Retired Geography Prof Succumbs At Age Of 66

By Jacqueline Corpening

Funeral services were conducted for Gwendolyn Steele, a junior English major at United Institutional Baptist Church, Sunday, November 5, 1970. Gwen, born December 22, 1932, in Greenwood, was the daughter of Mrs. Christine Forster and Mitchell and the late Johnny Steele. She died November 5, 1970, at Cone Memorial Hospital, following a brief illness.

Funeral services will be one o'clock Sunday afternoon at Springfield Baptist Church in Greenwood, South Carolina.

Mr. Clark, who came to A&T in 1945 as a teacher of history and Spanish, later became associate professor of geography and history. It was in geography that he probably concentrated his efforts organizing field trips and aligning himself and A&T nationally with geographers.

He organized and advised the Geographical Society. In 1957, he conducted a twenty-day tour of the Caribbean which included the annual conference of the Association of American Geographers in Minneapolis, Minn.

His sports interest was tennis. He was active in the 1940's in the drive to build a "Y" hut on campus. He is survived by his widow, two daughters two brothers, two sisters, and two grandchildren.

The Taylor Art Gallery will officially open Monday displaying an exhibition by Tseng-Ying Pang. Running currently with the Pang Exhibit will be a student exhibition of prints, paintings, and 3-dimensional design objects.

Swamp On Campus

The third semester is slowly creeping by since Senior Hall for men was initially occupied in a supposedly-complete state. However, a visitor to the campus would pass by and think that students were still waiting to occupy this building.

What would lead a visitor to think this? The answer is quite conspicuous if one has on footwear that he does not particularly like and wanders to Senior Hall. For all around this building is nothing but sloppy mud during periods of rain, which have been quite frequent of late. When it is not raining, the mud is not particularly dirty, but dust and dirt are in the air.

It would seem that the progressive people in Buildings and Grounds along with other persons responsible would realize that students do not particularly admonish living in a near swamp. One would expect that by this late date, actions would have been taken to pave the street and parking lot by Senior Hall.

This slippery mud can be quite hazardous to the personal safety of students in that no one knows when somebody might slip and break an arm, neck, etc.

The parking area behind the Communications Building is just as deplorable as the Senior Hall area. Many cars will get grounded this winter (and maybe even the people driving them) if they attempt to park in this area.

It seems that Buildings and Grounds could better use the money that they pay security officers to issue tickets to drivers of motor vehicles on campus by improving the parking areas so faculty and students can use them. If this were done, we would not have to have officers "writing tickets as an occupation".

We have waited far too long for the paving of the street and parking areas near Senior Hall. It is hoped that actions will be taken in the very near future to remedy this situation. This is one of the many ways that the administration can show its good faith and interest in the students (and faculty too) of A&T, a progressive institution.

How Our Readers See It

The A&T Register encourages letters to the Editor, but reserves the right to edit them. No letter will be considered for publication unless it bears a signature (not typed); names may be withheld upon request.

The Editor

Headaches, Tension, And Nervous Disorders

Editor of the Register:

Headaches, tension, and nervous disorders come to the students of A&T. To the graduating senior there are the problems of transcripts, grade estimates, which determine indirectly and directly graduation. To the other students, there are the problems of changing curriculum from year to year in their department. These problems perpetuate so much frustration that a student may resort to stern measures.

What would a school psychologist be the main answer. We, the students, need someone to help us analyze our problems and help us make specific decisions. A psychologist is the answer, a trained person who can adapt to diverse personalities and consequently understand "why". Each year, the many problems arise for each student. Help is needed to give the student direction.

Most instructors do not get a chance to really know the students; consequently, this makes the solution harder to find. Trained personnel could give the student a sense of being somebody and having someone to turn to in time of need.

Psychologists are needed at A&T and some students have already let the pressure of the "T" take its toll on their minds.

The atmosphere at A&T is healthy so why not the minds of our students? Understanding the problem is a step to solving that problem.

Mary Vereen

The Use Of "Underclassmen"

Editor of The Register

Why does the Yearbook staff insist upon using the term "Underclassmen"? The idea of putting the juniors, sophomores, and freshmen together takes away the idea of advancement. It seemingly puts all these classes in the same category, which is unfair.

A junior has had two years of experiences compared to the freshman who is just beginning. Since we have made these advancements, why are we deprived of the privilege of letting the public know it?

It's much easier to identify an individual while he is with his respective class rather than scanning a section labeled "Underclassmen."

It has been said that the Yearbook staff hopes to turn out an annual we, the Aggie family, can be proud of. How about taking this suggestion into consideration?

Patricia Smith

Junior

Landscape And Lighting Problems

Editor of the Register:

As a concerned student I find the landscaping and the lighting problem deplorable on this campus. Our campus has beautiful buildings but the lack of landscaping detracts from the total appearance of the buildings, especially the new ultra-modern ones. As thousands of students walk to class each day, they are confronted with mud, holes and large puddles. Shrubs are not trimmed and one sidewalk extending to Communications and Merrick is unlevel permitting water to puddle. The problem gets continually worse as the winter approaches with more rain, snow and sleet.

Students and help us make specific decisions. A psychologist is the answer, a trained person who can adapt to diverse personalities and consequently understand "why". Each year, the many problems arise for each student. Help is needed to give the student direction.

Most instructors do not get a chance to really know the students; consequently, this makes the solution harder to find. Trained personnel could give the student a sense of being somebody and having someone to turn to in time of need.

Concordia Student
Pleading Guidelines Set By Dean's Office

By George Johnson

On Tuesday night a meeting of the representatives of all campus fraternal organizations met with Dr. J. E. Marshall, dean of Student Affairs, to discuss future pledging on campus. Dr. Marshall stated that one of the purposes of a fraternity should be to work for the good of university life, and presented a tentative agenda for fraternal organizations on the campus. The tentative proposal included:

(1) Student Personnel Department will counsel and guide organizations

(2) No "Dog Shows" in the cafeterias or dormitories

(3) Scheduled "Dog Shows" should be held in Harrison Auditorium through the Student Activity Office

(4) Dean of Pledges of each fraternal organization should issue a general pledge agenda at the beginning of each semester

A proposed program for fraternal organization housing drawn up by Col. William Goode, Dean of Men, was presented by Bennie R. Mayfield, Director of Student Activities. Mayfield stated that a few changes would probably be made in the proposed plan.

Representatives of the fraternities raised questions to certain aspects of the program. The $15 room rent and the submission of a pledge agenda at the beginning of each semester activated the most criticism.

Dr. Marshall also stated that the fraternities throughout the nation are now under study according to a journal entitled Inter-Collegiate Press Bulletin. Talking in general concerning fraternal life on campus, Dr. Marshall selected the letter "M" to represent some of the things to its members. And, "honesty", "freedom", and "morality" were added.

The meeting was held in the Memorial Room of the Student Union with approximately 35 representatives, representing approximately 13 different fraternal organizations.

Progress Being Made At Draft Counseling Center

The Draft Counseling Center has experienced a measurable amount of success in counseling male students here on campus. Approximately 50 students have been in to receive counseling.

This number may seem small, but Draft Counseling is not a one-shot affair. Many students have had to return three or more times in order to get more precise and effective counseling.

Visit the Center, if only to see what opportunities you may have. The rights you can exercise in regard to the draft.

Gwen Will Be Remembered

In Holland Hall

(Continued From Page 1)

Mrs. Marylou Bowers dormitory matron of Holland Hall, commented, "She was quiet and easy going. She was easy to get along with and she took part in dormitory activities. She was always willing to lend a helping hand; therefore all the girls in Holland Hall will miss her."

Gwen is survived by her step-father and her mother, Mr. and Mrs. Zacharias Mitchell, one sister, Mrs. Claudia Steele Hall and two brothers, Charles Steel and David Mitchell, all of Greensboro.

Superb Soul Festival Proved To Be "Dynamic And Together"

By David Spinnell, Jr.

How else can one really define the word, "talent", other than as a natural endowment? In other words, "either you have it or you don't". Talent is that intangible creative quality that is the impetus of the world of art and, moreover, it enhances the world of art. To this effect, talent was truly exhibited during the superb performances of "The Tempo" and "The Shadows of Love" at the Soul Festival Monday night in Harrison Auditorium. This dynamic Soul Festival was sponsored by the Student Government Association.

To break the ice, the Soul Festival was opened by a "superbad" group called the Tempo 4. They provided the Aggies with such soulful selections as "Love and Peace", "Oh Happy Day", "Summertime", "Cloud Nine", and "Take 5" which featured a mean saxophone player, James Parker.

The other members of this aggregation are Alexander Fleming, piano, Semence Neal jr., drums; and Dan Edwards, guitar. The tempo 4 are students here at A&T.

Next in line came the fantastic showmanship of The Shadows of Love. With their talent, they are destined to go places. They provided fifteen mellow tunes such as "Baby, I Love You", "Seems Like I Gotta Do Wrong", "25-30 Years of Love". Also in their repertoire, they included one of their own songs, which was entitled "Up Above Down Below".

The members of this sextet are "C-C" Banks, "Spider Man", and Paul Banks, singer, Kevin Tynes, drums; Robert Dillworth, organ; and Carlton Morales, guitar.

Carthon truly moved the audience especially when he began picking the guitar with his teeth.

With the superb highlights of the Soul Festival, one can very easily see that there is an abundance of talent right at our fingertips. There is a need only to pull this innate talent out and to expose it more.

The Soul Festival proved to be "together", according to Aggies and it really did not take any meditation to say it either.

University of Pittsburgh Graduate School of Business

MASTER OF BUSINESS

ADMINISTRATION PROGRAM

-11 MONTHS

A representative of the Graduate School of Business will be on campus to discuss graduate study in business at the University of Pittsburgh with juniors and seniors in all departments regardless of major field, who are interested in programs of study leading to the degree of Master of Business Administration or Doctor of Philosophy. The school's representative will be on campus:

WEDNESDAY NOVEMBER 18

Hair Style For Yearbook Pictures Activates Strong Student Dissent

By Patricia Smith

The yearbook staff is again making preparations to create and produce an efficient, well-organized yearbook. In order to do this, plans are being made to take pictures and finish all necessary items to distribute the yearbook on time.

Many comments have been made in regard to the memorandum sent out concerning the type of hair style requested to take pictures. Jeshetta Becton, a junior history major from Fayetteville State, stated, "The yearbook staff is too demanding because it is unfair to non-students. Have they thought about those Black individuals who consider themselves as such without the Afro or Headdress?"

"Who do they think they are to command us to dress in the style they desire after we've paid our money?" was the reaction received from Shirley Moore, a junior English major from Pusan.

"I have nothing to say on the subject", was the response of a freshman Nursing major.

A junior English major from New Bern, Lavonell Dawson, replied, "Well, to be truthful, they are depriving the individuals of the privilege to express themselves!"

Baptist Union Seeks To Help Religious Life

By Douglas McMillan, Jr.

The first meeting of the Baptist Student Union of the 1970-71 school year was held recently in the Memorial Room of the Student Union. Officers for the organization are Willie Jean Jackson, president; Vernon Hall, vice-president; Willie Mae Shaw, secretary, and Cita McNeal, treasurer. Sergeant Frank Brinson of the Air Force ROTC serves as advisor.

The BSU is open, not only to Baptist, but to students of all denominations. It seeks to help the student fulfill his religious commitment on campus through various planned activities. Among them are worshipping at different churches throughout the city and employing this service to the Greensboro community by distributing food baskets at Thanksgiving.

Last week some of the members journeyed to Ridgecrest to attend the state BSU fall convention.

Other schools that were represented were Shaw University, North Carolina Central University, Tuskegee University, Appalachian State and Western Carolina. The next meeting of the Baptist Student Union will be Monday at 8:00 p.m. in the Memorial Room of the Union.

Willeminna Scott, another freshman Nursing major from Enfield, was asked her opinion, "To hell with it! Actually, it's not up to the Yearbook staff to tell the individual how to dress."

The opinion of a male student was also sought. Harold Cadey, a senior art major from Thomasville was against the idea. "I don't go along with the idea because everyone can't wear the Afro or Headress. Let the young ladies wear what they want to wear."

"I feel that it should be left up to a person's own discretion as to whether she wants to wear an Afro, Headress, or pressed hair!" This comment was received from a senior business administration major.

The most violent reaction was received from a junior physics major from Washington, D.C., "Who in the hell do they think they are to tell us what to wear to take our own pictures? This is our school, not just the Yearbook staff's. Can't we do our own thing?"

A sophomore physical education major from Beaufort, S.C., gave the only comment in favor of the idea. "I'm all for the idea myself. I think the idea is really what's happening."

Do we really have to dress Black to prove that we think Black?

By Patricia Smith

All organizations not registered with COSA by Tuesday, November 17 will not be eligible to take pictures for the yearbook. Organization presidents should give this matter immediate attention. -Yearbook Staff

---

Not many people know that General Electric started building a jet engine in 1941. America's first jet engine that jet produced only 1200 pounds of thrust. Our newest jet, for the DC-10, produces around 50,000 pounds of thrust.

In the early days of jet aviation, the important thing was thrust. But suddenly our skies are filled with jets. And, suddenly, jet pollution is a major problem.

General Electric tackled it head on when building the DC-10 engines. And we accomplished two things.

First, we've already crossed some important hurdles. Why are we running this ad? We're running this ad, and others like it, to tell you the things General Electric is doing to solve the problems of man and his environment today.

The problems concern us because they concern you. We're a business and you are potential customers and employees.

But there's another, more important reason. These problems will affect the future of this country and this planet. We have a stake in that future. As businessmen. And, simply, as people.

We invite your comments. Please write to General Electric, 570 Lexington Ave., New York, N.Y. 10022.
Aggie Biology Instructor Writes Book - 'A World Of Their Own'

By Linda Merritt

Mrs. Doris Byers Kwasikpui is the author of a new book, A World of Their Own (A Nature Activity Book For All Seasons). The book was released by Edwards Brothers, Inc. in June, 1970. This book, which is a new stimulant to outdoor science, is written primarily for elementary school teachers. However, it may be used by leaders of young people in church schools, youth organizations, Y.W.C.A. and Y.M.C.A. groups in guiding nature activities for boys and girls.

The activities in A World of Their Own are especially chosen to afford happy experiences for the boys and girls as they discover the small or big wonders of nature, through doing, making, seeing, and listening.

Mrs. Kwasikpui received the B.S. degree in Biology from the University of North Carolina at Chapel Hill. She is a member of the North Carolina Academy of Sciences, The American Institute of Biological Sciences, The American Association for the Advancement of Science, The National Association of Biology Teachers, the Beta Kappa Chi National Scientific honor society and the Alpha Kappa Mu honor society.

Mrs. Kwasikpui is a former news reporter of the Roanoke Tribune, City Editor of the University Student, Assistant Editor of Manuscript Solicitation, Region V of the American Biology Teacher. In addition her articles and research papers have been published in scientific and educational journals for the past ten years. She is an instructor in the Biology Department here.

GAPP And MXLU Will Take Part In Workshop

(Continued From Page 1)

The Greensboro Association of Pow People is a coalition of community groups into an independent association. This association works on the individual problems and group projects in the Black community.

This organization grew out of the collective experiences of poor people and their mutual desire for community improvement. Because of the limitations on the Economic Improvement Council, a number of poor Blacks decided to form an organization which could deal directly with their needs.

The third of these speakers will comment on the concepts, goals and objectives of Malcolm X University. This all-Black University became completely operational in the Fall of 1969 in Durham. After one year in this city, it moved to Greensboro.

This Black Liberation University was founded by Howard Fuller, HNIC, under the concept that only a university completely controlled by Black people could meet the needs of Black people in this country.

At the completion of the presentations, there will be a question-and-answer period.

The SGA president also announced that the workshop sessions after the Tuesday night session will be scheduled on the third Thursday of each month.

Most Greatest Hits albums make you wonder when half the “hits” were hits. But with a premium on honesty, Sly’s latest album is all for real.

“Sly & The Family Stone’s Greatest Hits” includes Dance To The Music, Everyday People, Hot Fun In The Summertime, M’Lady, Sing A Simple Song, Thank You (Falettinme Be Mice Elf Agin), I Want To Take You Higher, Everybody Is A Star, Fun, Stand!, Life and You Can Make It If You Try.

This time if you want the greatest hits, you’ll get them... all of them.

More Emphasis On Use Of Library Needed In Freshman Orientation

By Beverly Kelly

Many students on our campus feel that more information about the use of the school's library should have been taught to them in Freshman Orientation.

A survey of students on campus revealed that many of the students made the same remarks as the following sophomore students did in regard to Freshman Orientation.

Janice Morgan stated that, "Had I not worked in a library in Patterson, N.J., once I would not have known my way around."

Denise Galloway "I feel that what we learned in Freshman Orientation is of no use. There are too many limitations and the dining area is not of capacity."

Larry W. Evans, freshman, feels that "We should be able to dance and drink beer in the Union."

Cynthia Caesar, a junior, says, "Besides being a place for students to meet friends, it also serves the purpose for meeting new people."

Walter Anderson, a junior, commented, "The Union is only what you make it."

Patricia Sessoms, junior, said, "I think the Union is a place for students to relieve their tension. I do not think that there are enough facilities for a University of this size."

George Porter, sophomore, thinks "The attitudes of the workers in the canteen should be improved."

Benjamin Jones, a freshman, feels that "The Union is a place to mingle and it is the student's fault if he does not make use of the Union."

The students had varied opinions about the Union, but it can be agreed that some improvements need to be made.

In high school, when it gets down to the specific books to be used for research, a definite problem does exist.

Still many other students stated that they use the library mostly for studying class notes and assignments, and not for research.

Mixed Views Expressed On Union Service

Whether or not the Student Union is serving its purpose and how the students really feel about the Union have previously been topics of discussion by A&T students. A few students expressed their opinions of the Memorial Student Union.

Napoleon Davis, a junior said, "According to the amount of money we pay, the Union is of no use. There are too many limitations and the dining area is not of capacity."

Pamela Mitchell "Freshman Orientation is just a free credit."

Students don't really know how to find materials with ease. They are confronted with the problem of finding information successfully. It was stated by many that they learned how to use the Dewey Decimal System.

Juniors and seniors expressed their opinions of the Student Union. A few students have previously expressed their opinions of the Student Union.

Denise Galloway "I feel that what we learned in Freshman Orientation is of no use. There are too many limitations and the dining area is not of capacity."

"Besides being a place for students to meet friends, it also serves for meeting new people." Walter Anderson, a junior, commented, "The Union is only what you make it."

"I think the Union is a place for students to relieve their tension. I do not think that there are enough facilities for a University of this size."

George Porter, sophomore, thinks "The attitudes of the workers in the canteen should be improved."

Benjamin Jones, a freshman, feels that "The Union is a place to mingle and it is the student's fault if he does not make use of the Union."

The students had varied opinions about the Union, but it can be agreed that some improvements need to be made.

Venture: Use a love call to count bacteria.

The lamypride beetle family, Delight of small boys. Biological light bulb. And prime source of raw material for another Du Pont innovation.

Luciferase, an enzymatic protein, with intriguing properties, obtainable only from fireflies. Luciferin, an organic molecule also found in fireflies, but synthesizable. Adenosine triphosphate (ATP), a common energy-yielding substance found in all living cells.

Those are the three main ingredients in lamypride's love light. And because ATP is common to all living cells, university researchers discovered they could produce an artificial glow by mixing Luciferin and Luciferase wherever life is present.

Noting that phenomenon, Du Pont scientists and engineers went on to develop it into a practical analytical system. Correlating the intensity of the artificial "glow" with the amount of ATP present in bacteria, they designed a means of measuring the reaction.

The result is the luminescence biometer—the first really basic improvement in bacteria-counting methods since the time of Louis Pasteur. Rather than waiting days for a culture to demonstrate growth density, a doctor or technician can now get a digital readout of bacteria concentration in a matter of minutes.

Other potentially lifesaving uses for the biometer are being suggested every day—such as diagnosing metabolic rates, enzyme deficiencies and nerve damage.

Innovation—applying the known to discover the unknown, inventing new materials and putting them to work, using research and engineering to create the ideas and products of the future—this is the venture Du Pont people are engaged in.

You can become one of them, and advance professionally in any chosen field. See your Du Pont Recruiter. Or send us the coupon.
Epicureans Conquer C Phi G; Iotas Slaughter Rat Pack 40-19

By Jacqueline Glisson

Many Aggies turned Monday night in Moore Gym to witness the sport of basketball, aka the Epicureans and the Iotas. The most exciting and thrilling of the Basketball games was the Epicureans-Grove Phi Groove game, which went into a suspenseful overtime to decide the victor. Maurice William, a Groove, brought the game to a disappointment for all those who wish to live an uneventful life. The Aggies played hard to gain their 45 points, but the Epicureans added an extra spark of performance to gain the 46 victorious points. It was without a doubt that the leading players of this game were John Atkins, with 9 points, for the Epicureans, while Kenny Smith collected 16 points for the Grooves.

Iota Phi Theta and Rat Pack also had a hard-fighting game in which the Iotas' James "Hondo" Miller was the outstanding player with 16 points. Miller was the Rat Pack's greatest threat as their leading players James Hargraves and Thomas Armstrong were only able to gather 8 and 6 points respectively. Even though the Rat Pack led in free throws made, it appeared that the Iotas owned the court as the game ended 40-19.

Last Thursday, the game between the Suffered Alpha Phi and Omega Phi Psi was really a battle of the Greeks on the basketball court. Without a doubt Billy Cooper led the Kappas to victory with his 19 points, while Paul Jones followed with 4 baskets to his credit. Ronald Irby and Robert Houseman led the Omegas with 9 and 7 points respectively. Even with the "Purple and Gold" team's dominant performance, it could not surpass the hard playing of the Red and White Kappas as the game ended 40-23.

Throughout the season, fraternity basketball games will be played among the Greeks and the non-Greeks. The best teams out of the Greeks and the non-Greeks will play for the championship at the close of the season. Posters will be displayed announcing the various fraternity games. These games are sponsored through the Intramural Program.

Performance Of Frosh Eddie Floyd Indicates Bright Future As Gridder

By Philmie Beale

Eddie Floyd

A&T's current football team has its problems, but the play of Eddie Floyd, a freshman, indicates a bright future. Floyd, a native of Canton, Ohio, was a defensive star while in high school and earned a full of honors, including All-City, All-County and All-American Conference.

"He thinks that he has gotten along just fine from the standpoint of learning the playbook, but now in his sophomore year, he is beginning to develop some of the skills that he did not have as a freshman," said Floyd. "He has found out that college ball is a lot tougher than high school ball," said Floyd. "The competition is really keen."

Floyd, a native of Canton, Ohio, was a defensive star while in high school and earned a full of honors, including All-City, All-County and All-American Conference.

"He thinks that he has gotten along just fine from the standpoint of learning the playbook, but now in his sophomore year, he is beginning to develop some of the skills that he did not have as a freshman," said Floyd. "He has found out that college ball is a lot tougher than high school ball," said Floyd. "The competition is really keen."

Floyd, a native of Canton, Ohio, was a defensive star while in high school and earned a full of honors, including All-City, All-County and All-American Conference.

"He thinks that he has gotten along just fine from the standpoint of learning the playbook, but now in his sophomore year, he is beginning to develop some of the skills that he did not have as a freshman," said Floyd. "He has found out that college ball is a lot tougher than high school ball," said Floyd. "The competition is really keen."

1. Q. What's the oldest brewery in Milwaukee?
A. Last year Pabst Brewing Company, the oldest in Milwaukee, celebrated 125 years of brewing great beer. And that's older than your father's, father's, father's, father's mustache. Which brings us to our point: if you believe that practice makes perfect, then you can't find a more perfect beer than a Pabst.

2. Q. What should I serve when the boys drop over?
A. The perfect beverage for moments of celebration and good fellowship like this is Pabst Blue Ribbon beer. Its good old-time flavor helps break the ice and get the party rolling.

3. Q. Who are these guys?
A. This is a group photo of our bowling team. It was taken in 1893, the year Pabst won the Blue Ribbon as America's best beer. We still brew our beer the old-time premium way. Our bowling team hasn't changed much either.

4. Q. What are these horses trying to pull?
A. They're pulling one day's production of Pabst beer. This often caused traffic jams outside the brewery. These tieups were the results of efforts to supply the increasing demand for Pabst. A demand that has remained unquenched to the present day.

5. Q. How is Pabst brewed?
A. 1. Choice hops are gathered and placed here. 2. Then we mix in only the best grains. 3. Then the beer is allowed to brew slowly and naturally. 64. Look closely. This is a secret process that gives Pabst its good old-time flavor.

6. Q. What'll you have?
A. Pabst Blue Ribbon, because it has something no other beer has... good old-time flavor. And if perchance we have not covered everything you've always wanted to know about beer but were afraid to ask... quell those fears. You'll find the answers to all your questions inside an ice-cold bottle or can of Pabst. On second thought, why not buy a 6-pack? It's our "refresher" course.

Everything You've Always Wanted to Know About Beer... But Were Afraid to Ask.

PABST BREWING COMPANY • Milwaukee, Wis. • Peoria Heights, Ill. • Newark, N.J. • Los Angeles, Calif. • Portland, Ore.
