WANT Goes On Marathon To Increase Listeners

By FRANKLIN C. TEUNER

"I get a big kick out of it. I amassed seven packs of cigarettes alone last week," said WAVE disc jockey Miller's reaction to the 50-hour marathon held for the University's campus radio station. Miller was one of the participants in the marathon that began Friday at 12:01 a.m. and ended Sunday at 11:59 p.m.

The purpose of the marathon was "to increase listeners," contributed chief engineer of the station, Miller. His opinion more persons became aware of WAVE through the marathon than at any time in the past.

At Lincoln U.

Dr. Daniel Looks Ahead As New Prexy

Dr. Daniel also won first place in the contest for campusidores, and the Architectural Engineering Department, for the most original and unique float.

The Omegas also won first place in the contest for campus decorations, and the Administrative Engineering society won second place. Holland Hall, dormitory for black female students, won first place for the decoration of the building.

Other weekend activities included the second annual Alumni Luncheon by Dr. Walter C. Daniel, director of the division of humanities. Dr. Daniel spoke on "You Can't Compare the Direction of Black Campuses. Other campus issues discussed included the 50-hour marathon put on by the Student Affairs, from the manager of the Student Activities Booking Agency and certain radio stations, detailed the long search which the station was to promote the station and in some way, they want having paid to get a price for a "record help." Improvement, however, does not occur feasibly, although termination compensation has been changed.

Many students feel that the Student Government Association is entirely to blame. However, the SGA cannot be considered the sole villain in this drama. The President of the Student government, Matthew T. Dawson, who retires from the position, noted the difficulty in stopping the TIO from meeting under the general agreement that they were familiar with all institutions where students live under the school's confines.

If there was one problem that was by far common to all the representatives, it was the task of obtaining sufficient funds to publish papers that are capable of covering campus events thoroughly and effectively. The editors, who were financially incompetent to contribute, to the publishing of a college press service and advised each other on the various possibilities of obtaining additional funds.

At this point representatives of USSA proposed their plan for a progressive supplement that would benefit all schools involved. Their plan called for an editor, who would coordinate all incoming news stories, and a "hot line" press service. It was said that through the system each school could receive stories from across the country, without any part of the state. The financial problem associated with the system was not resolved, but the system was received well by all the editors.

Walter George Adams, Jr., and Franklin C. Turner represented A&M's editor at the conference. The conference, which was planned by Greensboro's student editors, had in attendance representatives of Guilford, A&M, Salem, UNC-G, Wake Forest, Appalachian State, Western Carolina, East Carolina and Methodist College.

All-Stars Fail To Show Free Event Is Possible

By DAVID LEE BROWN

The situation surrounding the performers for the Pre-dawn Dance has to be, the heart, caused some distortions among the audience. Why presenter Walter Walker and the All-Stars did not appear as scheduled is not definite. Many students feel that they should be reimbursed or that they should be compensated in some way. They resent having missed their phone calls from some of the students saying how much they enjoyed the show, added Miss "The Bandman." State and the other DJs can be heard again Tuesday through Thursday and from four Friday to Sunday.

Daniel D. Bethel, program director for the station, explained that "I was delighted with the staff participation because the band. Which was culminating during the show." He went on to say that, "we are in the process of examining a few difficulties such as time and equipment and other problems."

"The station is run primarily for and by the students," continued Dr. Daniel, who welcomes programming expressions from the student body.

Mr. T. E. Miller, faculty director of WAVE, encourages the students and faculty to visit the station, and he describes "that the entire campus family is a part of the radio, station.

A member of the interscholastic Relay System, the station is located in Room 509 of Price Hall.

At Homecoming Activities

More than 10,000 persons, the largest crowd ever to attend a homecoming at A&T State University, participated in the three-day celebration in Greensboro.

The crowd was swelled by the 6,000 fans who witnessed the Aggies' 76-60 victory over Morgan State College in the Greensboro Memorial Auditorium. The overflow began an early in the week so area motels and hotels reported they were booked solid. Alumni and other visitors began pouring into the city Thursday evening and all day Friday and Saturday, the campus was a beehive of activity.

One highlight of the celebration was the 101-year-old Homecoming parade Saturday afternoon. Thome of the parade's theme was "The Achieve­ment of Black Americans," and the city's largest crowd ever to attend a homecoming activities.

The President's annual reception for visiting alumni was held in the Memorial Union immediately after the parade. The Rev. Mr. Speller spoke to those in attendance.

"Come Home Again." The annual Homecoming Banquet was held at the hotel in Greensboro. The banquet was attended by Dr. Walter C. Daniel, division of humanities, and the Architectural Engineering society won second place. Holland Hall, dormitory for black female students, won first place for the decoration of the building.

Other weekend activities included the second annual Alumni Luncheon by Dr. Walter C. Daniel, director of the division of humanities. Dr. Daniel spoke on "You Can't Compare the Direction of Black Campuses. Other campus issues discussed included the 50-hour marathon put on by the Student Affairs, from the manager of the Student Activities Booking Agency and certain radio stations, detailed the long search which the station was to promote the station and in some way, they want having paid to get a price for a "record help." Improvement, however, does not occur feasibly, although termination compensation has been changed.

Walter George Adams, Jr., and Franklin C. Turner represented A&M's editor at the conference. The conference, which was planned by Greensboro's student editors, had in attendance representatives of Guilford, A&M, Salem, UNCG, Wake Forest, Appalachian State, Western Carolina, East Carolina and Methodist College.
How Our Readers See It

Who's Cheating Whom? Black Power! Black Power!

Almost everyone on A&T State campus is faced with the problem of passing an exam. It is forever present in the mind of the student that is acceptable to remain in school. To maintain such an average, he discovers means by which he can improve his grade in the easiest and obscure way. Of course, the banned.

When a student becomes so interested in cheating, he becomes more and more involved. He knows everything in his power to secure a comfortable grade for him. He is willing to pass the exam one way or the other, therefore, he will go to any length in order to get it. Sometimes the student does it his own way, sometimes it is as if the exam does not exist. He knows there are times when he does it because of the infinite possibilities of his friends, classmates, and the improvement he has given his parents. All these reasons are there when he does it. He knows that the students have created various methods to ensure success in taking exams. They have discovered, as well as invented, unique techniques to obtain good grades. Since they are aware of the probability and possibilities of being caught, they prepare themselves in advance for such an occasion.

How does a student cheat on an exam? Frankly, he has no set pattern that he goes by. For instance, he bribes the instructor according to the instructor’s movements or he has the instructor conduct his class. His maximum nosiness on small index cards is possible on the examination of his book. He may even write on his apparel. In addition, he may utilize an inkblot or kleenex with notes and pretend he has a cold. In fact, he may just open the book and copy verification the material that he needs.

How does this affect the innocent student who has studied but does not recall? Does this mean that he is ignorant? Does this mean that he’;d rather think than to cheat his way through the test? 

Exactly who are the honor students? Do they obtain their grades by their potentials, by their IQ’s, or by their student abilities? Are they hurting the instructor or are they hurting themselves? Usually, true does tell in the final analysis who is cheating whom.

Rebeccy Oliver

in a less as they do in a win.

Many of us criticize our teams, but I don’t think we can afford to criticize the people who are responsible for the students, or for the quality of the team. It is the quality of the student that is responsible for the poor quality of the institution. The quality of the education, the quality of the educational standards, and the quality of the students entrusted to us is the responsibility of the student and the institution.

I would like to express, if I may, my opinion on the quality of the education at our university, at this point in overall discussion. There is no question but that the quality of the education is very good, compared to a lot of other schools. But there is also no question that the quality of the education is very poor compared to a lot of other schools. 

University cannot be so overvalued or so undervalued. It is the responsibility of the student to take responsibility for his own education. He should be aware of the possibilities of his progress through this sequence is affected. In these six stages of moral development an individual may stop at any given level of moral development. 

How is your moral development? The six stages of moral development of individuals rate the following descriptions.

1. Right action satisfies one's needs and occasionally the needs of others.
2. Good behavior pleases or helps others and is approved by authority.
3. Moral behavior is defined by natural order and is accepted as natural behavior.
4. Right behavior consists of doing one's duty, showing respect for authority and maintaining the social order for its own sake.

The basic trend to be defined in terms of general rights and critically examined standards agreed upon by the whole society. There is a clear awareness of the relativism of personal values and opinions and a corresponding emphasis upon procedural rules for reaching consequences.

(6). Orientation is toward the decisions of consequences and toward self-chosen principles. They are universal principles of justice, of the redressability and equality of human rights, and of respect for the dignity of human beings as individual persons.

How Is Your Moral Development?

BY JUANITA F. BUSH

Each passing week always shocks his head and says, "What is this younger generation coming to?" It is a vicious and continuing cycle, and someday soon we will be casting that same shadow, counting the decreases in our health and spirits, as if the younger generation were a major disaster area comparable only to a nuclear war.

The term "younger" is not very fair for the older generation today is the morality of the younger generation. Even experts wonder about the morality of the younger generation. They ponder whether the next generation is less moral than previous generations, or whether there are just more young people and a general lessening of shame and in new social trends. 

Two questions that most trouble moral philosophers: How is your moral development? The six stages of moral development of individuals rate the following descriptions.

1. Right action satisfies one's needs and occasionally the needs of others.
2. Good behavior pleases or helps others and is approved by authority.
3. Moral behavior is defined by natural order and is accepted as natural behavior.
4. Right behavior consists of doing one's duty, showing respect for authority and maintaining the social order for its own sake.

The basic trend is defined in terms of general rights and critically examined standards agreed upon by the whole society. There is a clear awareness of the relativism of personal values and opinions and a corresponding emphasis upon procedural rules for reaching consequences. 

(6). Orientation is toward the decisions of consequences and toward self-chosen principles. They are universal principles of justice, of the redressability and equality of human rights, and of respect for the dignity of human beings as individual persons.

How's Cheating Whom?

October 31st was the traditional Hallowe'en Holiday Party in Moore Gym. An event of this magnitude has not been reached since the inception of the Student Association. Parents brought their children to enjoy this exciting event our students have been planning for months. The Student Union committee for this program had already been forming a committee for the event, but the people who were working on the event was not known to the students until the event was actually announced.

There was three of my friends, who I grew up with. Then we started having fun with each other, but always had a fun time. We usually got together to go to the movies, but after a while we started doing other things together. We always had a lot of fun and we never got bored of each other. We always had a lot of fun and we never got bored of each other.

Staffers Hope For Victory On Gridiron

By W. M. LEACH

Finis Editor

It was Saturday, 12 noon, and the minds of seven Aggies drifted homeward. The air of excitement that pervaded around them was the act that a couple of minutes, A&T would go down the road to victory or to defeat. Speculations abounded as to each of the seven dreamed about that first touchtown and that precious last point. Seven minds revolved around a single theme: BEAT MORGAN. Amid hopes of a 15-7 victory or a 1-1 tie was the resolution of seven minds looking homeward. The speaker of Ford Motor Company, talked about the “now” theme. The theme came, the theme intensified even more. The chant of the theme was dominant. Amid hopes of a 15-7 victory or a 1-1 tie was the resolution of seven minds looking homeward.

The Lutheran Campus House is open Monday through Friday from 12 noon to 5 P.M. and Sundays from 4 to 10 P.M. Come by and use the facilities available. Everybody is welcome.

James Walls, Mary King, and Al Jay Mason were recently elected president, secretary and vice president of the Interfaith Coordinating Council.

Gamma Delta Opens Their Campus House

By CAROLYN SEGER

The members of Gamma Delta cordially extend an invitation to our fellow students to use and enjoy the Lutheran Campus House. The Lutheran Campus House is the home of the Gamma Delta society, an organization of Lutheran College students dedicated to service to the community through God and the church.

The purpose of the Campus House is to enrich the college community by providing a homelike atmosphere in which to work and pray. The main floor of the Campus House provides a very comfortable study area while the lower level functions as a quiet game room (chess, cards, checkers, etc.).

The Lutheran Campus House is open Monday through Friday from 12 noon to 5 P.M. Come by and use the facilities available. Everybody is welcome.

Felicia Weathers Sings For B. C. Audience

By GEORGE ADAMS

ATR Reporter

Operatic soprano star Felicia Weathers came to the Greensboro area Sunday to sings at Bennett College. Miss Weathers, who has appeared with the Metropolitan, the Hamburg, the Munich, the Vienna, the Colonne and the Stuttgart Opera Companies, sang to an audience composed of various facets of life. The evening was that of a Carnegie-Hall recital with everyone dressed for the occasion and there in attendance that lent a touch of elegance and meaningful music.

Miss Weathers, who typifies the International Operatic Diva to a great extent, offered her audience music from six different composers. Each aria was pre-empted with calculated graceful gestures which clearly expressed her capabilities before she sang.

Although she barely reaches five feet, Miss Weathers voice contains the tempoquality, the melody, and the vigor that any performing diva must have at her command. Her accompaniment was done by Samuel Sanders, who knows his music expertly and was familiar with Weathers' moods as well. It was evident from the first song that it was she who set the tempo of the music from the beginning to the end.

The program itself was constructed of works of Brahms, Richard Strauss, Borodin, Puccini (including the famous "Un Bel Di" from Madam Butterfly). Also works by Bizet, which were rehearsed after a short intermission. Miss Weathers, who is an accomplished operatic singer of European and Western composers, tastefully placed in her performances some of the familiar Negro Spirituals. This is essence adhered to the old tradition of saving the best for last, while giving Miss Weathers the opportunity to sing about her own heritage.

Music has been a great love to Felicia Weathers who had been studying medicine for a long period of time under the auspices of her parents. She finally persuaded them to let her follow her real goal in life which was to sing. Born in Saint Louis, she first appeared at the Metropolitan Opera in 1965, then appeared with the San Francisco Opera in 1967. Later this season she will sing with the Chicago Lyric Opera.

The diva has also such songs as Sena in Troedello's, The Flaming Angel; La Traviata in Coppini's, Madame Butterfly. She also has various recordings under the London label which include an album of Negro and Hungarian folk songs.

Her honors include the Met's Titcomb Award, a Laureate at the International Competition for Young Singers at Beutha, Bulgaria - which rocketed her career with her debut as Salome in Kiel, Germany. In all Miss Weathers has performed some 60 leading roles in five languages throughout the world.

Immediately following the performance, the grateful singer was feted by her audience at Bennett's student union, but only after performing two encores to her enthusiastic listeners. 

CAREER CHALLENGES are available with MICHIGAN CONSOLIDATED GAS COMPANY an affiliate of the AMERICAN NATURAL GAS SYSTEM. Under a completing degree requirements in ENGINEERING, CHEMISTRY, PHYSICS, ACCOUNTING, GENERAL BUSINESS and MATHEMATICS are invited to explore employment and career opportunities with our Company on:

Talk with Newport News On-Campus Career Consultant about engineering openings at world's largest shipbuilding company—where your future is as big as today's brand new ocean.

Our backlog of orders running for years ahead means competitive starting salaries, career security, with your way up wide open. It also means scope for your abilities. We're involved with major ship propulsion and re-fueling, nuclear aircraft carrier and submarine building, even automation. We're a major builder of giant water power and heavy industrial equipment.

We're starting to apply our nautical nuclear know-how to the fast expanding field of nuclear electrical power generation on land. Interested in an advanced degree or research? We've sent our engineers to Virginia Associated Research Center with one of the world's largest synchrocyclotrons, offering advanced study in high energy physics. We're done to Old Dominion College and University of Virginia Extension Division, where you can get credits for a master's degree, or take courses in Microwave Theory, Solid State Electronics, Nuclear Engineering and other advanced subjects. Ask about scholarships, tuition grants, and special leaves to implement your study and research opportunities.

Ask, too, about the pleasant living and lower living costs, here in the heart of Virginia's historic seaside vacation land, with superb beaches, golf, fishing, boating, hunting.
