The Economics Club founded a tour to Charlotte recently.

Upon arrival at the bank, a guide explained the procedure for the tour. The tour covered the entire bank — from the vault, which is walled with steel and controlled by security equipment, to the teller windows, where tellers process transactions.

The tour ended with the viewing of a film, "The Economics Club," which reviewed the history of the bank.

Next, the tour proceeded to the Accounting Department and the Credit Department, where all the bank cards and checks were handled. A tour of the Reserve Bank was also made.

The tour ended at the Economics Club office, where the officers and members received a report on the trip. The report included a discussion of the bank's role in the community and the history of the Economics Club.
