, not what you dream, but what you earn."

Dr. Dowdy told the students, "No set of rules will change the regular weekly student assembly."

A&T Women Challenged To Shoot For The Highest

Dr. Glenn F. Rankin has announced a list of personnel promotions this week by Dr. L. C. Dowdy, president of the College. Dr. Rankin, who has served as dean of students since 1950, was promoted to dean of instruction last week.

The speaker was introduced by Judge Juanita Kidd Stout, left, judge, County Court of Philadelphia, Pennsylvania, who recently returned from a visit to the A&T College observance of Women's Weekend, is greeted by Commonwealth's Attorney, B.C. Johnson, right, dean of women.

A&T College women have been challenged to shoot for the highest goals. The challenge came from Judge Stout, who addressed the seniors during the observance of the annual Women's Weekend.

Rankin Named Dean Of Instruction

The speaker was introduced by Sara Beadner, president of the Sen­

Judge Stout told the students that the most interesting part of the observance was the exchange of questions which often tend to "average out" group expectancy and achievement. "In this averaging process," he said, "it should be obvious that the real result is something drastically better than figures. Excellence goes out what you make it, not what you dream."

The speaker condemned those programs and fields which women often tend to "average out" group expectancy and achievement. "In this averaging process," he said, "it should be obvious that the real result is something drastically better than figures. Excellence goes out what you make it, not what you dream."

The main address at the college's Relations Committee. He delivered in what he can do.

Students receiving scholarship awards included Willie P. Washing­

What About USNSA?

How many of you know what the United States National Student Association is? How many know what the NSA coordinator is and what his duties are?

The chances are that very few A&T students could supply adequate answers to the above queries, but all are questions which many of you, for one reason or another, are missing many of the advantages and opportunities which go along with belonging to the organization.

Several years ago the University of Wisconsin, student leaders from colleges and universities throughout the nation met at the first National Student Congress and formulated the Student Association. Federal leaders from colleges and universities throughout the nation met at the first National Student Congress and formulated the Student Association. Nebraska, Kansas, Missouri, and Iowa, among others, met to determine the function and purpose of the group. The Association's purpose, which is held basically, is to enable American students to determine themselves with the thinking of youth from the hearts of the world, as well as to provide the opportunity for students with a "futurist international experience."

The students arrived in the U.S. in the 21st. of December last year for a three-months' stay. They met nearly all American and Jewish students to exchange ideas on the problems they face in their respective countries. Leaders in various fields of international affairs, education, and government also took part in the conference.

The Association has started to collect and distribute educational materials to ill-equipped Negro schools and colleges in the South. Its many liberal programs have provided opportunities for American students to work in classrooms and help free Negroes.

Recently won international essay competition Secondary School, who recently visited the United States National Student Association, has sponsored drives to aid SNCC field workers in Mississippi and voter registration drives. It has long been a fighter to the Negro, the contribution and exchange of ideas are gained at the many conferences and seminars annually sponsored by the organization.

The publication, for instance, attends to conferences on international affairs. Others have considered race relations, national policy, and student-administration affairs. These are a sampling of the many jobs which USNSA is doing.

Just Give Us The Facts, Professor (ACP) — Sometimes a professor just gets tired of students who want to be led by the hand through a course.

F.A.S.T. — A.T. — A.T. College is a member of this organization (or at least it is supposed to be), yet we have chosen to take little advantage of the many opportunities afforded. We have done little for the organized and nonexistent groups sponsored by the organization.

Little effort, if any, is made to keep in touch with the national office. (One USNSA official reported being in Greensboro for 21 hours and not being able to contact anyone connected with the A&T Student Council.)

USNSA has provided a voice for American students on campus from which the students at American colleges and universities. Today it serves some 375 colleges and university student governments, representing over a million students.

It has gained the recognition, respect and support of leaders in all areas. Its advice includes some of America's leading educators and journalists.

How Good Are You At Precis?

How good are you at precis? They can become a wonderful training ground for you. If you took some of the incoherent, nonsensical passages out of newspapers and magazines, you would only have to make a few changes to put them in readable form.

In short, they make a strong point of adding some of the fruits of laboring with the vine. Will we?

How Much Do You Know About Other Lands?

How much do you know about the United States National Student Association? How many know what the NSA coordinator is and what his duties are?

Gulf Provides Tourguide Maps
Of World's Fair

The New York World's Fair has something for everyone, and Gulf Oil Corporation claims that it has something for everyone going to the fair. The fairgrounds in Queens, with its mixture of industrial, international, and federal and state exhibits, seems like a jigsaw puzzle. The free map is intended to help solve the puzzle.

The multi-colored foldout map guides the visitor to each of the hundreds of attractions. It also tells in detail how to get to the fair, to the fairgrounds in a map of the metropolitan area. Various directions and maps are routed as desired.

The map shows that at any one of more than 2,000 Gulf service stations in the New York area or visit to Gulf's Tourguide Bureaus. The addresses of the bureaus are given in the Gulf areas in Chicago, in Pittsburgh, Philadelphia, Atlanta, and Houston.

Students In Research Course
Study Family Decision Making

Sociological research, with Donald Allison as instructor, is quite an interesting course, at least five members of the class are genuinely pursuing a research project which seems to think so.

The group, composed of Mary Booman, Karen Gardner, Thomas Conley, Rosemary Sandone, and Harold Seaborn, admit that they entered the course with some reluctance. Having formulated a research team and come up with a project, however, they now label the course "enjoyable."

Family life, it appears, is an area of interest to each member of the team. This interest resulted in selecting the area of research. The group has decided on decision making among husband and wives, and will be meeting every Tuesday night to work on the topic for their research project.

Based upon information gathered by leading authorities, the group has found that in the majority of households, there are areas in which the husband and wife are the sole decision-makers, in making decisions pertinent to the particular areas, and that there are areas in which both the husband and wife have an influence on the decision-making process. It is the areas in which both parties are involved in the making of decisions that the group has chosen to study. The group points out that many studies have been done within the college environment and the city of Greensboro, but that they feel that their work will be done in residential areas of Greensboro. They will obtain their information through questionnaires which will be distributed in selected sections of the city.
