Science Teachers Begin To Apply For Academic Pay Institute

A&T College has been awarded a grant of $72,450 by the National Science Teachers Association to begin a new program during the next year. This is the first year the National Science Teachers Association has established a program for the support of teacher education.

The program is to be directed by Dr. James Proctor, chairman of the Department of Chemistry at A&T. Dr. Proctor will be responsible for the development of the program, including the selection of courses and the identification of qualified students.

The program is open to all teachers who hold a bachelor's degree in science and who are interested in teaching science at the secondary level. Teachers who already have a master's degree in science will be given priority in selection.

The program will provide financial assistance to teachers who are enrolled in courses leading to a master's degree in science education.

Testing Service, Princeton, New Jersey, has been selected to administer the examinations. The tests will be given in December 1964, and the results will be available in early January 1965.

The program is expected to have a significant impact on science education in the United States. It is hoped that the program will attract a large number of qualified teachers who are interested in teaching science at the secondary level.
Federal Service Examination: A Test Worth Taking

The Federal Service Entrance Examination is designed primarily as an avenue through which young people with promise may enter the Federal service. Therefore, students with a college education or equivalent experience have much to gain by taking the FSEE.

Successful candidates are trained for positions of responsibility and leadership. Many kinds of training programs are conducted by Federal agencies to help their employees develop themselves. There include on-the-job instruction, correspondence courses, and in some cases, part-time or full-time attendance at colleges and universities. Each Federal agency establishes the kinds of training programs it needs to develop its employees and accomplish its goals.

In an address before the United Negro College Fund (October 4, 1965), Secretary of Labor W. Willard Wirtz said, "We have countered real disappointment in recruiting as many people as we would like to from among the graduates of Negro colleges. From the evidence which is available, the number of Negro college graduates passing the Federal Service Entrance Examination is a lamentably low figure to ten percent."

He urged that the special training programs which had been undertaken by some colleges be extended.

In view of the facts presented by Mr. Wirtz and at the request of the personnel staff of the Department of Labor, Representatives of five colleges which had undertaken special programs to improve the performance of their students on standardized tests such as the FSEE convened as a committee. This group outlined an effective training program based on their experience.

Five elements comprise the program: timetable (or planning), test administration (or motivation), informal study groups (or tutorial sessions), test sophistication seminars (or techniques of taking and administering tests), and individual study (classroom work, practice for FSEE with emphasis on verbal and quantitative skills).

Speeches And Workshop Highlight Alumni Meet

Mr. C. Sumner Stone, administrative assistant to the Chairman of the House Education and Labor Committee, U.S. Congress, informed the A. and T. College alumni that the black people of America now must make an important choice.

Mr. Stone was delivering the keynote address at the winter meeting of the Executive Committee of the A. and T. College General Alumni Association held last month in Washington, D.C. Mr. Stone encouraged the group to "strive to involve white people in our daily economic, political, and educational lives, but let us seize the initiative in raising money, let us take the leadership in building our communities."

Other speakers for the event included Edwin M. Crawford, director, Office of Institution Research, National Association of State Universities and Land-Grant Colleges; Dr. Charles H. Wesley, former president of Central State College and now director of the Association for the Study of Negro Life and History; Dr. Samuel D. Proctor, former president of A. and T. College, now president of the Institute to Services for Education; and William C. Robinson, an alumnus of the college, now associate director of admissions at Yale University.

A workshop session, conducted from the theme, "Individual Expectations for Alumni Perpetuation," included the following persons: Kelsey Murdoch, staff assistant, American Alumni Council; Lacy Streeter, director, Sanders B. Moon Community Development Center; John E. Bennett, director of Educational Programs, American College Public Relations Association; Miss Betty Andrews, program assistant, Student National Education Association; and Miss Hazel-Ann Isgar, staff assistant, National Student Association, all of Washington; and William C. Robinson, president of the New York City Alumni Chapter, and John Winston, chairman of the Alumni Athletic League.

Those appealing on the program from A. and T. College included Dr. F. A. Williams, chairman, Planning and Development; Dr. Alexander B. Gardner, chairman of the Future Alumni Committee, and Dr. William M. Bell, director of admissions.

Dr. L. C. Dowdy, president of the college, outlined plans and developments underway at the college.

The program was conducted under the supervision of James T. Sprigg, chairman, the Northeast Region A. and T. College General Alumni Association. Howard C. Barnhill, Charlotte, is president of the organization.

Coffee. The quiet diet drink.

Maybe you don't like telling the world you're counting calories. Then instead of ordering a diet this or a low-cal that... order coffee. Coffee has absolutely no calories... so it works just like a diet drink. Even better. Yet coffee doesn't have diet for a middle name. It's quiet about diet.
The North Carolina Teachers Association - Student NTA field conference was designed to bring about realization of the unity of all local units. The state organization strives to promote the personal and professional growth and development of the field of education. It seeks to encourage participation in professional activities at local, state, and national levels.

The first step toward working together, and working together is the first step toward progress. The ultimate goal of the Student NTA is to help student leaders function as integral parts of the profession.

To function properly in today's society, students must be informed and motivated. To have influence, one must have capable followers. Hence, there is a definite need for the exchange of ideas.

Through this exchange will develop an interest in, and unity of approach to, the major issues facing the profession today. By developing desirable attitudes and skills, Student NTA can contribute to education profession with influence.

Today's college students have a chance to influence changes in a course in which students would have a chance to discuss ideas. Furthermore, as our college's self-analysis study develops, it will be a strong one. On paper the losing team may have two things against them at any given time. The team that won the game does not always reflect the true strength, there are hours to lose, but being like a gentleman is a vice. The whole team is a football team of graduates. For the most part, when the student body would have a chance to influence changes in the college curriculum, we must learn more about leadership.

Tomorrow's Leaders

College and university administrators are rapidly becoming aware that they must prepare today's youth to become tomorrow's leaders in many ways. They are striving to place an emphasis on the acquisition of critical interpersonal skills such as oral and written communication abilities, knowledge in making decisions and in forming value judgments. College students from coast to coast feel that institutions can better prepare them to meet the future by allowing them to influence specific change in school policies.

One of the most urgent requests of college and university students is the desire to be given a chance to influence the grade system within his institution. We must learn more about leadership.

As a member of the A&T College Business Manager Jesse Lanier, I have witnessed many changes throughout his tenure in this position. The biggest change that is happening is one that deserves looking into in order that positive changes can be brought about.

As a member of the A&T College, I have witnessed many changes throughout his tenure in this position. The biggest change that is happening is one that deserves looking into in order that positive changes can be brought about.

I have witnessed twice the most successful event of the year at A&T Homecoming. On each occasion, our team was defeated - defeated by a team we could have taken within his team. There is a bit of hard work in what we do, but what is to get is to be expected. Nothing has happened to the team.

The morale of our team for next year is a team that has a good coach. A good team has a good coach as a team can only go so far without his support and encouragement. The A&T College viewpoint at A&T, as to which one is more a professional player.

Dr. Williams has one of the most important responsibilities of any educational institution. He has a 'horse and buggy' flavor in a jet age."

Dr. Williams has one of the most important responsibilities of any educational institution. He has a 'horse and buggy' flavor in a jet age."

With the concept of a new morality and the elimination of CID, I believe that sexual activities should be practiced freely at the individual's discretion.

The article that appeared in the newspaper on "Midterm Grades Are Unfair," seemed to be of great interest to me and many of the other students in my class. This article gave some good ideas as to how to improve the current system and make it a more effective instrument for furthering the education of prospective leaders in the field of education. It seeks to further our education.

Editor of The Register:

I am writing in reference to the article "What Is Happening to Aggieland?" that appeared in last week's issue.

Many comments have been made about our football team. Some of these comments are true. Whatever the case, we should be behind our team. If a game is not always reflected the true strength, there are hours to lose, but being like a gentleman is a vice. The whole team is a football team of graduates.

For the most part, when the student body would have a chance to influence changes in the college curriculum, we must learn more about leadership.

Let's hold our boys, that we are behind those three hundred percent, whether they win or lose. They are not the team that is going to win. They are the team that is going to win. The boys who know that they have the wrong attitude toward the game.

Maybe if the student body would pull together and encourage the football team, we might actually see a win. The coaching staff is very interested in seeing the boys win. They seem to love it when the boys lose, they say "they" lost. It is obvious that our football team has a horse and buggy flavor in a jet age."

I have witnessed twice the most successful event of the year at A&T Homecoming. On each occasion, our team was defeated - defeated by a team we could have taken.

Grades and achievements, and accomplishments, are presented to the Campus Beautification Committee in the very near future. A plan is being devised in order that each student may have a role to play in preserving the beauty of our campus. A plan is being devised in order that each student may have a role to play in preserving the beauty of our campus.

As a student, one of the most urgent requests of college and university students is the desire to be given a chance to influence the grade system within his institution. We must learn more about leadership.
**Miss Homecoming**

Editor of The Register: I agree that “Miss Homecoming” should be taken seriously, for if she is to continue to use the title, it should be. And, in fact, a fact should be taken into consideration which has been left unmentioned by The Lettermen’s club, which selected Miss Homecoming. The fact is that members of the fraternity are made up of individuals that are chosen by the organization which operates under the name of the fraternity. This fact seems to be an incidental one.

Miss Homecoming is, of course, chosen by the student body. She will then be a representative of the student body and entitled to reign over the homecoming festivities. On this basis, money could be allocated from the student body funds to cover expenses incurred during her reign. It is not that “Miss A&T” be crowned during the spring, but where the students are present, the students would like to see her. The students would like to see her crowned during the springtime and entitled to reign over the homecoming festivities. On this basis, money could be allocated from the student body funds to cover expenses incurred during her reign. The students would like to see her crowned during the springtime and entitled to reign over the homecoming festivities. On this basis, money could be allocated from the student body funds to cover expenses incurred during her reign.

May I suggest that in the future you publish the names of those chosen by the student body. She will then be a representative of the student body and entitled to reign over the homecoming festivities. On this basis, the student body would like to see her. The students would like to see her crowned during the springtime and entitled to reign over the homecoming festivities. An Interested Student

**The Jazz Side**

By BILL R. ADAMS

Jazz is full of humor. Such humor may be found in a musical piece, in a song with colloquial language that is spoken around those music, and in tongue and cheek jokes. The here is the same sensation as when I explain how to play jazz piano or jazz drum or jazz bass.

For instance, one thing that I have noticed is that most people seem to have a hard time understanding what the term “jazz” means. Perhaps this is because there is no one clear definition of what jazz is. However, it is clear that jazz is a kind of music that has developed over time and that has become more widely popular in recent years.

**Stripes and Fashion**

By BILL R. ADAMS

Stripes - wide or narrow and always bright are the favorite pattern for this season. They are the necessary to last year’s flashy prints of the pop art world, though they are simply akin to pop art. Don’t be surprised to find the many varied places where striped pop up. They are used in everything from the latest casual coats and pantsuits to glistening evening gowns and sumptuous underwear. Materials in which the stripes can be made include wool, leather, knits, sequins and fur. Often matching striped headgear, shoes, and bags are worn with “stripes.”

A dress by Halston is a short black one with white stripes. The dress is made of a very soft black cotton and has a fitted bodice, green, and blue stripes. If you are so inclined, you can wear your favorite bandanna along with the dress.

Stripes can be found on everything from shoes to jackets. But, try not to get them mixed up with the striped shoe. Often matching striped headgear, shoes, and bags are worn with “stripes.”

**Private Men Only**

Practically every man has his own way of looking at the female sex.

They like to look at women who are wearing the latest styles in shoes, dresses, and accessories. Some see the buxom country girl with rosy cheeks and a beauty mark for a beauty that is only there when placed beside a better looking specimen.

Not, however, to turn green when placed beside a better looking specimen. Not, however, to turn green when placed beside a better looking specimen. Not, however, to turn green when placed beside a better looking specimen. Not, however, to turn green when placed beside a better looking specimen. Not, however, to turn green when placed beside a better looking specimen.

After that a teenager with a friend. The many sights her fingertips told to her. No, Lisa cannot read either; for Lisa is blind.

**Buildings and Grounds**

Editor of The Register:

In the last edition of The Register, you brought to the surface the problem of buildings and grounds for failure to keep the area behind Press Hall after homecoming.

This year, the improvement was made hastily and without consultation with the student body. We believe that the University's Office of Buildings and Grounds Department needs to be more involved in the planning and implementation of projects that affect the appearance and safety of the campus.

DEAN APPRECIATES NCTE

DR. Darwin T. Turner, dean of the Graduate School, has been elected to a three-year term as Director-at-Large of the National Council of Teachers of English (NCTE). The election took place during the annual convention of the council, held in Houston, Texas, November 22-28. Dr. Turner was among the more than 1,500 registration attendees who attended the convention.

DR. RANKIN ON NAT'L COMM.

Dr. G. F. Rankin, dean of A & T College, was elected to a three-year term as President of the Graduate School, has been a part of Aggie teams in more games than they will lose. Last year the Aggies had the longest winning streak in the CIAA tournament last year in Washington, D. C. A & T. placed fourth in the CIAA Championship, opening shot at 9:30 A.M. until 12 noon. A & T's basketball team, apparently has the ingredients for a winning team even this year. Coach Irvin's team has been among the "winningest" teams in the CIAA.

Last year the Aggies led the conference in total defense, with an average score against them 68.3 points per game. This fine defense has been a part of Aggie teams since Coach Irvin took over the reins.

When Coach Irvin builds a team, he stresses defense above all other things. He feels that defense is his most difficult phase of basketball, and the reason for its being so difficult is that it involves a "boy's doing something that doesn't come naturally."

According to Coach Irvin, this year's team possesses "good rebounding, good speed, fair shooting, along with an excellent attitude."

At Vespers Sunday

Dr. Amos Ryo, administrative assistant to the president of Morehouse College in Birmingham, Alabama, will be guest speaker at the 2 p.m. service to be held on Sunday, January 13, in the chapel of the James B. Dudley High School, under the direction of Sister Mary E. Ruffin, head of the school. Sister Mary E. Ruffin, head of the school, will provide music for the services.

The Mixed Chorus of the James B. Dudley High School, under the direction of Mrs. Julia Richmond, will provide music for the services.

"Dr. Ryce is a dynamic speaker who speaks the language of youth," said Rev. Cleo McCoy, pastor of the local church. "He has a message for young people that they can understand and relate to."
Letters To The Editor

The Editor

May I at this time congratulate you and your staff on the outstanding job you are doing with our college newspaper. Your work is of the finest quality and it serves as an inspiration to your peers.

I am happy to know that I am not the only person who thinks that The Register is "like." I am referring now to the letter which appeared in last week's column of The Register from a junior college. I was very glad to know that they felt that The Register was a splendid newspaper. But, of course, most of all, I was impressed by the fact that they wanted to publish a newspaper on their campus similar to ours.

Yes, you should be congratulated. You should be congratulated because your untiring efforts have not failed to bring the news to the college community even once. Having an admirer like this junior college should inspire you to work harder so that 'others' will want to be like you.

Aggies Set For Gate City Basketball Classic

Several changes are noted in the second annual Gate City Basketball Classic to be played here at the Greensboro Coliseum on Thursday and Friday nights, December 1 and 2.

The four teams involved, including the A & T College Aggies, Elon and Guilford, which also competed in the first event last year, and Catawba College, which replaces Western Carolina College in the two-day dribble derby, Aggies were the lone team undefeated, winning over Elon and Western Carolina Colleges, but unseated champions. This year the two-day doubleheader is to be operated on tournament style, and a champion is to emerge.

The games were the first college encounters for North Carolina and officially capped of the season.
