## Aggies Hold Mixed Opinions On Drug Usage

By Janet Jones

(Staff Photo By Thomas Conway)

The Greatest Threat To The Black Man - Dope

### Despite Medical Warnings

## Increase Noted In Students Using Drugs

By Jacqueline Glisson

The number of students using drugs on college campuses today is steadily increasing at a remarkable rate. In a national survey of college students, the number of students who have tried LSD and marijuana has almost doubled the 1969 figure. "Horse" "grass" "speed" and "acid" which are slang names for various drugs are becoming popular words in the vocabulary of college students.

Despite the warnings of medical authorities, most students who use drugs feel that they are not harmful and will not lead them to the use of larger doses and "hard" drugs such as morphine, heroin, etc. When a drug user realizes the harmful effects of drugs, it is generally too late—he is already hooked!

Drug addiction has been defined as a state of periodic or chronic intoxication produced by the repeated consumption of a drug. As long as a drug addict is receiving his usual dosage, symptoms may not be present. If

at any time, the dosage is not sufficient or he is unable to get a "fix", then certain symptoms will appear. The symptoms are: (1) pale, moist clammy skin, (2) trembling hands, (3) pinpointed or dilated pupils of the eyes, (4) faulty accommodation and (5) fluctuating reaction to light, withdrawal effects. Needle marks can be noticed on the arm of heroin users. The drug addict develops the overpowering desire and compulsion to continue taking the drug and to obtain in by and means necessary. As he increases the dosage, a physical, psychological, and or emotional dependency develops from the drug, causing bodily harm and instability. Most harmful are the drug detrimental effects on the individual and on society. To the drug user, drugs pose other serious conditions. Persons who inject drugs under nonsterile conditions run a risk of contracting abscesses, hepatitis, and circulatory disorders.

The most used drug on today's campus scene is

marijuana which is better known as pot, grass, reefer, or weed. It is classified as a relaxant and euphoriant. It is generally taken by sniffing, swallowing, or smoking from a pipe or cigarette. The effects of this drug lasts about four hours. It causes the user to feel euphoria, anxiety, restlessness, lightness of the limbs and body and hallucinations. From this, a moderate to strong emotional dependency occurs.

Acid, sugar, Big D, and cubes are slang terms used for LSD which is classified as a hallucinogen. It is swallowed in tablet, capsule, or saturated sugar cube form. Its effects bring about exhilaration or depression, suicidal or homicidal tendencies, extreme mood changes, and physical changes such as nausea, profuse sweating, dilated pupils and rapid heart beat. LSD's duration is about ten hours while the emotional dependency of the drug varies among individuals. Over a long span of time, its effects may intensify existing psychosis and panic reactions. It

is known to create a high degree of tolerance, while no known physical dependency occurs.

Another well-known drug is

(See EFFECTS, Page 2)

## NCCU To Host Conference On 'Save Black Schools'

By Vernice Wright

"Save Black Schools" is the central topic of the one-day conference scheduled for tomorrow at 11:00 a.m. in the student government office of the Student Union located on the North Carolina Central University campus in Durham.

Knowing that the reorganization plan of Robert Scott, governor of North Carolina is a clear and imminent threat to the existence of all Black schools, representatives of the five state-assisted Black schools in North Carolina are expected to meet for the express purpose of organizing a massive

Today, more than ever before, emphasis is being placed upon drugs on university and college campuses.

Because of the uncompromising desire of some young people to escape reality in some form, drugs have become the ruling apparatus for changing worlds by the troubled young.

We, see, therefore, an influx of drugs being sent to university and college campuses all over the world.

The question that naturally comes to the minds of many is what do the Aggies think of drugs?

This question was asked of several Aggies to obtain a general idea of what is going on in the minds of the students who attend A&T.

Donald Long, an advanced freshman, had this to say: "I don't think all drugs are dangerous. I would not take heroin, LSD, or any barbituates, but I think I would use marijuana and I think it should be legalized"

Connie Johnson, a sophomore, thinks that drugs should be legalized simply because it would take away the enthusiasm of getting high out of the ordinary. Then students would not steal, lie, and cheat to get high. They might drink wine and liquor instead of oppressive drugs.

Sharon Floyd, a new freshman, states, "I believe that anyone that wishes to use or experiment with drugs should be allowed to."

Tuti Evans, a sophomore, states, "I do not dig on our

(See STUDENTS, Page 6)

state-wide strategy to deal with this threat.

Jerry L. Walker, SGA president at NCCU speculates that "if Black state-assisted institutions are moved on, 'private' Black institutions will be next." Moreover, Walker considers this a problem not only of Black universities, but of all student at all levels.

In addition to the above, the meeting will be concerned with the support for MXLU, drug problems, and other projects for the spring.

For those who will need to stay overnight, the SGA at NCCU will make arrangements if notified in advance. Call 682-2171, ext. 497.

**A Commentary**

**Drugs - Defining The Problem**

By Janet Jones

The current use of hallucinogenic drugs by young people is being called the biggest cop-out of all time. A great many people would concur. It could be. But, having said this to the increasing minority of students and young people who are using drugs regularly, who use them occasionally, who do not rule out the possibility that they may try them at some time, or who vigorously defend the right of those who are using drugs to do so, the dialogue is ended. To many educators and others, deeply concerned with young people and their personal and social growth and development, the problem is not that simple and the dialogue must continue.

The problem of drugs on the college campus is a problem of "ignorance"—lack of knowledge about the action of chemical substances on the complex, delicately-balanced chemical system that is the living organism, lack of knowledge about the relationship of variations in this system to complex human behavior, lack of knowledge about complex human behavior itself. It is a

problem of the tyranny of opinion, attitude and belief in the absence of knowledge.

It is a problem of "semantics"—of trying to talk, think and act rationally in an area in which almost every term is entangled in so much myth and emotion and such a variety of implicit assumptions, beliefs, and attitudes that futile argument replaces dialogue and discussion because the participants are neither talking the same language nor proceeding from the same assumption.

It is a problem of "communication" among scientists and laymen, between parents and children, between a generation brought up before automation, television, jet travel, nuclear energy and the hydrogen bomb, multiversity, and the affluent society and a generation which has known no other conditions.

It is a problem of "living and learning and growing" in an arena where change is the only constant and where the future is increasingly unpredictable.

It is a problem of "philosophy of social control" in a pluralistic society—of the individual's

relationship to societal values and to these values as expressed by law.

It is a problem of education and its relationship to current societal values; a problem both of the relationship of the individual to the institution and of the institution to the needs of society.

It is the problem of a pill society which is increasingly buying the well-advertised proposition that there is a chemical solution for any problem of unpleasantness and discomfort, whether it be physical, psychological or social—a society that spends more money on alcohol, tranquilizers, and sleeping pills than it does on education.

It is a problem of "increasing retreat in the face of complexing, difficult problems" to "blob" thinking, of insisting at the earliest possible moment that everything is all good or all bad and defining good as not bad and bad as not good.

It may be relevant to ask why this society is reacting so violently to the use of hallucinogens when there are already 4 to 8 million alcoholics in the country.

**Drug Effects On Body Vary ; Depending On Drugs Taken**

(Continued From Page 1)

the amphetamines that have the slang terms of bennies, pep pills, dexies, and speed. It is classified as a sympatho-mimetic that is generally taken orally as a tablet or capsule and may resort to injections. Delusions, loss of appetite, hallucinations, alertness, and excitability are its major effects on the body.

Horse, H, smack, and Harry are slang terms for heroin which is classified as a narcotic. Heroin is sniffed or either injected. Its effects on the body include euphoria, loss of appetite, reduces sex drive and feelings of pain, respiratory depression, and distorts the sense of reality. Its duration is four hours. The long term symptoms include addiction and loss of appetite. Heroin causes a physical and mental dependency potential.

Morphine, better known as white stuff, M, morpho, and dreamer, is classified as a narcotic. It is taken by swallowing or injections. Euphoria, constricted pupils, lowered blood pressure, nausea, and addiction are the bodily effects morphine brings about. Its duration is six hours.

Barbiturates are classified as sedative-hypnotic and are also called "barbs, phennies, Blue heavens, and yellow jackets".

They are taken orally or by injections. Barbiturates duration is four hours and causes anxiety reduction and euphoria. Addiction with severe withdrawal effects, possible convulsions, and toxic psychosis develops over a period of time in the user. They cause a mental and physical dependency in the individual.

Corrine, snow, coke, and gold dust are slang terms for cocaine, a stimulant and local anesthesia. Sniffing, swallowing, and injections are the three methods by which it is taken. Cocaine brings about depression, convulsions, muscular twitchings, fatigue, and euphoria over a varied duration period. The user suffers both emotional and mental dependency from cocaine.

Other widely used drugs are codeine, DMT, methadone, and methamphetamine. The four principal categories in which drugs are classified are hallucinogens, stimulants, depressants, and narcotics.

All drugs are killers when abused by individuals. They can result in all sorts of psychological, emotional, and physical damages to the body. Factual knowledge about drugs and their bodily effects is the best weapon against drugs.

(Staff Photo By Thomas Conway)

The Various Types Of Drugs

**Engineering School Awarded Grant Of \$45,000 By DuPont Company**

A&T has been awarded a grant of \$45,000 for its School of Engineering from the E. I. duPont de Nemours & Company. Announcement of the duPont Engineering grant was made the last of January by C. B. McCoy, president of the company.

Dr. Lewis C. Dowdy, president of A&T, said the funds will be used primarily for teaching and research.

"The increase in the commitment for engineering at

your university is made in recognition of the nation's need for an expanded supply of graduates with good engineering qualifications," said McCoy. "It also signifies our enthusiastic endorsement of the Atomic Energy Commission's proposal for increased support for predominately black institutions offering baccalaureate degrees in engineering."

McCoy noted that there is a national shortage of black

graduates in science and engineering. "Stronger curricula in these colleges can help to provide these graduates," he said.

A&T's School of Engineering is one of the three nationally accredited facilities in the state. The school offers programs in architectural, mechanical and electrical engineering. Plans are currently underway for a master's degree program in engineering.

## Ayantee Staff Pushing To Have Annual Ready

By Beverly R. Kelly

The A&T yearbook staff is working diligently and consistently to assure Aggies of an exciting and highly imaginative yearbook this spring.

According to its editor, Charles D. Evans, over half of the book has already been submitted for publication with the final pages to follow by the 22nd of February.

When asked about the various problems that the staff was confronted with, Evans replied in this manner, "The lack of unity and overall cooperation among the students hindered the

progress of the yearbook as well as the late reception of vital equipment used for layout."

The yearbook will contain several new attractions this year including poetry and various snapshots--both provided by students on campus. The staff invites any student that has candid shots to bring them by the yearbook office by Monday.

Evans promises a very unique and appropriate corner that blends remarkable well with the yearbook's theme "We Are Somebody."

The return date for the yearbook is set for the later part of May or the first of June.

Dr. Theodore Bunch

## Dr. Bunch Will Resign After Serving 5 Years

By Beverly R. Kelly

Dr. Theodore Bunch, head physician of A&T's Sebastian Infirmary, has formally announced his resignation from the University.

After graduating from A&T in 1961, Dr. Bunch then completed a four-year study in Nashville, Tenn. This was followed by a year of internship at Homer Phillips Hospital in St. Louis, Missouri. It was after this that Dr. Bunch began his practice at A&T in 1966.

When asked why he has chosen to leave the University, Dr. Bunch explains that he is leaving in order to return to St. Louis and hopefully complete a three year residency there in Obstetrics and Gynecology.

June 30 of this year will conclude Dr. Bunch's practice at A & T; but those Aggies who have come in contact with him at some point through the years, will probably find it difficult to forget his patience and even

more, the doctor's ability to listen and then understand.

During the years, Dr. Bunch has constantly strived for improvements and growth of the school's medical clinic. Even now, he is in the process of hopefully establishing solid groundwork for the addition of a mental health clinic. Dr. Bunch explains that the development of such an extension has been delayed because of lack of funds.

"I am leaving with a great deal of regret, for I have enjoyed my work with the students and the administration," are the doctor's words in expressing his feelings about leaving the University. In these words, too, are the University's feelings captured. But as the doctor prepares to enter into a new phase of his life and career, the student body of A&T wishes him well and success in all his endeavors.

From Williamston, Dr. Bunch is married to an A&T graduate and is the father of two sons and a daughter.

### ABORTION COUNSELING, INFORMATION AND REFERRAL SERVICES

Abortions up to 24 weeks of pregnancy are now legal in New York State. There are no residency restrictions at cooperating hospitals. Only the consent of the patient and the performing physician is required.

If you think you are pregnant, consult your doctor. Don't delay. If you choose to have an abortion, early abortions are simpler and safer.

Abortions should be performed by Board certified obstetricians and gynecologists, with Board certified anesthesiologists attending, in fully licensed and accredited general hospitals. You should not have to pay exorbitant charges for any of these services.

If you need information or professional assistance, including immediate registration into available hospitals, telephone The Abortion Information Agency, (212-873-6650), which has helped counsel and place more than 22,000 women for safe, legal hospital abortions.

The total costs at good facilities range as follows (in-patient hospital service, except as noted):

For D & C: Pregnancy up to 9 weeks, \$285-\$310 (out-patient hospital service); up to 12 weeks, \$385-\$410; up to 14 weeks, \$560. For Saline Inductions: 16-24 weeks, \$560-\$585.

## Rev. McCoy Attends Confab On Role Of Campus Minister

By David Lee Brown

"The Role of the Campus Minister in the Liberation Struggle" and "The Urgent Necessity for Full Commitment to the Black Liberation Struggle on the Part of the Black Campus Minister to Blacks in Higher Education" were the two major topics discussed at the Consultation On the Identity Crisis of the Black Campus Minister by Rev. Cleo M. McCoy, Director of the Chapel, and nine other Black campus ministers recently at Stone Mountain, Georgia.

The conference involved a week of intensive study and analysis of the theological and practical aspects of the identity crisis of Black ministers.

As a result of the consultation, more pertinent ideas were accepted by the ministers and older concepts of and approaches to today's problems were reconstructed to meet the demands of the present racial and social atmosphere.

It was decided that it is necessary for chaplains as well as all Blacks to be aware of pre-slavery identity and to realize that the Black religion possesses some carry-over from the African culture.

### MUST WORK TOGETHER

It was recognized that there is a need for equilibrium between "extremes", the revolutionaries and the less militant in the Black liberation struggle so that problems will not result between the two levels of activity, and so that there will be greater

understanding and cooperation between them.

The participants decided that as campus ministers they must serve as agents of reconciliation and understanding between the church and the university. They also decided that it was extremely important for them to consider the spiritual needs of the students and to help the students to understand the relevance of religion in their struggle for liberation.

One important issue that confronted the ministers was the origin of the Christian religion and its relationship to the Black struggle.

It was pointed out that the Christian religion was not an invention of the white man to suppress the Black man. It grew out of the desires of an oppressed people, the Hebrews, to rid themselves of a European oppressor, the Romans. However, the post-sixteenth century theology of organized religion has been distorted and twisted into a tool of oppression.

### RELIGIOUS RELEVANCE

Nevertheless, the campus ministers indicated that Christianity has relevance for everyone. Although it was originally forced upon Blacks, the slaves made it an instrument of survival and liberation.

The conference was sponsored jointly by the Ministry to Blacks in Higher Education and the Church Society for College Work.

Rev. McCoy is a founder and member of the Steering Committee of the Ministry to Blacks in Higher Education.

# Drugs: Not Only Evil

The mixed opinions expressed by Aggies on the use of drugs is a reflection of the opinions of the younger generation on this topic.

These opinions are held by the younger generation primarily because of the world in which this generation has been forced to become adults. That young people see no harm nor condemn others for using drugs is not astonishing.

This generation is asking itself, "How much more disastrous can the effects of drugs have on mankind than the other violent acts committed by mankind?"

The present so-called war in Vietnam has killed more men than drugs will ever kill. Americans killed in this war alone total more than will be killed by drugs for generations to come.

Yet there is so much of an uproar on the part of the U.S. government, state, and local "law enforcement" agencies about drugs and their illegality. Drugs will never be as illegal from a moral standpoint as the Vietnam war; oppression of Blacks, Jews, Indians; police harassment and brutality; or starvation when there is food.

Many of the users of drugs today have taken this means of temporary escape from reality. Many of us say that a man should face the facts of life. However, one can see from present world conditions that this world really is not much that one aspires to face.

So we see that we have one way to combat the dope problem - straighten out this world.

Admittedly, drugs are widely used today and some control should be exercised as far as their use is concerned. But who is to exercise this control - the people who have accomplished the feat of putting the world in its present chaotic state.

Perhaps the ideal solution for the problems of the younger generation and those of the older generation is to cooperatively work together so that we all may be saved from the folly of our ways and the inevitable destruction that will surely ensue if world conditions continue to worsen as they are presently.

It is not to be assumed that any attempt is being made here to support drugs or their users. It is being attempted here, however, to show that this problem is not as bad as other world problems and that an attempt should be made to remedy this and other problems.

## Summer School Is Gratifying Experience

Dear A&T Students:

Having the opportunity to write you at this time affords me a very real pleasure. At the very outset, let me tell you that we enjoyed very much your stay with us last summer.

It was gratifying indeed to learn that you enjoyed your study here at A&T State University last summer. It was gratifying because we tried very hard to provide the diet you wanted, served according to your wishes and in a kind of emotional climate conducive to a feeling of common interest, concern and mutual respect. You rewarded our efforts by a large increase in the number who shared the season with us.

Should continuation of study

be your plans for the summer of 1971, we take this as opportunity to extend you an invitation to again make A&T the University of your choice. More and more your fellow students are using summer study as the avenue to preparation for earlier employment. Then there are those who use the summer term to pursue courses of interest to them which can not be fitted into their major programs in the academic year schedule. Whatever the reason, more and more of you are finding A&T Summer School an attractive summer experience.

In closing, let me suggest that you come by the Summer School Office when you have a few leisure minutes and let us talk about how the Summer School

can better meet your needs or your wishes. Every effort is being made to improve the quality of service which it affords you. Your patronage is appreciated and every rightful consideration will be given your reactions to its effectiveness.

Let me wish for you good health, a very successful year and a great deal of happiness and good clean college fun.

J. Neil Armstrong, Director  
Summer School

## Lost Talent

Editor of The Register:

What is wrong with A&T when one of its most talented students becomes discouraged with the leadership of his department and leaves school? It seems that certain people are power mad and now that the Little Theatre is in operation, all the "prima donnas" must go.

When this young man makes it big—and he will—he'll never say "I went to A&T." Somewhere, something is wrong. Maybe each department should be checked out because as far as I'm concerned A&T has killed many geniuses.

Sincerely yours,  
John F. Dyer

A Former Genius

## Music Student 'Shited'

Editor of The Register:

Just an open letter expressing my gratitude, along with that of the Music Department, to SGA for allowing Minister Farrakhan to speak in Harrison Auditorium recently, the same night one of our students (namely me) was to perform a senior recital.

Of course, I had only been preparing for my recital three and a half years, and should have

asked for Harrison Auditorium more than two weeks prior to the event. It seems two weeks wasn't enough.

This is only one of the many ways that we as students of the Music Department get "shited" by this institution of higher learning. Not enough said, but . . .

# Campus House Minister Believes New Religious Spirit On Campus

By Patrice Dunn

Externally, the most obvious indication of change is the new black, red, and green sign in front of the campus House. Inside a full congregation and an energetic minister are signs of the new spirit of religious awareness at this campus sanctuary.

The minister, Rev. William T. Brown has for ten years run the Campus House which is owned by the Lutheran Church Missouri Synod, but space has been rented to the Catholic Church and the United Methodist Church. Rev. Brown is the full-time Denominational Chaplain and Methodist Campus Minister.

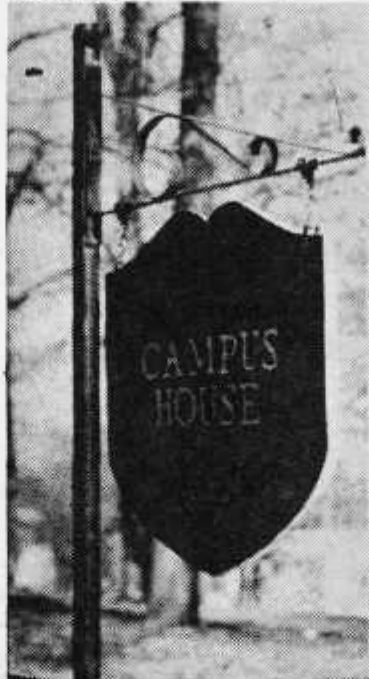

Current programs which make this the center of student interest are worship services at 10:00 a.m. each second, fourth and fifth Sunday and at 6:00 p.m. each first and third Sunday. Weekly discussion sessions are also held on Wednesday and Thursday nights from 7:00 to 9:00 p.m.

Topics now motivating student interest are "The Doctrine of Angels and Demons" with "The Communion of The Saints on Earth with the Saints in Heaven," as the topics for the next two morning services.

Rev. Brown revealed plans for two major proposed programs. The first, the Mind Power Laboratory will be sponsored by the Wesleyan Foundation and will include experiments and studies concerning the power of the mind. Interested students have already begun signing up and others are invited to join. The second program is the establishment of a lay-Theology School which will be aimed at developing and training laymen in their background of theology.

Use of the Campus House is being greatly encouraged. Facilities are available for worship services, games, parties, cook-ins and other social activities. Rev. Brown says that he most fervently believes that

there is a current upsurge and revival in religious thought on campus. Anyone wanting to get aboard this "religious train" is asked to stop by or call him at his office (273-2408) or at home (274-6608). All students are invited.

# Florida A&M Professor To Speak At Kings Inn For Accounting Club

By Clarie Withers

Professor Sybil C. Mobley of Florida A&M University will be the guest speaker at a dinner meeting of the ALOBEAEM Society to be held at Kings Inn on February 18 at 6:30 p.m. Her topic for this occasion will be "Black Accountants in the Super Seventies."

Professor Mobley earned her B. A. degree at Bishop College, M.B.A. at Wharton School of Finance and Commerce, University of Illinois, and she is a Certified Public Accountant in the state of Florida. Before her present employment with Florida A&M, she worked with IBM, Union Carbide Corporation, Price Waterhouse and Company and Chase Manhattan Bank. She has also done consultant work including serving on a continuing basis as consultant for Internal Revenue Service.

In addition to book reviews, she has published "The Realization Concept: A Useful Device", Accounting Review, April, 1966; "Revenue Experience As a Guide to Asset Valuation", The Accounting Review, January 1967; and others.

In addition to Professor Mobley's accomplishments she has appeared a number of times on regional programs for the American Accounting Association and was a panelist on the national program last year.

She has served on several committees for the American Accounting Association; she is presently serving on the Manuscript Committee. Presently she is on the editorial boards of the Accounting Review and the University of Florida Press.

Anyone interested in

attending the dinner should contact Dr. Herbert Watkins, chairman of the Department of Accounting. His office is located

at B210 Merrick Hall. All persons attending the dinner will have to pay his \$4.00 prior to February 16.

## ENGINEERING GRADUATES

# Ebasco Will Interview on Campus

FEBRUARY 17, 1971

It's find out time! Time for you to find out the role you might play in the company that has designed or constructed over 8 billion dollars of fossil fuel, hydroelectric and nuclear plants.

There's never been a more exciting time to join Ebasco. Forecasts call for electrical power systems 3 1/2 times the size of our present national systems. As an engineer at Ebasco you'll be in the forefront of this activity. Ebasco engineers always have been.

See your Placement Director soon to arrange a Q&A session with the Ebasco representative on the above date. If this is not convenient, write to College Relations Coordinator, Ebasco Services Incorporated, Two Rector Street, New York, New York 10006. An Equal Opportunity Employer.

# Students Express Opinions On Drugs

(Continued From Page 1)

brothers and sisters taking drugs because it's time for us, as Africans, to get our minds together and not involved in drugs."

"I am of the opinion that drugs destroy a person psychologically, and we as Black people must use our minds to fight for the cause" states Pearlene Ross, a sophomore, from Charlotte.

Charles Moran, a sophomore, has this to say about drugs: "I can dig pot, but I don't condone hard drugs. There are drugs that are not habit forming and those that are. If it can not be arranged so that mild ones can be sold without the temptation of stronger ones, then I'm against them."

Katie Roach, a senior nursing major, states that drugs should not be used unless they are consumed in the right way. Many people do not know what they are doing until they are hooked on drugs. Drugs can be helpful, but they can be harmful also, unless they are used wisely.

Gerald Holland, a freshman, believes that drugs should be prescribed only to a person's illness. As far as hard drugs are concerned, he states, "Each to his own."

Doria Spears, a sophomore from Charlotte, thinks that we must develop our minds in order to find a means for overthrowing our oppressor. Drugs hinder this process and while we are steadily deteriorating mentally and physically, the underground profits and white man infiltrates our lives. "Let's get and develop our minds, not destroy them" she states.

Shirley Williamson has this to say: "I don't condone the use of drugs for anyone except as prescribed by a doctor for medicinal purposes only. From all one ever hears and sees of drug usage, it is unprofitable (to the consumers) and, in most cases, has dangerous after effects."

Benjamin Fagan, a sophomore, states, "I am all for reefers. They should legalize it. Smack is an altogether different thing. One should see a junkie and then make a decision."

Katie Graham, sophomore, says, "It's your thing, do what you want with drugs as long as it does not interfere, impede, or endanger the person or property of others."

Luther Jackson, a freshman, thinks that drugs should not be used in anyway - hard or light.

Barbara Davis, sophomore from Virginia, states, "Being an Aggie and a member of the Black race, I feel as if any of my Black brothers and sisters who wish to take drugs should be allowed to do so without society downing them."

Larry Sotherland, a

sophomore, explains, "Obviously drugs are a hazard to anyone that might indulge excessively. But to legally impose restraints on its use is a rather delicate and often quite unfavorable maneuver. This I don't feel is the answer. For those that desire its usage, it is available. Let's face it, an attempt by the establishment to forcibly protect an individual from himself is quite obsolete."

These are the opinions of just a few of the many students at A&T. One can not base his opinion on the opinions of these few. It is up to us, as individuals to draw our own conclusions about drug usage.

# Graeber Shoots To Clear Campus Drug Traffic By End Of The Year

By Janet Jones

"Drug abuse is one of the biggest, and most serious problems here on A&T's campus," stated Marvin Graeber, director of building and grounds.

"We are concerned about our students and it hurts me to know that anyone is using drugs," he stated in a very sincere and honest tone. "It is a fact that drugs are being pushed on campus and some of these pushers are known."

During the 69-70 school year, eighteen arrests were made during the fall semester. Some of these were made at the Student Union, which is thought to be the center of drug traffic on campus.

"Pushers are making a lot of money off drugs and our people are being gullible to these peddlers," states Graeber. "But it is not all to be blamed on pushers; big organizations are behind this ring of criminals." "It is mostly white students," he says. Money is behind drug abuse.

Much is being done to clear the campus of drugs. Several raids have been made on dormitories and on the student Union. "Anytime, there is a chance or possibility of uncovering drugs, raids will be made, day or night" exclaimed Graeber.

The security department must stay within the boundaries of the law. If a student is apprehended for drugs, in most cases, he is

turned over to the city law. Graeber hates a drug pusher. He has no compassion for one. "Our job is to track down these peddlers and we expect to clear the campus of drugs by the end of the year," Graeber later replied.

## Librarian Notes Improvement In Use Of Library Facilities

By Jacqueline Glisson

One of the most heavily populated buildings on campus by the students is the library. Students are able to use the facilities provided by the library any day of the week from as early as 8 o'clock in the morning until as late as midnight most nights.

The most widely used area of the library by students is periodicals with circulation being the second most heavily used. Due to the shorter open hours of the browsing room, students use this library department least of all.

Most students use the library particularly on Mondays, Tuesdays, and Wednesdays during the night time. Early hours nightly during the week, are the hours most students are using the library; after 10 o'clock at night, the numbers of students in library decreases.

The library assistants are busiest serving students on Sundays from 6-10 o'clock. With the coming of the weekends, students visiting the library are at the lowest figure. Thus, Friday afternoon, and Saturdays are the lightest days in the library. From the student's use, it is apparent that they are nocturnal.

The first floor in the periodicals department is the library area where most students do their studying. It has been noted that students have mainly mutilated books and magazines in periodicals, while overdue books by students are the problem in circulations. B.C. Crews, librarian, said, "Yes, the rate has decreased on missing books."

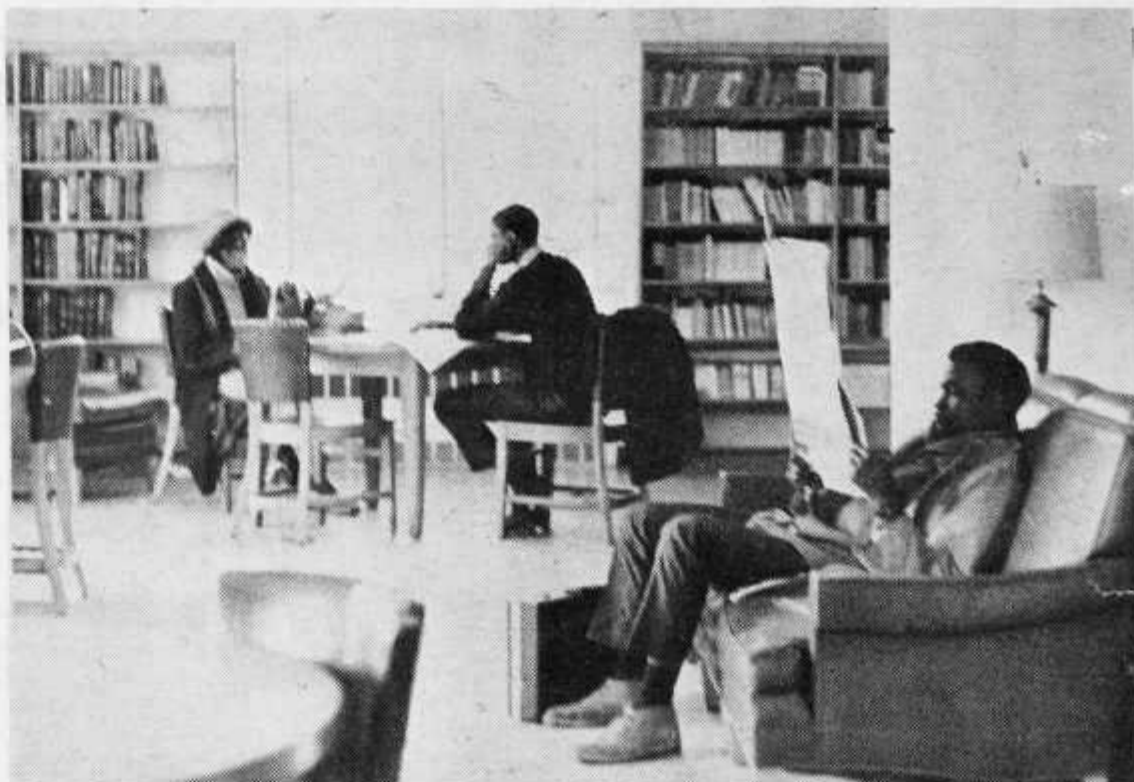

He feels that if students will take time to properly check out books and follow regulations, many problems of the library would be greatly decreased. Unfortunately students are still tearing out pages from books at an increasing rate. This should not be happening with the Xerox duplicating machine making copies at a lowered price of five cents each. This destruction causes about one to six months to order the magazine or sheets to replace the torn sheets.

A new addition has been added to the library rules; students will soon have to use ID cards for use of the stacks, because stack cards will not be used anymore. Students using the stacks, will leave their ID

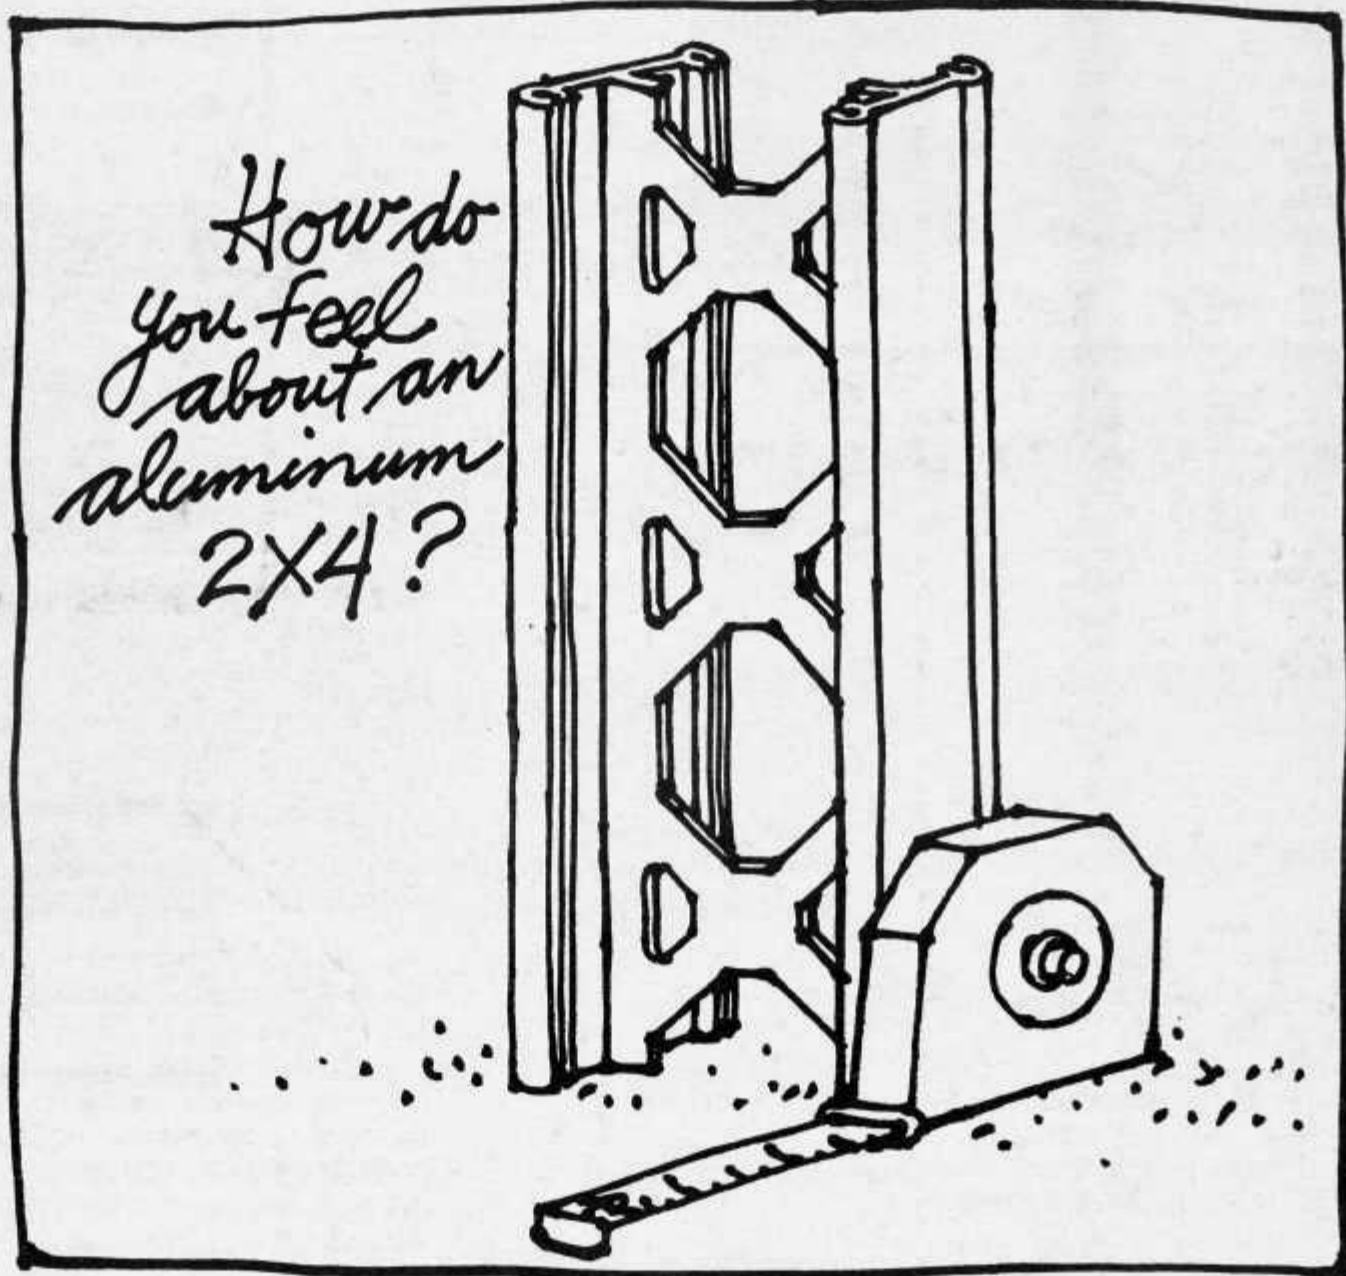

cards at the desk and get them when they leave. As of now, only juniors, seniors, and graduate students may use the stacks.

Students make use of the film library most when they have reports to do for a class. Mrs. Hudgens, the film librarian, emphasizes the importance of students' securing a good projectionist to run these films for them. Students should realize that the cheapest film is \$60 and the most expensive is \$665; thus, it presents unfortunate circumstances when films are damaged.

The head librarian feels that as far as students' use of the library, "They are doing fairly well, but it still needs improvement".

Valentine's Day Is All The Time For Some Of Us

# Valentine's Day Ignites Spark Of Love In The Hearts Of Lovers

By Brenda Thornhill

Once again Valentine's Day has arrived and more so than ever its true origin has yet to be recognized. Surely, the sending of love tokens has yet to cease in commemoration of the holiday. Yet is there a reason why people give candy or send valentine cards to loved ones? Sources reveal that the feast of St. Valentine on February 14th seems to be intended to commemorate two saints of the same name. According to legend, one was a Roman priest who suffered martyrdom during the persecution of the emperor Claudius, and the other saint was a Bishop of Interamna (Terni) who was martyred apparently also in Rome. It appears that both acts of martyrdom were legendary, but they are based on a historical foundation.

There is no doubt that, regardless of the true origin of Valentine's day, there remains the joyous festivity in its remembrance. St. Valentine's Day, as a lover's festival, the choice of a valentine and the modern development of sending valentine cards has no relation to the saint or to any incident in his life. On the contrary, these customs seem to be connected with the pagan Roman Festival of the Lupercalia which took place in the middle of February. Many tend to associate the mythological character Cupid

with Valentine's Day.

Valentine's Day has its special effect on Aggies, too. At this time, the girls look forward to receiving gifts (candy being most traditional) from their sweethearts. It has a tendency to bring lovers closer together - the Sunday date becomes extra special - the evening kiss, extra affectionate. Dorm buzzers ring more than ever - the mailman makes extra trips delivering articles from Valentine cards to

expensive gifts to satisfy the eager anticipation of the young ladies.

It is on this special day that both sexes fall prey to Cupid's arrow that pierces their hearts and makes them exhibit some warm affection toward each other. Although Valentine's Day may cause young ladies to pick up a few extra calories, it, nevertheless, continues to create a stronger bond of love among mankind.

**WANTED:**

College men and women for management positions in government. Must meet physical requirements. Financial aid available for in-college trainees, or applicants can enroll in special training course on graduation. Stateside and/or overseas travel guaranteed.

Here's a government position with a real future for both men and women. An officer's job in the Air Force. A management level job in anybody's book. Certainly, there's no better way to get the experience and training needed for executive responsibility.

If you have two years of college remaining, you could find yourself earning an Air Force commission while you learn, through the Air Force ROTC two-year program. Along with college credits and a commission, you'll receive \$50 each month as a student. And upon graduation, that management position we promised will be waiting for you. If an advanced degree is in your plans, you'll be happy to learn that the Air Force has a number of outstanding programs to help you further your education.

If you're in your final year of col-

lege, you can get your commission through the Air Force Officer Training Program. It is open to all college grads, both men and women, who qualify.

Check it out. You'll find that the Air Force is one career that offers something for everyone. Nearly 430 different jobs, ranging from aeronautical engineering to zoology, with almost everything else, including flying, in between. But whatever your duties, you'll soon discover that the Air Force will let you move just as far and as fast as your talents can take you.

So look ahead and let your college years pay off for you with a managerial position in the U.S. Air Force. Just send in this coupon or write to USAF Military Personnel Center, Dept. A, Randolph AFB, Texas 78148, and get your postgraduate career off the ground.

# A&T Undergraduates Unaware Of Tight Job Situation

By Patrice Dunn

"The fact that students don't realize the tight job situation" says Mrs. D. G. Jones, assistant Director of the Placement Center, is the most serious problem the Center currently faces with A&T students.

She further states that many recruits cancel their visits because enough students have not signed up prior to scheduled

interview dates, thus making it unprofitable for the recruiters to come to this campus. Also many businessmen from this area call for part-time, internship or summer employees among undergraduates. Since few undergraduates have registered at the Center, they have very few names to offer.

To solve these problems Mrs. Jones suggests that students

before their senior year come and register in order that these jobs can be filled before students from other colleges in the area get them. Liberal Arts students who are hardest to place are asked to make a special effort to come early.

The Placement Center, now being housed in East Dorm, offers services to seniors in the capacities of interview sessions

with recruiters from major firms, businesses, industry, school systems and the government.

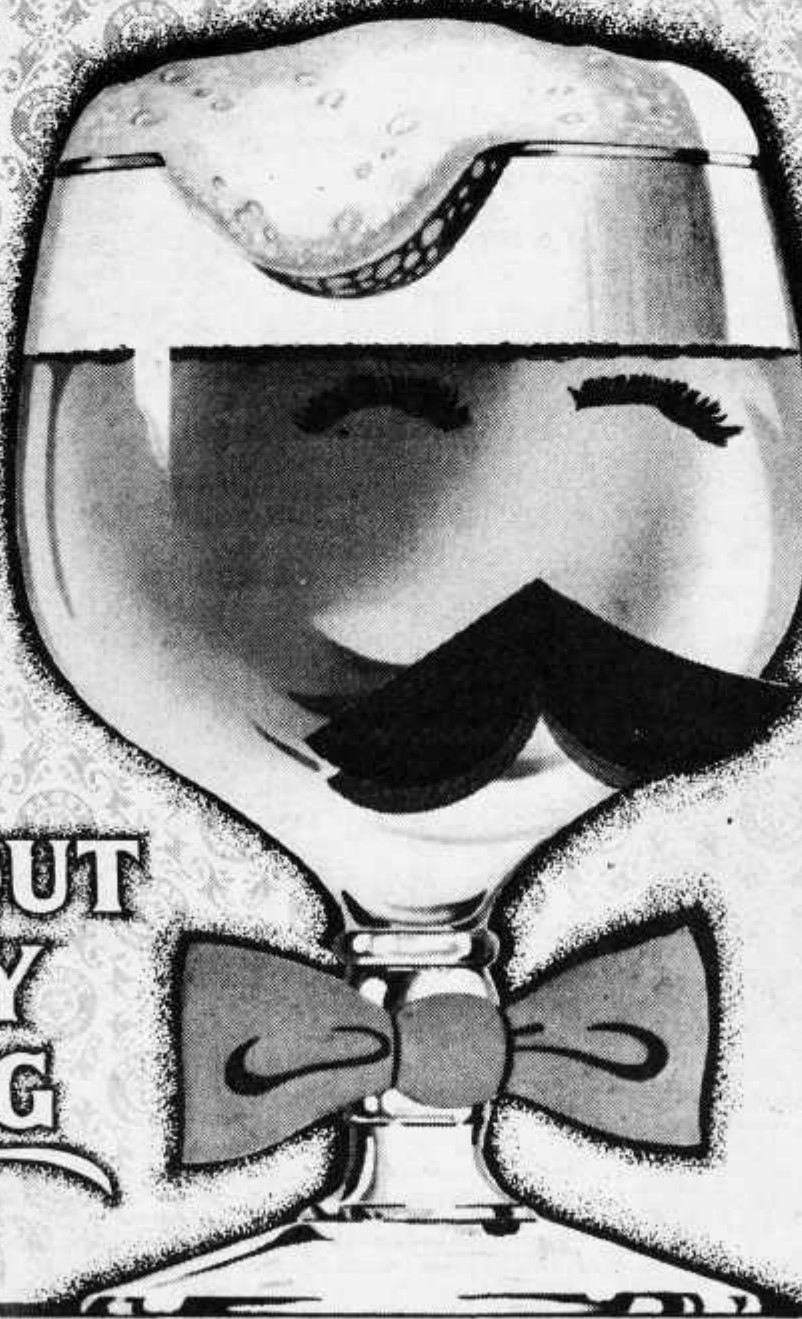

To underclassmen their are services in finding part-time, full-time, and internship jobs. Also, services to alumni and counseling are provided.

Past functions sponsored by the Center include the October interview Training Clinic. A Career Conference is scheduled

for March 3 and 4 with Black representatives from major firms returning to give inside stories on the availability of jobs for Blacks.

Mrs. Jones encourages all students to attend the March Clinic and make ample use of the Center. She describes the Placement Center as a students "greatest and easiest opportunity to find a job."

# Irvin's Cagers Tromp Blue Bears 99 - 70

By Paul Jones  
Sports Editor

There is nothing like misery, and the hapless Blue Bears of Livingstone has its share as A&T ripped them 99-70 for their 18th loss of the year.

For the Aggies it was their 17th win against four losses. Of the Blue Bears' two wins this season, one was over Fayetteville State, a team that beat A&T earlier in the year. But this was no ordinary game as A&T regulars encountered all kinds of problems with the fired up Bears.

Reversing his strategy, Coach Cal Irvin went to the opposite end of his bench and put his second and third team into action. When the "minute men" began to take advantage of their action and make the game a runaway, the regulars got in more limited action.

The Aggies got the tap and Elmer Austin had scored seconds later. Both teams started to run and a shootout was on. To everyone's surprise the Bears stayed within a basket and soon took the lead.

When Livingstone took a 28-26 point lead, Coach Cal Irvin had taken enough and made substitutions as Bear fans tried to bring the roof down. First came Milton Nunnally who responded with eight quick points. Next came Bob "Leaping Lizard" Goodwin who scored a couple and the "minute men" were in their glory.

Sporting a 53-37 lead at the half behind the effort of the bench, the Aggies wasted no time in going for the kill. Starting this time with substitutes, A&T continued their rampage as the bench stole the show.

Taking advantage of a 30 point lead, A&T's regulars came back into the game, but the minute men had proved their worth in the win.

High for the Aggies was Al Carter with 17 points along with Marvin Morris and Milton Nunnally with 16 and 14 points respectively.

Next game for the first place Aggies will be at Elizabeth City tomorrow. Game time is 8:00 and will be broad casted over WMDE-FM.

# WSSU Loss Has Positive Effect; Aggies Back On Winning Track

Basketball coaches do not usually regard losses as having a positive affect, but Cal Irvin believes that the Aggies' defeat by Winston-Salem last Friday may make A&T a better team in the long run.

"Maybe the pressure is off

now," said Irvin. "We keep telling our boys that you have to be up for every ball game or you will lose."

A&T regrouped its forces Monday night in Raleigh and trounced tough St. Augustine's 100-88 for its 11th conference

win against two defeats.

"I think that we are back on the winning track," said Elmer Austin, the Aggies' hard working captain. "We all took that loss to Winston-Salem kinda hard." Prior to the defeat, A&T had won 10 straight games and had gained the 16th spot in the Associated Press National poll of small colleges.

A&T went after the Falcons like they were really fired up.

Connecting on a blazing 51.2 percent of their shots from the floor, the Aggies raced to a 53-40 halftime lead. St. Augustine's managed only 44 percent from the floor in the first period.

After St. Augustine's cut A&T's lead to eight points a few minutes into the second half, the Aggies went to work again and put the game out of reach. They were taking no chances and elected to slow their game the final five minutes.

"I don't think we did our best job on defense," said Austin. "We are going to have to get our minds set for the CIAA Tournament."

Austin seemed to be thinking about the tough road games they have remaining. "It is going to be rough to win on the road," he said. "But that is what we have to do."

A&T's big gun against St. Augustine's was sophomore guard William Harris, who pumped in 30 points and directed the Aggies' offense well.

Austin added 16 points, Bobby Parks 15, Al Carter 13 and Walt Anderson 11.

# SPORTS

Paul L. Jones,  
Sports Editor

# Aggie Cagers Rank No. 1 As Tournament Approaches

By Paul Jones  
Sports Editor

Approaching the final week of regular season play in the tough CIAA Southern Division, A&T continues to lead the pack.

In making its strongest bid for the regular season title in recent years, the Aggies would have to lose the rest of their games to come out anything less than second-place. With Elizabeth City's 89-88 loss to Johnson C. Smith on Wednesday night, A&T can clinch the title by beating the Vikings in an away game Saturday.

For the last two years the Aggies have suffered defeats at Elizabeth City after having leads of up to 20 points in the second half. This year coach Cal Irvin is hoping he can change the situation behind the efforts of William "June" Harris and Elmer "Flute" Austin and a host of hopefuls on the bench.

Conference warfare is still raging as only four teams are assured of places in the upcoming CIAA Tournament to be held in Greensboro. Making the trip to the tournament so far will be undefeated Norfolk State and second place Howard University in the North.

Along with A&T, Elizabeth City has its place in the tournament.

Scramping for a place in the Northern Division is Maryland State, Virginia Union, and Delaware State. Attempting to make the four team Southern Division is the biggest match to be settled.

Although North Carolina Central strengthened its lead on third place by upsetting Winston-Salem, the Eagles still have an excellent chance of not making the tournament due to a tough road schedule.

On the other hand Winston-Salem, who won the

25th tourney last year, is in sixth place and, too, may have to sit this year out. Rounding out the field of teams in contention are Shaw University and Johnson C. Smith. No matter who makes it, this should be the best tournament since its origin.

# Ram Player Plays Like Earl Monroe

When sports writers ask Clarence "Bighouse" Gaines if his freshman star Sandy Smith is to be compared to former Ram star Earl Monroe, Gaines just smiles.

"I don't like to compare ball players," said Gaines, but Sandy is going to be an exceptional ball player. He is quick, he has all of the moves and he can handle the shots."

For his efforts in helping to revive a sagging Winston-Salem team, Smith has been named "Player of the Week. The fragile-looking 6-3 guard from Trenton, N. J. was at his best last Friday against the Aggies, Southern Division leaders.

Smith pumped in 32 points as the Rams won the game, 83-79.

Earlier in the week he scored 29 points against St. Augustine's. "There are some similarities between Monroe and Smith at the same stage," added Gaines. "But I won't go into that."

Although suffering with a severe groin injury most of the season, Smith is averaging 24 points per game. He made the honor roll the first semester.

# Beauty Not A Mystery; Simple Care Is Answer

By Jacqueline Corpening  
 Fashion Editor

Beauty need not be a mystery! There are simple how-tos that once learned, soon become second nature... things like washing your face and hair super clean, grooming your nails and eyebrows.

For most young ladies washing the face twice a day will do it. A thorough cleansing in the morning and at bedtime will usually do it. Never go to bed with your make-up on. When blemishes or blackheads are a problem, an extra cleanup at midday or after class is a necessity.

Keeping pretty nails may also be a problem for many young ladies. To achieve a pretty look or very attractive look, file straight across the top of the nail always in a single direction and up to the corners, smoothing but not rounding them. Buffing stimulates the nails, gives them

gloss, makes them stronger and encourages them to grow. Always buff in one direction and if you use buffing cream, scrub it off before applying polish.

Your eye brows are another important part of your beauty. First brush your brows into a shape and dab with an astringent. Gradually work closer to the shaping you want, checking frequently in the mirror to be sure the overall shape is right.

Eyebrow tweezing may be painful. This is because the skin is dry. Use a little petroleum jelly and see if that helps. Put the petroleum jelly on and then pluck upwards in the direction the hair grows.

## Med School In Third Year Of Program

In an attempt to alleviate the extreme shortage of medical doctors and dentists among minority groups, The Harvard Medical School is again sponsoring the Health Careers Summer Program.

The program, initiated in 1969, admits for 8 weeks (July 6 - Aug. 27) minority undergraduates who have completed their freshman, sophomore or junior years. All students accepted receive full financial aide for tuition, room and board plus a stipend and travel allowance.

The purpose of HCSP is to better prepare students for acceptance into health-related professions and to improve their chances of entering highly rated medical schools. This is done by providing students with Harvard academic courses, academic tutors and clinical experience in seven medical centers in the Harvard area.

Applications for the program are now being accepted. Interested students are asked to call Miss Carol Sander, Administrative Assistant, at 617-734-3300 Ext. 468 or write Harvard Health Careers Summer Program, Harvard Medical School, 25 Shattuck Street, Boston, Massachusetts, 02115 by February 15, 1971.

# Will it fit you?

## Stone & Webster interviewers will be on campus February 16, 1971

**Find out** if the Stone & Webster corporate hard hat is for you - and vice versa. As a Stone & Webster construction engineer, you'll become directly involved with nuclear, steam and hydroelectric power generation, power transmission systems and design and construction of process plants for chemicals, petrochemicals and petroleum. As part of your engineer-in-training activities, you'll spend 2½ years in the field alongside experienced, senior construction engineers. Then you'll devote six months to developing firsthand knowledge of design,

scheduling, purchasing and other management skills in our Boston offices. Stone & Webster offers an excellent employee benefit program including a generous Tuition Assistance Plan.

See how the hat will fit. Register with your Placement Office for a Stone & Webster interview when our representatives visit your campus.

If you are more interested in design engineering, we have a comprehensive training program for you, too.

# A&T And YMCA Join Forces To Help Underprivileged Youth

By Edward Coles

A&T and the Hayes-Taylor YMCA have joined forces in combat against the lack of recreation and nutrition for the underprivileged youth in the Greensboro area. A&T and the YMCA will provide recreation and hot meals for over 250 underprivileged youngsters between the ages of 10 to 14.

This program will be financed by a \$15,623 grant through the Guilford County Economic Opportunity Council.

With officials of A&T conducting the project, the majority of the programs will be held at the YMCA, under the direction of David Morehead, an A&T graduate. Morehead said, "We look forward with great anticipation along with A&T, in serving the youth of Greensboro. It is our opinion that these kids need this kind of help."

"The YMCA is an agency to serve all people regardless of where they may live or how much money they may have. I consider this program to be one of the most beneficial the YMCA has ever offered," Morehead emphasized.

Also Dr. Roy Moore, head of the A&T Physical Education Department, will supervise the nutrition part of the project. "Attaching the food component to a recreation program will go a long way toward enhancing the total development of the individual," explained Dr. Moore.

The youngsters will

participate in a wide-ranging program, which will include sports, dramatics and other activities such as dancing.

Moore pointed out, "There will also be classes in civic responsibility".

Last summer, A&T conducted

a comprehensive sports program for over 400 disadvantaged youths from the Greensboro and High Point areas.

The project was sanctioned by President Nixon's council of physical fitness and the National Collegiate Athletic Association.

DEGREE CANDIDATES

## Afro-House To Receive Financial Aid

The financial committee of the A&T Afro-House will sponsor "The Wonderful World of Beautiful Black People", February 19th at 9 p.m. in Moore Gymnasium.

The program is being presented to aid in the re-opening of the Afro-House. The Afro-House is the campus cultural center which has been plagued by financial problems.

Featured on the program will be singer Ronn Feaster, the St. Augustine College Dance Groups, and several Black models. The runner-up for "Miss Black North Carolina 1970" will also be presented.

Also on the program will be a game, quizzy-wizzy, which will allow ticket holders the chance to win a television set, a polaroid camera, a set of luggage, and many consolation prizes.

A car will be given away as grand prize.

Admission for students will be \$1.50 in advance. General Admission is \$2.50.
