Laundry Plans Action To Combat Shortage

By Cassandra Wynn

Plans are being made to require students to show their I.D.'s and that they are off-campus students before they receive any linen, according to Albert S. Crawford, director of the laundry. The reason for this new step, explained Crawford, is to cut down on the number of off-campus students using the laundry services.

The situation has been that, many times when students go to the laundry, they are unable to get clean linen to replace the laundry that they have used. Crawford gave several reasons for this problem. He said that there are a number of off-campus students who use the laundry even though they are not supposed to. The cotton shortage was another reason that Crawford gave for shortages especially in pillow cases.

Several weeks ago the laundry ordered some new linen. They were only able to get a partial shipment of 35 dozen sheets and pillow cases because of the cotton shortage. In a few days, another shipment of 75 dozen sheets and pillow cases is expected, Crawford said that this should alleviate the pillow case shortage for the time being.

Crawford said that another reason sometimes causing shortages is a slow turnover in linen. He said that sometimes some students keep linen on their beds for nearly a whole semester.

On Friday and Saturday, students desiring clean linen often have a hard time getting it. Crawford said the reason was due to the scheduling of student workers. He said that most of the student workers do not work many hours on the weekends. Students might be more successful at getting clean linen if they go to the laundry at the beginning and middle of the week, according to Crawford.

Because of a breakdown in the air compressor, the laundry has been behind in doing personal laundry such as jeans. The air compressor is being repaired. Most of the equipment in the laundry is 25 to 30 years old. Crawford emphasized that none of the problems were due to personnel.

Efficiency Study Says A&T Has Poor Appearance

Dowdy Responds To Report

In the report of the Governor's Efficiency Study Commission, A&T was noted for "its good food services and book rental operations."

The report also stated that while a deferred payment plan for tuition, room and board offers students financial flexibility, there was not enough effort made to reduce accounts receivable build-up and delinquency.

"Accounting systems are not automated and, in addition, most personnel are needed in the groundskeeping and accounting departments," the report continued.

The report also stated that A&T's appearance was poor as a result of having only temporary facilities for the/grounds maintenance.

Recommendations of the Commission included the increase of University staff to strengthen the general accounting functions. Along with this recommendation, they said A&T should automate student accounts receivable since payment policies are not often followed and statements are not sent out as frequently as they should be.

According to the study, the automation would allow for elimination of two clerks, which would result in annual savings of $12,600 after the system is installed.

The report said the grounds staff should be assigned five additional employees during the summer months and that the staff should not be shifted to other duties, this should be accomplished for $7,500 the report stated.

In response to the recommendations for A&T, Chancellor Lewis C. Dowdy issued the following statement Wednesday morning:

"I do not wish to make comments on the Efficiency Study itself, which was made for the Governor's Office because I have not seen the report. However, I will make comments on the specific recommendations made for A&T. These remarks are made as a result of the newspaper report and not the report itself."

The statement continued:

"We recognize more than anyone the condition of our grounds and would like to improve them as rapidly as possible. This, however, cannot be done unless we reduce the "exceptional" equipment with which to do the job. We are very pleased to see that others recognize our needs. Harold Marveck chairman of the grounds committee has submitted a report for improving our grounds and maintenance department for 1973-1975. We will give careful consideration to this report."

Butz Fails To Show At Nutrition Confab

Earl Butz, United States Secretary of Agriculture, who was scheduled to speak at a National Nutrition Conference this past Wednesday at 6:30 p.m. in the Student Union Memorial Ballroom was unable to attend. However, Dr. Darby, president of the Nutrition Foundation, was able to preside at the meeting.

Two organizations sponsored this meeting. They were the Nutrition Foundation and the U.S. Department of Agriculture.

Jesse Jackson To Speak at Monday Convocation

An address by the Rev. Jesse Jackson, an A&T alumnus and national director of PUSH (People United to Save Humanity), is scheduled to kick-off the week's Homecoming activities.

Jackson is slated to speak at a Homecoming Convocation Monday at 10 a.m. in Moore Gym.

While at the University, Jackson led student marches for integration in Greensboro and started in football. A native of Greenville, S. C., he attended the University of Illinois for a year on a football scholarship before transferring to A&T.

In the spring of 1963, he led protest marches that succeeded in desegregating downtown Greensboro. After graduating from A&T, Jackson studied for two years at the Chicago Theological Seminary on a scholarship from the late Rev. Dr. Martin Luther King.

Jackson last spoke on campus at the Annual Freshman Worship Service back in September 1970.
Andrew Young Will Be Speaker At University Foundation Dinner

Congressman Andrew Young of Georgia will be the keynote speaker for a Black Tie dinner to be sponsored by the A&T University Foundation Dinner on November 9.

The dinner, which will serve as a tribute to the university’s alumni, friends and corporate supporters, will be held at 6:00 p.m. in the Hilton Inn.

Marshall Cobston, secretary of the foundation, said that 400 invitations have been issued for the dinner, one of the major community efforts in the foundation’s current $41 million campaign. He said a progress report on the dinner will be presented at the dinner.

Contributions reported this week totaled $5,535. The amount included $2,600 from Dow Chemical USA, $3,500 from the Amoco Foundation, $2,100 from the Boeing Vertol Company, and $1,135 from Western Electric.

Congressman Young first gained fame as the executive assistant for the late Dr. Martin Luther King during the civil rights movement of the 1960’s.

USDA Official Addresses Confab

(Continued From Page 1)

Chancellor Dowdy was then introduced by Dr. Darby, president of the National Urban League. The second phase of reconstituting started in the 60’s was America in the subject of business, the 101st Annual Fellowship Banquet and Recognition Ceremonies of the Prince Hall Lodge Free and Accepted Masons Jurisdiction of North Carolina.

Dr. Brandon stated that the American Consumer had been helped by a critical understanding of complex and difficult period.

He concluded by saying that the conference will promote the good life and healthy life.

Urban League Head Talks On Second Reconstruction

By Cassandra Wyman

The issue now is whether or not we are going to completely the evolution of the 60’s,” stated Vernon L. Jordan, executive director of the National Urban League. The second phase of reconstituting started in the 60’s was America in the subject of Jordan, address to the 101st Annual Fellowship Banquet and Recognition Ceremonies of the Prince Hall Lodge Free and Accepted Masons Jurisdiction of North Carolina.

Jordan said that “The second phase of reconstituting is focused on the dangerous regression in which we, as Blacks, and a nation find ourselves today.” According to him, if Congress acts to keep its power as an equal branch of government, it can act to save the second phase of reconstruction.

He listed three things that Congress must act on in order not to let the civil rights struggles of the 60’s be in vain.

Congress must act first on a minimum wage bill, he said.

Second on the list of things that “Congress must act on is an overhaul of the welfare system. He described the system as one that “corrodes human dignity and treats the poor as enemies.”

He said that the third thing that Congress should act on is revenue sharing. He said that it does not need to be in the hands of local and state governments.

Those that have shall be given; those who do not have what they seem to have shall be taken away in the policy revenue sharing,” he said. It will take present programs out of the hands of federal agencies.”

The biggest single task of Congress is to assure Americans capable of work a job and a decent salary. Jobs and economic security will fit us to deal with problems of housing and unemployment, he said.

He added that a supposedly booming economy has no place for those who want to work,” he said.

Jordon advocated a full-employment policy program so America can redeem its promise of freedom. He challenged America to pay off or “get out of the business of democracy.”

He said that America is in a crisis of spirit. He named such organizations as the Masons and the Urban League as having an obligation to help revive America. “We cannot fail."

Learning Laboratory Donated To University

The multi-media learning laboratory for individual instruction was donated Thursday to A&T by the Raytheon Company of Lowell, Mass.

The gift was announced by Dr. Frank White, interim dean of School of Arts and Sciences.

“We are extremely excited about this new auto-instructional learning center,” said White. “It will form the basis of a new Learning Center now being developed at A&T and it should add much to our overall programs, including the social sciences and the behavioral sciences.”

Developed a few years ago by the Educational Development Laboratory, the learning laboratory (Learning 160) is a communication skills program which integrates listening, and observing with speaking reading, writing with the skills that accompany these acts.

“Conventional lectures, tests and assignments too often end up with many students just not getting the material,” added White. “With this new system we are setting up, students in the laboratory will be able to work independently on their weaknesses in the communications skills.”

Hugh Reynolds, director of sales operations for EDL, said that the Learning 100 has been successfully used in many educational applications, including home adult education and for dropout and students reading below grade level.

Is A&T ready for Juan Logan? The answer will come Oct. 7 when his work goes on display in Taylor Gallery. photo by Lance

Students Advised To Use Zip Codes On Mail
By Alice Britt

For those persons interested in receiving their mail and promptly, James Morgan of A&T's campus mail service should be contacted.

A&T's campus mail service has a post office located in the basement of Brown Hall. Mail is picked up from the main post office on Market Street and brought back to the campus post office to be sorted.

Delivery times to the various dormitories and offices is made on the north and south side of the campus. Those faculty members and students with private boxes at the campus post office, mail must be picked up personally. Private boxes must be obtained for only a dollar to cover their rental.

A&T with Morgane, two years are opened full time. They are Johnny White and Mark others are employed full time to extend a little advice to students.

Along with Morgane, two employees of the post office. Be they are Johnny White and Mark others are employed full time to extend a little advice to students.

By Benjamin Forbes

Whenever there is a holiday on campus, everybody prepares to go home. We try our best to be on campus as quickly as possible. We never think of the foreign student and what he does when the campus cities for the holidays. Where do they go? This reporter interviewed some of these students and get wanted explanations.

Ching-shing Lee, a sophomore from Hong Kong, said that he went to New York City last year but didn't like it. This year he plans to go to Atlanta, Ga. He said that he liked Greensboro because it was a clean city.

Last summer, Lee went to summer school and he plans to go again this year. He is a mechanical engineering major.

America Fascinates Foreign Students Stay Here
By Benjamin Forbes

Whenever there is a holiday on campus, everybody prepares to go home. We try our best to be on campus as quickly as possible. We never think of the foreign student and what he does when the campus cities for the holidays. Where do they go? This reporter interviewed some of these students and get wanted explanations.

Ching-shing Lee, a sophomore from Hong Kong, said that he went to New York City last year but didn't like it. This year he plans to go to Atlanta, Ga. He said that he liked Greensboro because it was a clean city.

Last summer, Lee went to summer school and he plans to go again this year. He is a mechanical engineering major.

Diane Foley, a freshman clothing and textiles major stated, I always heard A&T was one of the best academic schools in North Carolina, so I thought I would come and explore to really see what A&T was all about.

Mary Bonner, a sophomore political science major commented, I came here because I heard it was a pretty good school academically, and once you get in Appalcland you could enjoy yourself.

Delia Toney, a sophomore nursing major from Coosmore commented, I came here because of its extensive nursing program and I felt I would be well equipped to be a registered nurse upon graduation.

Mary Jenkins, a senior economics major commented, I am at A&T to complete a B.S. degree in economics since there is a great demand for Black economists.

Nelson Richardson, a freshman clothing and textiles major commented, I came to A&T because I wanted to gain an education to that I could be more dependent upon myself later in life.

C Help Us To Fight The Soton: Join the Register Correction Crew
Let There Be Light

And then there was the dark. With campus life almost as busy at night as during the day caution is not enough to observe while walking after 8 p.m. alone on campus. Some more light would be helpful.

Certain spots like the area immediately between Moore Gym and East Gym won't lose its romantic atmosphere if another light were placed somewhere thereabouts.

Something should be done about the shortage of lights on campus.

As you argue the pros and cons, that we are all sisters and brothers, keep in mind that A&T is not an isolated fortress; it is within a city of several hundred thousand.

So, how about turning on the lights?

Homecoming Spirit

It's in the air. You can feel the silent preparations of students mind and bodies as they go through the motions of getting ready for the celebrations of Homecoming. And suddenly, the almost-forgotten emotion called "school spirit" erupts in the dining halls and pours into the street where proud Black students sing "I'm so glad I go to A&T."

As you walk towards North campus you find yourself being greeted by complete strangers, or by those familiar faces that you thought didn't know you existed. Then you walk on, feeling good, and wishing that this Homecoming spirit would last the whole year long.

Toward Black Women's Lib

By Rosie A. Stevens

The comment of ten made by Black women in relation to the so-called women's lib movement — so-called because it is actually a feminist movement — that they do not want to be liberated anymore than they are. This is taken to mean that Black women perform the roles considered to be feminine in our society along with the socially-approved masculine roles — socially approved for Black women that are played in this society by Black woman. Thus, the Black woman not only earns the bread; she prepares and serves it also. As a result, the the Black woman feels that the least she can do is to have a door opened for her, for instance, to assure her that she is, after all, feminine. She also feels that "women's lib" can do nothing for her in the way of liberating her doesn't need liberation.

By Rosie A. Stevens

Some sociologists define this situation as role-conflict. The person is forced to perform two roles which are socially defined as opposites and which dictate that the performance of one makes it difficult to perform the other. Black women, for the most part, have accepted this definition of role conflict with respect to the functions they perform in this society. For the most part, Black women feel trapped in the dichotomous situation of earning the bread, then preparing and serving it. Socially the roles are defined as separate and complementary, but, by the same society, they are permitted to perform both roles.

Within the last few years, an interesting solution to the conflict has been advocated by the proponents of Black power. This solution is very simply a sharp differentiation of the masculine and feminine roles along traditional lines. Females perform feminine roles, and males perform masculine roles. To put it another way, the Black woman is told to realize herself and her true potential as a woman so that the Black man may achieve manhood. This is accepting the situation in the black or white, neither-or situation with no gray areas. This is a solution which seems to be the case not role conflict. This solution, which has been pointed out before, involves the acceptance of the roles as they are without masculine or feminine differentiation; earning bread is no more masculine than the role of grocery shopping is feminine. Both sexes can and do perform both roles. If this is the case, Black women could definitely use "women's lib."
A lot of noise has been raised about the possibility of white people becoming a physically dominating part of A&T's campus, thereby causing A&T to lose its identity as a Black institution. Obviously, Black institution used in this sense implies a definition based upon a physical count of Black bodies. This is dangerous at best. One gets the implications, from this understanding of a Black institution, that as long as there are white faces in large numbers, then the Black institutions continue to exist and we "saved Black schools.

The danger exists in thinking that white people by their mere existence constitute a negative force. They bring, as it is, this money hungry, capitalist, inhumane desires and values that are manifested into oppressive and repressive acts that are negative. So that if we understand that it is possible for those values to invade and prosper on campus without the physical existence of white students or faculty, or administrators, then we recognize the real danger. White institutions have been designed and defined to resupply the present white American power in the face of the conditions of Blacks never entered into the purpose of "White American Institutions of Higher Learning." Any Black institution of higher learning, if defined by purpose, should speak to the betterment of Black people, not the continued exploitation or oppression of our people. So let us recognize this as a fact and a responsibility.

American society has produced or influenced our value system but, if we correct our value system, then we stand to correct American society. Since massive support to save Black schools will have to come from the Black communities, Black students will have to be freed from the paternalism and not the continued destruction, of the Black Church. The only way one is going to support his own destruction. Keeping white folks out is secondary to keeping their values out and getting ours straight. We cannot offset to become our worst enemy.

For the above reasons, we have decided to form a SGA chapter. We believe that we have the need for a SGA chapter because we are the only members on this campus who will represent the students. We will be concerned with our welfare, our rights, and our responsibilities. We believe that we have a responsibility to take it upon ourselves to ensure that Black people got the same opportunity. His view wasn't that exploitation should be ended, but that a few Black people (capitalists) should have this view, he got more support than opposition.

To say that this set of materialistic values are a cause for a lie. But to say that any Black institution, defined in terms of purpose, should be able to restrict such self-destructive analysis is a fact and a responsibility.

American society has produced or influenced our value system but, if we correct our value system, then we stand to correct American society. Since massive support to save Black schools will have to come from the Black communities, Black students will have to be freed from the paternalism and not the continued destruction, of the Black Church. The only way one is going to support his own destruction. Keeping white folks out is secondary to keeping their values out and getting ours straight. We cannot offset to become our worst enemy.

Rebecca Parker

Keeping White Folks Out Is Secondary

Forensic Association Holds Sessions On Sex

By Floyd Weatherpoon

Dr. Olin Tillman, a graduate of A&T and a member of the Board of Trustees, was the guest speaker for this week's rap session on sex sponsored by the Forensic Association.

"Mr. Tillman, who has practiced medicine in High Point for more than 16 years was able to capture the enthusiasm of more than 100 students and faculty members, including Dr. Jesse E. Marshall, vice-chairman for student affairs.

Questions from the students varied from questions concerning education, pre-marital sex, oral sex, and the response of the Black Church toward the problems of youth.

Dr. Tillman stated that women today feel they should get more out of sex than satisfying a man. He went on to say, "The image of the woman staying at home cooking has changed. Women want to find a new place in life, right along next to man."

When the question of oral sex came up. Dr. Tillman stated that it was a type of perversion because it was away from the normal sexual habits of man. Dr. Tillman stated, "Oral sex among Blacks has dropped sharply to a few percent." He stated that oral sex activities in Durham was the highest in the state, then Greenwood followed by Winston Salem.

Wille Middleware, a political science major, asked Dr. Tillman how has the Black Church responded to the sexual interest of the Black youth? Dr. Tillman stated that the Black Church has failed in responding to the everyday problems of youth. The Church talks about what happened over a thousand years ago and not about the problems young people are faced with today, such as sexual problems and dope, he said.

On this subject of sex education, Dr. Tillman said he felt that sex education should be taught before the age of 12 in school, instead by instructors. Then the instructors should prepare themselves by taking courses on the subject, he said.

Private Schools In The South Cause New Kind Of Dual System

ATLANTA--In the face of a national decline of private and parochial schools, particular kinds of private schools--dubbed segregation academies--are flourishing throughout the South with churches serving as their primary means of support.

This evaluation is set forth by John Epton, a free-lance writer from Memphis, southern Baptist and a member of the Board of Directors of the Joint Center for Political and Economic Studies. The survey is based on a South-wide survey of segregated school systems.

John Egerton, a free-lance writer from Memphis, southern Baptist and a member of the Board of Directors of the Joint Center for Political and Economic Studies. The survey is based on a South-wide survey of segregated school systems.

The answers seemed somewhat obvious to me until recently in a church body, state or national decline of private and parochial schools were being influenced by church bodies, state or national trends.
**Harrison Players Present**

`Jacques Brel Is Alive And Well`

The Richard B. Harrison Players will open their 1973 season next Monday with what Director John Marshall Stevenson calls "a real fun show."

The Players will present "Jacques Brel Is Alive and Well and Living in Paris," a stirring Broadway musical. Performances will be nightly through Saturday, with curtain call at 8:15 P.M.

"This is really not a play," said Stevenson. "It's like cabaret theatre. Whenever there is music, the audience can really get involved."

One reason that Stevenson is excited about doing "Jacques Brel," he says, is that he has "an outstanding group of singers."

"Linda Thomas, who is cast as Woman No. 1, is going to do some real show stopping," he said. Linda is a soloist in the university's concert choir.

The other leads will be sung by Al Mack, a theatre arts major from Raleigh; Ernest Frierson, a voice major from Sumpter, S. C., and Bonita Chavis, a voice major from Bennett College.

Also in the younger cast members themselves are also excited about their forthcoming show.

"If this show is put over," said Bonita, "it will be a dynamite performance. I am really enjoying the experience of being in the show."

"Jacques Brel" was written by the Belgium lyricist of the same name. The production is composed of a series of musical vignettes, with some 30 lively tunes, some with dance steps.

David Staples will serve as technical director and the singers will be accompanied by an orchestra.

**Who Wears The Pants On A&T's Campus?**

By Linda Stallings and Bowanna Morgan

Who wears the pants on A&T's campus?

Women on campus are wearing pants more frequently than ever before. Kathy Johnson, a senior, said, "I find pants more comfortable than wearing dresses all the time. I prefer wearing pants because they're easier to put on, and I don't have to worry about long nippers and hooks."

Dresses are rarely seen on women in the classroom. This is especially true with the female students. Some women on campus feel that dresses should be compulsory for church wear only, and pants should be appropriate for any other occasion.

Blue jeans and jumpers are everyday wear for both men and women on campus.

How do the men feel about this?

John Ghalting, a freshman political science major, said "I think that the women are overcoming it a little but I think that pants make some of the women look better."

Everett Jackson, an economics major, said, "I like the women in pants; for some women, pants hide skinny legs. This is an advantage to some."

One senior male stated that an eich year has passed, he has realized how popular pants have become among women and he stated that he hated the fact that pants were so popular. Another senior male stated that he doesn't care who wears the pants on campus just so long as the (the sleeper) doesn't think she's a MAN!

Find out if the chemistry's right.

At Du Pont, the best chemistry is people chemistry. Anything can be achieved if you have the right people and they talk to each other.

So we look at you as much as at your grades. We look for compatibility as much as talent. And that goes for engineers and chemists as well as business students.

If you want to find out what fields have openings, what states you can work in and more, meet with the Du Pont recruiter when he comes to your campus. Or if you've already graduated and have experience, write Du Pont direct, Room N-13400, Wilmington, Del. 19898.

And as you know by now, we're equally interested in women and men of any color. The chemistry is what counts.

An Equal Opportunity Employer M/F
The Great Books of the Western World can be used as tools to familiarize students with two things at one time: (1) the great writers of our time, writers who deal with love, religion, education and so forth, which are important to man; and (2) the Great Books give students familiarization with the thinking that will tax their minds to create and think, "responded Dr. W. C. Parker, Jr., director of the N.C. Hollows Program and an American Studies major. "The Great Books are used mostly by the Business Department. "Any student is welcomed to use the Great Books or the learning lapes."

"The Plant Science Department majors in a variety of subjects," stated Mr. McCleave, "such as greenhouse management, landscape design, horticulture, flower show management and floral design. We perform experiments in hydroponics which is growing plants without the use of soil, and instead using water. Just as biologists have to work requirements, plant science has its, and Reid Nurseries is the laboratory. They provide the plants for horticulture, agronomy and botanical classes, depending upon what is needed," said Mr. McCleave.

"Students perform experiments on disease control, light, temperature and heat necessities, and soil problems. An example of what grows in the greenhouse is Commercial Flower Show. We have 150 students in the course," Mr. McCleave explained that the objective is to make the plants grow. "We are simply finding out what every plant wants and needs."
Grooves, Macks, Ques Win Intramural Games

By Robert Brooks

Only three games were played this week due to another nature's reaction: Grooves 14, ASME 8; Macks 14, Triffers 6; and Ques 15, ASME 0.

The Grooves came from behind in the second half to down ASME.

ASME opened the scoring on a 70-yard pass from Harold Martin to John Hariston in the opening half while holding the Grooves scoreless.

The Grooves struck back in the third quarter on a 12-yard pass, Steve Morton to Lamont Armstrong. The final score came in the last two minutes of the game on the "bomb" as Morton passed 65 yards to Robert Mack. Donnie Worrell scored the conversion to sew up the win.

The Macks went into overtime before defeating the Triffers 14-6.

The Triffer scored first in the second quarter on a 60-yard pass and ran from Darrell Ester to Lionel Williams.

The defenses played an important part in the game until the fourth quarter when Walter Sydnor ran 38 yards to put the Macks on the board.

The overtime was all defense.

Mitch Johnson intercepted an Ester pass with less than 2 minutes remaining to set up the winning points. With 4 and 25, Mack Williams threw a desperation pass that was caught by Jeffrey Sneed for the touchdown. Williams scored the extra points to insure the victory.

Music Major Also Plays On The Football Squad

When the A&T football players see Mel Rose carrying his trombone, they immediately launch their teasing and put downs:

"Hi there, Schroeder," they say. Schroeder, you remember, is the piano player in the Charlie Brown comic strip.

However, the situation is no laughing matter to Rose, believed to be the first music major ever to play on the Aggie football team.

At 6'0, 245 pounds, Rose might not fit the definition of a virtuoso trombone player, but he is a good center and offensive blocker.

"I realized from the beginning, it would be a problem, in music and playing football," said Rose. "After all, I am not able to play the trombone.

(See Football, Page 11)

When Was The Last Time You Saw A Pillow Case?

In the finale, the Ques shutout ASME 15-0. Greg Pridgen was the big man for the Ques with 2 touchdowns. John Patterson threw a pass covering 10 yards to Pridgen in the opening period to lead 0-0.

In the second quarter Donald Beaton threw 80 yards to Pridgen on the halfback option and the final score came on a 25-yard pass from Patterson to Randy Jones.

Beaton, Glenn Woods and Donald Martin led the Ques defense that shut out the ASME passing combination of Harold Martin to John Hariston.

Any of these Caterpillar areas of employment offers the same thing: a relevant job.

By relevant job, we mean a job that will let you use the knowledge you worked so hard to attain. And let you use that knowledge to your fullest extent.

At Caterpillar, we feel that we'd be cheating you, as well as ourselves, if we placed confining restrictions on how you apply your knowledge. That's why when we give you a problem to solve, we also give you everything you'll need to come up with the best possible solution.

It's our people that have put us in our world leadership position. It's going to be our people, and their ideas that will keep us there.

If you think you'd like to work for a company that will pay you to use what you've learned, talk to your placement director about Caterpillar. Waiting for you are a wide-spread variety of relevant jobs with a company doing business in 12 nations on 5 continents.

Our recruiter will be on campus October 8, 1973.

Caterpillar, Cat and CH are Trademarks of Caterpillar Tractor Co.
SPORTS NOTEBOOK
By Blannie E. Bowen

Henry Aaron did not break Babe Ruth's career home run record in 1973, but how close can you come to breaking a record?

Aaron started the season 41 homers behind Ruth and he swatted 40 for this season. Not only has he seasons to break the record. With one year to go on the contract, the record seems as though '74 already belongs to Aaron, who has hit 713 career round-trippers to Ruth's 714.

Hamming Hank holds numerous major league records including the one for most homers with one team, most homers by a National Leaguer and most total bases. When the record books are completely opened, you can find Aaron's name atop 17 National League records, 11 Major League records, and he has tied three National and one Major League record.

Aaron is a man who has mellowed with age as he clouted his 40 homers this season at age 39. Not only has Aaron mellowed with age, but he has gotten rich in the process.

While getting contracts straight for appearances on the Flip Wilson, Dean Martin, and Sonny and Cher Shows, Aaron has received endorsements in excess of $2.5 million dollars. He joins swimming superstar Mark Spitz and the rock and roll success of Joe Namath, but he does have the confident, not cocky attitude that only he could possess.

He speaks with a confident but subdued voice when questioned by reporters. He has become America's sports hero-for Blacks and young whites at least.

Aaron has received almost as much "hate mail" from die-hard fans, who cannot accept a Black man's greatness, as he has received congratulatory mail. Henry Aaron - America's sports hero.

* * *

AFTER A DISAPPOINTING LOSS to Smith Saturday night, A&T travels to Norfolk to take on the Spartans. Norfolk State is 1-0 this season, but A&T holds a 10-1 over-all record against the Spartans since the series began.

The Aggies have won the last five contests and should win again this season. Since the game is at Norfolk and the Aggies cannot find the endzone with any regularity, A&T should win by a T.D.

* * *

THE WORDS OF THE WEEK came from Aggie defensive back, Ralph Brown. Brown was defending against Stanley White of Smith who caught the winning touchdown.

Brown gave the most honest appraisal of a situation by any player I have ever heard when he said jokingly, "I tipped the first pass and he caught it for 39 yards."

He continued, "He burned me on the 65 yard T.D. and when he dropped the other T.D., I said thank God."

Wrestling Superstars Return
By Blannie Bowen

Do the names Harris, Glover, Windley, and Fair sound familiar? They are a football fan or a sports fan, you will know that these are the names of some of the best wrestlers that have appeared in the 1973-74 wrestling season.

Coach Pinckney has what he terms a junior team because the wrestlers listed above were freshmen stars of a year ago and they are just juniors. Fair was the star of the junior class last season and he has now selected the captain of this year's squad.

He completed an excellent year last season by going to the NAIA National tournament in Sioux City, Iowa. Fair had a 19-2 over-all record and ranked 19th in the nation.

Harris will be wrestling at 190 again this season and he will add experience to an already experienced team.

Windley will be wrestling at 126 again, but there are a lot of competitors for his job. If he doesn't get this job, he will have another good year for us," stated Pinckney of Windley.

Two of Pinckney's big men - heavyweight or unlimited - will be Stanley Christian and Danny Coleman. Both of these wrestlers are now playing on the offensive line of Coach Hornsby Howell's football team.

Coleman suffered a broken arm last year and Christian carried most of the unlimited class burden. Coleman is a senior and Christian is a sophomore.

"If he has the right attitude," stated Pinckney of Coleman, "he can be on the Division 1 or MEAC titles this year. That is if he wants to of course."

Last season saw Pinckney take two freshmen and have them win 29 matches, while losing only three. Roosevelt Hilton and Charles Simmons are now sophomores, but if, Hornsby duplicates his 74 record while Simmons duplicates his 12-3 mark, Pinckney will have him two new superstars.

Right now, Pinckney has his manager, William Mason, putting his wrestlers through pre-season practice sessions at 4:30 on Mondays and Wednesdays.

Once practice begins, he will have his wrestlers working out from 4-6 p.m. everyday in the Moor Gym balcony. Pinckney has an orientation meeting scheduled for October 15 in the Moor Gym lobby for all wrestlers and students who would like to wrestle.

"With the recruits, and what we already have here, this should be A&T's year," remarked Pinckney of the upcoming season.

Football Co-Captain Plays In Concert Band

(Continued From Page 10) marching band on Saturdays.

Instead, on most Saturdays in the fall, Rose is busy tearing into opposing linebackers with his vicious block.

A senior from Richmond, Virginia, Rose got interested in music while taking music lessons in the fourth grade. He later took drum lessons and from then on, he was hooked on music.

It was through the influence of an older brother that he became interested in football. After a fine high school career at Armstrong High, he was offered a full athletic scholarship at A&T. Rose is currently serving as the Aggies' co-captain and team leader.

"He is a team leader," said Coach Hornsby Howell, "and also a serious football player."

Right now, Rose is eyesing either a music scholarship or playing football as a professional musician. "If it's music," he said, "I want to arrange pop music or play in an orchestra."

In lieu of playing with the 140-piece A&T marching band, Rose entire group and does music lessons.

Football season, after basking his buddies around on the field, he manages to get in a few licks on his trombone.

How does Rose relax before a game, not the least bit mindless? "It just seems to relax my body," he said with a wide grin.
PROCTER & GAMBLE

will interview

Wednesday & Thursday, October 17 & 18

for management careers in:
Mechanical and Electrical Engineering

The Engineering Division’s Responsibility. If you were to join us in the Engineering Division, you would immediately become an important part of a management team of over 500 engineers who design, develop and supervise the construction of from 150 to 200 million dollars’ worth of equipment and facilities each year for P&G.

Our Basic Functions Are:
1. To develop the process, packaging, instrumentation and control systems to produce our products.
2. To design and construct new manufacturing, laboratory, warehouse and office facilities.
3. To improve existing manufacturing facilities.
4. To provide technical advice concerning proposed and existing facilities and equipment.

Typical First Assignment. Shortly after joining the Engineering Division you would be assigned to a project, and would be responsible for all design phases of that project from start to finish. Parallel to initial project responsibility, you will be trained in all design and administrative procedures related to our work. This includes comprehensive reviews of all operating, maintenance and quality control requirements.

A typical project assignment will require that you handle all or part of the following work depending upon the magnitude and complexity of the project:

1. Conduct preliminary studies to establish the engineering feasibility of proposed work.
2. Establish design requirements through consultation with representatives of Manufacturing, Research and Development and other contributing groups.
3. Determine the optimum design concept through engineering and economic justification studies.
4. Develop new equipment, providing basic design concepts and direction to designers and machinists as the design is executed and prototypes fabricated for testing.
5. Specify, select and conduct acceptance tests on equipment purchased from vendors.
6. Inspect construction and installation of equipment; conduct operating tests and make corrections as needed.
7. Solve equipment problems that develop during initial operation.

We would like to talk with you regardless of your graduate school or military service plans. For more detailed information see our literature in the placement office.

Opportunities with Procter & Gamble are also available in Research & Development and Plant Management. Representatives will be here to discuss these areas on the above dates.

JOHN MOORE
Mr. John Moore, a Senior in Electrical Engineering at N.C. A&T State University, worked for The Procter & Gamble Company in its Summer Student Engineer Program during the summer of 1973. Mr. Moore worked in the Power and Control Systems Department of the Engineering Division in Cincinnati, Ohio.

Mr. Moore’s assignment involved a detailed feasibility study on using a dielectric heater for drying glue in packaging equipment.

We are an equal opportunity employer.
