Carmichael's Tune: Unity Africa

The primary concern of Blacks around the world should be the political unification of Africa. According to Stokely Carmichael, speaking as an academician, "We are still in an excellent guerrilla warfare." "All revolution is based on the question of land," Carmichael pointed out. If anyone is talking about revolution one must talk about land." The Algerian revolution and the Chinese revolution illustrate this point. "We must talk about land when talking about revolution," theorized Carmichael. "For we do not own and control any land; we are on the land but not of the land." Turning his attention to the discussion of capitalism, Carmichael said, "Some people say if we get rid of capitalism, we get rid of racism; but I believe that we should fight both capitalism and racism." "Marx defines a capitalist as someone who owns and controls the means of production. And if capitalists, said Carmichael, "We are still highly sought after." "I guess that many of these firms have started equal employment programs and want to advertise to potential students who want to finish college," said Williams. "We are still in an excellent bargaining position as far as placing our graduates." "For Travel" "Mrs. Jenkins will travel for travel and studies of public health. The World Health Organization fellowship to be used in helping to set up hospitals and training of Black officials. She has a Ph.D. in public health education from the University of Wisconsin. She has taught at Tuskegee Institute and Prairie View A&M College. Gray holds a Ph.D. degree from Kansas State University. He is currently on the staff at VPI and Kansas State University. Parker is a graduate of A&T and holds the master of science degree from the State University. He is currently working at Bell Aerospace Company in Buffalo. Formerly worked as a stress analyst for Bell Aerospace Company in Buffalo.

NASA Awards Research Grant

The School of Engineering at A&T last Monday received research grants for the University. From left to right are Leo Williams, Jr., associate professor of mechanical engineering; Paul Parker, assistant professor of mechanical engineering; and Dr. Paul E. Grey, associate professor of electrical engineering. Two of the projects were funded by the National Space Agency, NASA.

The two grants, totalling more than 33,000, are among the first NASA research grants given to predominately-black institutions.

The total amount also represents the largest research grant ever given to the School of Engineering, which won national accreditation last summer.

In announcing the grants, Dr. Lewis C. Dowdy, president of A&T, called the research funds, "Carmichael those from NASA breakthrough for predominately-black institutions of higher learning."

The grants were awarded to the University for the following research projects:

1. A $15,000 grant was awarded to Dr. Robert D. Crenshaw, professor of electrical engineering, for a study on "the means of production. And if capitalists, said Carmichael, "We are still highly sought after." "I guess that many of these firms have started equal employment programs and want to advertise to potential students who want to finish college," said Williams. "We are still in an excellent bargaining position as far as placing our graduates." "For Travel" "Mrs. Jenkins will travel for travel and studies of public health. The World Health Organization fellowship to be used in helping to set up hospitals and training of Black officials. She has a Ph.D. in public health education from the University of Wisconsin. Research Grants

The grants obtained by various faculty members in recent times tend to indicate that it has finally been realized, and we have proven, that the Black scientist is just as competent, and sometimes more competent, as his white counterpart in his ability to conduct important and useful research.

This institution has been the recipient of numerous grants from various agencies. However, the grants now being acquired by faculty members for research are of much larger amounts and are much more significant to the total development of A&T, and to Black people everywhere.

The grants obtained by members of the faculty in the School of Engineering are beginning to make us realize the importance of developing strong programs in these areas of scientific skill here at A&T.

The individual recipients, while being highly trained, qualified, and deserving of these grants, are not solely responsible for their acquisition. We have past and present chairman and dedicated staff members of these departments to commend for their continuous efforts at the enhancement and improvement of the engineering programs here.

There are still other members of the university family that have played supporting roles, but very vital, in the development of this school as well as the Division of Arts and Sciences and the School of Engineering - the main academic segments conducting scientific research.

All of us can be assured that A&T State University will play an integral part in the development of mankind through this type of achievement.

Letters

Think First

Editor of the Register:

May 27th is approaching. It is the anniversary of the fall of May 1967 and the death of Bro. Willie Grimes - the Blackest day in the history of A&T.

Many of the actions which took place last year were purely emotional. They were reactions to the most cruel and most campus disorders. The fact is that none of these actions has ever had anyone that could "rape".

My point is that the person that starts this type of action is not necessarily right. We as university students should be able to think, and reason for ourselves. Everything that we do should be under the name of justice, the oppressor will always seek to restore it through this type of achievement.

The individual recipients, while being highly trained, qualified, and deserving of these grants, are not solely responsible for their acquisition. We have past and present chairman and dedicated staff members of these departments to commend for their continuous efforts at the enhancement and improvement of the engineering programs here.

There are still other members of the university family that have played supporting roles, but very vital, in the development of this school as well as the Division of Arts and Sciences and the School of Engineering - the main academic segments conducting scientific research.

All of us can be assured that A&T State University will play an integral part in the development of mankind through this type of achievement.

A&T Ambassador

The end of another academic year is rapidly approaching and over 3,000 Aggies will be departing from the confines of A&T for a period of at least three months. Whether we are departing for the summer or departing to take our places among men of the world, we should always remember that we are Aggies.

In light of this fact, let us all make a resolution to serve this country as well as we can. Aggies are constantly striving to inform people that A&T is an institution worthy of support - whether it be as a student, alumni, or interested friend.

History Has Turned The Tables In Repetition

By Dick Gregory

It is at once odd and sad that both blacks and whites in America realize that if it permitted the syndicate hoodlum from pushing reefers and heroin to young black kids. "But labeled, "For bad Germans only." And, in his inaugural address, urged the nation to lower its voice. Vice President Agnew condemns loud voices of approval as buses were used to transport white kids and their silence. For years, white folks stood by in silent neglect and a shroud of silence over the race issue.

In Appalachia are not turning on and getting high. Odd, it is also ironic that dope addiction has traditionally become common with the advent of warmer weather. I am referring to the improper visits of some unauthorized students to some of the dormitories after curfew. In other words, men in the women's dorms! There is nothing that I hate more than having my privacy infringed upon by a man walking around, making himself at home, in the halls all hours of the morning.

I am writing this letter as a resident of CM. Vanstory and I would like for everyone to know that we don't like the situation. As a resident of the dorm, I find it undying love for anyone that can "Rap". As a resident of CM. Vanstory need to think for yourself. Think before you act. Underlying love for your brothers and sisters is all well and good, but you can't have undying love for anyone if you blindly follow the suggestions of someone's "Rap" and not think of the consequences to yourself and your brothers and sisters. Please think.

Reggie DeFour

Privacy

Editor of the Register:

"Spring has sprung," is a definite sign that the campus is about to present all over campus. Everyone enjoys seeing the lovers lying in every corner of campus. However, everyone, especially myself, does not enjoy every one of the other activities which have become common with the advent of warmer weather. I am referring to the improper visits of some unauthorized students to some of the dormitories after curfew. In other words, men in the women's dorms! There is nothing that I hate more than having my privacy infringed upon by a man walking around, making himself at home, in the halls all hours of the morning.

Linda King

Intercom System

Editor of the Register:

I would like to take time to complain about our Public Address System in C.M. Vanstory. As a resident of this system, I find it truly inconvenient. Though you are not a student worker and you come in the dorm you are confronted with the question "Are you going to the 2nd or 3rd floor?" I would not mind going once in a while, but I truly detest having it repeated over and over again. After Christmas the P.A. system is working. It was approximately a month until the system broke again, and it has been broken every since.

I would like for everyone to know that we don't like the situation. I also believe that the desk workers of C.M. Vanstory need to be tipped for going up those steps at long as they have without complaining. How would you like to go up two flights of stairs and down the hall for five months at least 10 times or more an hour? Cheryl Ramsey
Kappa Alpha Psi Fraternity held its Mid-Eastern Provincial Meeting at the Hilton Inn, April 23-25. The host chapters were Greensboro Alumni and Alpha Nu Chapter of A&T. The Polemarchs of the chapters are John Zeigler, Greensboro and Lonnie Dawkins, Greensboro Alumni and Alpha Nu. Howard C. Barnhill was elected as the regional Polemarch of the Charlotte Alumni Chapter.

The theme for the Provincial Meeting was "Leadership Through Education," the Charlotte Alumni Chapter.

The following chapters are in the Middle Eastern Province: Alpha Epsilon, Johnson C. Smith University; Alpha Kappa, N.C. Central University; Alpha Nu, A&T State University; Alpha Tau, Bluefield State College; Gamma Omicron, St. Augustine College; Delta Gamma, Shaw University; Delta Chi, Winston-Salem State University; Epsilon Alpha, Epsilon Alpha, Elizabeth City State University.

Alumni Chapters are Berkley, V.A.; Bluefield, Charlotte, Durham, Fayetteville, N.C., Raleigh, Rocky Mount, Winston-Salem and Greensboro Alumni. Each chapter was represented.

Matthew Simpson, elected Vice Provincial Polemarch, was also elected to the National Nominating Committee. Dwight Shinkle was re-elected reporter, and Kenneth White elected to the Board of Directors.

Simpson and Moskow are members of Alpha Nu and White of Greensboro Alumni. Delta Chi of Winston-Salem State University was voted the outstanding chapter. The undergraduate, Alpha Epsilon, Johnson C. Smith University, shared the honor. The following morning, Bernard Carree, an accounting major, gave a report on the resolution of Brown's case. "It is obvious that there is a drastic increase in the number of people who are being imprisoned. I don't think he is dead for sure, but I don't have the slightest idea," exclaimed James Tyson, a junior engineering math major.

Black people must consider not only the man in your fraternity as your brother or the man in the sorority as your sister, but all Black people are Brothers and Sisters. We must strive for one thing Unity.
Confusion Over SGA Constitution
Elections Re-Scheduled For May 14

by Ronald Topping

The SGA elections, which were slated for April 30, have been re-scheduled for May 14. The final date for applications to be turned in is May 9.

The set back was caused by confusion over the new SGA constitution recently presented by the committee, chaired by Shirley Stevens, was concerned over the difference in the qualifications and eligibility of candidates as written on the application form and in the SGA constitution. According to Miss Stephens, the committee has formed the correct list to begin the elections. The changes in the qualifications and application point out that an SGA officer must be enrolled as a full-time undergraduate student and that he should not move off-campus until his term in office has been terminated.

The elections will follow the same pattern as last year with voting being held in the Union Ballrooms, with the addition of two more voting machines.

The election committee is now in the process of scheduling events for candidates to speak to the student body during the week of May 7-14. The campaign speeches which are traditionally held on one night in Union Auditorium will be spread over two nights this year.

Teaching Is My Life: Says Retiring Econ Head

Dr. Juanita D. Tate, retiring chairman of the Economics Department

"If God gave a talent to a person, teaching is my talent-that's my profession," said Dr. Juanita D. Tate, who is currently retiring from the Department of Economics here. "I love Greensboro and the people here, so this is where I plan to retire. I plan to rest for a while first and then write a book on the life of Phillip Murray, the labor leader; I may later act as a consultant or maybe lecture in the field of economics," Dr. Tate said. "Dr. Tate completed all of the statistical calculations for "Method of Statistical Analysis in Economics and Business" by Dr. E. Lewis. This textbook is currently used in the Department of Economics here. "I really should have gone into Chemistry, because during my undergraduate days I won an award for being one of the top ranking chemistry students in my graduating class at Talladega," said Dr. Tate who is still quite full of variety.

A native of Birmingham, Alabama, Dr. Tate finished Talladega in Chemistry and proceeded to Howard University to do graduate work in the Romance Languages with a specialty in Old French. Dr. Tate earned her doctorate in economics at New York University's Graduate School of Arts and Sciences.

Dr. Tate holds membership with many national and local organizations. A few of which she is most proud are: The Greensboro Community Foundation, League of Women Voters, American Economics Association and Kappa Delta Pi, which is an honorary society for outstanding teachers.

In releasing the first year's annual report of SEDFRE's Technical Assistance Program (TAP), Mr. Moore noted that the greatest gains in black representation have occurred in the South. "In the five years since the passage of Voting Rights Act of 1965, the number of black elected officials in the South has increased 800 percent. While that may sound impressive, it actually represents a gain from an estimated 656 to 6,556. But black people are still critically underrepresented there as well, and there are still no blacks among executives at the State level in the South," Mr. Moore emphasized.

He added that "more is expected of black elected official than black official. He must be administratively competent and a leader in affecting change both in his community and for the broader constituency he represents. The need is to maintain or reconstruct on a new basis - direct, sensitive, fruitful contact with the community" (what is termed "laboratory" in the SEDFRE report). The Technical Assistance Program is working with the administration of Mayor Richard G. Hatcher, who is this year retiring from the SEDFRE report, the Technical Assistance Program was launched "in anticipation of services that would be needed by the fast-growing number of black officeholders."

Brief case studies are included in the report on workshops for elected officials conducted by SEDFRE in Beaumont County, South Carolina; Tallulah, Louisiana; and Albany, Georgia. Also cited are regional and national seminars for school board members and educators.

In addition SEDFRE is conducting two intensive programs, according to the report. The first is the recent issue of "Volunteer, Mississippi," where Mayor Charles Every was welcomed back baking soda, which was swept into office last July, 1968. In Georgia, where SEDFRE is working with the administration of Mayor Richard G. Hatcher, the need for new officers with wide, general responsibilities to develop specialized knowledge and skills.

SEDFRE is a non-profit, tax-exempt foundation supported by both large and small donations.

Housewives Doing Something About Pollution Problem

While Congress debates and activists march, housewives faced with a problem do something about it. Such is the case in Ann Arbor, Michigan, where 3,000 housewives, appalled at the deterioration of their lakes and streams, have come up with a pollution solution. They're quick to point out, every single pound of phosphate that finds its way to our lakes and streams, is capable of supporting 82.6 pounds of water-staining algae.

In the state of their housekeeping suffers from such wholesale banishment. For scouring and cleaning they've welcomed back baking soda, an old favorite that's phosphate-free. New members introduced to their cleaner waters are baking soda vases and floor, scrubbed grime away. And even potted houseplants are provided with how-to directions for close to 100 different household uses for this product.

Directions for producing a high-quality, phosphate-free dishwashing liquid and a high-quality, phosphate-free washing soda, which are also distributed to those attending the demonstration, are easily found in the community. Members of the team are staked out at laundromats to advise, counsel and urge a switch to the high-phosphate detergents.

Chemistry, because during my undergraduate days I won an award for being one of the top ranking chemistry students in my graduating class at Talladega," said Dr. Tate who is still quite full of variety.

### Code To Student Life

Editor's Note: the following excerpt from the Code To Student Life is the third of a series of excerpts being printed by The A&T Register in the hope that some students who for some reason or another are not familiar with this code will become familiar with it. It is hoped that the knowledge gained will be of some benefit in guiding this student body as to the policies regarding student life at A&T.

#### C. General Observations

1. Class attendance is exclusively an academic matter. It is appropriate that the University reaffirms the commitments:
   - To provide maximum educational opportunity and services to all students.
   - To make clear the necessity of maintaining general academic freedom.
   - To assure and to preserve the right of all members of the University Community to question, debate, criticize and to dissent peacefully.

2. Implementation of policies related to student activities must conform to the following:
   - Specific grievances, issues or other potential protests or demonstration concerning policies or university regulations, and maintaining standards of good conduct are the responsibility of the Office of the Dean of Student Affairs. This office is assisted by other university officials, faculty, staff and students.
   - Disciplinary authority may impose the following sanctions for student violations of university rules:
     - Admission - An oral statement to offender that university rule has been violated.
     - Warning - Written reprimand for violation of specified rule or regulation, including the possibility of more severe disciplinary action in the event of conviction for the violation of any university regulation within a period of time stated in the letter of reprimand.

### III. Procedures, Policies and Regulations Governing Demonstrations

It is appropriate that the University reaffirms the commitments:
- To provide maximum educational opportunity and services to all students.
- To make clear the necessity of maintaining general academic freedom.
- To assure and to preserve the right of all members of the University Community to question, debate, criticize and to dissent peacefully.

Academic freedom and the right to dissent peacefully, however, cannot be preserved in an environment of force, violence or threat of force and violence which disrupts or obstructs the activities of the University or the members of the University Community.

Hysteria or oppression is a less desirable alternative to discipline and the use of procedures for orderly conduct of protests, picketing and demonstrations are submitted for purposes of information and guidance of all.

#### A. Procedures for Orderly Conduct of Protests, Picketing and Demonstrations

Protests, picketing and demonstrations by a student or student group(s) are under the jurisdiction of the Office of the Dean of Student Affairs. The conduct of these activities must conform to the following:

1. Specific grievances, issues or other potential protests or demonstration concerns must be submitted to the President of the Student Government Association 96 hours in advance. The President of the Student Government Association will conduct a hearing of the case and issue a decision.
2. If the grievance is not recognized after the expiration of 36 hours, the student, organization, etc., in the case might be, desiring to assemble for purposes of protest, or demonstrations on campus must make application to the Coordinator of Student Activities to secure approval of an appropriate time and place.
3. The use of the campus as a staging area for off-campus protests or demonstrations will be discouraged.
4. Failure to comply with these rules and regulations will result in university suspension of an organization or disciplinary action taken against students who are participants for non-compliance.
5. Mean or abusive language on or near property of public buildings and houses for the purpose of damaging or defacing such location.
6. The use of the campus as a staging area for off-campus protests or demonstrations will be discouraged.
7. The use of the campus as a staging area for off-campus protests or demonstrations will be discouraged.
8. Violent or disorderly conduct or justices to persons, real property or public buildings and houses for the purpose of damaging or defacing such location.

The project actually covers an eight-month span. Planning and orientation sessions were conducted on the Greensboro campus.

The students, who at the end of their stay in Camden, are expected to participate in an evaluation session. Then, they will complete their practice teaching experience in the Greensboro area where the project will be completed with a sharing of experiences in a group setting with other student teachers from A&T.

### Seven Seniors In Camden Lab Experience

CAMDEN, N. J. - Seven seniors from Greensboro, N. C. A&T State University are completing a field laboratory experience in inner-urban problems in a teacher education program at Rutgers University.

The project, which is funded by a Federal grant, is under the direction of Dr. Rosolia Cozzi, coordinator of the teacher education program at the Rutgers urban center here.

Theodore B. Johnson, assistant superintendent of Camden City Schools, and O. Theodore Reid, Jr., director of financial aid and Rutgers, are serving as advisors.

The main purpose of the program is to provide an opportunity for senior teacher education majors to learn about the distinctive problems of urban life and education in an urban setting through the facilities of Rutgers University.

Other objectives include fostering competence in dealing with urban problems in education and providing a means of evaluating the urban teaching preparatory program at A&T State University through the performance and "feedback" of the students participating in the project.

It is also hoped that the materials and resources developed by the teaching project's students over a period of time will serve as the basis for a seminar in urban education, which is to be incorporated into the curriculum at both institutions.

Participants in the project, who are being housed in private homes in the Parkside section of the city, include Barbara Campbell of Trenton and Aona Harrington of Washington, D.C. North Carolina residents are Leslie M. Dula of Lenoir; William Guy of Greensboro, Thomas D. Hager of Rockingham, Tony Guy of Lambert and Jasper Woods of Ayden.

Selection of the two women and five men was based upon interest in teaching in an inner-urban community, adaptability, scholarship, recommendation from academic included in the field laboratory experience in inner-urban problems in teacher education for North Carolina students was a tour of the Rutgers campus in Camden. Pictured on the steps to the library are (front, left) Dr. Rosolia Cozzi, coordinator of the teacher education program at Rutgers and director of the federally-funded project; Leslie M. Dula of Lenoir; Thomas D. Hager of Rockingham; (second row, 1-to-r) Theodore B. Johnson, assistant superintendent of Camden City Schools and program advisor; O. Theodore Reid, Jr., director of financial aid at Rutgers and program advisor; Tony Mitchell of Lambert and William Guy of Greensboro.

The students, who at the end of their stay in Camden, are expected to participate in an evaluation session. Then, they will complete their practice teaching experience in the Greensboro area where the project will be completed with a sharing of experiences in a group setting with other student teachers from A&T.
**TV Special Will Be Shown On Individual Creativity**

Many young people, frustrated with the kind of life available to them, are choosing individual creativity over the assembly line, opting for man over machine.

The rebirth of the crafts was a provocative springboard for discussion. Are these craftsmen opting for man over machine. 

They are not allowed to do. "With these Hands" also documents the creativity over the assembly line, freedom, and the only accessory you can find.

"These Hands" includes Charles W. Harriell, a major; Leroy C. Gaither, an English instructor; and Miss Sandra Hughes, a 1969 A&T graduate.

The cast includes Charles W. Harriell, an English instructor; and Miss Sandra Hughes, a 1969 A&T graduate.

The rebirth of the crafts a reaction to the hippie movement. Watson, the leader of the Crafts Council, warned that Blacks and poor whites must come together. But how could they do this? The two groups are diametrically opposed.

On guerrilla warfare, Carmichael specified that "the guerrilla must have a political ideology. He should never move in groups of more than three of five. He must not move with anyone he has not known for a long time; he does not seek his recruits from the people who talk the baddest but those he has known the longest; and never uses all his arms in one place.

Carmichael gave four goals that Blacks must be concerned with:

1. Our priority must be our homeland. Everyone one talks, he must talk about Africa; our ideology must be future oriented, just as God promises a life after death.

2. Blacks must unite. The unity of Black people is paramount at this time.

3. Blacks must seek to take over all political institutions in their community.

4. Blacks must seek to develop an economic independent basis whenever possible. For the peasants has taken him and scattered him all over the world.

**Repertory Group Of Art To Present Play**

The Black Arts Repertory Company of A&T will present "The Man Nobody Saw" as part of South Carolina Association of Social Workers' Conference in Greenville, South Carolina. The play, written by Elizabeth Blake, is scheduled to be presented on May 6 at 7:00 p.m. at St. Matthew United Methodist Church.

**New Move In Fashion Is Towards Freedom**

By Jacqueline Coppenr

The big move in fashion now is toward freedom, the freedom to put things together as you like, to see a look your own way.

The things that have to go are those that restrict this freedom. Freedom is like a feeling you must match things to your own. The freedom of the fairly tight dress is gained by having the right kind of body and by setting it off. There is the short skirt and the shorter length, the length and shape of your body to conform to.

Vests still look marvellous especially with wide-legged pants and a scarf tied to at the neck. Shoulder-strap dresses are the new fashion, they are not worn underneath, but as part of the outfit. A shirt or sweater, worn underneath, is also part of the look.
Tennis Team Has Record That Is Best In CIAA

By Weldon Washington

The tennis team has come on strongly to have one of the best records in the CIAA this season. So far they have displayed a 4-1 record. The only defeat came at the hands of Fayetteville State (4-3). The other scores were at Livingston High School (7-2), Fayetteville State (6-3), Norfolk State (5-1) and Virginia State (7-2).

The players on the team are Tyrone Wheeler, Joe Anderson, Robert Sampson, Adolph Piatt, Kim Poe, Roy Moore, Corbett Johnson, and Oscar Hart. Coach Mat Brown had good comments to make about his players. He said that the team on a whole was improving day by day. Adolph Piatt is becoming more and more aggressive. Kim Poe is improving and Roy Moore is beginning to shape up and get his eye on the ball. Oscar Hart has an outstanding future for next year. The entire team will be returning except for Anderson.

The team played Fayetteville State and won overall with a score of 6-3. Tyrone Wheeler won over H. Hones, (6-2; 6-0), A. Platt over G. Winfield, (6-2; 6-2), Kim Poe over R. Battle, (6-4; 6-2), and Roy Moore over C. Swepton, (6-0; 6-0) in singles. Joe Anderson and Robert Sampson lost. In doubles, Wheeler and Anderson fell to John and Winfield, (6-4; 6-1), Sampson and Poe won over Byrd and Swepton. Moore and Platt also won over Battle and Swepton, (6-2; 6-1).

Coach Brown has two more matches both with Elizabeth City before going on to the CIAA Tournament in Hampton, Virginia. The coach also states that much of the team's success is due to the great performances of Adolph Piatt, Roy Moore, and Tyrone Wheeler. All three are undefeated in singles. Moore and Platt in doubles are undefeated.

Perry Wins First Place In Karate Tourney

By Weldon Washington

Some members of the N.C. A & T S.U. Karate Do attended and participated in the 3rd annual Far Western United States Karate Association Tournament in Asheville, April 11.

The tournament was sponsored by the Asheville School of Self Defense. The state representative and owner of the school is Charles Matthews, a 4th Deg. black belt.

The participants in the tournament were divided according to their rank. White and yellow belts were classified as white belts. Blue, green, and purple belts formed the intermediate division. The brown and black belts fought in separate divisions.

Each match lasted two minutes. Matches were won on the basis of 2 out of 3 wins. No excess contact was allowed to the head or neck area.

The representatives of A&T were William Perry, Vernon Tapps, Earl Lindsey and Wilton Bennett. Tapps and Lindsey were defeated before they got to the finals. Lindsey, a green belt, was disqualified after scoring a point with a round house kick to the opponent's midsection and immediately followed up with a fore hand attack. Lindsey was defeated because of the face contact.

Bennett fought in the brown belt division. He won most of his matches with a powerful roundhouse kick and knife hand. All his matches were won except for the last two which gave him third place.

William Perry fought in the white belt division. This division always has the largest number of competitors. There were about 60 contestants. Because of the great number, they were divided into light and heavy weight divisions. Perry was placed in the heavy weight division. The regular eliminations did not give Perry much trouble. He went through the entire primary session without having a single point scored against him. This was due to his fist and direct straight punches to the body and reverse back kicks. His matches usually lasted one minute or less although there was a 2-minute time limit. He of course took the heavy weight division title in the semifinals.

In the finals, he fought the lightweight division champion.
We Knew You Would Be Glad

AND THAT'S WHY WE ARE TELLING YOU THAT THAT BOOK YOU HAVE BEEN WAITING FOR, THE A&T POETRY REVIEW, WILL
BE COMING YOUR WAY ON MAY 20 SO JUST BE A LITTLE PATIENT AND YOU WILL NOT BE SORRY FOR THE TIME THAT
YOU WAITED.
