Total Enrollment To Exceed 3200 Mark
Freshman Class May Reach 1200 As Fall Registration Continues

Total enrollment at A&T College is expected to leap beyond the 3200 mark as an estimated 1200 freshmen descended upon the campus for orientation and other first quarter of college work.

According to administrative officials, the freshman attendance should exceed last year's by 500 students. The figure represents a high mark for recent years.

NEA Official Plans Visit To Campus

Mrs. Thelma F. Davis, president of the Department of Classroom Teachers of the National Education Association, will be a guest on this campus Tuesday, September 22.

At the invitation of Dr. L. C. Dossy, A&T College president, Mrs. Davis will attend a luncheon in Murphy Hall at 1:00 P.M. Here she will meet four officers of Student NEA, NCTA, officers and members of the local James E. Dudley chapter, and the president of Bennett College's David J. Jones chapter. Other plans will include clinical visits.

At 2:00 P.M. Mrs. Davis will meet with the Teachers Education Committee in Roanoke Hall.

Mrs. Davis' trip to the Piedmont area is part of a "gourmet" visit in North Carolina, according to Assistant Superintendent district director of NCTA's Department of Campus Visitation, Dr. Proctor.

"Mrs. Davis will offer general advice on problems concerning classroom teachers, and she will visit the students on the campus to help them solve any problems that may arise," Dr. Proctor stated.

A first-grade teacher in Griffin, Georgia, Mrs. Davis took over the post of the world's largest professional organization in Atlanta, Georgia, in July after having served a year as an assistant director. A&T College is a member of the Southern Regional Council, the National Committee and the General Board of Education and Public Relations.

Other items on the orientation schedule included meetings with Administrative Department, Student Personnel, the Student Personnel office, and the Board of Education.

Orienteration week officially closes Thursday when freshmen girls received a "lets get acquainted" party, a "let's get acquainted" party, and a freshman reception. Registration will not begin under way for freshmen Thursday when they meet with advisors and an older class registration procedures which had initiated the previous Tuesday. Registration is ending today and tomorrow for freshmen and sophomores.

Classes begin 7:00 Monday morning.

Welcome, New Citizens

To the nearly 1200 new citizens of the A&T community, we extend a hearty welcome. We hope that you will find your stay here both pleasant and educational. At the same time that we offer you our hand of welcome, however, we also offer you a challenge to make the most of your college experience and to help influence us to come to A&T — and we hope they were all positive influences — make one thing definite, and that is that you will take full advantage of your stay at A&T. A&T can be an exciting place with football games, pep rallies, dances, movies, sororities and fraternities, and other social activities. It is up to you to make the most of them.

College days are ones that you will not soon forget. They provide another layer on a foundation upon which you may build. Make the most of them.

Our Population Explosion

America's college campuses are finally being submerged in the tide of the population explosion. All across the country, students are entering colleges and universities in astounding numbers. The population explosion has affected many aspects of our daily life, from housing to transportation, and it has also had a significant impact on higher education. In this respect, it appears that A&T is not alone in this problem, as other schools face the same. In this respect, it appears that A&T has the biggest problems of all. Student enrollment figures in North Carolina alone indicate an increase unprecedented numbers. Students are entering colleges and universities in astounding, in the tides of the population explosion. All across the nation, students are entering colleges and universities in astounding numbers.

Fall Fashions

By BRENDA MOORE

Since the new fall fashions came out last spring, it has been apparent that there is a new way of thinking about the way women carry with them oblige obligations that she carries with it obligations. She carries with her the weight of her own body, and in her own person her own values and personal standards. I want you to know, then, that the 20,000 students who come to A&T are going to be the first to learn this.
Dr. L. C. Dowdy Delivers Address
On The “State Of The College”

Faculty and staff members at A&T College were told that the predominantly Negro institution, today, also has a third Imperial responsibility.

The speaker was Dr. Lewis C. Dowdy, president. He was delivering the “State of the College” addreesa at the opening general session of the annual Profession Faculty-Staff Institute.

“While most college and university faculties face the responsibility of meeting the needs of quality and quantity,” he said, “we in the predominantly Negro colleges also must meet the needs imposed by deficiency.”

He said, “As we take our places in the classrooms this year, we must confront many who have not accepted the equality, the laws of the land, the dream of the American education system that mark the walking wounded of a three-century battle for freedom and full citizenship.”

“These people, too, can and must be helped. They must be restored to economic, political, intellectual, and spiritual health, and we must do it.” He continued.

He told the group that crumbling race lines in employment opportunities had brought to the A&T campus more than 100 recruiters from the leading industries of the nation and government, seeking Negro college graduates. This, he added, impresses upon the teachers in these colleges a new and a bigger challenge to “provide the best possible education for these young men who come to our doors.”

Also speaking at the session were Dr. F. A. Williams, director of Extension Services, who delivered the keynote address for the three-day Institute, and Dr. Glenn F. Randolph, dean of instruction, who outlined the general college program.

The three-day Institute also featured a series of smaller group discussions in which faculty members explored ways and means of improving college services.

Dr. L. C. Dowdy Delivers Address
On The “State Of The College”

At the annual Institute Dinner, held on Friday evening, Howard C. Burnett, Charlotte, presented to Dr. Dowdy a check for $1,175 to cover 1964-65 grants to 20 Alumni Scholars being supported in part by the normal school.

KNOX ISLAND CITY 1, NEW YORK

This is the average man.
The men studying him aren’t.

Putting together the results of measurements, Air Force scientists designed this “typical” head. Its purpose? To help provide better protective equipment for Air Force flying personnel.

But the young man working on this project is one of the average Air Force officers, they are working on a field that requires a high degree of technological insight.

The fact is, most Air Force jobs today call for advanced, specialized knowledge. And they give young officers the opportunity to undertake vital missions of great responsibility.

For instance, an Air Force scientist may be exploring the complex field of aerodynamics. Another may be engaged in biochemical research. A third may be working to develop the technology of nuclear weapons.

How many other professions give a young man such an important job to do right? You can get started on an Air Force officer career by enlisting in the Air Force ROTC. For information, see the Professor of Air Science.

Speaking Of Sports: The “Big Three”

When kickoff time rolls around for the 1964 football season in the Central Intercollegiate Athletic Association, the traditional “Big Three,” the A&T College Aggies, North Carolina College Eagles and the Morgan State Bears, will have company.

The Morgan State College Spartans and the Maryland State College Hawks now have joined five teams that are expected to add a great deal of excitement and chief rivalries to the 14-member CIAA.

Despite the robust size of the conference, it marks the first time in recent years that as many as five teams have been considered as serious championship contenders.

Haring an unexpected development in which their teams would knock each other, and this could happen, the 1964 CIAA champions are sure to emerge from the five. Past history suggests this.

Norfolk State, admitted to the conference two years ago, may be the surprising team of the lot. The former junior college, which has just graduated its first four-year class, with this season be playing a full schedule of four-year contests. This means a more experienced team. That could make a big difference and only a matter of fortune. All Norfolk State is known for in an outfit which has a few players who have played well in their last two years. This is the year to watch when an upset is in the cards. Norfolk State is sure to have something left in their system and may be the team that upsets one of the CIAA’s elite.

Eustis Coaches Scout Aggies By Helicopter

A smooth, yet fully legitimate, scouting technique was last week pulled against the A&T College Aggies.

As the Aggies took the field on Saturday, September 26, for their first game of the season, they were to be the first full day rehearsal in preparation for the game on the next week-end.

A group of Eustis coaches were present at the stadium. The "whirly-bird" circled over the campus of times and settled on a scattered area that overlooks the stadium from the northwest corner.

Two Army officers stepped out of the contraption. They were Eustis coaches who joined in with about 500 other spectators on hand for the event.

Apple coaches acknowledged that the Aggies might not have been able to do something about the matter, for the scrimmage session was open to the pubic.

The principal weakness the Aggies will have to solve in a limited depth in experienced midfield line. If this situation is met, the Aggies will have to be a tough squad to beat.

College Seniors May Take the NTE On Different Dates This Year

College seniors preparing to teach may take the National Teacher Examinations on five different dates this school year. This announcement was made by Dr. Charles L. Hayes, chairman of the Department of Education and Psychology.

Dates set for the testing of prospective teachers are December 12, 1964; March 20, July 17, and October 2, 1965. The tests will be given at A&T College on each of these dates.

Scores on the National Teacher Examinations are used by many large school districts for employment of new teachers and by several states for certification or renewal of teaching licenses.

In North Carolina, a minimum score of 450 on the NTE is required for an initial certificate; and 400 for a provisional certificate.

Scores on all full day of testing, protracted that with a 400-449 range may obtain a certificate which is good for two years. Within this two year period, he may take the NTE examinations only twice to reach the 450 mark.

On each full day of testing, prospective teachers may earn a minimum of 400 on the examination, which measures the competency of new teachers and by several states for certification or renewal of teaching licenses.

E. F. Corbett Wins Post In Denver

E. F. Corbett, public information director at A&T College, was selected president of the Denver Psi Phi Fraternity at the 10th annual convention in Denver, Colorado, last month.

Corbett, who has served for the past three years as vice president of the fraternity, said he expressed interest in the position, the second in command of the national fraternity, at the national convention of the Omega Psi Phi Fraternity, which was held in Denver.

Among other delegates representing the A&T College chapter in Greensboro were Joseph C. Shelton, editor of the A&T College Student Government and serving second vice grand master of his fraternity; Dr. George C. Bass, dean of the Graduate School; and Dr. Alfred Beer, professor of education.

A & T Alumnus Is Admitted To N. C. Bar

A former president of the A&T College Student Government was admitted to the North Carolina Bar yesterday by George Meares, formerly of Greensboro, now a probation officer for the Superior Court in Greensboro.
