Jerry Butler Performs "Soul" Concert Here

BY PATRICIA LANIER

The senior class presented Jerry Butler, the popular recording artist, in concert Thursday, February 2, at 8:30 P.M. in Moore Gymnasium.

Before the concert, students eating in Moore Hall were pleasantly surprised by the sudden appearance of Mr. Butler. He had entered the cafeteria inconspicuously through one of the kitchen doors and evidently had not been recognized by any of the students. His presence was discovered when several students on the minds of several students who were sitting with several friends, and sat down with him. He introduced himself and we ran to join the crowd converging around the famed performer.

The former Jerry Butler entertained students and many others in concert last week. Students clamored to get Jerry Butler's autograph after he was literally carried off the concert platform in Moore Gymnasium. Jerry sang many of his famous recordings and brought the crowd to a roaring state of excitement with "For Your Precious Love."

One young lady (pictured above right) became so overcome with the rendition that she insisted on holding Jerry Butler's autograph while he signed it for her. She would not forget the memorable night, she left the scene smiling professionally, Mr. Butler intended to "Approximately 9 years!"

When asked what is his inspiration when singing, Mr. Butler stated: "For Your Precious Love," which was written by him. The other songs which were written by Mr. Butler are: "He'll Break Your Heart," "Find Yourself Another Girl," "I've Got a Secret," and "Good Times and Good Old Days." The songs were "Approximately 9 years!"

Mr. Butler attended Roosevelt University where he studied music and began his successful singing career. He has a part in the movie "Curtom" of which Mr. Butler is President. Among his favorite television programs are "Kopy-Katie."Mr. Butler added that he was "a nut for notes." When asked what is his inspiration when singing, Mr. Butler stated: "The words, themselves; for sing - ing professionally, Mr. Butler intentions to apply for New Politics and is a mem­ber of Phi Kappa Literary (SCRREW), and is an honorary member of Phi Kappa Literary Society of the University of Georgia in Athens, Georgia.

It was also mentioned that the Bands have appeared in Negro Digest, Rights and Liberation, American Scholar, etc. Beyond the Blues, New Ne­gro Poetry, the Book of Negro Poetry, and other publications of the same nature.

Mr. Bond, his wife and their two children, Left in June, 1967.

This year's observance "In Pursuit of Excellence" emphasized the involvement of youth in world af­fairs. Mr. Newman-Lanci is reserved for members and guests.

Science And Faith Seek Harmony

In Religious Week Observance

"Seeking Harmony Between Religious Faith and Scientific Learning" has been designated as the theme for Religious Emphasis Week, February 26-March 2.

All campus organizations are in­vited and urged to participate in the Religious Emphasis Week Activities. Participation may include separate organizational programs, relative to the general theme, faculty-sponsored programs, and individual participation in the campus-wide phases of the general program.

The vespers speaker on Sunday, February 26, will be Reverend Lorenzo A. Lynch, pastor, White Rock Baptist Church, Durham, and former pastor of Providence Baptist Church here in Greensboro.

The campus concert will be held Monday, February 27, in Memorial Gymnasium at 8:00 p.m.

Program: A Panel Dis­cussion on the Theme of the Week.

12:00 A.M. Vespers Program at 1414 Gressell St.

WEAL Presents OTIS REDDING

"I'M FREE, I'M FREE," he proclaimed, in a dark black creature stepped on American soil. He was brought here to build American and his coat of skin did glow. He was forced and made to work with never a moment of peace or rest from morn till setting sun. With a cold and non-flowery grave. But he labored, he toiled, and he sweated with grasping knowledge on every opportunity. Educated each day just a little bit more. As days passed by and as years rolled on, the idea of escape did lurk. To grasp him within the Northern reach. The North began to make its bid and save him from his grave. And made a part of this nation and help develop the human race.

Carl Fretz (B.B.C.E.) of the Bethlehem Steel Loop Course knows where the action is. He faces new challenges daily as an experimental engineer in the Metallurgical Department of our Bethlehem, Pa., Plant. Join the action. First step: pick up a copy of "Career with Bethlehem Steel and the Loop Course" at your placement office. Then sign up for a campus interview. Our 1967 Loop Class law opens for technical and non-technical graduates and post-graduates for careers in steel operations, research, sales, marketing, accounting, and other activities.

Pursuit Of Excellence

The standards, reputation and identifying characteristics of an organized group can be rated no higher than its weakest members. To pursue excellence is a lofty goal, but it must be stamped, not on the printed page, but on the hearts of all men.

In Pursuit of Excellence

Science And Religion
Seeking Harmony Between Faith and Scientific Learning

It is highly possible that this consideration grew out of the "God-is-dead" theory of those who, on the basis of their own researches, are convinced that a religious belief is no longer necessary for the survival of man.

Perhaps one of our students, here on this campus, could be the next National College Queen.

The annual search is now under way to select and to honor the nation's most outstanding college girl. During, various states of the country, the search is being held in order to see who is the best student according to the criteria set forth by the judges who are seeking a typical American college girl.

The 1967 National College Queen program will be held in May, and the winners' titles will again award 50 free trips to New York City. One trip will be given to each state, including Alaska and Hawaii, will be flown to Manhattan to compete for high honors.

JAZZ SIDE

Talent Galore! Waiting To Be Heard

By BILL H. ADAMS

As each year evolves into another, somewhere the multiple abundance of talent breaks from an incubation period to a wide stage of acceptance. Often, the person who possesses such talents may be new, or he may be as in any case, someone who has been waiting for that one big break. Therefore, when one speaks of new talent, usually the idea means that the artist has finally made his original jump into the world of entertainment.

In jazz, the major move toward public acceptance in the past five years has been in the avant-garde players of the 1950s. This is essentially true in the case of younger musicians. The piano and reed instruments forge ahead of the other instruments in popularity among the younger artists.

Silver Matching Competition Opens To Coeds

Reed & Barton Silvermatching have announced the opening of their 19th Annual Matching Competition, offering a $300 scholarship and a $250 scholarship to the women on this campus. The competition is open until March 31. You may see the Reed & Barton Silver Matching Competition in the Register for more information.

Modern Achievements Not New According To da Vinci Ideas

You have another thing coming, if you believe:

The Wright Brothers designed the first airplane.

The tank was conceived in the first airplane — that is to say, in 1903. The very first airplane ever to fly was the one designed and built by the Wright Brothers.

The Gatling Gun was the first automatic machine gun.

Perhaps the most startling of these achievements, Leonardo designed and built a major improvement over the machine gun — the tank. Although the tank was not actually built by Leonardo, he designed it in 1490, ahead of its time by over 500 years.

Yet another thing to consider:

Leonardo da Vinci was a giant in the field of science, art, and engineering. He is credited with over 300 inventions, including the helicopter, the submarine, and the tank. His notebooks, written in Leonardo's own shorthand, are full of ideas and sketches of his inventions, ideas that were Ahead of their time.

And don't let his bad handwriting fool you. Leonardo's handwriting is actually quite legible.

And don't let his bad handwriting fool you. Leonardo's handwriting is actually quite legible. His notebooks are full of ideas and sketches of his inventions, ideas that were Ahead of their time.

But the most interesting thing about Leonardo is that he was not just a scientist or an artist, but a true Renaissance man. He was a polymath, and his work spanned many different fields.

So next time you think that you have a good idea, remember that you might just be following in the footsteps of one of the greatest minds in history.

SOOPY SCORES 32

Aggies Drop Another One To State Rams

By EARNEST FULTON

Aggies, led by a potent 1-2 scoring unit, came roaring back to score 62 points in the second half and make the Vegetable State College Rams work hard for a 135-79 victory.

Soapy Adams paced the Aggies with 22 points, most of which came in the second half. Carl Hines scored 10 of the Aggie scoring duo with 22 points. These two combined for 44 points.

The 32 points by Soapy Adams was the junior sharpshooter's career high as an Aggie. His points came on 12 field goals and six of those were of his usual variety 20-30 foot, high-arching jumpers.

The high scorer of the game was Earl Monroe with 19 points, 19 of those coming on free throws.

The regular season competition for the Aggies will end on Friday, February 21, when they engage in a doubleheader at the Greensboro Coliseum.

The win brought A&T's conference record to 1-2 and over all record to 5-16. It practically eliminated them from any chance of winning the championship.

Soapy Adams scored 13, and William Gilmore and Teddy Campbell chipped in with 12 points each. All of the starters scored in double figures along with Barney Walls, a top reserve.

Soapy Adams had 14; Carl Hubard scored 13, and William Gifford and Tommy Campbell chipped in with 12 points each. Watts had 11.

The Aggies held a 52-51 lead at halftime, and that was the end of the game as the second half was a strumming variety.

The Navy welcomes a recent graduate of Agricultural and Technical College to the challenges and opportunities of the U. S. Navy.

Go McDonnell. Because when you join McDonnell, you'll work for a world-renowned name that stands for leadership and excellence in the aerospace industry. You will grow professionally by working in an environment conducive to achievement, alongside some of the engineers who have outstanding technical reputations. And you'll build your future with a research-oriented company that's receptive to new ideas. You will also earn an excellent salary and enjoy liberal fringe benefits with a company that is known for stability.

At McDonnell you also get the chance to put your personal touch on things while helping the team to make a contribution to aerospace science. In addition to getting management recognition for outstanding accomplishments, you'll have the satisfaction of knowing that you used your head to get ahead.
