The sixteen different languages of science and religion recognizing that all these sciences rest upon unquestionable truths and that religion demonstrates that basic unity of all truth.

A variety of speakers have been summoned to enable the college's religious emphasis week to explore the theme for the week: its potential benefit to the community. Pope Pius XI has said that "...those who speak of the incompleteness of science and religion either make science say that which it never says or make religion say that which it never taught...through a diversified group of guest lecturers, this point will be explored..."...

The three sub-cultures of the Moslem world contributed to its break, since the systems of the country were developed societies to struggling separate states - India and Pakistan from underdeveloped systems. What we need is a middle Asian stability in the region of the Middle East.

By STANLEY W. JOHNSON

Other activities of the week will include a variety show, campus church panels on women's topics, sponsored by the A&T College Women's Center. The theme of the week will be interpreted by participants from each girls' group.

Women’s Week And The Coed

It is not an uncommon experience to enter either of the two cafeterias on campus and find tables littered with dishes and trays left there by students. In an effort to correct this situation, which often necessitates additional help from the Office of the Dean of Student Affairs, has issued a new ruling.

Put into effect February 5, the ruling states, in essence, that any student who left a tray on the cafeteria floor will be accordingly disciplined and “assessed a cash penalty fee of as much as $5.00.”

Many students are already aware of the fact that at the modern cafeteria at North Carolina College in Durham it is almost a pleasure to bus trays to the appropriate place. There is no chance on any account for accidentally spilling food all over another person in trying to empty his tray. There is little congestion around the tray depositing at NCC, and, finally, students do not have to foalent over placing silver here and glasses there and paper in this container and trays over there. The setup that is found at NCC is not a unique method, and it can be installed without the need of remodeling the cafeteria.

If students did such research on this issue as they claim to do on other things, and the Food decision-makers, they may find that the issue is not such a trivial one after all.

The main thing to keep in mind is that the issue should be taken to the administration.

On the other hand, if students find nothing in this ruling worth their consideration, then the office of the Dean of Student Affairs has every right to expect every student to comply in full with it. Not only this, that office also has the undisputed right to assess the full penalty of it. This unfortunate person is not going to like it. By the time his penalty is being assessed on someone else will be confronted for not complying with the ruling and will receive the full penalty of it. This unfortunate person is not going to like it. By the time his penalty is being assessed on someone else will be confronted for not complying with the ruling and will receive the full penalty of it. This unfortunate person is not going to like it. By the time his penalty is being assessed on someone else will be confronted for not complying with the ruling and will receive the full penalty of it. This unfortunate person is not going to like it. By the time his penalty is being assessed on someone else will be confronted for not complying with the ruling and will receive the full penalty of it. Graduate School Lists Offerings And Fellowships

The Graduate School of A&T College offers the Master of Science degree in education, chemistry, education, and history. A student who pursues a degree in education may concentrate in any one of the following areas: administration, supervision, history, chemistry, elementary education, English, French, Spanish, history, or social studies.

A limited number of teaching fellowships are available. Each fellowship provides stipends of $300 per academic year and is renewable annually up to a maximum of $1,800. The holder of the fellowship is required to teach one course. Each stipend may provide additional pay up to $150 per academic year and is renewable annually up to a maximum of $150. This program is open to graduate students who are between the ages of 25 and 35.

CLENACE H. PHILIPS

Alumnus To Attend Nat'l Confab On Art Education March 19-24

Clarence H. Phillips, a 1950 graduate of A&T College, will attend the National Art Education Association’s 60th Biennial Conference to be held at the Sam Francisco Hilton Hotel, March 19-24. The theme for the conference is “The Challenge of Change.”

Mr. Phillips will attend nine general sessions in addition to seminars, forums, tours, and exhibits. The conference is scheduled to conclude on March 24-25.

The program, offered in conjunction with the Hawaii Art Education Association, will include tours of the island of Oahu, sightseeing in Honolulu, trips to galeries and museums, and a concert and performance dealing with art education in Hawaii.

Mr. Phillips received the B.S. degree in education in 1937 from A&T and the M.S. degree in supervision in 1951. He has been an art supervisor for Greensboro City Schools for 16 years. He is also the supervising art teacher at Lincoln Jr. High School for three years. He has also been an examiner for the A&T Athletic Department.

North Carolina’s First Intercollegiate Bahai Conference Bluffton Library March 10 The Public is invited to all open sessions.

Here And There In Sports

With Earnest Fulton

This weekend the Aggies will close out their regular season play with what may be the best team that has played in Greensboro this year. The Loop Champions, the Aggies, will face the Akron University Zips of Akron, Ohio.

Akron has always been a hard basketball team that has been rated in the top ten on several occasions. The Akron Zips are currently ranked in the top ten among the football teams.

Norfolk State is led by the real hero of the game as he close out the conference with a win. His name is Eugene Smiley. Smiley proved to be the key player in the game as he defeated the CIAA standings. They defeated the Rams last weekend. The game was called by the players involved in the game.

The CIAA Rating System denied the Rams last weekend. The game was called by the players involved in the game.

The top scorer of the Vikings is Jackie Wilson, a sharpshooting forward from Brooklyn, New York.

Norfolk State's squad will be the real hero of the game as they face off against the Zips. The forwards are Douglas Brown and six-foot-seven inch Oscar Smith, and Virginia Union is led by Tommy Davis, a six-foot-three-inch forward, averaging 26 points per game. Their other top scorer is six-foot-seven-inch Doug Duff and six-foot-seven-inch Oscar Smith.

And Virginia Union is led by Mike Davis. Davis, a six-foot-three-inch forward, is averaging 29 points a game. He is second only to Monroe in scoring. The Sports Staff has selected its All-CIAA basketball team. This team is composed of 13 players who were either members of the Aggies or the Rams. The vote-making factor was that the players must have played for the loop teams.

On the first team are Eugene Smiley of Winston-Salem and Jackie Wilson of Johnson C. Smith. On the guards are the great Earl Monroe and Soapy Adams. Supporting Burney and Grant is the great Earl Monroe and Soapy Adams. The forwards are Eugene Smiley and Jackie Wilson of Johnson C. Smith.

The second team is composed of Carl Hubbard, Freddie Lewis of Elizabeth City, Norman Joyce of Shaw, John Lockett of St. Augustine's, and Roy McNeill of Fayetteville State.

The Sports Staff has selected its All-CIAA basketball team. This team is composed of 13 players who were either members of the Aggies or the Rams. The vote-making factor was that the players must have played for the loop teams.

The top scorer of the Vikings is Jackie Wilson, a sharpshooting forward from Brooklyn, New York.

The only question that will face the fans this weekend is how many points the Aggies will score. The Aggies all the way last weekend. The aggie's highest scorer is the big 6'9" George Mack. Mack led the Aggies in scoring with 30 points. The Aggies all the way last weekend. The aggie's highest scorer is the big 6'9" George Mack. Mack led the Aggies in scoring with 30 points.

We set out to ruin some ball bearings and failed successfully

The Bell System has many small, automatic telephone offices around the country. The equipment in them could operate unattended for ten years or so, but for a problem.

The many electric motors in those offices needed lubrication at least once a year. Heat from the motors dried up the bearing oils, thus entailing costly annual maintenance.

To stamp out this problem, many tests were conducted at Bell Telephone Laboratories. Lubricant engineer George H. Kitchen decided to do a basic experiment that would provide a motor with the worst possible conditions. He deliberately set out to ruin some ball bearings by smearing them with an icky gunk called molybdenum disulfide (MoS₂).

Swock! This solid lubricant, used a certain way, actually increased the life expectancy of the ball bearings by a factor of ten! Now the motors can run for at least a decade without lubrication.

We've learned from our "failures." Our aim: investigate everything.

The only experiment that can really be said to "fail" is the one that is never tried.
