Frye Comes In First In N.C. House Election Results

Henry Frye, A&T alumnus, was not only re-elected to the North Carolina House of Representatives but led the ballots in the election for Guilford County's six seats with 20,401 votes in Tuesday's general elections.

Charles Phillips, a member of the A&T Board of Trustees, was second with 19,049. Phillips, in 1963 led the fight to give university status to A&T to make it the first Black public institution of higher education in North Carolina to gain this distinction.

Frye supporters survived an early scare when his name did not show on early televised election returns. Somewhat later his name appeared in fifth place and, finally, emerged at the top in the balloting.

In his first term, Frye was selected by leading news reporters in North Carolina as one of the most competent freshmen members of the Legislature. He served on the House Rules Committee and the committees on banks and banking, public welfare, education and correctional institutions.

SGA Prexy Discusses Pre-Dawn Shortcomings

The president of the Student Government Association, Matthew Simpson, stated early this week, "There is a definite need for students to be made aware of what happened." This statement was made in reference to the pre-dawn show last Saturday morning. Over 2,500 students filed into Charles Moore Gymnasium to be entertained by the Delfonics, the Intruders, Brenda and the Tabulations, the O'Jays, the Vibrations and Nat Turner's Rebellion.

When the show was over at approximately 5:30 a.m., these same students left Moore Gymnastics after having been entertained by only one of these groups, the Delfonics. The other entertainers did not show up.

Simpson explained, "What actually happened is somewhat a mystery even to SGA . . . there was a contract signed between A&T and Ross Fields Productions to contract these groups." The SGA head revealed at this time that A&T was not the only school that had contracted this show. He pointed out that this same show was scheduled to be staged at Florida A&M on Friday at 9:00 p.m. As was the case at this university, only the Delfonics showed up at Florida A&M.

Simpson was then asked about legal action that could be taken, he replied, "You can . . ." (See STUDENT, Page 8)

President Of Men's Council Lists Problems And Plans

Future plans and projects of the Men's Council include more snack machines, telephones in dormitories, and more washers and dryers in men's dormitories according to Thurman Yelverton, newly-elected president.

Movies and dances are tentatively planned for Men's Council week.

The newly-elected president complimented Scott Hall and Senior Dormitory on their success in collecting dues for the Men's Council.

He expressed concern over the lack of participation by upperclassmen, "The Men's Council is being run by freshmen," said Yelverton, "and upperclassmen are not here to hold offices." In fact the composition, which makes no accommodations for freshmen to hold offices, was temporarily suspended to permit the election of a full slate of officers.

Yelverton feels that an (See MEN'S COUNCIL, Page 4)

New Recruitment Program Planned For Spring Semester

By Clarence D. Robinson

Have you ever wondered or asked yourself how you happen to have been selected as a Presidential Scholar or a member of the 13-Collar Curriculum Program here at A&T State University? If not you had better read on, fellow Aggie.

For the fall semester the recruitment program at A&T follows a schedule drawn up by the North Carolina Association of Registrars and Admission offices.

The schedule is comprehensive in that it covers all sections of the state of North Carolina. According to this schedule, A&T has a main recruiter, Lovie Kee, Jr., four and one half days a week covering the state form the mountains to the plains.

Vincent McCollough, presently a prospective graduating senior here at the University, is working with the admissions office in the capacity of Admissions Counselor. He is working currently with three different categories of applicants.

The categories include the National Merit Scholars; seniors who had requested that A&T be sent a copy of their Scholastic Aptitude Test scores and those students nominated by their high school counselors and their classmates as the most outstanding student in their respective school.

The above categories of students are in addition to the regular procedure, whereby students request information concerning A&T State University.

William H. Gamble, director of Admissions, has visited and had consultations with prospective freshmen who are thinking seriously about attending A&T.

Next semester recruiting procedures will not involve a regular schedule. Visits will be made at the request of high schools or at the request of the admissions office.

Furthermore, Gamble commented that the admissions office was pleased with the reception that he and his fellow members staff received from the prospective students that have been contacted.

Last year, approximately 3,000 individual contacts were made. This year in comparison with the academic year before, is varying very little. This year the admissions office in accelerating its efforts to contact approximately 20% more students than last year's figure.

Approximately 1,700 students were admitted to this year's freshman class, but only 1,000 came. The difference is believed to be due to the lateness of the arrival of the financial and packages to A&T, increase in fees, and the funds from the students that other universities, predominantly white, which are able to use to attract black students.

Since A&T does not get any financial aid of this sort, it cannot adversely compete on an equal basis.

The admissions office plans to mail approximately 8,000 applications this year for the incoming freshman class. It is predicted by this office that 4,000 applications will be returned to A&T. The University will be able to admit at least 20% of these applicants. The estimated student enrollment for the freshman class of 1971-72 should fall in the range of 1,100 to 1,200 students.

For the spring semester of the 1970-71 academic year, A&T (See 150 PREPAREN, Page 5)
On Frye's Victory

Aggies who participated in the Henry Frye Campaign can relax now that their candidate has been re-elected to the North Carolina House of Representatives.

Although the majority of the students were not eligible to vote, they were enthusiastic in helping to get citizens registered prior to voting time. Some assisted in distributing leaflets on and off campus. Others worked at the Frye Campaign Headquarters. And still others assisted in transporting voters to the polls or in providing their services to promote the campaign.

Such worthwhile participation says, louder than words, that we are somebody. Students, faculty, and the community at large are to be commended for our victories in this election.

Editor's Rights

An element common (and often latent) in the wide diversity among student publications is expressed in Exstir and St. Andrews' Freedom and Censorship of the College Press. "A student newspaper can raise more hell on a college campus than spiked punch at the dean's reception for freshman women."

"The loud explosion you heard" occurred on Greensboro College's campus Wednesday as Dr. David G. Mobberley, president, dismissed Bob Collins, editor of the Collegian for "a serious error in judgment."

The error according to the Greensboro Daily News was the publishing of a short story called "The Dean," which described the assassination of a dean.

Dr. Mobberley defended Collins' right to exercise his option of printing or not printing any given article... "But (it) is also equally clear that... the editor shall be held responsible for the consequences of his guaranteed right to print or not to print."

The story reportedly "intimidated the deans by strongly suggestive words implying violence upon their persons," thus creating a climate of fear.

Censorship allegedly is not the issue, but apparently Collins thinks it is. At any rate before the problem at G. C. is resolved, the perennial arguments about freedom of the press and responsible editor will surely be engaged in.

The Register with few facts at hand, would not dare render a judgment in this matter; however, it may be of interest to some to know that "There is no such thing as a right to print." The Constitution, instead, to print or not to print.

Board Approves Establishment of Business And Economic Center

The establishment of a business and economic development center at A&T, to assist in the promotion of minority enterprises, was approved last Wednesday by the Board of Trustees.

Dr. Lewis C. Dowdy, professor of economics, stated that the center is expected to be financed initially through a large federal grant. "We are pretty certain that we can obtain the funds for this worthwhile project." Dowdy's request came as a follow-up of a board meeting last January, when a delegation of Black-owned businesses in the area last year. He said results will be released soon.

He added that the economic and business development center hopes to stimulate economic development of the black community through research and discussion. "We will also examine ways in which the University can assist in the development of small businesses," said Dowdy. In other action, the Board of Trustees approved the sale of 52.7 acres of A&T's farm land to the City of Greensboro, so the city can install a treatment plant to handle the refuse from South Buffalo Creek. Dowdy told the board that a treatment plant would help to eliminate the offensive odors which residents have been troubled with.

Charles Graves, the Professor of Military Science, said; "ROTC enrollment has dropped because more and more black-owned businesses in the area which residents have been troubled with. "We have had no difficulty with members in the respective academic disciplines.

Each fellowship award will cover (1) the full tuition and fees required by the graduate school, (2) an allowance of $300 per year; stipends for each dependent will be $50 per month.

The names of the recipients of the Doctoral Fellowships, for Black Students, will be announced on or about April 15, 1971. For application forms and additional information, write to: Doctoral Fellowships for Black Students, The Ford Foundation, 320 East 43rd Street, New York, New York 10017.

Sharp Decrease Noted In ROTC Enrollment

By William L. Johnson

"ROTC enrollment has dropped for several reasons," says Lieutenant Colonel William V. Graves, the Professor of Military Science. "Ourrotc enrollment fell from 234 to 183 or a drop of more than we have...(20%). The enrollment dropped still further in 1968 to 169 with the change from compulsory to voluntary ROTC. This drop was from 234 to 183 or a drop of about thirty percent (30%)."

Col. Graves said, "The disturbances of May 1969 and the resultant action of the National Guardmen in addition to border strife over the war in Vietnam further decreased enrollment." Lieutenant Colonel Robert O. Thornton, Professor of Space Studies, said, "ROTC enrollment has dropped because of the general opinion at the national level against the war in Vietnam and because of the draft controversy. Yet we commissioned thirty officers last year. That's more than we have commissioned here in any one year."

In the school year 1969 to 1970 Air Force ROTC enrollment fell from a total of 315 to this year total of 192, a drop of about twenty-five percent (25%).

Schenck, Civil, Electrical, and Mechanical Engineering

Graduating Seniors

ALL SENIORS who expect to graduate January 30, 1971, are required to complete an APPLICATION FOR GRADUATION FORM which must be obtained at the Office of Registration and records. Please list on this form the Course No., Sec., Credit Hours, and the Names of the Instructor of all classes in which you are currently enrolled. This form is to be returned to the Office of Registration and Records on or before November 7, 1970.

Doctoral Fellowships Available For Blacks

By Janet Jones

Doctoral Fellowships for Black Americans who have not yet started graduate study are now available. These fellowships are for Black Americans who plan to enter careers in higher education. The fellowships are open to Black Americans who (1) have received a bachelor's degree during the ten years ending September 1971, (2) plan to enter graduate school and study fulltime for a Ph.D. in the humanities, the social sciences, or the natural sciences, and (3) plan to enter careers in higher education. A person is not eligible if he has previously, or is now enrolled in a professional or graduate study.

Recipients will be selected upon the recommendation of a panel of faculty members, all members in the respective academic disciplines.

Each fellowship award will support fulltime graduate study for up to five years if the Fellow maintains satisfactory progress toward the Ph.D. The Fellow may begin study in either the Summer Session of 1971 or the Fall Term of 1971.

Each year the award will cover (1) the full tuition and fees required by the graduate school, (2) an allowance of $300 per month for books and supplies, and (3) a monthly stipend for living costs. An unmarried Fellow will receive a stipend of $250 per month. A married Fellow will receive a stipend of $325 per month and may also claim his/her spouse and up to two children as dependents of the gross income of each dependent is not more than $2,500 per year; stipends for each dependent will be $50 per month.

The deadline for submitting applications is January 31, 1971. The names of the recipients of the Fellowships will be announced on or about April 15, 1971. For application forms and additional information, write to: Doctoral Fellowships for Black Students, The Ford Foundation, 320 East 43rd Street, New York, New York 10017.
On Power And Politics
By Roderick Hinton

It is important that we understand the political power structure that is being waged between two major political parties in this country. It is important, not because Blacks are going to be effective, but because they will most definitely be affected by it. It is necessary to analyze Nixon's regime, spearheaded by Nixon himself, his "dog whistle" Agnew. It should be noted here that this article is the opinion of a single individual who is no authority on political struggles.

We must realize that Nixon and Agnew have traveled around in this country extending an open hand to racism. In all of their campaigns, not once have they mentioned helping anybody but the Republican Party. They have denounced everything that the Democrats have done which is not being done by their worthless cause and are attempting to set this country back fifty years with its conservative policy of gradual change. Their ideology is sectionalizing this country more than ever before and extending hand to anarchy, which is the eventual result. The so-called struggle over who controls the street is more than which dog can beat the other dog over how much of the bread and the chips being given to the people.

Their "law-and-order policy" for criminals is directed against the Black man as it always has been, against individual elements rather than organizational elements such as organized crime. Using the main media for their political avenues, they are demonstrating their racist ideology by down playing their imperialistic and oppressive tactics still being waged in Indochina and the Middle East. We must understand at all times what white power structure is cobbling together to notice us. We must know the techniques and implications so that we can present facts dealing with them and provide for future reference material. Watch the efforts being made by the government to stop crime, cease inflation, and end the war and see who ultimately will lose. The supposed power, because our future will be determined by how much we know about the white man in order to help our brothers on the continent bring about the inevitable revolution.

University Rifle Team Prepares For Match Against Norfolk State
By Ruth James

The Rifle Team is a part of the 1763 program at A&T State University. Being coached by Sergeant Charlie Willis, Jr., and his advisor, Major Eldridge Killian, Jr., the Rifle Team is composed of 12 active members with a majority of freshmen students. The Rifle Team is composed of Variety Rifle Team and Army ROTC students. The team competes in CIAA Rifle tournaments.

The Rifle Team is getting prepared for a rifle match against Norfolk State this Saturday.

Various types of competition are the smaller 10-shooter competition, postal matches, where 2 individual schools shoot against each other, and send in their scores to determine which school won. Another is the area matches which are similar to the postal matches.

Females also participate on the Rifle Team. They are hoping more females will join the Rifle Team.

The Rifle Team anticipates a pleasant year and hopes to gain more members.

Buildings And Grounds Head Speaks On Negligence
By William Johnson and Linda Merritt

There is no place like home. Our home is Aggieland, and it will be what we make it, but it seems that we are out to destroy it.

Every time we turn over a trash can, it costs us money. For instance, last year alone, the school, according to Marvin Greber, head of Buildings and Grounds, paid $34,627.38 for repetitious repairs of buildings, including labor and materials.

Scott Hall alone accounted for $22,000, nearly one third of the total cost.

In past years, Aggies have suffered many losses. It seems that one cannot go home for fear that upon his return articles will have been stolen from his room or walls have been broken into.

Of course, this cannot be blamed on vandalism because we are sometimes very careless with our personal possessions.

Another aspect of vandalism may not be destructive, but it is pretty unsightly. How would you like to tear our campus? Our first stop is the Student Union.

Despite Weather Conditions Decor Exemplifies Spirit
By Janet Jones

In spite of the wet weather, there was the sight of homecoming was still exemplified through the beautiful decorations that were displayed by organizations and students.

Coeds Express Opinions On Weekend Fads
By Cecile Garrett

A&T students were recently pressed in their finest attire on Saturday. Many persons commented that they thought they were among the top as usual. The Empory Fashion Show, Several Aggie's expressed themselves about the different fashions.

Cynthia Caesar, a junior English major from Roanoke Rapids, said, "I know that this year's fashions have been so many different styles. I saw everything from the gaucho to the most, and the guys were really clean."

Corine Cook, a freshman nursing major from Raeford, said, "I thought that I was attending a fashion show."

Cynthia Hicks, a junior English major from New Bern, said, "The outfits this year are the most stunning ones that I have ever seen. We have been attending the homecoming activities."

Dowen Mitchell, a freshman speech major from Enfield, commented, "I couldn't really watch the game because I didn't want to miss any of the outfits."

When you really get down to it, A&T students are some of the best designers around. There are so many different styles. I saw everything from the gaucho to the most, and the guys were really clean."

The main points that were looked for in the competitions were originality, design, workmanship and its relationship to the theme of homecoming. The awards may be picked up in Gibbs Hall.

Our resident halls that competed were Senior Hall, Quadrangle, and Morrison.

The decorations were beautifully displayed. Many fraternities, sororities, and social organizations displayed works of art in many colors which made the campus even more colorful. Due to the amount of decorations, the buildings were decorated inside the buildings.

So even with the rain, the decorations exhibited the enthusiasm, beauty, and spirit of Homecoming 70.

Deltontas Stage Great Show Despite Despair-Dawn Failure
By Jacqueline Coppening

Yet another Homecoming has come and gone and the Deltontas of Philadelphia did their thing in Moore Gym once again. The Deltontas sang their all- 时间 great hits "When You Really Get Down To It," "Ready Or Not," "Somebody Loves Me a Lot," "Rock Your Promenade," and many more. Even though they were under the pressure of doing the entire pre-dawn show by themselves, the Delta's on top is usual. The Deciantes certainly deserve a pat on the back for their great performance.

The Post Homecoming dance was really together also. Even though the Unified didn't show up until it was too late for them to perform. The Opels and the Crusaders Band filled their shots to perfection. The Opels is a group that put on the best show one day. Their style of singing can't be matched with any other group that has performed in the contest before.

A great deal of credit goes to the Crusaders Band who kept the dance alive during the entire contest show. Even though this program was put together at the spur of the moment, it was very good. The reaction of the Azores there on the dance floor they truly were real Bronies. Besides the dance was free!
Noble Hall Shown Off By Its Students

By Helen L. Holley

The first Te Lo Ca (Tender Loving Care) meeting of the semester was really the first opportunity that the Nursing students had to show off their renovated home, Noble Hall.

Noble Hall, one of the oldest buildings on campus, has been recently renovated. While being renovated, nursing classes were held in Carver Hall. After about six months departure from Noble Hall, nursing students were really happy to return to their newly decorated home.

The first floor of Noble Hall was completely renovated. The second and third floors were not completely renovated, because of the lack of funds. The office of the dean of the School of Nursing is located on first floor.

Also located on the first floor are the secretary's office, workroom, conference room, faculty lounge and three offices. The main center of attraction, and really a necessity to nursing students is the reading room.

On the second floor of Noble Hall are located three classrooms, three offices and a laboratory.

On the third floor, the auditorium is located with a one-hundred and twenty seating capacity for nursing students and three offices and a fundamental laboratory.

Mary Lee, a junior nursing major from Westfield, New Jersey and president of Te Lo Ca stated that she had high hopes of Te Lo Ca becoming a Keystone Chapter of the organization this year. She also stated that this year Te Lo Ca members would have a Miss Te Lo Ca Contest.

This year promises to be a challenging year for Noble Hall members, nursing students and Te Lo Ca, according to Miss Lee.

150 Freshmen Expected For Next Semester

(Continued From Page 1)

will be able to admit approximately 150 freshmen students. It is noteworthy that many of the students accepted for the fall semester who did not come have notified the admissions office that they will enter next semester.

On the behalf of the Admission Office, Gamble expresses his gratitude to the alumni, prospective entering students, parents of students here and the student body for the cooperation and help they have received.

To The Students, Faculty, And Staff Of A&T State University:

THANKS

A Million Times From The Bottom Of My Heart For Your Contribution Toward My Re-Election To The North Carolina House Of Representatives. Thank You For Your Confidence In Me And In Our Political System. I Hope That Both Will Merit The Confidence That You Have Expressed In Us.

Henry E. Frye, Representative to the North Carolina General Assembly

Why isn't a big company like General Electric doing more to clean up the environment?

How much can one company do to clean up the environment? Until the problems of pollution are under control—until its effects are reversed—no company can ever be doing "enough."

What follows is a listing of things General Electric is doing to ease environmental problems. Some are new. Some are as old as twenty-five years. Should we be doing more? Yes, of course. Every company should. These are only a few of the more important ones. But every day sees us take more steps in many more directions.

- General Electric is working toward a process that will use bacteria to convert garbage into a high-protein food for cattle. One possible answer to the mounting garbage problem.
- Modern, pollution-free mass transit from General Electric is carrying more and more commuters into cities without their cars.
- GE pioneered the development of nuclear power plants. A nuclear plant makes electricity without making smoke. While there is still the problem of thermal effects, it's being tackled on a site-by-site basis and can be solved. But for now, increasing demands for power can be met without an increasing output of air pollution. GE has developed a waste-treatment unit to significantly reduce the water pollution from ships and boats.
- We have been chosen by the federal government to solve the problem of jet-engine noise for the aviation industry. Our present jet is already quieter than those on the passenger planes of the Sixties, and yet it's nearly three times as powerful. GE designed and built an underride habitat called "Tektite." Several teams of scientists have lived in the habitat while studying coral reef ecology and ocean pollution.
- We're designing an earth-resources satellite which will be used for a worldwide survey of the oceans. A first step toward the ultimate control of water pollution.
- Our newest jet airplane engine, for the DC-10, is designed to be smoke-free. Of course, there's more to jet exhaust than just smoke. And our goal is to one day make them run totally clean.
- General Electric makes high-temperature vortex incinerators for the complete combustion of many types of solid waste. Complete combustion drastically reduces the amount of leftover ash, as well as virtually eliminating air pollutants.

The problems of the environment are many. And some of the solutions will be difficult and costly. But, as you can see, we're working on them.

Why are we running this ad?

We're running this ad, and others like it, to tell you the things General Electric is doing about the problems of man and his environment today.

The problems concern us because they concern you. We're a business and you are potential customers and employees.

But there's another, more important reason. These problems will affect the future of this country and this planet. We have a stake in that future. As businessmen. And, simply, as people.

We invite your comments. Please write to General Electric, 570 Lexington Ave., New York, N.Y. 10022.
Program To Prepare Engineers Continues With Degree Of Success

By Edward L. Coles

About a year and a half ago a special project was started under the initiative of Dr. Paul E. Gray, associate dean of the College of Engineering. The purpose of this project was to prepare entering electrical engineering freshmen for engineering by getting them to some advanced problems and by understanding what engineering is all about before they start their freshman studies.

Last summer, a project of the same type, but on a broader basis, was started. Both Dr. Paul E. Gray and Dr. Charles Thompson were the coordinators of this project. Dr. Thompson is an associate professor of mechanical engineering. The project is the Engineering Freshman Enrichment Project (EFEP).

This second project was funded by A&T School of Engineering under the Kellogg Grant. The purpose of this project was to prepare the freshmen for the Mathematics Placement Examination which every engineering freshman takes before starting his studies in engineering.

Another purpose of the project is to prepare the students for engineering by getting them to understand certain phenomena that would not be acquainted with until they advanced in their studies. The EFEP had two main parts, engineering problems and mathematics problems.

James Goodson, a research assistant in electrical engineering, was in charge of the mathematics problems and Edward L. Coles, a sophomore in electrical engineering and Eddie Fox, a student in electronic technology, were in charge of the engineering problems.

The EFEP started the students writing computer programs on the uses of matrices while at home during the summer.

The EFEP was only funded for the summer of 1970, but the project is still in operation with about twelve interested students still participating in their spare time. These students are advancing their knowledge in computer programming using Fortran IV computer language. John McIntyre, Malcolm Glover, and Edward Coles are assisting (without pay) Dr. Thompson and Gray with the project this semester.

Some of the students that participated in the project during the summer gave their comments about it. Cornelius Hinton said he thought the project was very useful to him and that it should be continued next summer.

"The project was rewarding to me in that it was another learning experience. It taught me some things I didn't know. It helped me in that I think I know more about engineering itself as a result of participating in the project. Most of all it helped me on the Mathematics Placement Test," explained Kenneth Hord.

Andre McCloud said, "To me the Engineering Freshman Enrichment Project is one of the best things the Engineering School of N. C. A&T S. U. could do for freshman engineers."

Carey Baldwin feels those who completed the project are due an opportunity to further their knowledge of computer programming, as soon as possible.

I think that the EFEP was excellent. I would go so far as to encourage any individual pursuing a major in engineering to participate in it," expressed Naru Williams.

NCCU To Host Conference Of Black Leaders

The concept of Pan-Africanism will be studied in depth by Black students in North Carolina at a four-day leadership conference during the Thanksgiving Holidays sponsored by the Student Organization for Black Unity (SOBU) and the SGA at North Carolina Central University.

All Black student leaders are urged to attend this conference to develop programs and projects for students to work on during the remainder of the school year. Any brothers and sisters interested in attending this conference are asked to come by the SGA office to pick up an application and to obtain further information.

The A&T State University Gymnastic Club will begin its activities on November 9, 1970 in East Gymnasium at 4:00 P.M. The club is open to all A&T students who are interested in participating in gymnastics. The club will meet on Monday, Tuesday and Thursday from November 9 until March 11, 1971. We encourage students interested in this area to come out and join us.

Wednesday, November 11

BS and MS degrees in ChE, CE, IE, EE, ME, Pulp and Paper Technology, and MBA's with BS in any technical discipline. We have opportunities in:

- MANUFACTURING PLANT MANAGEMENT
- PLANT MAINTENANCE MANAGEMENT
- PRODUCT ENGINEERING
- PLANT INDUSTRIAL ENGINEERING
- PLANT CHEMICAL ENGINEERING

 Already 10th largest industry in the United States, papermaking is exploding with new growth. And Charmin, as a producer of household paper products only, is a pacesetter in the segment that is growing 3 times faster than the total industry! Charmin's entire operations are alive with new methods, new ideas, new processes, new technology... and Charmin engineers are in the forefront of these developments.

Now, as our marketing area expands beyond 75% of the U.S. population, we need more engineers capable of bold new thinking.

Our rapid growth, combined with a spirit of promotion from within, provides outstanding advancement opportunities. We must significantly increase our management organization in the next few years, providing opportunities at all levels in the organization. Your progress will be closely followed, since we've technically trained management group is comparatively small.

Choice of four locations: Green Bay, Wisconsin; Cheboygan, Michigan; Mehoopany, Pennsylvania (near Scranton) or our new Cape Girardeau, Missouri plant. If hunting, fishing, or skiing are hobbies, your choice of locations can put you into an area rich in resources for your favorite sport.

Sign up at the Placement Office now, and find out more about a future with us. We're interested in talking with you even if you have graduated school plans or a military obligation. Note: You must be a U.S. citizen or have a permanent immigrant visa.

Aggies Drop Homecoming Game To Morgan 15-9

By Paul Jones

Mel Holmes Chosen For Shrine Football Game

By Jacquelin Glisson

Ankle Injury Sends Middleton To Sidelines For Upcoming Games
Aggies' Defeat

Mistakes And

make matters worse. Willie Wright was nil the rest of the way. To spot and took the ball away from holding a 9-0 lead A&T's offense the stage for the first Morgan could get a sustained drive. Morgan drive was halted on the for the TD. The PAT was good team to the two oh the running Riley and Eddie Floyd added to for the second half was Bear dominated of the second half came when second half was Bear dominated but A&T had played well as again. Even so, Morgan had won there is also honor in defeat. Still trailing going into the (Continued From Page 5)

Student Government To Give December And January Shows

(Continued From Page 1)

always use, but in one case using wouldn't do any good... we had a show to put on for 3,000 students." He further explained that the Student Government Association is only liable to the pre-dawn show. He then mentioned that Fields Productions was responsible for bringing the very successful Jerry Butler show to A&T in the Fall of 1967. It was at this point that the SGA head announced that Kod and the Gang and the Lost Generations will appear on campus in December and that they are working on a Jerry Butler show in January. The December show will be free to A&T students, with the Butler show being kept to the bare minimum for students. The SGA hopes that this will make up for the pre-dawn show.

Simpson then asked to comment on the raises money was not refunded. He stated that SGA did not refund money because they were liable to the contract and that a large portion of the money collected was given to Fields Productions for the appearance of the Deltashells. The SGA head then emphasized, "The Student Government Association put the same effort and care in planning pre-dawn as we did the Coronation, the Soul Festival and other activities and we are deeply embarrassed over the fact that our pre-dawn was not a total success.
