College Plans Variety For Summer Study

Campus Leaders Hold Conference
Director Of NSM Delivers Speech

"The Campus Leader, a Symbol of Growing America," was the theme of the second annual leadership conference held May 21 and 22 in the Harrington auditorium. The conference was sponsored by the Department of Education of the University of North Carolina. The theme was chosen because of its potential for increasing the interest of the group in the role of the leader and his relationship to the college. The conference was attended by over 100 students from the state of North Carolina.

Dr. C. Hayes, chairman of the Department of Education and Psychology, was the keynote speaker. He discussed the importance of leadership in the modern world and the role of the campus leader in promoting social change. He emphasized the need for leaders to be effective communicators and to be able to influence others to achieve common goals.

The conference also included a panel discussion on the role of the campus leader in promoting social justice. The panelists were representatives from a variety of organizations, including the American Civil Liberties Union, the National Association for the Advancement of Colored People, and the National Organization for Women. They discussed the challenges of leadership in a time of social and political change.

The conference concluded with a luncheon for the campus leaders and their guests. The luncheon was sponsored by the Department of Education and Psychology and was attended by over 100 students from the state of North Carolina.

In Annual Exercise On Sunday

30 Student Nurses Receive Caps

Barbara Richardson, Goldsboro; Elizabeth Robinson, Raleigh; Brenda J. Smith, Winston-Salem; and Mary A. Smith, Greensboro, were among the 30 student nurses who received their caps at the annual exercise held in the lower lobby of the Greensboro Academy of Medicine on Sunday, May 22.

The exercise, which is held annually, is a traditional event in the nursing profession. It is a time for the nurses to receive their caps, a symbol of their commitment to the profession. The nurses also perform several social and cultural activities during the exercise.

Receive Caps On Sunday

Undergraduate students will be able to attend the exercise and receive their caps. The exercise will be held on the campus of the North Carolina Agricultural and Technical State University in Greensboro. The exercise will also feature several cultural and social events, including a performance by the university's choir.

The exercise is an important event in the nursing profession, and it is a time for the nurses to receive their caps, a symbol of their commitment to the profession. The nurses also perform several social and cultural activities during the exercise.

The exercise will be held on the campus of the North Carolina Agricultural and Technical State University in Greensboro. The exercise will also feature several cultural and social events, including a performance by the university's choir.
Commencement Nears

In June, around 7 million Americans will receive a diploma, signifying completion of some stage of the learning process. To almost seven times that number, the close of the school term also brings an important, if less dramatic, milestone — 40 years of age.

The June phase of the educational cycle is as familiar a part of our lives as is the passing of the seasons.

The mystery behind the Flashing Red Light

By EULA BATTLE

Instead of going South, or further south as one individual interjected, Ned Franklin union members were building of Buildings and Grounds. It was only after a year, nor can they try to erase their shortcomings in the time remaining; however, a new school year is coming, bringing with it a new freshman class, a new year’s schedule, a new set of goals, and it is hoped — a new bill of rights.

Bill Of Rights Questioned

Looking back at student interests and activities of the past year, a near-sighted person could very easily see that the students of this college have a clear cut idea of what they consider important things to strive for. They could be listed as a bill of rights such as the following:

The right to be a student — in the academic program.

The right to protest any and all things with which they do not agree without the slightest regard for proper procedures, as was evident in the Food disruptions.

The right to vote rules of “no smoking,” in the cafeteria, classrooms, and Harrison Auditorium.

The right to sit back and criticize invited lecturers and the program they present.

The right to maintain continuous noise in the dormitories which have been placed there for the students.

The right to keep trays on the tables; but at the same time refuse to suggest someone or anyone who is considered a pest or a disturbance.

The right to send this special greeting.

To everyone who is one step ahead of you in your future careers.

The right to violate rules of “no smoking” in the cafeteria.

The right to be a member ofTHE REGISTER, and be a part of our lives as is the passing of the seasons.

My best wishes are with you in June and in all the months and years of your future careers.

— The Honorable Hubert H. Humphrey

Just Reminiscing

By PRYCE BALDWIN

The years, one thousand nine hundred sixty-six, and the one thousand nine hundred sixty-sevenpered us; but on the other hand, they have been quite disastrous for others.

Tommy Dorsey or Graduation day for the Class of 1966; and the memories of these years for their momentous occasions still remain with us.

In order to help you determine what type year you are having, I would like to offer you some general advice about some things you have been listening to recently.

As the college year draws to a close, it is appropriate to remind you that the Spring term of the academic year means "stop," a flashing red light means "stop," a flashing red light means "dear," a flashing red light means "yes," a flashing red light means "no," and a flashing red light means "goodbye."
Club Makes Tour Of Food Plants In N. C. and Va. The Agriculture-Economics Club recently took a field trip to various processing plants and research laboratories in North Carolina. The three-day tour included visits to Raleigh, ROcky Mount, and Wilson. In Virginia members visited plants in Norfolk, Smithville, and Richmond.

Dr. Howard P. Robinson, chairman of the Department of Agricultural Economics, accompanied the group as they sought information about modern methods of processing and research.

Club members who went on the tour were Russell Harris, freshman from Tarboro; Earle Taylor, freshman from Tarboro; Willie Stilabough, senior from Bladenboro; Samuel B. Tate, junior from Morehead; John Renard, senior from Vanhose; Lawrence Clarke, sophhome from Lincolnton; and John H. Barrett, senior from Whiteville, who is president of the club.

The trip was sponsored by the Department of Agricultural Economics.

Intern Program (CONTINUED FROM PAGE 1) Ed. Robinson's dissertation on "The Progessive Value of Certain Factors Contributing to Academic Success and Failure" is included in "The General College of The North Carolina College Bulletin, 1939-1940" published by the College of The North Carolina College, 1940. He has also contributed to "Col- lage and Residence Counselors," "An Intern Program" and "The Freshman Testing Program at the University of Illinois." Dr. Robinson is also affiliated with the American Association for Higher Education, the Southern Association of Colleges and Secondary Schools and the American College Testing Program.

In addition, Dr. Robinson is a member of the Educational Research Council of the Southern Association of Colleges and Secondary Schools.

Leadership Conference (CONTINUED FROM PAGE 1) and resolutions. This was followed by a "Hot Seat" session, in which members of the administration asked pertinent questions to the students.

The conference ended with the presentation of awards to outstanding students and organizations. The awards were as follows:

(1) Music Educators National Con- ference, Raymond English; Agree- ment, James Jones, III; Ann- al Air Society, James Pagnon; Student National Educational As- sociation, Robert P. Cox; and Technical College of North Car-olina, John M. McPherson.

Dr. Robinson also spoke at the Teachers College "Intern Program" to College Teachers Look at College Training.

Professionally, Dr. Robinson is affiliated with the American Association of University Professors, the Association for Higher Education, the Southern Association of Colleges and Secondary Schools, and the American College Testing Program. He is also a member of the Educational Research Council of the Southern Association of Colleges and Secondary Schools.

Dr. Robinson has been an associate professor of education at the University of Illinois and is the father of two children, ages 9 and 11.

The trip was sponsored by the Department of Agricultural Economics.

Bethea, Phillips Win Awards At Annual Athletic Banquet

Elvin Bethea of Trenton, N. J., and Monte Phillips of Wilkesboro, N.C., two star athletes at A&T College, took the lion's share of honors at the annual athletic dinner.

Tanya Yarbough, a star in basketball and baton twirling who led the A&T women's team to victory in the annual track meet, was named Most Valuable Player and Best Female Athlete of the year.

Bethea, a 24-year-old tall and rangy fellow who was a two-sport star at North Carolina A&T, was named Best Male Athlete of the year.

Phillips, a star in basketball and track, was named Most Valuable Male Athlete.

Bethea and Phillips led A&T to a national championship in the college division of the 1965 NAIA Track and Field Championships.

A&T Aggies Defeat Rams

A&T last week downed the Win­ston-Salem State Rams, 154-136, in a CIAA baseball game played at Memorial Stadium.

Outfielder Lloyd Hipps was a standout in the third and final game on Saturday, driving in four runs. The winning pitcher was John Quick.

Tjacos jobs ... typical of the engineer's work being done day after day at Western Electric, the manu­facturing and supplying unit of the Bell Telephone System, has a hand in solving problems like these.

The six-mile product was a complete success. Next year, Tjacos says, how to test it before it is was buried underground—before modifications, if necessary, became time-econo­mizing and expensive? The answer is to do what has been called "artificial cable"—a model a few inches in length whose electrical characteristics matched those of the full-size cable. In this way, engineers learned which type of cable would do the job best, how many repeater stations would be needed, and where repeater equipment should be installed. Artificial cable lets us anticipate and solve many other problems...before they ever arise.

The small product was a thin film circuit for the Central Office. The thin film was used because it is easier to handle and cheaper than the standard circuit. It is flexible and can be bent easily. The thin film is also less likely to be damaged during shipment.
