"THE VOICE OF THE PEOPLE WILL BE HEARD"

VOLUME XLII, NUMBER 7

NORTH CAROLINA AGRICULTURAL AND TECHNICAL STATE UNIVERSITY, GREENSBORO

OCTOBER 30, 1970

## 'Africa's Black Pearl' Crowned 1970-71 'Miss A&T'

By Jacqueline Glisson

On one of the most unforgettable nights of the 1970-71 school year, the brothers and sisters of Aggieworld witnessed along with many visitors and guests, the touchingly beautiful crowning of Miss A&T, Sister Pearl Brown, Wednesday night. To the tune of "Black Pearl", the theme, Africa's Black Pearl, was displayed throughout the intriguing coronation.

Dramatic readings of Black poetry set the mood for the 1970-71 Coronation of Miss A&T. The audience became enraptured as the radiantly, attractive queens were brought forth by their escorts to take seats on an enormous and beautiful map of the African continent which lay in the center of the gym floor. The queens made their entrance to pulse-moving, rhythmic music with an African beat.

SGA president, Matthew Simpson, emphasized his introductory speech by the statements, "We truly are young, gifted, and Black. We can say, we are somebody."

A unique addition to the coronation program was the pre-

sentation of several visiting queens from other Black colleges and universities by Brother Simpson.

Excitement grew as the four attractive queens, one for each class composing Miss A&T's court, made their impressive entrance.

The climax of the coronation was reached as Sister Pearl Brown made her dramatic and surprising entrance through a partition behind her throne. The crowd arose in joy, loyalty, and pride as their beautiful 1970-71 Black Pearl of A&T made her profound debut.

Dressed in a bright gold outfit a silvery-white coat and matching turban, Sister Pearl took her place upon the throne. Dr. Lewis C. Dowdy, adorned in his African costume, installed Sister Pearl into her new position through a moving speech. Looking at her majesty, he emphatically stated "The dignity of African womanhood is seated before me; can you deny it?"

To the underlying question of "why" the African setting, Dr. Dowdy answered that it brings home an identification we can-

not get otherwise. "Let's work together for freedom and unity," were the closing words of Dr. Dowdy spoken in Swahili.

The audience listened attentively as their 1969-70 queen, Sister Lillian Campbell, made her final heartwarming speech as Miss A&T.

The coronation reached its peak with the crowning of "Our Black Pearl" by Sister Campbell who placed the token pin on her turban and the royal Black staff in her hand.

Brother Jesse Marshall, Dean of Students, introduced our queen's mother, Mrs. Lucille Brown. The program was completed by the African dancers performing "Gingo La Ba La."

In the greatest moment of her life, the 1970-71 Miss A&T made her touching coronation speech. With dignity and grace, she ended her speech with the words, "We are somebody!" Our lovely queen was then presented with many gifts.

Brother Hollis Pippins demonstrated a truly African sense of rhythm as he went through the expressive and skillfully executed motions of his dedication dance.

"Africa's Black Pearl", Pearl Brown was crowned "Miss A&T" Wednesday night by the 1969-70 queen, Lillian Campbell (back to camera). (Photo by Conley)

## Aggies Have Great Enthusiasm In Their Opinions About Homecoming

By Ruth James

As homecoming approaches, an outsider wonders what are the opinions of students and alumni about Homecoming 1970-71, especially the game, the parties and other highlights that will be taking place that weekend.

Jacqueline Glisson, a sophomore from Sumter, S. C., commented "through strong determination of the team and support of the Aggies, A&T should be victorious in the Homecoming Game." She also added, "Victory always makes homecoming an even greater event."

Paul Jones, a senior from Kinston, stated, "The game will be lively and also Homecoming is a good occasion." He also added that A&T stopped Morgan State's 34-game winning streak the year Morgan came to A&T and also beat Morgan State at its homecoming last year. We should come out on top at Homecoming."

Marilyn Bell, a sophomore from Jackson, said,

"Homecoming is a time when alumni, students and friends get together." She feels with high hopes that the Aggie team will win over Morgan State.

Connie Johnson, a sophomore from Moultrie, Ga., feels that Homecoming '70-71 will be an experience to be remembered. With hopes of a superb victory and successful dance, her intentions are to be an Aggie from beginning to end.

Earl Martin, a junior from Winston-Salem, feels that everything lined up for Homecoming this year will be out of sight. He hopes everyone will have a fine time during Homecoming Week.

Janet Jones, a sophomore from Fuquay-Varina, states that "this year's Homecoming will be one of the best yet. Well, as far as the game is concerned, I'm hoping and praying that our Aggie team will roll to victory over Morgan State."

Verence Moore, a junior from Gary, Indiana, feels that, if the team cuts down on so many mistakes, the team will capture

the game. He also added, "Homecoming weekend will turn out great."

Donald Thompson, a senior from Sumter, S.C., stated in his opinion "that the Homecoming Game is the greatest sporting event of the school year. It is a time when all Aggies, young and old, can unite to cheer the team to victory."

Doria Spears, a sophomore from Charlotte, is looking for a great Homecoming week. She also hopes that Homecoming '70-71 will be one that's remembered for a long time.

Emma Brooks, sophomore from Charlotte, feels that the Aggies will be encountering a dynamite performance for the Homecoming Game.

Nancy Beatty, a freshman from Council, feels "that the Aggies will win and hopes to experience a wonderful time at her first Homecoming at A&T."

Anonymous hopes that the Aggie spirit between the team and the students will help boost the team to a victory over the big rival, Morgan State.

## Soul Festival Produces Binding Aggie Spirit

By David Spruill, Jr.

Enthusiasm and school spirit are the two major elements that bind us all together as Aggies. What significance is homecoming without these vital elements? To this effect, the Aggies truly displayed their spirit during the fantastic performance of The Blenders, The Shadows of Love, and The Majors at the opening event for homecoming, the Soul Festival, in Harrison Auditorium Tuesday night.

To kick off the homecoming activities, the Blenders opened up the show with a funky version of "The Chicken," which made the Aggies slap, stomp and scream with all their might. The Blenders, a nine-membered crew, played and danced to "Chocolate Buttermilk," "Let The Music Take Your Mind," "I'm Losing You," "It's A New Day," "Spinning Wheel" and many other rocking selections. The Blenders are mainly students of Winston-Salem State with the exception of Graham Fletcher who is a student here at A&T.

The featured singers of this aggregation were Hobert Sharp, Graham Fletcher and Eugene "Sweet Child" Best. "Sweet Child" truly motivated the coeds with his version of "Going in Circles" and "Ain't That Loving You."

Another highlight of the

Blenders' performance was "Where We Are" which featured a mean trumpet player, Mike Doughtry.

Other members of the group are Hobert Sharp and Ervin Payne, guitar; Bongos, Ervin Stowe; Graham Fletcher and Bernard Foggie, saxophone; Darryl Sharp, trombone; Ronnie Eller on the drums; and "Sweet Child" on organ.

The Shadows of Love, a local group performed next with their romantic and harmonic versions of "Trying To Make A Fool of Me," "25-30 Years of Love," "Didn't I," "I Gave To You," "Like Your Loving," "Who Knows," "What's a Funkadelic," and "Ooo Child."

The Shadows of Love, a trio, features "C-C" Banks, "Paul Banks" and "Spider Man." This aggregation also did one of their own songs entitled, "Up and Down" which sounds hitbound.

Next in line came the fantastic "Majors," who are members of A&T. They provided "I Can't Get Next To You," "Memphis Underground," and many other soulful tunes that turned Aggies on.

With all these highlights of the Soul Festival, one can easily see that the Aggies definitely got off to a good start with their homecoming festivities. The Soul Festival proved to be uptight and out of sight

# On Being Black

As Black people assemble on this university campus this weekend for the homecoming festivities of Aggies, we should take this opportunity to demonstrate to our brothers and sisters that we are true Black people - people of an African heritage.

When we say that we should demonstrate to our people that we have our "stuff" together as a student body consisting primarily of Blacks, it is not meant that we should attempt to see who can get his hair to extend into the longest Afro, for this does not denote the markings of a Black person, any more than the color of a car denotes the worth of its engine.

Showing our Blackness is not entering a competitive contest to see who can look most like our African forebears in dress, for this denotes a Black person no more than the halloween costume of a donkey guarantees us that a donkey is on the inside.

Engaging in conversation to find out who has the "baddest Black rap" does not distinguish who is Black and who is not any more than the speech of a parakeet characterizes him as a human being.

Then what is being Black? Being Black is demonstrating that we can wear our hair any way we want to and still be able to treat a fellow brother with compassion, dignity and respect.

Being Black is dressing in any outfit one chooses and still engage in the massive struggle of our people to show that "We are somebody", each and every Black person on this earth.

The mark of a true Black person is being able to communicate verbally with any brother or sister and having the patience and respect to listen to his views just as he listens to your views without calling each other "super niggers" for his views.

Being Black, above all is just that - being Black, not a second class citizen in mind, body or spirit; not a patsy for someone else; not an individual for any man to use or look down upon - but an inspiring image demonstrating to following generations the profound pride we feel for being born Black men and women.

Peace and Power to all Black people, this homecoming week and from now on til eternity.

## Education Week - Late

"Shape Schools for the 70's," the theme for American Education week, is perhaps timely, but late: for the 70's are already here and the time for planning has already passed.

It probably is not too late to think about the eighties, the nineties, or perhaps 2,000.

If educators had devoted more time earlier to planning for this decade, the word relevancy would not be as overworked as it is today.

More than 30 years ago, Aggies gave impetus to the idea of a new Shape for schools in North Carolina: but even after the Supreme Court's Decision in May 1954, feet dragged and excuses were found to prevent the new Shape.

Sixteen years and many bitter experiences later, there is still a need for a new Shape.

Whether the answer is in separatism or togetherness or something else (perhaps the dismissal of those people who are convinced that Blacks are all culturally deprived to the degree that they must learn English as a second language, or that they can achieve only in "special" programs set up especially for them), there is still the need to give a new Shape to our schools on all levels.

Provision must be made for the kind of training that requires all students to work up to their maximum abilities rather than be satisfied that their cultural, economic, or social deprivation makes it impossible for them to rise above the inferior state to which they have been consigned.

This is the challenge of the 70's. This is the challenge of all the years to come.

## How Our Readers See It

The A&T Register encourages letters to the Editor, but reserves the right to edit them. No letter will be considered for publication unless it bears a signature (not typed); however, names may be withheld upon request.

-The Editor

### University Librarian Thanks Register

Editor of the Register:

I would like to thank Clarence D. Robinson for his article, "Librarian Says Cooperation Has Profited Library", in the October 16 issue of the A&T Register. However, I would like to clear a few points that were mentioned in the article.

1. Students may pick up slips from the periodicals, reference, and circulation desks to use the other libraries in the city, after our resources have been thoroughly checked. These books do not have to be reference books but any title that is not in the library's collection. The slips will permit the students to use materials in the library. If the student would like to check out library materials, they should make requests for Interlibrary Loans through the Reference Department only.

2. The fact that students are able to request books to be purchased, is not new, but is something that students at A&T have been able to do for a long time--it has not, however, received the necessary publicity.

The order forms for books can be picked up at any public service desk and it will not be necessary for the students to contact the Librarians's office.

The last paragraph of Mr.

Robinson's article indicated that books were being put on shelves for students' convenience because of the updating of our cataloging system; I am assuming he meant that because of our present system of cataloging, our books are being processed faster and that they are available for use in a shorter time.

I would like to thank you and your staff for the interest you have shown in the library. We will be happy to furnish articles on any Library Activities.

Yours truly,  
B. C. Crews, Jr.  
Acting University Librarian

### Criticism Voiced Concerning Traffic Problem Here

Editor of The Register:

In my few years in Greensboro as an Aggie and as an employee of this institution, I have knowledge of only one criticism. This criticism I feel is one of utmost importance. It can be looked at in many ways but can be listed in the books only as "TRAFFIC".

From the first day of school until October 27 at 12:50 a.m., I have seen four students have a brush with death in only two accidents.

This is not what is happening in our cities, but what has been and is happening on our campus.

After constant requests and warnings from our Campus

Police to "Slow Down", "Be Careful", and "Watch Out For That Student", there have been two accidents that could have caused hardships, pain, and even death for a young lady walking and to a group of three young men riding in a motor vehicle.

These are the things that should exist for the sake of opening one's eyes.

Please!! Before it's too late, wake up and live. Look before you leap. Observe that sign, even though it means that you will be a little late; at least you will arrive. Above all remember. PREDESTRIANS NO LONGER HAVE RUBBER BUMPERS.

An Interested Employee

# Band Ends Season Half With 'Soul In Motion'

By John Caesar

The 132 piece A&T State University Band under the direction of W. F. Carlson and J. J. Williams has completed the first half of the marching season with performances entitled "Soul In Motion."

The "Marching Aggies" began the season with great success by participating in the first annual "Soul Bowl" that was held in Yankee Stadium, New York. They also took part in an earlier parade through the streets of Harlem before the nationally televised "Soul Bowl" game between A&T and Southern University of New Orleans, La.

The half-time show entitled "Soul In Motion" featured sounds such as "Getting Ready", "Mash", "Chocolate Buttermilk", and Stevie Wonder's latest recording "Signed, Sealed, and Delivered."

One week later the Marching Aggies participated in the first annual "Sickle Cell Disease Benefit" Game held in Winston-Salem's Grove Stadium.

The contest between A&T and South Carolina College was well supported with excellent half-time shows from both "South Carolina's Marching 101" and the famed "Marching Aggies of A&T."

Other shows performed by the "Marching Aggies" were in contests with Johnson C. Smith

University, Maryland State College, and for the first time in Greensboro against Norfolk State College.

The band with 132 pieces this year features a stronger low and percussion section with the middle and solo selection featuring more experience and musical ability than in previous years.

Leading the band again is Hollis Pippins, a junior from Jacksonville, Miss., backed by twirling major Ronne "1,2,3" Quick, a freshman from High Point.

The majorettes are headed by Barbara Lucas, a junior from Washington, D. C.

One other feature of the Marching Aggies is Joan Goode, a Greensboro freshman, as a female snare drummer who has shown unusual ability in cadences.

Paul Foster, a senior from Greensboro, is largely responsible for the arrangements of the "soul sounds" that the band plays. The "off-the-field" performances are led by Semmie Neal, and the percussion section, and the "Doddble Brothers," a nickname for the piece bass horn section, led by Daniel Edwards.

Leroy Miller, a junior mathematics major from Greenville, S. C., has been responsible for drills that are performed during half time.

The "Marching Aggies" have completed the first half of their marching season performing music using the theme, "Soul In Motion". The Aggies are shown here marching at the University of Maryland at Eastern Shore (Maryland State College) two weeks ago. (Photo by Conley)

# History Department Chairman Has Plans To Make History Relative

By George D. Addams

The word history connotes to many people a dry and usually non-interesting, non-relating subject whereby those do well with it are usually dry and uninteresting too, or just plain egg-heads.

Dr. Frank White, new chairman of the History Department (which is a department all to itself now) is pulsating with energy to see that in this school, history shall be as relative to the campus life as the 6:00 news is to most Americans.

Dr. White has begun a program of informative rapport with those interested in the field and especially with history majors; the extensive idea is to conglomerate the institutionalized form of learning history so that it might adhere to contemporary concepts in thinking as well as learning.

Dr. White feels that history does not mean just learning a lot of dates, places, and people; however, he emphasizes the need for dates and times to relate to us meaningfully, how they led us to where we are and how they direct our future existence.

The planned itinerary for the current term will consist of a varied-multi-interest and selective form of study. There will be regular meetings with the chairman of the department with its majors, and an "open-door" policy with the instructors as

well. No student in earnest shall have his question(s) unanswered if Frank White has anything to do with the matter--this is safe to rely upon.

At the first meeting held for all history and social studies majors, he gave a new outline of course requirements for entering freshmen, and an idea of courses for currently-enrolled students to take so that their projected fields of interests and occupations might be of relevance to them or in post-graduate work.

They are the following:

principles of sociology, statistics, anthropology, the histories of other regions of the earth other than requirements demand, and business law. These courses will be helpful to the person planning a career in such areas like urban-planning and development, institutional research projects, etc., but will graduate as a history or social studies major.

Also, at the meeting a history club was again started; however, this will be functioning body this

(See HISTORY CLUB, Page 12)

# Role Of Technologist In Changing World Discussed

The third annual convention of the National Association of Industrial Technology was held October 22-24 at Kansas State College in Pittsburg, Kansas.

Representing A&T were Dr. C.W. Pinckney, Dean of the School of Industries, Andrew Williams, Chairman of the Department of Industrial Technology, Ronald Robbins, President of the A&T student chapter of NAIT, and Joseph Levister, vice-president.

The theme for the convention this year was "Education, Technology, and Industry." In addition to the regular convention business sessions, many industrial leaders addressed the convention about world industrial problems of today and the role of the industrial technologist in this ever-changing industrial complex.

Along with presentations by such industrial leaders as Norman Krandall and Robert Hornbucked of Ford Motor Company, recent industrial technology graduates reported about the pros and cons of the large corporation and the opportunities that await the industrial technology graduate. The governor of Kansas also was among the list of guest speakers and panelists.

Two highlights of the convention were the exhibition and demonstration of Helio-stol and Big Brutus. Helio-stol is a new pro-

peller plane which was developed for the military. Under certain wind conditions, this winged airplane will duplicate many helicopter feats, such as vertical take-off. Fully loaded, it is capable of taking off in only 335 feet and lands in even less.

Big Brutus is the largest excavation machine in the world today. Brutus was built in the early 60's on location at a strip mine southwest of Pittsburg. Towering 160 feet in the air, the shovel has a dipper capacity of over ninety cubic yards, enough to fill three railroad cars. It is used to strip about twenty-five feet of earth from the top of an 18-inch seam of coal.

SEVEN DAYS A WEEK

# Dean Tells Of Crucial Period In Education Week Speech

Dr. Albert Spruill, dean of the Graduate School, was the guest speaker at a program in observance of American Education Week, Monday at 7 p.m. in the Memorial Union Ballroom.

Dr. Spruill's address was centered around the theme of American Education Week, October 25-31, which is "Shape Schools for the 70's." The program was sponsored by the Student National Education Association.

Dr. Spruill began his message by admitting that the theme was a challenging and an uncertain one.

Accepting the challenge, he added, "We do not know whether we will shape the schools for the seventies or whether the seventies will shape the schools for us. This uncertainty is apparent because we are living in the most crucial period of human existence."

By the crucial period, it was gathered that Dr. Spruill spoke of the the Vietnam War, domestic resentment to the war, the population explosion, pollution, the knowledge explosion, student unrest, the generation gap, crime, deep-seated division in our population, drug traffic, and others.

Hence, "How shall we shape our schools for the seventies so that they will be able to prepare individuals to live in this uncertain world?" he queried.

"Let us look then through a crystal ball to examine what we will run into during the seventies as we attempt to shape our school," said Dr. Spruill, inviting the audience to fantasize with him.

He now cited a survey by Dr. George Gallup and the shortcomings of the public schools which was published in the October, 1970 issue of the Phi Delta Kappan.

According to the Gallup Poll, Dr. Spruill pointed out, "the seven biggest problem areas with which public schools in communities must deal with, presumably in the seventies, are in this order of priorities: discipline, integration/segregation, finances, teachers, facilities, dope/drugs, and curriculum."

Speaking on the topic of discipline, Dr. Spruill warned, "We have passed the day when we can treat our youngsters at any age as mechanical soldiers to be manipulated at the will of despondent adults." Surely the problem of discipline will be with us for a long time to come.

"Student unrest, like a bad case of poison ivy, should neither be ignored nor treated as a fatal malady," quoted Dr. Spruill from the October issue of Phi Delta Kappan.

"Secondly, integration/segregation is a most important aspect of this whole matter of shaping schools for the seventies. I am convinced that former Chief Justice of the Supreme Court, Judge Earl Warren, was quite right when he said that we cannot expect domestic peace and tranquility in this country until we have granted equality to minority groups the same as to those of the majority."

The part that finance will play in shaping schools for the seventies is that with the population on the increase. There will be a demand for more and better schools, hence there is bound to be a need for additional finances.

"Teachers will be among the critical issues that we must deal with in shaping schools for this decade," he surmised. Issues concerning teachers will be, "How

will they be prepared, and who will certify them?"

Teachers will be made accountable for the public's learning and the old adage "If the pupil has not learned, the teacher has not taught," will be put into practice.

"Dope and drugs will be an important consideration, for Compton's Pictured Encyclo-

pedia of 1968 estimated that somewhere between 400,000 and 3,000,000 youths were involved in drug use and abuse. These figures have increased immensely and today it is a critical issue," he informed his audience.

"And finally," began Dr. Spruill, "the issue of curriculum is so important that the March, 1970 Phi Delta Kappan dedicates an entire volume to this topic.

There appears to be a movement towards an integrative curriculum, intercultural education and Black studies, course relevancy, flexibility in schedules, and humanities will play greater role in the education of individuals for a leisure class culture."

Ending, Dr. Spruill challenged all to be movers and doers as we enter what will likely be a most critical decade of human existence.

## If you are a senior...

# 1971

## could be the most important year of your life.

As you contemplate one of the most important decisions of your life, you will want to remember this: it is not just "a job" you are seeking—it should be the beginning of a career. And if it is to be successful, both you and your employer must need and want each other.

To help you with your decision, we invite you to consider the opportunities at Pratt & Whitney Aircraft. Currently, our engineers and scientists are exploring the ever-broadening avenues of energy conversion for every environment... all opening up new avenues of exploration in every field of aerospace, marine and industrial power application. The technical staff working on these programs, backed by Management's determination to provide the best and most advanced facilities and scientific apparatus, has already given the Company a firm foothold in the current land, sea, air and space programs so vital to our country's future.

We select our engineers and scientists carefully. Motivate them well. Give them the equipment and facilities only a leader can provide. Offer them company-paid, graduate-education opportunities. Encourage them to push into fields that have not been explored before. Keep them reaching for a little bit more responsibility than they can manage. Reward them well when they do manage it.

Your degree can be a B.S., M.S., or Ph.D. in:

- MECHANICAL ENGINEERING
- AERONAUTICAL ENGINEERING
- ENGINEERING SCIENCE
- ENGINEERING MECHANICS

If your degree is in another field, consult your college placement officer—or write Mr. Len Black, Engineering Department, Pratt & Whitney Aircraft, East Hartford, Connecticut 06108.

## Grievances Expressed Concerning Living Conditions In Scott Hall

By David Spruill, Jr.

Is a building considered a reflection of the people who reside within? Is a house considered a home? These are ambiguous propositions, no doubt. Nevertheless, an overwhelming majority of the occupants of Scott Hall feel their dormitory is not a reflection of the students entirely, but it is also a reflection of the administration as well.

In several recent interviews, freshmen and sophomores expressed their grievances of the living conditions and problems that they are faced with daily. Basically, the two top complaints of the students were the following:

1. Students should be able to regulate their own heat in their rooms.
2. A new, or at least, a modified, intercom system should be installed.

Fifty occupants were interviewed. Of this number, 25 were freshmen and 25 were sophomores. They all included the two basic complaints in their comments. The following are a few of the most prominent comments made on the subject:

**Archie Quick**, freshman art major: "I feel that Scott Hall should be remodeled in order to make the students feel at home away from home. One main thing that's wrong with Scott is the people. They keep writing ... on the walls and sweeping trash in the halls."

**Charles Hagwood**, sophomore mathematics major: "Scott Hall is entirely too large. There are too many brothers here; and when brothers interact, they mess up the place. Living in Scott is a tragic experience except on Sundays from about 3 a.m. to 10 a.m."

**William Dula**, freshman sociology major: "Scott Hall is not at

all what I expected. The old closets are hard to open and close. The heat should be regulated and we can't hear the intercom distinctly even with the door open."

**Frank Bell**, sophomore biology major, Newport News, Va.: "For the money we're paying, I feel that we should have better conveniences. There is no true communication between the administration and the students. The administration is partially to blame for Scott's dilemma."

**William Boone**, freshman animal science major: "The bathrooms and halls are just not clean enough, especially on weekends. Another thing, there should be more than four washers in the basement for over 1,000 students."

**Tyler Hairston**, sophomore political science major: "Scott Hall is a monstrosity. It is too large to be adequately controlled by the present staff. Scott seems not designed solely to house people, but to solve a problem, that problem being - housing as many people as possible without spending a lot of money."

**Earnest Stallings**, freshman social science major: "What's the use of having heat when you can't control it! Scott Hall needs qualified people to fix the heating system and the intercom. As far as lights are concerned, it's a shame that the staircases are pitch dark and windows are broken out. As far as cleanliness

goes, that depends on the students. If everyone would do his share, it wouldn't be so bad.

Scott Hall needs a whole new canteen and a television in the lounge. A committee should be made by the students to enforce some action around here. A lot has been said, but nothing has been done."

**John Taylor**, sophomore political science major: "As far as personal phone calls are concerned, I feel that messages should be directed to the student's room instead of being placed on a bulletin board. The intercom system should be more distinct."

**Jasper Little**, freshman accounting major, Washington, D.C.: "Scott Hall needs a new intercom and heating system. Those are the basic needs. I also feel that better illuminated lamps should be installed in the rooms. We need a whole new canteen. All the machines seem to be defective, in that money is lost in the machines."

**Thomas Johnson**, sophomore business administration major: "I feel that most of the responsibility lies with the students. We, as a whole, don't have self-pride. Broken glass, trash, and water can be seen down the halls, especially on the weekends. About the intercom, well, that is due partially to the students who rip them off the wall. The attitude of the mass makes it hard on the ones who want to see changes made."

The last comment comes from **James Patten**, mathematics major from Winston-Salem and the president of the freshman class. "Scott Hall is not bad; it's the people who make it bad."

## Alumni Association Members Listed For Many Activities

This year the members of the Alumni Association are scheduled for a complete list of activities during the homecoming weekend.

According to Ellis F. Corbett, "the number of alumni activities usually increases year by year. However, because of difficulties encountered with room reservations the number expected this year will be lower."

This morning, early alumni arrivals attended the dedication of the new Computer Science Center. Tonight some alumni will attend the Omega Mardi Gras.

On Saturday approximately 150 alumni officers and members, along with members of the Board of Trustees, will attend a luncheon given by Dr. L. C. Dowdy, A&T president.

Of course on Saturday night after having attended the game between A&T and Morgan State College, the members will attend the Alumni Homecoming Dance at the Hilton Inn on West Market Street.

The Alumni Worship Service will be held Sunday morning at 11:00 in Harrison Auditorium. C. C. Griffin of Concord will be the speaker.

## Campus Haps

The A&T Register will be holding its weekly staff meeting on Monday night at 7:00 in the student newspaper office.

**Homecoming Aftermath** featuring live "The Shadows of Love" Saturday night, October 31 from 10 to 3 a.m. in the Second Floor Ballroom of King's Inn. Admission is \$2.00 stag and \$3.00 drag. Sponsored by the Iota Phi Theta Fraternity.

**Omega Psi Phi Fraternity** will be holding its frat meeting on Wednesday night at 9:00 in the Student Union, Room 212.

**Alpha Phi Alpha Fraternity** will be meeting Monday night at 9:00 in the Alpha frat room located in the basement of Scott Hall.

**The Ayantee** will hold its meeting of the yearbook staff on Tuesday night at 8:00 in Room 210 of the Student Union.

**Roman Catholic Mass** sponsored by A&T - Bennett Newman Club in the Campus House, 1015 Bluford Street (Across from Hines Hall). 11:30 each Sunday. Confessions will be heard before mass.

**Groove Phi Groove** presents **The Gator Affair** at King's Inn on Friday night, October 30, at 8:00. Tickets are \$1.50. Boo-Coo Refreshments.

**All engineering students** - representative from Eastern Kodak Company will present a seminar, "The Beginning Engineer In Relation To Industry". To be held Monday, November 2, at 6:30 p.m. in Room 206 Cherry Hall.

**Physical Education Majors Meeting** Monday night at 7:30 in Moore Gymnasium. All P.E. majors are urged to be present.

**Welcome All Alumni**

# Rested Aggies Prepare For Homecoming Clash With Morgan

By Paul Jones  
Sports Editor

The Aggie football team got a period of well-deserved rest last weekend as they continued to prepare for the awesome Bears of Morgan State for homecoming. Saturday's game will mark the 40th anniversary of the first meeting of these rivals of long standing. As in previous contests, this game is expected to be the

usual thriller. With only a 3-3 record, A&T is a decided underdog, but has the material to give Morgan a real game. After dropping its first contest to Grambling 38-12, the Bears have terrorized its CCAA opponents. Since its defeat, Morgan has rolled 55-0 over Maryland, 54-15 over NCCU, 15-7 over Norfolk, 43-6 at Virginia Union, and celebrated homecoming 34-6

at the expense of Delaware State. Scores such as these surely indicate that A&T has a real opponent for homecoming. Already the Aggies have played two of the biggest powers in Black football—Florida A&M and Southern University—and lost. But with all of the upsets occurring this season, Morgan is destined to be a loser again. Having lost its own homecoming 20-19 last year and having its 34-game winning streak broken 7-6 by the same Aggies, Morgan is not taking this game for granted. Coach Earl Banks would like nothing more than to take a victory back to Baltimore, but A&T's Coach Hornsby Howell has his team ready to make homecoming a joyous occasion.

The game should match up as a real defensive struggle. Morgan QB David Freland, who has thrown for 9 TD's and nearly a thousand yards, can be expected to put the ball into the air at anytime. To compliment this, the Bears have the most potent running game in the conference. However, A&T has the best rushing defense in the CCAA which will probably decide the victor. Heading the Morgan attack will be halfback John Sykes who has been compared to LeRoy Kelly. Already the injury plagued Sykes has accounted for five Bear TD's. Other running backs to watch include blocking back Joseph Alex, HB Graig Gee, and QB Freland. Defensively the Bears have the material to be

tough to run against. Its secondary compares favorably with that of A&T. Expected to play leading roles for A&T are All-American candidate Mel Holmes, End Willie Wright, Flanker Charles Middleton, and QB Jerome Turner. Charging the defense will be Ben Blacknall, Ralph Coleman, and William Hargraves. With a continually improving secondary, A&T and Morgan have the stage set for a truly exciting game. This and an explosive offense adds up to a team which can't be beaten again this season, especially for homecoming. For the third year A&T should be victorious by one point with the backing of the home crowd.

## Students Will Be Kept Busy By New Intramurals Program

By Jacqueline Glisson

Canoeing, bicycling, roller skating, horseback riding, and horseshoes are just a few of the sports included in the activities for students by the Intramurals Program. These sports and activities are being provided for students through the leadership of Roger McKee, director, and Eric Cox, student chairman. The flag football teams, basketball teams, and swimming activities are now in progress. There is no battle of the sexes, for girls have an equal opportunity to participate in any phase of the activities. Two girls' flag football teams have been organized. On a rental basis, 10-10 speed bicycles for the energetic will be provided for races, while double and triple seated ones will be provided for the more relaxed students. Basketball is offered from Monday-Thursday, while swimming is on Monday, Wednesday, and Thursday from 6-7:30 p.m. Other sports offered are softball, tennis, golf, table tennis,

bowling, basketball, flag football, and volleyball. Not only have 13 flag football teams been formed, but a football game is planned between two fraternities also. In the competitive sports, trophies will be given to the outstanding participants and teams. Because of school closing early in May, last year's outstanding participants will be presented their trophies this year. As stated by Cox, "The objectives of Intramurals are to get students into more activities during the weekdays and to release the tensions and hostilities of students." A project promoted by the Intramurals was the Student-Faculty Game to bring about a closer association between students and faculty members. Interested students may enroll for Intramurals by signing up at the Union Information Desk. The Rule pamphlets can be picked up from the Intramurals Office in room 103 of the Union. Cox said that thus far, the student participation has been good.

## Willie Wright Doing Good Job Of Making Opponents Miserable

As a football player, A&T's Willie Wright has but one goal in mind—to take advantage of pass defenders.

The Aggies' lanky junior tight end has been doing an outstanding job of making life miserable for opponents who happen to play in the defensive secondary. With four games remaining on the schedule, Wright has already snagged 27 passes, just four fewer than he caught during the entire season last year. He needs just 13 receptions to give him a total of 100 catches over the three-year period. "I would like to end up with at least 50 receptions this season," said Wright. "That is the personal goal that I have set for myself."

At 6-4 and 210, he is an imposing figure on the football field. The two ham-like hands he possesses are also an asset.

"I always try to take advantage of the short defender," said Wright. "I tell the quarterback to throw the ball high; then I leap for it. That way, if I can't get it, usually he can't get it either."

A native of Greenwood, S. C., Wright has been a starter for A&T since his freshman year.

As a freshman, Wright was sometimes tense and unsure of himself. He also seemed to lack the speed necessary to get the job done. Then coach Hornsby Howell recommended that his young receiver go out for the track team. That proved to be a good move.

Wright became a prime target for the long bomb and his moves after catching passes were also improved. Last season he was probably the most feared receiver in the conference.

A hard worker and an intensely proud young man, Wright is still not satisfied with his own performance. "I want to catch those that are easy and those that look hard."

Wright traces some of his leaping ability to the fact that he was a pretty good basketball player in high school. He also took turns as a defensive end and half-back.

One of Wright's biggest boosters is coach Hornsby Howell. "We always knew that he had the speed to do the job for us," said Howell. "He was having some

difficulty at the beginning of the season, but he is holding on to the ball now and we are expecting even greater things out of him."

*Accounting - Finance  
Sales - Marketing  
General Administration  
Broadcast Management*

Contact your placement officer for an appointment to see the CBS representative

### 13-College Program Has Queens For All Four Classes

By David Spruill, Jr.

This year marks the first graduating class of the 13-College Curriculum Program. Thus, queens have been selected from each class. However, the queen from the senior class represented the 13-College Program at the Coronation.

Gwendolyn Smith, a senior accounting major from Shelby, stated, "I feel that this program has more or less taught me to communicate with the instructors. This program has been most rewarding financially."

When asked what she thought was the role of the Black woman, she stated, "Well, being married, I would say that the role of the black woman is to encourage, push or motivate her man."

Gwen's interests are sewing, cooking and playing tennis.

Barbara Feemster, a junior social welfare major from Sharon, S.C., stated, "The 13-CC has given me a lot of enrichment that otherwise I wouldn't have obtained. Barbara is a member of Alpha Kappa Alpha Sorority. Her interests are meeting people, sewing and watching television."

Louise Murrill, a sophomore accounting major from Jacksonville, states, "My main academic endeavor is to become a CPA, due to the fact there is such a small percentage of Blacks in this area. My main hobby is sewing."

Karen Patterson, a freshman political science major from Henderson, states, "This program is most rewarding in that the teachers spend more time with you. And at least the freshmen don't have to worry about registration. My hobbies are reading, dancing, sewing, and swimming."

*Engineers! Would you rather start your career in management and practice engineering instead of starting in engineering and working up to management?*

**Management Now-- Charmin Paper**  
*Not Later at*  
A SUBSIDIARY OF THE PROCTER & GAMBLE CO.

*Yes, management now-not later!*

Experience in papermaking is not necessary; we'll train you. Within 6 months after you join us, you will be given full charge of an engineering staff section or direct responsibility for a production unit or department.

We will interview at the Student Placement Office

**Wednesday, November 11**

BS and MS degrees in ChE, CE, IE, EE, ME, Pulp and Paper Technology, and MBA's with BS in any technical discipline. We have opportunities in:

- MANUFACTURING PLANT MANAGEMENT
- PLANT MAINTENANCE MANAGEMENT
- PRODUCT ENGINEERING
- PLANT INDUSTRIAL ENGINEERING
- PLANT CHEMICAL ENGINEERING

Already 10th largest industry in the United States, papermaking is exploding with new growth. And Charmin, as a producer of household paper products only, is a pacesetter in the segment that is growing 3 times faster than the total industry!

Charmin's entire operations are alive with new methods, new ideas, new processes, new product concepts—and Charmin engineers are in the forefront of these developments. Now, as our marketing area expands beyond 75% of the U. S. population, we need more engineers capable of bold new thinking.

Our rapid growth, combined with a practice of promotion from within, provides outstanding advancement opportunities. We must significantly increase our management organization in the next few years, providing opportunities at all levels in the organization. Your progress will be closely followed, since our technically trained management group is comparatively small.

Choice of four locations: Green Bay, Wisconsin; Cheboygan, Michigan; Mehoopany, Pennsylvania (near Scranton) or our new Cape Girardeau, Missouri plant. If hunting, fishing, or skiing are hobbies, your choice of locations can put you into an area rich in resources for your favorite sport.

Sign up at the Placement Office now, and find out more about a future with us. We're interested in talking with you even if you have graduate school plans or a military obligation. Note: You must be a U.S. citizen or have a permanent immigrant visa.

An Equal Opportunity Employer — M/F

*Paper is Big Business! We're a leader!*

*You can grow with Charmin!*

*Sign up for an interview!*

# ROTC Drill Teams Will Perform

By William Johnson  
Linda J. Merritt

The Army and Air Force drill teams will be performing in the Homecoming activities this weekend. "The team is not geared strictly for show," says Thomas Price, commander of the Army ROTC drill team. "Dancing is not the thing we are stressing; it's weapon movements, snap, and precision drill."

Price further stated that the general public doesn't really understand the meaning of competition drill. "The team got off to a slow start," he said; "but, by the spring competition in Georgia, we will have it all together."

"The Air Force drill team is progressing quite well," says Raymond McCall, commander. He stated that the men are trying very hard and are eager to learn.

"Furthermore, the team will try to develop itself more around snap and precision than in former years," he continued. "We plan to take more trips and give the team members more opportunities to show off what they have learned."

What makes a cadet join the drill team? Theresa R. McLain, a freshman from Fayetteville and the only woman on a drill team at A&T said, "I have always had a negative attitude about women being in the military services. After I came to A&T, I wanted to do something different. To my knowledge, there has never been a woman on the Air Force Drill Team, so I decided to try out for it. I urged more women to join the Air Force ROTC, but not the drill team. I joined it to show that it could be done. I like a challenge."

David Doctor, a sophomore from Beaufort, South Carolina

stated, "We have a lot of young members on the team who are shaping up to be members of a fine Army ROTC drill team. I personally wanted to be on the team because it gives me a great experience of working with other young men."

William Kenon, a freshman, commented, "I had three years of ROTC in high school and I like the movements specified in the 50-14 manual of the Air Force. I had a brother who is a senior here and I have been coming up here for homecoming for three years. I like the Air Force because of the uniforms. I had decided to be on the team before I came here."

Michael Houge, a sophomore from Morehead City, explained, "I feel that the Army drill team that we have this year will be the best ever. I joined the team because I enjoy drilling."

# Skilcraft Blind Workers Begin Picketing

By Milton Coleman  
SOBU News Service

Blind Black workers at Skilcraft Industries for the Blind here took to the streets last week after the company's board of directors snubbed their noses at the workers' attempts to negotiate longstanding grievances.

Skilcraft, which employs about 150 persons—ninety per cent of them blind and well over half of them Black—has been cited by the workers over the past four years for its unfair, discriminatory and exploitative work conditions.

The workers have continually sought in vain to meet with company officials. They have been backed in their demands by a number of groups and influential individuals in the Black community.

Early last month, a group of respected and influential Black community members, including several ministers and civic leaders, toured the Skilcraft plant.

At a press conference held, a spokesman for the group revealed to newsmen that the committee was "appalled at the working conditions, the overall poor management and the discriminatory practices which our people are forced to endure because they are Black and happen to be blind."

Describing the conditions as "little short of slavery," the group called on the total Black community to join in the effort to alleviate the conditions.

Despite positive responses by the Black community, however, Skilcraft has continued to pass the buck and avoid the issue. The decisive moment came when the firm's board of directors was contacted by the blind workers and refused to even answer the workers' letter, much less grant them an audience.

All avenues of calm negotiation thus being closed to them, the workers began their picketing

Tuesday, October 20 during their lunch hour.

Speaking at a press conference, Katie Nixon, a spokesman for the blind workers recounted the past rebuffs given her and her co-workers.

"We have worked," she explained, "with many agencies and individuals including the industry's management and board

(See SKILCRAFT, Page 12)

# Gymnastic Club

THE A&T STATE UNIVERSITY GYMNASTIC CLUB WILL BEGIN ITS ACTIVITIES ON NOVEMBER 9, 1970 IN EAST GYMNASIUM AT 4:00 P. M. THE CLUB IS OPEN TO ALL A&T STUDENTS WHO ARE INTERESTED IN PARTICIPATING IN GYMNASTICS. THE CLUB WILL MEET ON MONDAY, TUESDAY AND THURSDAY FROM NOVEMBER 9 UNTIL MARCH 11, 1971. WE ENCOURAGE STUDENTS INTERESTED IN THIS AREA TO COME OUT AND JOIN US.

## Homecoming 1970

### 'Striving Toward Pan Africanism'

## History Department Chairman Has Plans To Make History More Relative Subject

(Continued From Page 3) time, not just a paper with some names on it, as Dr. White said. Paris Favors, a senior political science major was elected president by an uncontested student vote; Favette Smith as vice-president; Rachel Doster as secretary; Dorothy McClain, treasurer; and yours truly as

History Club reporter (I wonder why).

In a further desire to bring the best form of educational facilities to A&T's History Department, new instructors with multifarious educational

training and field work as well as indigenous backgrounds have been hired to fulfill that goal. As example, David Clarke a graduate of Kent State and Ohio State is instructing courses in European and Far Eastern Histories.

## Blind Workers Are Snubbed By Skilcraft

(Continued From Page 11)

of directors, the human relations commission, the legal aid attorney, mayor Jack Elam before he was mayor, the state commission of the blind and the United States Justice Department.

"Since that time it has become quite clear that unless Black people act in their own behalf no one else will."

The group was joined on the picket line by many community persons and students from Malcolm X Liberation University, Bennett College, and A&T, as well as organizational representatives from the Greensboro Citizens Association and the Greensboro Association of Poor People.

Mass media coverage of the conflict has been miniman, perhaps because of the composition of the board, made up almost entirely of prestigious members of the Greensboro Lion's Club. Community observers have also pointed to the fact that Bailey Hoppood, a board member, is also an executive at the only local television station (WFMY-TV) which has in this instance refused to give any film coverage to the kind of Black community activity it ordinarily flashes across the screen as often as possible.

As a result, Blind workers have begun their own publicity campaign, heavily canvassing the downtown area and shopping areas in the Black community, inviting everyone to a mass community meeting scheduled for Monday at a local church.

That the workers might go on strike if they are continually snubbed by the all-white Skilcraft power structure has not yet been considered an unlikely possibility.

"Even though Industry of the Blind generally represents the only means of gainful employment for Black blind people in Greensboro," Miss Nixon said, "We are nevertheless prepared to continue picketing until Black blind people are respected as whole people and our grievances are resolved."

The grievances cited by the workers include low wages, on-the-job discrimination in the supervisory and executive fields, poor training, inadequate pension and medical problems and unbelievably unsafe working conditions.

### Graduating Seniors

ALL SENIORS who expect to graduate January 30, 1971, are requested to complete an APPLICATION FOR GRADUATION FORM which may be obtained at the Office of Registration and records. Please list on this form the Course No., Sec., Credit Hours, and the Names of the Instructor of all classes in which you are currently enrolled. This form is to be returned to the Office of Registration and Records on or before November 7, 1970.

# INTERFACE.

It's where dignity is a right, not a gift.

The senior research chemist who's helping us develop a safety fuel for jet aircraft happens to be black. The one working most closely with him is white. The project couldn't go on without either of them or their support team.

Which may explain why people in the interface of companies affiliated with Standard Oil Company (New Jersey) are colorblind.

We couldn't afford judgments based on color, sex, creed or national origin. Even if we didn't have a deep conviction that dignity is a right, not a gift.

Because of our conviction, we gave thousands of dollars last year to the National Urban League and the United Negro College Fund. And we actively recruit and employ qualified graduates of all races, at all degree levels.

Our interface brings together some of the best minds in all engineering, scientific and business disciplines. Creates challenges and insights beyond those of a single company. And stifles petty thinking and petty minds.
