Phillip Arterbery Is Elected Freshman Class President

By Rosie A. Stevens

The results of the freshman class elections were announced here Thursday afternoon at 3:30 p.m. in room 213 of the Union. Phillip Arterbery won the office of President with a total of 92 votes as opposed to 56 votes for Tony Tyson, his closest contender. For Vice President, Michael Farrar won with a total of 72 votes, with Anthony Mobley trailing with 20 votes. Carol Parkensen had a total of 91 votes, winning the office of Treasurer.

The Title of Miss Freshman was hotly contested with a margin of less than the required ten percent of the total votes necessary for an undisputed win. The contest was between Phyllis Glover with 43 votes and Kathy Ward with 40 votes. However, at the time of the announcement, Phyllis deferred to Kathy so that Kathy Ward is Miss Freshman.

The newly elected officers were given the oath of office by Clarence Jones, Attorney General of SGA.

All officers expressed thanks to the students who supported them during the campaign and who voted during the election. Arterbery stated that he would "try my best to fulfill the confidence expressed in me by the voters." He also said that he would work with his executive committee in leading the freshman class during the coming year. Michael Farrar, vice president, indicated that he wanted to make the freshman class "the best ever." "We are already faced with problems," he said, "since we are the freshman class, and we are just beginning." He indicated that the officers would "rely on Marilyn Marshall and Lloyd Inman for advice and in meeting our expectations." Arriving after the announcement of the election returns, Kathy Ward, Miss Freshman, expressed incredulity at winning. "You've got to be kidding! This is too much. I really don't believe I won." She recovered for a moment to express thanks to those who voted for her.

When asked for comment concerning the elections, Marilyn Marshall, president of the SGA, said she felt that a "shorter span of time between voting and the announcement of the returns should be adopted." She added later that she thought the conduct of the elections was "smooth" but that she was "disappointed" at the turnout, approximately 10% of the freshman class.

The elections committee concurred with the small turnout with the exact figures given by Ronald Penny 193 out of approximately 1500 freshmen. "It was a poor turnout," Penny stated, one of the poorest turnouts we have seen." This was the third election seen by the committee. Bennie Glover, chairman of the committee, stated that one reason for the low turnout was "poor publicity" along with other factors. Brinkley Faison expressed his feelings with "I really think it is apathetic."

On an optimistic note, Lloyd Inman stated that "the candidates were well qualified for their positions."

University Bookstore Head Says ‘There Definitely Is A Shortage’

By Cassandra Weight

When James Meachem, head of the University Bookstore, was asked whether or not there was a shortage of books in the bookstore his reply was, "There is definitely a shortage of books."

He stated that one reason was the lack of participation in enrollment. He explained this to mean that sometimes there is over enrollment in a course, thereby causing a limited number of books to be available for other courses. He said the bookstore may have 30 books for a section but perhaps 50 may be enrolled in the class.

Meachem said another reason for the shortage was that after the add and drop period, students fail to return the books for the courses they had previously enrolled in and instead generally wait until the end of the semester to return those books.

Still another reason, he said, for the shortage was out-of-stock merchandise. Meachem said publishers order from printers and if the publisher underorders, then it takes around a month for the order to be available.

Meachem urges that all students return books that belong to the bookstore if they are not presently being used so that others enrolled in a particular course will not have to wait for books to be ordered.

New Research Project Probes Air Pollution

Automobile noise pollution, which many observers believe will soon come under close federal scrutiny, is the subject of a new $31,500 research project at A&T.

The grant was announced by the Ford Motor Company to Dr. Amar Datta, associate professor of mechanical engineering at the University.

Datta and a group of A&T engineering students will study the effect of various engine parameters on the exhaust noise of the automobile.

"At a time when the attention of the public is focused on the quality of the air we breathe and on the automobile as one important contributor to its pollution," said Datta, "the auto industry is looking years ahead and anticipating possible federal guidelines on auto noise pollution."

He said certain states have already adopted guidelines of their own.

"There is no doubt," added Datta, "that if we can find some (See New, page 5)
Animal Waste Tested For Harmful Effects

By Cassandra Wynn

Ways to dispose of large amounts of animal waste without harming the environment are being sought by a group of plant science and technology.

"Agriculture Waste Management and Pollution Abatement" is the title of the project, which is sponsored by the U.S. Department of Agriculture.

The experiment is carried out at A&T's Farm on McConnell Road. Dr. Ruffin said that eventually experiments will be done with the waste from slaughter houses and wastes from breweries. He said that in the future, there might be a project to experiment with the waste from garbage dumps.

AFROTC Enrollment Makes Gain

WASHINGTON, D.C. (NNS)

The cause of equal employment opportunities marches on, this time the banner being carried by the Law Enforcement Assistance Administration (LEAA) that recently set up new guidelines for law enforcement agencies to follow.

Stating that full and equal employment of women and minorities is a "necessary component" of the criminal legal system, LEAA's new guidelines require that minorities be given a fair shake in order to help the concerned nationwide effort to control crime.

Any law enforcement agency which receives LEAA financial assistance in excess of $25,000 and which employs 50 or more persons is required to implement and maintain an Equal Employment Opportunity Program (EEOP) if the population it serves has minority components of at least three percent. This figure includes inmates in correctional facilities as well.

Since most of the institutions involved are considered government agencies, the Civil Service Commission will be responsible for at least partially, the recruitment and selection of minorities to new posts and for processing complaints.

Recruitment procedures for women and minorities are to be kept separate. Each classification is to be listed, and a separate, broken-down plan on paper to clearly indicate how many of each minority group is in each position. All disciplinary actions against individuals are to be handled similarly. Categorization is also to apply to applications for employment, actual numbers hired, number of promotions and several other divisions.

Records will be reviewed by the Department of Labor at the end of each fiscal year. These must be accompanied by yearly detailed narrative statements. Flexibility has been provided within the guidelines, allowing each agency to set up its own program as long as the program gets the job done.

Creative Writing Course Starts Monday Night

A native of Birmingham, Ala., Dr. Daughn has taught literature for 20 years and has had over 1000 items accepted for publication. Beloit Poetry Journal and Carlton Miscellany are among the magazines in which she has had poems published that have accepted her works.

Creative Writing Course Starts Monday Night

A new course in creative writing, poetry will be offered by the A&T Center for Continuing Education beginning Monday, September 23, through November 4.

Offered from 7 to 10 p.m. on Monday, the course will be taught by Dr. Ann Deagon, associate professor of classics at Guilford College.

The course will cover the poetic experience, the process of writing, techniques of criticism, student poetry reading, and preparation for publication.

AFROTC College Scholarships Received By Two Students

Ten young men have received Air Force ROTC College scholarships at A&T.

Dwight A. Bell of Greensboro was the only recipient of a four-year scholarship.

Three-year scholarships were awarded to Michael E. Bennett, Riverhead, N.Y.; Charles M. Coffin, Philadelphia, Pa.; LaGrange Campbell, Spotsylvania; Barry L. Obie, Woodside; and Milton T. Siler, Seat Pleasant, Md.

Receiving two-year scholarships were Derry L. Campbell, Chadbourn; William V. Dula, Lexington; Craig A. Gordon, Southern Pines; and Robert Jackson, Greensboro.

Each scholarship provides for full tuition, laboratory expenses, incidental fees, and reimbursement for textbooks. In addition, AFROTC scholarhships cadets receive a $100.00 non-taxable allowance each month.

A total of 4500 scholarships are in effect at any one time and are available to qualified male and female cadets in both the two- and four-year programs. Four-year scholarships are awarded to young men entering college who meet the requirements for entry into the flying training program.
Residents In Cooper Tell About Conditions

By Gladys Exum

"It's not what you make it; it's what it makes you," commented one junior social service major. "You can try your best and live in Cooper Hall and really stick it up with. It wouldn't be so bad if times didn't come when the young men decided they wanted a raid," she continued.

She added that a lot of girls had practically the same thing to say concerning life in Cooper Hall. The dorm has often been called practically the same thing to say concerning life in Cooper Hall. The dorm has often been called the worst dorm on campus and many comment, "If they put me in Cooper Hall, I'd move to another campus." However according to most girls interviewed, it has its advantages and disadvantages.

A junior business administration major from High Point did not wish her name to be used, gave the following comment: "There is no privacy in Cooper Hall. The boys have as much to do over there as I do. It also does not have a good studying atmosphere. Every night the guys from Scott Hall, Trent and the auditorium do party outside my window.

"First of all, bathrooms are often dirty, commode leak, and showers scorch," stated Anita Gray, a home economics major from Tarboro.

Other complaints were also made that, if radion and stereo could not be played at reasonable volume, they should not be played at all.

"A psychology major from Apex, Virginia, does not think at all about living in Cooper. "Things could be better," she said "but we, as girls can do nothing about it." She said it seems like home to her now after going on her third year.

"Constance Gadsden of Charleston, S.C. states the advantages of Cooper Hall living is being close to her classes since she is in the Business Education Department. She said that there is also freedom to do what you want to do.

A few complaints concerned the building not being adequately furnished for a ladies dorm.

Newly elected President of Cooper Hall, Denise Cathy said that she can because she has been in Cooper for nearly three years and she felt something had to be done.

She said she felt the girls were paying too much money for the type of living conditions under which they lived. Her suggestions were similar to those already made concerning commode leakage and scorching showers. She also commented as to the situation of young men using the side of the girls dorm for a bathroom.

(See Dorm, page 8)

Gala Affair Planned For A&T's Coronation

By Betty Holman

Coronation, slated for October 11, will be a majestic as well as a gala fertility if plans proceed as scheduled.

Miss A&T, Delores Mitchell stated that African attire will "personify the beautiful sisters and Struggle's Haemor." Power Through Unity, Dignity and Struggle's Haemor.

According to Dr. Howard Parnall, A&T State University choir professor, there are going to be some outstanding attractions in A&T's 1973-1974 Lyceum Series. These coming attractions include "The Dancers of the Ivory Coast"; The Majors; Arthur Cunningham, lecturer and recitalist; Carolyn Stanford, mezzo soprano; The Newark Boys Chorus; and The Emme Kemp Trio. The Majors, a very outstanding and creative rock group appeared in Harlem's Apollo Theater. The Majors, featuring George Bushill, will open up series October 2.

Cunningham, a musician and performer with the A&T State University Choir in his latest work entitled "The Harlem Suite." Cunningham will also lecture in humanities and music classes.

Miss Stanford, lives at State College in Fredericksburg, N.Y. and is a native of Philadelphia and a graduate of the Curtis Institute of Music. With the help of a John Hay Whitney Fellowship, Miss Stanford has appeared in many operatic stages and leading orchestras and she will appear at A&T January 29, 1974. The Newark Boys Chorus has been gaining recognition as one of the finest groups of its kind. It consists of 32 voices ranging from the ages of 7 to 14 and the Chorus will make its appearance in the Piedmont area February 19, 1974.

Students Mar Books; An Expensive Problem

By Cassandra Wright

A problem other than book shortage faces Bluford Library. John Thomas, reference librarian, said the problem in the library is not mainly directed at the shortage of books, but the mutilation of books instead.

He said that sometimes two weeks after new volumes of encyclopedias have arrived, he would find pages torn from the books. This he emphasized was an expensive problem because usually a set of encyclopedias would cost from $200 to $300.

He stressed that, because of the expense of the books, damaged books would have to stay on the shelves, thus crippling the education of other students that seek the torn out information.

Alice Young, serial librarian, placed emphasis on the fact that the mutilation of the books could possibly stem from the mass assignments given by the instructors.

Thomson said it was especially hard to maintain information on sex and black history.

Don't Come Back Without Several Bulldog Pelts!

Artists Scheduled To Perform Here

Miss Kemp, educated at Northwestern University, and the Chicago and Southwest Conservatories, plays the piano from Bach to Bacharach, and sings in six languages. Miss Kemp and her trio, "The Emme Kemp Trio," will perform a program called "New Sounds in Jazz" April 2, 1974.

OUT OF THE MOUTH OF A CANINE

It's a human's life. It certainly is a shame that humans live like dogs. As for me, I just sit in the union all day, nod out on the steps, don't even have to worry about classes and I just love Murphy Hall food (I'll eat almost anything).
No Books

The semester is well underway and in a little over a month mid-term evaluation will be here. Mid-term, not pretty word at all, is even less appreciated by the student who got off to a slow start because he could not get his textbook.

Instructors react to the situation in different ways: some teach at a slower pace, others assume that because a student did not get his book, he is trifling. But by the third week, students are deep in subject matter regardless of the situation, for neither is it fair to the class to hold up those who do have textbooks.

Nonetheless, there is a shortage in the University Bookstore, which is not really anybody's fault, but rather everybody's fault. Most conflicting situations result because of interacting opposing forces, as in this case.

The manager of the bookstore has said that over-enrollment is one reason for the shortage. No doubt he is right, but should not the bookstore be made aware before classes start the the maximum number of students for a section has been increased?

And then, if a book is out-of-stock, it takes at least a month for the student to get it. But part of the responsibility lies not only with apparent poor communication between the bookstore and curriculum administrators, but with the student himself.

Either because one feels it takes too much time to return a book for a course he has dropped or because he does not consider the inconveniences his fellow student must suffer.

From Enthusiasm To Apathy

By Rosie Stevens

Every year, the freshman class begins the year with enthusiasm, vitality, and motivation to lead the freshman class. This year's freshman class is certainly no exception to that rule. Offices are filled with candidates dying to contest for them. Officers are elected by a very large turnout of students. The officers assume office, and then something very interesting happens.

This interesting phenomenon is known by many terms. In some groups, it is known as lack of involvement. Others refer to it as the presence of a state of low student interest. Still others label it student apathy. However, all the consensus perceives that very little is going on a short period after the elections are over.

The reasons for this suspension of activity exist only as various people in the student body define those reasons. As of this date, the reasons given in previous years are only descriptions of the problem itself: nobody does anything. It is extremely difficult to ascertain whether this means that the officers are not doing anything or whether the class as a whole is not doing anything. It is conceivable that the class and its officers are synonymous, though not identical.

It is also extremely difficult to get the class officers to comment on this matter.

This type of activity, or lack of it, continues for most of the freshmen right on up until their senior year. It is extremely difficult to break the cycle of lack of involvement, little student interest, and student apathy. Hopefully, this freshman class will prove to be an exception to the apathy which afflicts this campus. It is wished and prayed that they will remain involved in their class and university activities, and break the syndrome of apathy.

With this in mind, the writer wishes the freshman officers a productive term of office.
CRISIS

By Ted L. Mangum

Speakers Costing Much And Saying Nothing

Last Monday, while in Raleigh, I was asked by members of the All-African People Revolutionary Party to try to make arrangements for Brother Stokely Carmichael to speak to the brothers and sisters in this area. As if the job didn't appear simple enough, Bro. Stokely agreed to speak for a fee of only $1,000. You probably say WOW! But I say only because the going rate for speakers (usually speaking on things that they don't even believe in) is anywhere from $4000 to $6000.

So, when you consider that half these speakers can't match Stokely, who teaches as he speaks, then you have to know that you're getting a bargain. Yet, the rhetoric that goes along with Dick Gregory, Julian Bond, Jesse Jackson, and even Bobby Seale is quite expensive. Yes, the rhetoric that goes along with them (and other speakers that they don't even believe in) is much greater, she said.

Since Mrs. Turner has been on the job only two weeks, it was difficult for her to assess her job. However, she stated she enjoys contact with the students and that she has a lot to learn. She has received much help from all the staff.

She stated that approximately 20 students enter each day with personal or academic problems encountered on campus. "They come looking for guidance from Dr. Marshall," she said.

There are meetings concerning budgets, student government, and the scheduling of staff in this office.

Mrs. Turner was a member of the 1967 graduating class. Her major was secretarial science. She has been employed by the government since her departure.

Recruiters Describe Job Qualifications

By Betty Holeman

Marriage led to the return of Aggie and Greensboro native, Shirley Turner. Mrs. Turner now serves as secretary to Dr. Jesse Marshall, vice-chancellor of student affairs replacing Pauline McLaughlin who is now education counselor in Counseling and Testing Center.

Mrs. Turner said that now that she is back in this setting it feels great, as if she never left. She also stated that the same general friendly provocative atmosphere still prevails.

Mrs. Turner gave a lot of credit to her teachers for her success in life. She stated that they prepared her to face life's dilemma.

She stated that her goal in life was to be the best secretary. "If I had a chance to do it all over again, I would still pursue the same goals," she said.

"Being a member of the National Secretarial Association keeps me abreast of the latest techniques in secretarial science. This field has been the stepping stone for those who wanted to advance in industry," she said.

According to Mrs. Tuning, Greensboro and Charlotte are the highest paying cities in the state for secretaries. There are different levels of secretaries she informed.

In past years, there were misconceptions about the role of a secretary. Presently, the administrative advancement is much greater, she said.

The grade average has to be 3.5 and to score on the National Labor Relations Board Test in the top percentile.

Pay ranges from $6500 starting off up to $12,842. According to Kaufman, the highest paid examiner receives $33,627.

Students To With Professor On Noise Study

(Continued from page 1)"I would like to reduce and in the past in research related to automobile emissions.

"By undertaking the research involving the participation of a number of students, we hope to provide a unique opportunity for these students to be associated with the solution of real-life problems in engineering," said Dutta.

Dutta, who has worked in the Ford Research Laboratory in Dearborn, Mich., has been active in the past in research related to automobile emissions.

The highlight of the yearbook will be a three-page color foldout of the basketball and football teams they said. Other areas of sports such as track, soccer, baseball, swimming, and bowling will receive more coverage than in the past they added.

Foldout To Spotlight Two Aggie Ball Teams

(Continued from page 1) 20 pages more than last year's book.

Bonnie Love and Paula Dicken, co-editors of the yearbook, both stated that academics will be stressed and fall coverage of all schools.

Seniors pictures will be taken

SEPT. 17-20, 7 P.M.
By Bobbye Deck

In America today, there are a lot of jobs in every field and subject you can think of. But what about the field of clothing and textiles? There are a lot of jobs one can have in this field dealing with fashion, besides creating the fabric and making the garment.

When a person wants to major in the field of clothing, she or he can go into fashion buying, fashion design, garment making, model and window design for department stores. He can open a boutique, design and make hats, coats, undergarments, shoes, bags, become a fashion editor for a newspaper, teach in a school or community center, or design jewelry.

In the field of textiles, one can go into fabric design, making fabric, studying the make and best uses of fabric, or working in a textile laboratory testing the finishes of fabrics, or become an interior designer.

Here at A&T, Dr. Myrtle Smith is teaching children's sleepwear, tablecloths and curtains for flammability in Career Hall. This is a test to see if a garment will burn easily. Recent tests have proved that a lot of garments on the market today will burn easily, so textile researchers are testing all fabrics to find the flammable ones. Clothing manufacturers are now requested to send all of their garments through this test and if they are inflammable, they must be tagged as such.

Otherwise they cannot go on the market. The best way to get involved in clothing and textiles is for one to become familiar with the business world, economics, marketing, and management. One should also subscribe to magazines dealing with fashions and fabrics to try to become familiar with the different types of fabrics on the market today and do a little comparative shopping.

This is a field everyone should take an interest in because fashion is a part of our everyday lives. This is a field where one can do a lot of traveling and trading different designs and garments with others in the same field.

Knowing a lot about clothing and textiles can help you decide what looks good on you and the best colors that bring out the natural you. You will also realize that making your own clothing can be very economical and original, especially for the college scene.

---

Alumni To Celebrate Hall Of Fame Weekend

A&T alumni will be participating in quite a few events the weekend of Sept. 21. It will be the Sports Hall of Fame weekend. The headquarters for all the activities will be located in the Golden Eagle Motor Inn on East Market and Davie Streets.

Highlighting the weekend will be the Hall of Fame Banquet to be held in the Guildford Room at the Golden Eagle at 7:00 p.m. At the banquet four outstanding A&T athletes will be inducted into the Sports Hall of Fame. One of the inductees is Joseph Williams, director of Alumni Affairs here.

The keynote speaker at the banquet will be Casson Bain, president of the Greensboro Chamber of Commerce. Donations for the banquet are $10 per person. Reservations for the banquet may be secured from the Office of Alumni Affairs at 203 Dudley Building. Deadline for making reservations is September 19.

The Sports Hall of Fame Ball will be held September 22 in the Carolina Room of the Golden Eagle. The donation for the ball is $2.50 per person. Tickets for the ball can be secured at the Alumni Affairs Office and from the Future Alumni Activities Committee.

Campus Haps

Ray Movie "Black Caesar," Friday, at 6:30 p.m. Harrison Auditorium. Admission is $5.00.

Dance Friday, Sept. 14, 9 p.m.-1:00 a.m. in Moore Gymnasium. Admission is $5.00. Sponsored by Nu Gamma Alpha.

All Non-Greek Presidents or representatives will meet Monday, in Room 212. Student Union, at 7:30 p.m.

University Chapel Service Sunday at 11:00 a.m. in Harrison Auditorium with Rev. William Turner, director of United Campus Christian Ministry, as speaker. Chapel service to be held each third Sunday. Campus Community Church to be held all other Sundays at 11:00 a.m. in Harrison Auditorium. Speakers for these services will be students who are ministers.

Free Movie 'The Mack," Sept. 19, in Harrison Auditorium. Two Shows - at 5:00 p.m. and 7:00 p.m. Tickets must be picked up by September 17 at the Information desk in the Student Union. Only 3000 seats available. I.D. Required.

Animal Science Association members will meet every Tuesday at 5:30 p.m. in Carver Hall.

Home Economics Club members will have their first meeting Sept. 18 in room 209, Benbow Hall. New officers will be installed.

Show and Dance featuring the Majors, Sept. 20 from 9 p.m. to 1 a.m. in Moore Gym. Admission $2.00. Sponsored by the Junior Class.

All Prospective Seniors who plan to go to graduate school are urged to register in the Testing and Counseling Center, room 2, Dudley Building, for the Graduate Record Examination which is to be administered free, Dec. 9.
HARRIS DISPLAYS COOL IN SUPERSONICS’ CAMP

Harris Displays Cool In Supersonics’ Camp
By Blannie Bowen

Rookie camp has just concluded for the 32 rookies who were trying to make the NBA Seattle SuperSonics training camp and among the four survivors is former A&T basketball great William “June” Harris.

The SuperSonics camp is sponsored in late summer, just as all NBA and ABA teams sponsor rookie camp, for the players who were not drafted in the professional draft while in college and for players who were not drafted and hope to make it as professionals on their own.

Harris displayed his usual cool in making it through the camp. He was in competition with players from all over the US. He performed against the likes of Bob Bodell of Maryland, John Wooten’s miracle workers at UCLA, Larry Hollifield, Watts of Xavier, Harold Fox of Jacksonville, and one of much-heralded names, Bob Bodell of Maryland, Donald.

Thirty-two rookies were in the camp including the A&T’s Harris was the only one to survive along with three other rookies. In an intrasquad game, Harris pumped three assists and collected five rebounds. Bill Russell has found what he has been looking for to complement Spencer Haywood and Jim McDaniels for the opposition the ball on their own three yardline.

By winning the first game of the season, it looks like A&T should be 8-2-1 by the end of the season with the winning tradition of Coach Howell in strict command.

A&T is in a growing process and new tennis courts are a part of this new growth.

Dr. Roy Moore, chairman of the Health, Physical Education and Recreation Department, heads the committee for the construction of the courts. Dr. Norman Jarrard, Andrew Williams, Matt Brown, Thomas Byrum and Ernestine Compton are members of the committee.

According to Dr. Moore the courts are to be constructed on the field behind East Gym which has been used for drilling purposes by the R.O.T.C.

There are to be eight quick clay courts. These courts will have stadium seats with the center court having bleacher seats. They also will be lighted and fenced in. Moore stated that these courts should be some of the finest in the southeastern section of the country. These courts will attract some of the USLTA (United States Lawn Tennis Association) sponsored tournaments. These tournaments may be college tournaments, any amateur tournaments and also professional.

The construction of the courts will begin in approximately 90 days.

Being Number One Quarterback
Is An Honor That Two Men Share

By Robert Brooks

Last week when Coach Benjamin Howell was asked the question, "Who is A&T's number one quarterback?", he replied, "Paul McKibbins and Leonard Reliford." Both are equally effective and they share the duties like Craig Morton and Roger Staubach of the Dallas Cowboys.

When asked the same question, their answers were almost the same. Here is how the separate interviews went:

How do you feel about sharing the quarterback job?

McKibbins said, "I guess after three years, I've gotten used to it. Sure, everyone has the desire to start, but as long as we win, I don't mind. 'Snake' (Reliford) could have started anywhere else because of his strong passing arm and his knowledge of the game of football is excellent." Reliford said, "I don't really feel that bad about it because I have learned to respect him (McKibbins). We have become very good friends because of it."

How does the offense adjust to two different quarterbacks' styles? McKibbins said, "They adjust to my running style all the same. Here is how the separate interviews went.

What do you think of the athletic Department? McKibbins remarked, "It is pretty fair. They are doing all the things they can for us like the new uniforms we got. If we continue to win, we will probably get better things." Reliford said, "We could use some more items, but considering all things, A&T is doing very well with what we do have."

It seems as long as they continue to win that they do not mind sharing the job. Each thinks highly of the other and winning is the only matter that concerns them since they complement each other and they possess the main elements to win football games: determination and pride. This means that all opposition should beware of the "dynamic duo," Paul McKibbins and Leonard "Snake" Reliford.

Harris Works Out In Supersonics' Camp

(Continued from page 3)

and, according to Harris, Russell told him that there will always be a place in the NBA for the small players. Harris fits very well into Russell's theory because he is only 6'2" and a pack of dynamite. The All-American honor was the next to last reward granted Harris while at A&T.

"My greatest individual college thrill has to be my selection to play basketball in Peru in the World Games this May," is the way "June" Harris described his highlight of his basketball career at A&T.

Former NBA great Bill Russell is the coach for the Supersonics.

Dorm President Proposes To Make Hall A Big Family

(Continued from page 7)

Her main proposal she said is to make Cooper Hall one big happy family. She said she feels that we should work on establishing communication, and be ready to help one another willingly, academic wise.

"A few flowers here and there help give the lobby a feminine appearance," stated Denise. The basement of the dorm is officially opened, but no one seems to know it she added.

Plans for open house occasionally and at least during Homecoming are ones she said she hopes to discuss. Comments were also made about leaving doors open at night. She said that the students are only jeopardizing their own safety.
