Arlene Bell Takes Title

By Janet D. Jones
News Editor

Climaxing the elections which were held Thursday was the announcing of Arlene Bell, an early childhood education major from Asheville, as Miss A&T for 1972-73 school year.

Arlene won by a close margin of votes over eight other candidates. Peartella Graves was first runner-up for the title of Miss A&T.

Jennifer Byrd, a nursing major, was elected secretary of the senior class. The position of vice-president of the junior class was filled by Greg Pringle, a Raleigh native and Lorey Hayes.

Elijah Mohammed, a Black man from Georgia with a third grade education, is presently touring the country speaking for the Nation of Islam. The nationally renowned soul singer, now turned Muslim minister stated that

"I have seen too many Black men, women, and children mistreated by the white man, and the black men and children need to open their eyes and see what is going on," he stated.

Singing and dancing, he explained, was an occupation, not a career. His career is with Elijah Mohammed and not the entertaining field.

Joe Tex Talks About New Career With Islam

By Gloria Rogers

Famous singer and entertainer, Joe Tex, was guest speaker at a program Thursday night in Harrison Auditorium, which was sponsored by the Greensboro Mosque of the Nation of Islam. The nationally renowned soul singer, now turned Muslim minister, stated that he changed his name to Minister Joseph X and is presently touring the country speaking for the Nation of Islam.

He was influenced to join the Muslims six years ago when he heard the teachings of Elijah Mohammed in Miami, Florida.

"I have seen too many Black men, women, and children mistreated by the white man, and the black men and children need to open their eyes and see what is going on," he stated.

Singing and dancing, he explained, was an occupation, not a career. His career is with Elijah Mohammed and not the entertaining field.

There were two reasons given for his current tours around the country. First, there is a need to teach the truth about the Nation of Islam because Blacks have gotten only third-hand propaganda about Muslims from the white man; secondly, money must be raised to build a hospital in Chicago for Blacks.

Other main points in the message dealt with the main teachings of the Honorable Elijah Mohammed, a Black man from Georgia with a third grade education, but who today is... the most powerful man in America.

He strongly emphasized that the 6000 years of white rule is coming to an end in less than four years. In continuing, he pointed out that the Caucasian race cannot afford to give back what has been gained in 400 years to the Black man. "Race is not going to do anything for us."

"God is a man," he stated; "but for years Black people seemed to have been looking for a mystery man." Furthermore, he feels that the Black man should mate within his own race. He stated, "God blesses the child that has his own."

According to Minister Joseph X, the Black woman knows that her Black man is the best own earth, but he asks the Black man if he has yet realized that he has the best woman.

The program ended with a question and answer period.

Computer Telephone System Coming

By Vivian Edwards

Completion of the Centrex Telephone System is scheduled for February, 1973. This is a new direct dialing system where an operator will not be necessary. An attendant will only be at the switchboard to give information.

The Centrex system will operate in this manner: each station will have its own telephone number. Presently, A&T has one number and persons trying to place a call must ask for the extension to which they desire to be connected. All incoming calls will go directly to the station called, without any need for an attendant. Stations will be able to dial outside calls direct, as well as dial inside calls. Finally, any station may request the attendant to transfer an incoming call to any other station.

A computer print-out of all calls made at the University will be sent to the business office each month. This computer print-out will provide an accurate record of all long-distance calls made by each station. From this computer print-out the business office will then be able to charge departmental budget accordingly.

The cut-over of systems is being made in an effort to obtain better phone service. It will hopefully eliminate the delay in reaching a party and some of the busy signals received by people trying to place a call.

Centrex will offer these advantages: efficiency, the speeding up of incoming calls, and an automatic identification of outward dialing.

Hello, A&T State University
Professor Receives Grant For Research

By Alice Hobbs

Dr. Chung Woon Seo, an A&T professor, has received a $128,688 grant from the United States Department of Agriculture.

The research topic that Dr. Seo has chosen is the Lipid Oxidation in Freeze Dried Meat.

The main purpose of the research is to find methods to prevent rancidity in freeze dried meats. At the present time there is no effective method available to determine the degree of lipid oxidation in freeze dried meats. Thus, this is also an important phase of the research project.

Working with Dr. Seo will be Mrs. Sarah Williamson, a former A&T graduate in foods and nutrition. She will be a full time research associate. There are two part-time graduate students in foods and nutrition and two student lab assistants, who will also assist in the research.

Some advantages of the grant for research are to give training in research skills for undergraduate and graduate students, to offer students financial aid and also to strengthen the food and nutrition graduate program on campus.

A unique feature about the food and nutrition major area is that it provides first-hand research experience for its students in preparation for graduate study or a job in nutrition research or other areas of study as well.

New B&G Building Going Up Near Crosby

By Joan Boykin

A new building is now being constructed to house the Physical Plant maintenance department.

According to Marvin B. Graeber, Associate Director of Physical Plant, construction started this week and the building should be completed by August first of next year.

The new building will house all divisions of physical plant maintenance which includes carpentry, painting, plumbing, electrical maintenance and Locksmith.

In addition to this, Graeber stated that the building will also house a warehouse, a campus shipping and receiving office, and the security office.

Graeber noted, “We’ve been asking for a new building for twelve years.” In 1963, Building and Grounds drew up plans for a new home.

The new building which will be located across from Crosby Hall, will be approximately 17,000 square feet in size.

Graeber stated that the building will not be as large as was hoped for, but nevertheless the department is pleased to get it and will hold open house as soon as they move to their new location.

Linens Shortage Strikes Aggieland Once Again

By Ruth James

Many Aggies who have trouble getting linens at the A&T laundry will have fewer problems in the future.

Alfert Crawford, laundry manager, stated the laundry problem is a temporary one and will be solved within the next few days. The order for additional linens is on the way.

“The problem stems from several areas,” stated Crawford.

“First there were more students than the supply of linen we had. Furthermore, we have checked and found out many students have more than one set of linen.”

In addition, Crawford further stated that many students didn’t turn in their linen at the end of the school year nor at the end of the summer session.

With the additional linen on the way, the laundry will be experimenting with the use of fitted sheets. This is to eliminate the wear and tear of sheets in the past. Students will be receiving these sheets within a few days. Closer restrictions for off-campus students using linen from the laundry will be checked. By checking identification cards, laundry employees will be stopping off-campus students from getting linen from the laundry. This also helped to bring a shortage in linen.

Crawford is asking that students cooperate with the laundry, and the temporary linen shortage will be eliminated.

Cafeteria Progress Day By Day

By Betty Holeman

Day by day, one sees that continuous progress is being made on the new cafeteria.

To confirm this statement, John Zeigler, Vice-Chancellor of Business Affairs, stated that it was progressing according to the construction schedule. No problems whatsoever have been experienced.

In addition, he does not anticipate any unforeseen problems; but, with a job this size, one can never predict what is to be expected. There have not been any setbacks in the construction of this immense project yet.

Further, he commented, that it was possible for the new dining hall to be completed approximately two months earlier than the original completion date of September 1, 1973.

According to Zeigler, the general contract is about sixty percent complete, and the mechanical contract is about six percent complete.

Work has not begun on the elevator contract, the plumbing contract, the food service equipment contract, and the refrigeration contract.

Construction on these areas will begin as soon as enough program has been established.

University Now Has Diplomat-In-Residence

A&T has been selected by the Agency for International Development (AID) to participate in a unique Diplomat-In-Residence program, designed to give returning Foreign Service officers interaction with faculty and students.

The first diplomat to be assigned to A&T is Dr. William E. Reed, former dean of the university’s School of Agriculture. He has returned to the United States after spending 11 years in AID programs in Africa.

“Are we extremely excited about our involvement in this new cooperative venture with the Agency for International Development,” said Dr. Lewis C. Dowdy, chancellor of A&T. “Putting our students and faculty in direct contact with seasoned foreign service officers will add immeasurably to their total educational development.”

The Diplomat-In-Residence Program, administered by the Foreign Service Institute, was first initiated in 1964 at the University of California, the University of Iowa, and the University of Washington.

Reed will spend a full year at A&T and develop his own program, including some teaching and seminars with faculty and students.

“We are supposed to serve as resource persons, providing information and expertise in foreign assistance programs and the training of foreign nationals in the United States,” said Reed. “We shall also assist in upgrading of A&T’s programs in these areas.”

Reed served as regional director for AID in Nigeria, deputy mission director for Eritrea, and mission director in Togo.

A native of Columbia, La., he holds the Ph. D. degree in soil chemistry from Cornell University. He is the first scientist to make a soil survey of Liberia.

Reed came to A&T from the State Department in 1969 and served as dean of the School of Agriculture until his departure for Africa in 1969.

He is married to the former Marie Scott of Baton Rouge, La. The Reeds have three children.
Dr. Prince Comments On Trip To Yugoslavia This Summer

By Nei Burwell

Dr. Dorothy M. Prince, chairman of the Education Department, was a participant in a faculty seminar in Yugoslavia during the summer. The seminar was sponsored by the Association of Colleges and Universities for International and Continuing Education.

Thirty American college professors from various parts of the United States participated in this seminar to learn about Eastern European cultures.

"My interest was for the preparation and aid of teachers to become more relevant in the 70's and 80's," Dr. Prince said. "Not only the interest of teachers is involved but all walks of life and politics of other people."

The main concern of the trip was to learn in depth about Eastern European cultures and Yugoslavia in particular.

The trip was multi-disciplinary. There were many lectures, concerts, tours, and interviews on site.

These activities were held at the Workers' University in Zagreb, Belgrade, the capital of Yugoslavia, Novi Sad, Split, and Ljubljana.

The visits ranged from peasant villages to sophisticated cities. The trip was a nine-week seminar which lasted from June 29 through September 1, 1972.

Over 4,800,000 miles were visited, in addition to Hungary, Bulgaria, Romania, Austria, and Poland.

Dr. Prince said, "The educational structure of Eastern Europe is similar to Western Europe. It is performed through a uniform system which begins with the eighth-year primary school."

However, great attention is being placed on vocational and technical schools. The educational system is also supplemented by schools for training skilled workers in Eastern Europe.

In addition to her interest in the seminar, Dr. Prince liked the idea of "self-management." This is the idea of monetary profit not being as important as the realization of the participating person in decision making.

Dr. Prince received her A.B. Degree from Oberlin College, her M.A. degree from Syracuse University, and Ed.D. from Indiana University.

She also studied at Barnard College of Columbia University in New York City and educated at College of Wooster, New York.

Dr. Prince concluded, "It was a most outstanding experience. I will be glad to share my impressions of the visit with anyone who wishes to know more about it."

More Than Just A Beauty Queen

Students Give Views On 'Miss A&T'

By Doen Green and Delores Mitchell

As far back as the thirties, Miss A&T has been chosen by the Aggie student body. Miss A&T is a woman looked up to. She was graceful, she was elegant; she was the epitome of the Aggie woman. She was more than just a beauty queen; She was a good-will ambassador for all Aggieland.

Miss A&T is a classic example of all that is desired in a queen. Miss A&T 1956-1957 is a literal example of the Aggie woman; She was a good-will ambassador of the pride and beauty that is desired in a queen. Miss A&T has been chosen by all age groups.

As part of her radiant nature, she possessed the essential traits of a leader. But, with her election to office, she brought a fresh sparting personality and a keen appreciation for duty.

The woman, personal nature rendered those in her presence at AFROTC Scholarships

Lt. Col. Thurmon L. Deesley, Professor of Aerospace Studies, recently announced the awarding of AFROTC scholarships to eleven more detachment cadets. Scholarship cadets receive a monthly allowance, paid tuition, and an annual allowance.

The most recent AFROTC scholarship recipients at A&T are James A. Brown, Peter Burnett, Nancy Bush, Ernest Davis, Michael J. Davis, Steven T. Dudley, Marvin L. Lambrecht, Earl W. Matlock, John Smith, and William Wade.

Library Fine Policy

Relatively Unknown

By Jacquelyn Davis

Although Bluford Library's policy on fines for overdue books is not new, it is still relatively unknown to the majority of the student body. For example, few students are aware of the fact that if you lose or mutilate a book, you will not only be charged for the price of the book, but a $2.00 processing fee as well. Other policies are as follows:

1. Fines for overdue books from Main Circulation are five cents per day.
2. Fines for overdue Reserve books are fifty cents for the first ten days and ten cents per day thereafter.
3. Failure to return materials not circulated for overnight use would cause a charge of $1.00 for each day thereafter.
4. A fine of $1.00 per day is charged for an overdue film or other Audio-Visual materials.

Fines are payable at the Main Circulation Desk. As in the past, unpaid fines will be reported to the Business Office and posted against the student's account. Unlike the past, however, is the possibility that Free Day will not be observed this semester on which all overdue materials could be returned to the Library without the penalty of a fine.

Inefficacy

Or Apathy

This week the newspaper received another letter which talked about the university’s ineffectiveness. Well all that can be said about that is how can the university be effective if the students don’t care what happens to their school, their lives, or anything else for that matter. The question is always raised why the administration doesn’t do this or does that. The only thing that anybody will ever owe you is a 6 foot by 6 foot hole in the ground. And you even have to pay for that.

People have to get off their laurels and work for the things they want in this society (and most others as well), whom is he working for, (he can lose his job). The administration dosen’t do this or does that. The only thing happens to their school, their lives or anything else for that going to try if you don’t, and why should they. Then do something about it; organize, fight, change something further and he refused? When he does ask him offer you. but what have you to offer it?It is what you in the ground. And you even have to pay for that. That anybody will ever owe you is a 6 foot by 6 foot hole matter. Tlie question is always raised why the university be effective if the students don’t care what

meetings.

Well all that can be said about that is how can the effectiveness rise to a need for products to make the change come about. Skin creams and ointments, hair products, textiles, and other industries in general profited from this era of consciousness in the Black community. Many of those who profited were Black.

Everyone was following the trend of being like the white man and never really succeeding at anything except being exploited. The second need grew out of a rebellious desire on the part of Blacks. This need was readily filled by the system it was supposed to defy. Afro wigs, and puffs, the blow-out, the combs and picks and hair products needed to maintain the afro have created a market of those Blacks who rebelled against the system, parallels an earlier one which was once the exclusive style of Blacks, and each represents a need for products dictated by Black values, and each represents a commercial use and exploitation of these values so that the meaning of the real need was somehow lost. Whether this is good or bad depends on what was lost. These two markets have some things in common. Each was begun by a need for products dictated by Black values, and each represents a commercial use and exploitation of these values so that the meaning of the real need was somehow lost. Whether this is good or bad depends on what was lost. The first need represented a desire on our part to achieve integration into a system which rejected us. We tried to conform to the dress, speech, and general appearance of the dominant national group. Since our hair did not naturally and generally fit the pattern of the majority group, we had to make it fit.

This altering of appearance gave rise to a need for products to make the change come about. Skin creams and ointments, hair products, textiles, and other industries in general profited from this era of consciousness in the Black community. Many of those who profited were Black.

Everybody is wearing the Afro today or nearly everybody. What was once the exclusive style of Blacks who rebelled against the system is now common-place, and even taken advantage of by the system it was supposed to defy. Afro wigs, and puffs, the blow-out, the combs and picks and hair products needed to maintain the afro have created a market of those Blacks who rebelled against the system, parallels an earlier one which was once the exclusive style of Blacks. This need was readily filled by the system in the rise of a market, already mentioned, that catered to Blacks. The system with headquarters on Madison Avenue who profited were Black.

Everyone was following the trend of being like the white man and never really succeeding at anything except being exploited. The second need grew out of a rebellious desire on the part of Blacks. This need was readily filled by the system in the rise of a market, already mentioned, that catered to Blacks. The system with headquarters on Madison Avenue was supplying the means of its own defying, and what is more, could well afford to.

Black people have not really been liberated, but have only been subjected to another form of control by a corporate system.
**To The Chancellor**

To the Chancellor: I refuse to make any more explanations to the why's and what's of the inefficiencies in terms of figures, that attended the Political Science Club meeting Wednesday night. So I respectfully ask you the question that opened our Political Science Club meeting: How soon are you planning on getting the qualified instructors which are needed for the Political Science Department?

Patricia Ewewit
Freeman, Political Science Major

**Teacher Education Goes Through Changes**

By Doris Jackson

Two notable changes have been made in the Student Teaching Program, according to Dr. S.O. Jones, director of the Teacher Education Program. One change will end the issuing of B Certificates without the teacher education program. Dr. Jones stated, "Students will not get any type of certificate without coming under the education program; this change will affect those students who decided late that they wished to teach." The decision, not to issue certificates except through the education program was decided September 7, by the Board of Education.

The second change was the elimination of the three-day seminar in which students came back at mid-semester to discuss their problems, it was held a week before the semester ended.

There were some changes made, but more changes are needed. He stated, "I would like to see them have more field time, but the schedule will not permit it. Some institutes spend 18 weeks for experience. I don't see it right now for A&T. There is a need for earlier experience in the year-beginning in the sophomore year. The last course of education is too late for students to realize that they want to teach."

The program wanted for the teaching department is similar to the Early Childhood Program. In their program the student is able to be in contact with teaching difficulties. Their program allows for more classroom experience than the present program.

Dr. Jones would like to see the NTE, National Teacher Exam, deleted as the initial requirement for the "A" certificate. "Although a student has finished four years at a reputable college, he must take this exam; however a proposal has been made to the Board of Education to accept a certificate based on competence less emphasis on the number of teaching hours one has," stated Dr. Jones.

All these changes would benefit those students who want to teach.

**Is John Shaft A Political Virgin**

By Ted L. Mangum

We need to see politics in sports and entertainment as well as in every day classroom discussions. If you understood politics, you wouldn't have become angry or sad when the Arab-Guerrillas interrupted normal Olympic procedure and killed those 11 Jews because you would have understood Israel's pro-South African politics and their wholesale exploitation of African Nations. You would have understood that in order for the black athlete to make it in the U.S., he must separate himself from his white competitors and their wholesale exploitation of African Nations. You would have understood that in order for the black athlete to make it in the U.S., he must separate himself from his white competitors and their wholesale exploitation of African Nations. You would have understood that in order for the black athlete to make it in the U.S., he must separate himself from his white competitors and their wholesale exploitation of African Nations. You would have understood that in order for the black athlete to make it in the U.S., he must separate himself from his white competitors and their wholesale exploitation of African Nations.

**About Input**

No doubt you have seen the section in the A&T Register labeled "Input." These articles are written by persons in most cases not associated with the newspaper staff.

Last year the newspaper discontinued its "Letters to the Editor" section because of the lack of response. Instead the "Input" column was added.

It is as the name implies, a place for input into the university's communication system. If you have something to say, gripe about or even praise send your ideas to the A&T Register. Box E - 25 campus.

The A&T Register will not accept any article which in not signed, although the signatures will be held with upon request.

---

**Mailman Incarcerated**

By Dirk Thomas

The U.S. mail was held up at Scott Hall. Interesting, now, the way I heard it, the mailman (our protagonist in this story) left his keys in the mailroom door on the out side. Suddenly, from down the hall, SOMEBODY (who remains unknown to date) closed the door, with the keys still on the outside. However, the mailman was in the inside. And he stayed there for a while. (The duration of his stay is undetermined.)

Upon his release, the mailman promptly swore he would not return to A&T, even it's he did show up Thursday, and took an outdoor-man's suit and left the house. (The keys on the outside.)

So ends our episode. A&T pulls another first. I wonder what kind of mailman we'll have next?
Instructor Offered Editorship Of Local Weekly Newspaper

By Gloria A. Rogers

Miss Annie B. Herbin, instructor of English at A&T, has been offered the editorship of The Future Outlook Weekly by Mrs. J. F. Johnson, wife of the late editor and publisher Mrs. Johnson, who operated the newspaper for more than thirty years in Greensboro, died of injuries received in an automobile accident recently.

In an interview with the proposed editor, Miss Herbin stated that two major reasons almost compelled her to assume the responsibility of continuing the publication of The Future Outlook. First, she pointed out with deep concern that, although a man dies, his ideas live on after him; and Mr. Johnson spent his entire adult life advancing the idea of a foundation upon which Black youth can continue to build and improve. Secondly, Miss Herbin feels that under new management, The Future Outlook can offer students in Journalism a wide range of experience in the publishing field.

She stated: "Newspaper publishing is a business; and if I continue with it, The Future Outlook, I shall share my knowledge with concerned students in every facet of the publishing process. These facts include obtaining advertisements and subscriptions, distinguishing news as "news," circulation, bookkeeping and billing-in other words "the whole thing." For she says in a tired but enthusiastic voice, "Newspaper publishing is a full time job in itself. I will surely need help if we are to keep it going."

She is currently organizing a full staff to assist in the publication. She voices great expectations for the paper in the future; however, publication is temporarily suspended until certain legal matters can be settled.

For four weeks Miss Herbin was responsible for editing and publishing The Future Outlook which she said, "was a tremendous task along with my duties at the University, not to mention a continuing program in Georgia, which I must follow up monthly."

Miss Herbin is a graduate of A&T with a B.S. and Masters degree. She has been a John Hopkins Fellow and has also studied Advanced English at the University of Maryland, College Park, Md.

When asked about a Ph.D., Miss Herbin, in a matter of fact manner, replied that she needed only one year more at Johns Hopkins, but has not been really up tight about the degree. Though she says she will consider it in the near future, most of all she would like time to devote to writing and publishing pieces of her own.

Great Books Program Begins Again

By Janice Smith

The Great Books Foundation, which was established in 1947 is an independent non-profit educational organization. Its designated purpose is to provide people of all ages with a lifelong program of liberal self education through the reading and discussion of Great Books which have survived the test of the ages. The program will be continued this term, beginning October 7 and continuing through the school year.

Speaking of the reading program, Mrs. Kelley stated, "It gives A&T a thrust into the community in the critical area of reading; thus, it provides students a chance to project the college into the community."

Student Body President 'Man On His Way Up'

By Millic Dunn

Larry Hinton, S.G.A. president, is definitely a man on his way up. Tall, dark, and strangely attractive, Larry is forcibly dedicated to the cause of helping Black people. John Ready, editor-in-chief of The Future Outlook, feels that as president, Larry has a good idea of how the office should be run. Because of this and the fact that he knew the people, students would have to deal with, he decided to run for the office of S.G.A. president.

"I had always said that I'd never run for the office but in election time approached, I felt that I had something to offer the student body."

He further stated, "This is a very important and crucial in A&T's history since it is our first year under the consolidated plan. I had studied the plan and had the knowledge to deal with it. I felt that, as president, I could help prolong A&T's Blackness."

Larry also stated that, in the past, he does not believe that the administration has taken the S.G.A. seriously. However, he says that there are indications that they will be taken more seriously this year.

When asked about student apathy, Larry simply stated, "If students don't turn out to meetings, it's their fault if they don't know what's happening. Student apathy will not cut down my enthusiasm in dealing with campus problems. Many problems are solved by small groups. Students who don't support the S.G.A. should not expect anything from it."

Larry, a native of Durham, graduated from Hillsdale High School. He is a political science major who hopes to enter law school upon graduation. He admits that he does have much spare time; but, when he does, he likes to play tennis and read. He has no definite plans for the year but only promises to "continue to work in the area of student service."

Agriculture Official Sees Research Project

The Textile and Clothing Research division of the Department of Home Economics was visited Thursday by B. M. Kopacz, Assistant to the Director; Southern Marketing and Nutrition Research Division of the U. S. Dept. of Agriculture.

The visit was in connection with the research project being conducted by Dr. Myrile L. Smith, Director of Textile and Clothing Research here at A&T.

This is a two year project which is investigating the effects of rolling and laundering on manufacturer applied flame retardants. The emphasis of the research is on infant's sleepwear because most fires occur at night or during the early morning hours.
Air Force ROTC Gets New Prof.

By Janice Nichols

Lt. Colonel Thuman L. Deloney has recently been assigned as new Professor of Aerospace Studies here for a period of three years.

"The ROTC assignment," stated Col. Deloney, "was at one time the worst assignment, but the Air Force has upgraded ROTC extensively in the past years." Under his direction, the Air Force ROTC program will place more emphasis on recruiting.

What impressed the Professor of Aerospace Studies most about A&T was that the Army and Air Force ROTC units have their own building. He pointed out that very few colleges or universities with ROTC units have a building of their own.

Col. Deloney was the most impressed with his staff.

This will be Col. Deloney's first experience as Professor of Aerospace Studies. He did not apply for the position here, but the Air Force decided for him. He had no preference of college or university.

Lt. Col. Deloney stated that, "At the present time, there are 101 freshmen, 75 sophomores, 38 juniors, and 23 seniors enrolled in Air Force ROTC. A&T has the largest enrollment of Blacks in Air Force ROTC than any other predominantly Black college or university."

Before coming to Greensboro, Col. Deloney was at Dover AFB, in Delaware, where he was the Wing Social Action Officer. Prior to that he was in Vietnam and held the position of Combat Crew Navigator on a C141.

Lt. Col. Deloney is a native of Watonga, Oklahoma. He is married and has two children.

A Photo Essay

By Larry Lewis

The Style Of Minister Joseph
Harrison Players Will Attempt

To Master ‘Impossible Play’

How do you arouse 50 budding college actors and actresses enough to get them to master an “impossible play.”

That is the task facing Dr. John Marshall Stevenson, the youthful director of A&T State University’s Richard B. Harrison Players. Stevenson has selected the difficult “Marat/Sade” for the Players’ opening production this year. The two act drama will run for five nights.

“This play is almost impossible to do unless you’ve rehearsed,” added Stevenson, “I believe our clients will thoroughly enjoy this production.”

Cast in the lead role of Jean-Paul Marat, for the Players is Sophomore Junious Leak, who scored a hit in last year’s rendition of “The King and I.” Leak is from Greensboro. Belynthia Wimbush, a sophomore and drama major from Raleigh, will portray Simonne Favard, the Marquis’ mistress.

Other lead roles will be played by Staples (Marquis de Sade), Dwight McCoy (Coumier) and Loney Hayes (Charlotte Corday).

THE A&T REGISTER

All reporters, typists, photographers, business personnel, circulation staffers and other members of THE A&T REGISTER are asked to be present for a special staff meeting, Monday at 7:00 p.m.

PS. Your copy of THE A&T REGISTER will be available in the Union Ballroom, Student Services Building, from 8:00 - 11:00 p.m. Admission is $.50. Sponsored by Omega Psi Phi.

Football Game - A&T vs. Florida A&M, away. Saturday, September 23, at 7:30 p.m.

Student Worship Service - Union Ballroom, Sermon by David Spruill. Dress as you please! Sunday, 11:00 a.m.

Society of Lady Engineers - meets Tuesday, September 26, at 7:00 p.m. in Room 218 Cherry Hall.

Math Tutorial Sessions - for Math 101 - 112 will be held on Tuesday morning, September 26, 9-11 in Merrick Hall Room M112.

English Major Finds Success

By Patrice C. Dunn

One of the most promising student literary figures on campus is senior English major, George Raleigh, from Greenvor. George has found success as a poet, novelist and playwright.

As a poet, George has two poems that currently appear in the fall issue of the Anthology of Tar River Poets which is published by East Carolina University. The two poems are "Six Autumn Variations" (For Modern Piano) and "Night Has Spread Her Thigh." Others of George's poems have appeared in the North Carolina based publications, Reflection and Seminar and Song.

Most recently George has been concentrating on the role playwright. In this role he is seeking to produce his revolutionary idea of "gestalt" or non-linear drama. He says that the concept is based on Chekhov's revolutionary idea of "gestalt" or non-linear drama. "Masks of the Red-Shift" attempts to show the modern man trapped in emotional states which alternates from himself and his fellow man." It also seeks to reveal "modern man fearful of a future in which nothing is as certain as it was in timepast, in which identity seems irrevocably lost and alienation prevails; and modern man longing to return to a past which can not be recaptured."

George stated that he was a novelist before a playwright, but left the novel when he found that "in drama there is the least distance between the writer and his audience. It's like dialing direct; a writer writes dialogue and characters speak what you are speaking. It is immediate."

As a novelist George wrote "Strawberry Fields," a work that was never sold. He comments that he is "glad it wasn't sold" but feels the knowledge he gained during the years he spent working on it is something that he could have never learned otherwise. The novel mainly never sold because agents wanted George to include more commercialism and less artistry in his work.

George attributes his start in the literary field to Dr. William H. Robinson, a former English instructor here who convinced him to begin writing during his first period in attendance at A & T during the early 60's. Seeking to make millions, he then left school and discovered that "he couldn't make a million dollars selling poetry in little magazines."

Commenting that he is now discouraged by the fact that he has not reached overwhelming success yet, George points to life of Mario Puzio, author of The Godfather, who spent many years writing and finally met major success at the age of 46. Continuing, George believes that what he is doing "may seem avant garde now, but in 10 years will be quite traditional."

Serving as a cornerstone for the future development of non-linear drama "Masks of the Red-Shift" attempts to show the modern man trapped in emotional states which alternates from himself and his fellow man. It also seeks to reveal the modern man fearful of a future in which nothing is as certain as it was in time past, in which identity seems irrevocably lost and alienation prevails, and modern man longing to return to a past which can not be recaptured.

SIX AUTUMN VARIATIONS*
(For Modern Piano)

i
In autumn,
the sky is a pale blue crystal
which crowds of blackbirds explore.

ii
Yellow grass waves in the field.
Day lingers.

iii
Bark is flaking from the pine tree.
Dry cones drop to the forest floor.

iv
Worms have eaten the leaf.
Only the skeleton remains.

v
In the distance.
The valley takes the sun between her thighs.

vi
Swift fingers of dusk throttle proud peacock colors
Of sunset. A chill wind from the east:
The day is hushed.

*Night has spread her thick
Cloak over this town, streets,
Houses utter yellow sighs
And people peer skillfully from behind
Steamy windows afraid.

But now they begin to enter the street and
More cautiously at first, and then more bold they
Laugh, Talk, and love.

They aren't as afraid of Night's Cloak
As I, hiding in my room,
Offering small sacrifices of poems.

Aggies Insult S.C. With 41-7 Rout

"We just weren't ready." Those were the only words that South Carolina State College's Coach Joe Barks could utter after being flattened by North Carolina A&T, 41-7.

Yes, the end of football was hovering over Greensboro Memorial Stadium Saturday night as the Aggies demonstrated defensive and offensive proficiency in whipping the Bulldogs from Orangeburg South Carolina.

A&T struck pay dirt first on a 42-yard pass from Leonard ReUford to freshman Curtis Thomas Murphy capped a driving march and a 16-yard run by Thomas Murphy. At Holland punched the ball over from the two for a 2-7 advantage.

At this point A&T was only halfway to proving its football prowess.

Six Slated For Induction Into University's Sports Hall Of Fame

Six of the finest athletes ever to compete for A&T have been selected for induction into the university's Sports Hall of Fame on Saturday, October 7.

The second group of inductees includes Art Statum, varsity wrestling coach at LaFayette College, Easton, Pa., Robert "Stonewall" Jones, assistant football coach at North Carolina Central; Thomas Alston, former major league baseball star; Connie Raiford, former A&T track, swimming and baseball star; the late John Mayo, football star; and the late Walter Hamilton, a boxing hero.

The athletes will be officially inducted into the Hall of Fame at a luncheon at the Hilton Inn on Oct. 7 at 1 p.m.

Statum, a native of Bethlehem, Pa., won the first national championship for A&T in 1933 when he became the NCAA heavyweight crown. He also was an All-American end in football.

Jackson, a native of Allentown Pa., earned Negro All-American honors as an A&T fullback in 1946, 1947 and 1948. He was the first Aggie athlete to earn a berth on a professional team.

He was drafted in 1946 by the New York Giants in 1936 and played two years.

He has also coached at Johnson C. Smith, Shaw and Southern University.

Alston, a Greensboro native, was an All-CIAA baseball star at A&T before becoming a major league. The St. Louis Cardinals paid San Diego of the Pacific Coast League $500,000 for his contract.

Raiford, currently a Greensboro bondsman, was an outstanding A&T athlete during the late 1920's.

Maye, a native of Greenville, competed for A&T from 1954-58. He was a two-time All-CIAA halfback and also a track star. Before his death, he was principal of Robertson High School in Winnsboro.

Hamilton, a native of Norfolk, Va., was one of the finest A&T boxers to earn All-CIAA honors. He graduated in 1947 and died recently in Trenton, N.J., where he was director of a YMCA program.

Allen Smith going over from the six.

Reaping the blessings of high emotionality and good coaching by Hornsby Howell, A&T came right back with a scoring march high-lighted by a 20-yard Reliford to Walter Bennett pass and a 16-yard run by Thomas Murphy. At Holland punched the ball over from the two for a 2-7 advantage.

At this point A&T was only halfway to proving its football prowess.

Aggies To Battle Deadly FAMU Rattlers

When the A&T Aggies travel to Tallahassee, Florida, to play the Florida A&M Rattlers, they will tread in unknown waters. The Rattlers have not played a game yet, but the "winning" Aggies are well on their way into the season with a 2-0 record.

A&T will have its hands full when it will face the always deadly Rattlers. But then, the determined Aggies have plenty in store for Florida just as they surprised South Carolina State with slaughtering 41-7 victory.

Leading the Rattlers' attack will be veteran quarterbacks Rodney Montgomery and Kenneth Holt. Outstanding running back James Rackley will pose a threat, but it is not a problem too difficult for the sturdy, solid A&T defense to handle.

Although Florida A&M has a new coach this season, they will be ready for this season's opener.

The Rattlers are even stronger than last year, since their personnel consists mainly of sophomores and junior players.

With the Aggies anxious to score early in the game, so they will be prepared for whatever "bag of tricks" the Rattlers employ.

$25 PRIZE!

"GUESS THE SCORE CONTEST"

The Week Before Each A&T Football Game WMDE-FM Radio will conduct a contest giving you a chance to guess the score of the game.

Winners Receive A $25 Certificate For Portrait Pictures

White Hat Smiling McKibbens Rests Comfortably In Infirmary

By Jacqueline Glisson

A most unusual place for A&T's sensational quarterback, Paul McKibbens, to be in is the A&T Infirmary. McKibbens performed superbly in the game last week against South Carolina and was walking around enjoying the victory.

Last Monday changed all that, when McKibbens found himself in bed in the Infirmary. He began to feel slightly ill after the game and it gradually became more pronounced.

With his favorite white hat resting comfortably on his head, the "smiling" quarterback was sitting up in bed with several enron letters surrounding him.

It seems he would be totally contented, but the 6-2 native of Atlanta, Georgia amusingly yearns to be back on the gridiron signaling calls, throwing the pass, and running the ball himself.

While it is difficult for Aggie students to picture McKibbens out of the pigskin and gridiron scene, it is even more difficult for the star quarterback to adjust to the "infirmary scene" himself. He stated, "It is a funny feeling. It's the first time I have been out of a game for illness."

Although the 194 lb. field general is in good spirits, he finds it rough being away from the team and playing ball. "I'm ready to get back out there," added the hopeful McKibbens.

The team will definitely miss the presence and performance of McKibbens in the FAMU-A&T game. This is quite evident because in his freshman year he compiled 308 yards worth of "arm" firepower. He makes split second decisions and is very fast on a sneak quarterback run.

Looking into the immediate future, McKibbens said, "We hope to have a good season!" Once he is out of the infirmary and back into familiar jersey Number 11, the Aggies and McKibbens will join most successful seasons ever for 1972-73!

Aggies Rout S.C. 41-7

(Continued From Page 11)

Another drive with a two-yard plunge making the score 28-7 with John Guy's extra point. Then in the fourth stanza, Artie Stanfield dashed 29 yards on a dazzling broken field jaunt upping the count to 34-7.

But A&T's defense, which yielded only 47 rushing yards to South Carolina all night, had to launch its superstar. Ronald Tuck, a sophomore defensive end from Philadelphia, Pa., answered the call with a 25-yard pass interception run for a score adding the final 47-point final.

The night was a bad one for Coach Banks as his team tallied 140 total offensive yards to A&T's 334. The Aggies for the second week in a row demonstrated a balanced attack by heaving the ball for 155 yards and shoving it down S. C. State's throat for 179.

The defensive backfield had its stars with Oconeal Hicks, Ronald Tuck and John Guy picking off signals. William Wideman, an All-American candidate at defensive end, and his partner on the other end, Carl Collins, both kept heat on S. C. State's little quarterbacks Ellis O'Neal and Clay Miller as they dumped the two eight times.

Playing in 82 degree heat, the physically strenuous rout should help the Aggies in preparation for Florida A&M University under the sweltering palm trees in Tallahassee, Fla.

Coach Hornsby Howell was worried about his team's play last week but should have no gripes after beating the Mid-Eastern Athletic Conference's No. 3 rated team and dominating in style.

A&T now stands 2-0.
