"COMPLETE AWARENESS FOR COMPLETE COMMITMENT"

VOLUME XLV NUMBER 34 NORTH CAROLINA AGRICULTURAL AND TECHNICAL STATE UNIVERSITY, GREENSBORO JANUARY 25, 1974

New UNC Board Members Meet In Get-Acquainted Session

By Cassandra Wynn

It was a get acquainted session for four new members of the University of North Carolina Board of Governors and members of the administration of A&T. Those new board members who are to help make policy for the University system that will affect A&T in a direct way spent about five hours touring the campus and listening to administrators talk about the programs and the needs of A&T.

In a short summary of how A&T has progressed in a 10-year period, Dowdy told how A&T has changed since 1964. He pointed out that since 1964 A&T has increased the number of faculty and administrators who have doctorates to 43 per cent. Dowdy said that the number is very close to the goal of 50 per cent that has been set for 1975.

Dowdy noted that in 1964 only 29 students were on the honor roll; in 1973, there were 129 students who made the

honor roll. The number of baccalaureate degrees that the University gave in 1964 amounted to 379 and in 1973 the degrees numbered 810.

He told the board members that the University has gotten reaffirmation of its regional accreditation and has achieved national accreditation in the schools of engineering, nursing, chemistry and social service. He stated that efforts are now being made to get the teacher education program and the schools of business and economics nationally accredited. "There is no other national accreditation that we can seek after that," he said.

Dowdy praised the members of the administration at A&T. "They are not narrow minded; we have interdisciplinary work going on all over campus," he stated.

He concluded by listing to the new board members some of the needs of A&T. Among them were air conditioning for six

buildings, an addition to the library, renovation of Hodgkin Hall, an addition to the Student Union, a new track field, renovation of Cooper Hall, renovation Phase II of Scott Hall and a new women's dormitory. He ended the list by saying, "That's all we want."

Dr. Glenn F. Rankin, vice-chancellor for Academic Affairs gave the new board members some insight into the academic programs that A&T has. He listed the ROTC program, the Special Service Program and the "Project Iodine" in the School of Nursing.

Marilyn Marshall, SGA president spoke to the board members about some of the needs of students. More financial aid, expanded infirmary services and a graduate dormitory were among the things that she listed.

Marilyn also warned the board about treating A&T as an "adopted child." She advised them, not "to quit" until "our goals become your goals."

CHANCELLOR DOWDY

Worker checks gauges at heating plant.

Energy Crisis Poses No Heating Problem

By Mike Hailey

With the so-called energy crisis a major issue, the possibility of running short of fuel for A&T is "not foreseen in the future," according to Merrill Watson. The supplies come from Argentina and unless the U.S. cuts off diplomatic relations with them, this campus is in no immediate danger.

Although fuel oil is now the main source of energy, Watson said that the last time coal was used in the heating plant was in June of 1973. It was converted because of the environmental

people who received many complaints due to the dark substance that came from the smoke stacks.

To help preserve energy, Watson asked for the students' co-operation by keeping room and hall doors closed as much as possible, report overheating problems and don't cover radiators with items that would cause underheating.

For those students that complain about overheating, A&T is now in the process of buying new equipment for the buildings to better control the heat Watson said.

Are Two Part-Time Doctors And Seven Registered Nurses Adequate? Students Review Infirmary Services

Are two part-time doctors and seven registered nurses adequate for a student body of about 4,700? Is there enough equipment in Sebastian Infirmary to give the A&T students sufficient medical treatment? These are some of the questions that were posed to students in a survey of opinions

on medical service at A&T.

For the most part, the students who responded to the questioning did not have many complaints about medical treatment that they have gotten while at A&T, yet most suggested that services be expanded to include a full-time doctor.

"Services are up to par, but they could stand some improvement," said Warren Cooke, a professional biology major. He added, "I think we need a full-time doctor and we should have stricter rules on the distribution of medication."

Another student complained of the inconvenience of not

having a full-time doctor. She said that once she had a torn cartilage and it took her two days to see the doctor. She added, "The complaint slips are ridiculous."

Claretta McCoy, a junior childhood development major, stated that, "Everything is so general; they don't take time to

prescribe for individual needs." "I don't have any negative feelings toward the infirmary," said Nancy Turner, a junior nursing major. "The only thing is that the physicians should come more often or spend more time there. It would be helpful to have a full-time doctor." Nancy said that before she ever went to (See Physicians, Page 2)

New Buildings And Grounds Is Spacious And Modern

By Debra Daniels

The cry for more adequate space and sufficient equipment for Buildings and Grounds began in 1962; now 12 years later Buildings and Grounds has been granted

17,000 square feet of the requested 26,000 and is located beside the Senior Dormitory. There is no comparison between this spacious and modernized building and the former one which had been converted from a heating plant.

Marvin Graeber, the associate director of the physical plant, stated that they desperately needed more space so that the department could serve the needs of the campus more properly. He said he is delighted

and satisfied with the results of the new building, but he regrets the inconvenience of its location.

Graeber said he would prefer for Buildings and Grounds to be situated in the central part of A & T's campus, but its present location is the only space that was available for the vast room required by the adjacent shops connected to Buildings and Grounds. Although they have begun to function, they are still moving in as the department has not completed equipping and setting up all of the work stations.

Besides its various offices, Buildings and Grounds is composed of a lobby, supply rooms, blueprint and work stations, the electric, paint and auto shops and the ground maintenance.

The new Buildings and Grounds has a spacious lobby.

Math Department Offers Tax Services To Community

With the aid of the "Teaching Taxes Program" materials supplied by the office of F. R. Bostian, Chief of Training at the Internal Revenue center in Greensboro, the class of "Mathematics of Business and Finance" will again be of service to file income taxes for persons in the low income bracket and the elderly, free of charge.

This is a fourth year the Mathematics Department has been able to serve the community and proudly report that 202 federal and state taxes were filed last year.

For this year beginning Jan. 28 until April 15, the instructor,

Ms. T. E. Bradford announces the following places where persons may come for help.

On Wednesday nights, from 6 until 9, persons may go to the same office as in previous years, now the office of the Head Start Training Program, 1320 E. Market Street, (in the College Shopping Center).

Monday nights, from 6 until 9; Tuesdays and Thursdays from 10 a.m. until 2 p.m., interested persons should meet in Merrick Hall (North Campus), Room 206.

Information is available by calling the Mathematics Department, 379-7822.

A&T Fellows Program Is In Search Of Interns For Summer Project

The A&T Fellows program, a funded project designed to identify young leaders for the nation's social, economic and political sectors, is looking for some friends in North Carolina.

Youngsters selected for the program have spent their past two summers working for such dignitaries as Rep. Richardson Preyer, Rep. Shirley Chisholm, Rep. Henry Frye, and for some of the nation's largest industries.

"But now we need more internships in North Carolina," said Dr. William Parker, director of the project. "We would like for our students to gain the experience of interacting with some of our outstanding leaders in this state."

The A&T program is funded by the North Carolina Fellows Program Inc. and operates through A&T, the University of North Carolina at Chapel Hill, Davidson College, North Carolina State University and the Smith Richardson Foundation.

The fellows are selected after a careful screening and spend most of the academic year traveling and meeting informally with national and state officials.

It's the greatest learning

experience possible," added Parker. Funds for the travel and guest lecturers are born by the North Carolina Fellows Program.

Some of the fellows attended the Black National Political Convention, some have met personally with the Rev. Jesse Jackson, national Civil rights

leader, and Dr. James Farmer, the founder of the Congress for Racial Equality.

Parker said firms desiring to provide internships next summer, may contact him at A&T. The students are required to participate in an internship experience.

By Bennie L. Glover

"The union is the community center of the college for all the members of the college family--students, faculty, administration, alumni and guest." This is the role of the College Union as defined by the Association of College Unions Annual Conference of April, 1956. How well our Student Union carries out its role can best be seen in the following interviews.

"I would say roughly 40 per cent of the registered student body makes use of the union facilities at present," stated Jacqueline Farr, program director for the Union.

She further stated that many girls appear to be afraid to make use of the Union facilities

especially at night. Many students refuse to use the Union for the primary reason that they feel they cannot relax here as they would like to since they cannot abuse the building and its facilities as they would like to.

The Greek and social clubs make use of the Union facilities more often than other students especially the conference rooms, explained the program director. Many students do not know these rooms are available for studying if they so desire them, she also said.

Mrs. Farr went on to say that the union just as the gym is now obsolete, thinking in terms of it being able to accommodate the needs of the student body efficiently. "It was probably obsolete before the completion of construction, for now there is not enough space and sometime ago the music room had to be converted into offices," she said.

The main problem aired by many students is that there are not enough activities carried on especially on the weekend. Also many students make excessive use of profane language in the union and its surroundings which the program director expressed a desire that they stop.

Willie Middlebrooks, a senior political science major, stated, the

Union is a great facility. "We have been able to acquire rooms in it for Communion Services when Harrison Auditorium was impractical for the expected crowd; and the meditation room is available to any student who desires to use it. It is a place that makes many students feel at home with its main lobby, magazines, papers, music, and chairs."

Middlebrooks went on to state that one of his main criticisms is that some people just linger there all day rather than go to class and strive toward academic excellence. Another criticism is that wine bottles and paper keep the outside constantly littered.

"It's not exactly up to par but to a certain extent, it serves its purpose," said Paula Bowen, a sophomore business administration major. She continued, "It's a place for socializing, but its location is not convenient to the females other than those in Cooper, especially at night."

From the preceding comments one can determine for himself whether the union is meeting its goal as outlined in the Memorial Union Handbook which is "the development of persons as well as intellects."

'Physicians Should Come More Often'

(Continued From Page 1) the infirmary, she had a stereotype of what it was like. "I was misled by what I heard until I went over there. Service for me was very effective."

She added, "I was able to receive medical attention from the physician and given medication that was helpful and which also relieved my specific problem. Before that, I had little faith in the infirmary."

One student noted that the infirmary does not have enough equipment to adequately serve the students. She specifically pointed the absence of an x-ray machine.

Let's hope this guy in the rain finds a girl with something extra- an umbrella.

Summer School Is Cheaper

By Delores Mitchell

Few Aggies realize that the cost of summer school tuition is relatively cheaper than during the regular semester. But according to J. Neil Armstrong, director of summer school, it is. Although the cost is less expensive, the director said this fact is not stressed.

If there is a course that the students wish to take during the summer, they must first talk with the departmental chairman. The chairman discusses the facts and information concerning the course with Armstrong. He in turn weighs this information against the budget.

However, four important elements largely determine whether a course will be offered during the summer. These factors are the number of students desiring the course, classroom space, and available qualified instructor and the necessary funds. Armstrong pointed out that a great number of courses offered in the summer are those needed by students who seek to graduate.

The summer school office is compiling a listing of the subjects to be offered in May. The catalogue will include both graduate and undergraduate courses and will be distributed just before mid-term. It will also list other relevant information and dates concerning summer school.

When asked if any new courses would be offered in the summer, the director mildly stated, "I feel safe in saying that a few most likely will be offered, although I haven't checked it."

Every summer, according to Armstrong, there are certain courses always offered. These are "Human Anatomy and Physiology", all of the math courses for freshmen and

sophomores, "Principles of Accounting I and II," English courses, and others.

Armstrong expects to enroll some 2,000 undergraduates this summer. He noted that the graduate enrollment is also increasing. The director observed that for the past five years more students have been attending summer school.

He positively explained, "This speaks well for the intelligence and foresight of our student body, because students understand the value of attending summer school as it relates to accelerating their time of graduation, easing their schedule problems, as well as the simple economics of attending school."

Armstrong revealed that it has been normal for summer school tuition to be less expensive. He inserted, "Historically summer school rates have been lower than regular school and even under escalating cost prevailing the universities of North Carolina, A&T has insisted on keeping its summer school rates economical.

With inflation and the cost of living on the rise its good to know that at the right time and the right place, Aggies can get a bargain on their education.

He added, "There are a few courses that students tend to fail or drop and we try to offer these since a larger population want them."

Council Will Present Sit-In Day Next Week

The East White Oak Community Council announces its plans for the David Richmond Sit-In Day. The events of that day will include a dinner scheduled to be held on Feb. 2, 7:30 p.m. at the East White Oak Center. The Center is located at 1801 Tenth Street.

Dr. Lewis C. Dowdy, chancellor at A&T, will be the keynote speaker at the dinner. His topic will be "Pillars of Strength." Guilford County state representative and President of Greensboro National Bank, Attorney Henry E. Frye, will introduce Dr. Dowdy.

According to Harry Bunch, Council president, this event has two purposes. First, it is designed to give recognition to Dave Richmond who grew up in the East White Oak Community. Dave was also one of the four young men who sat in at Woolworth's in 1960. This, now internationally famous sit-in took place in February of 1960.

Thus, the reason February was selected as the most appropriate month for recognition of one of the persons who took part in an event which has had a lasting impact on the Civil Rights movement in the United States. Bunch also indicated that the other three young men who participated with Dave in this Sit-in have been invited to participate in the David Richmond Sit-In Day.

The second purpose of the dinner is to serve as a fund raising project for the East White Oak Community Center. These funds will be used to continue various projects at the East White Oak Community Center for the benefit of the residents in that area and other interested citizens in the Greensboro Community. The Center is in dire need of a stove with an operating oven and a fence. It is hoped that some of the funds raised during the David Richmond Day will assist the Center in obtaining these items.

Campus Haps

All Students interested in debate, original oratory, sponsoring rap sessions and other public speaking events are asked to come to room 326 Crosby Hall, Tuesday, at 3 p.m.

The members of Alpha Kappa Mu Honor Society are urged to attend an important business meeting on Tuesday at 5 p.m. on first floor Hodgkin Hall.

Bennett College is sponsoring a show and dance featuring the Manhattans, Wednesday at 8 p.m. in the Ida Goode Gym. Students--\$2, General Public--\$3.

The Wesley Foundation will meet Tuesday at 8 p.m. in the Campus House. Old and new members are welcome. Refreshments will be served.

Soul Phi Sigma will present a jam Friday in East Gym. Admission, .35.

A&T vs Winston-Salem in Winston, Friday.

The Union Advisory Board presents "Detroit 9000" at 2 and 6 p.m., Saturday.

The SGA will charter a bus for the MEAC Tourney. The fee will be \$15 per ticket; this does not include tickets for the game and overnight accommodations. Interested persons should sign up in the Union as soon as possible and must pay a \$7.50 non-refundable deposit.

All organizational heads should have their adviser to total the number of hours and the name of the project for the SGA's Outstanding Organizational Award. Deadline is Wed., Feb. 6.

The lines of add - drop steadily progress.

Morning Meetings

Plans for the semester to be spearheaded by the SGA include a Black Culture Week and monthly student body meetings. SGA head Marilyn Marshall has said these meetings will most likely be on Tuesday mornings, or at least that's what the SGA is working towards.

She gave two reasons for pushing for Tuesday morning meetings: classes are usually light and she feels that students would not want to leave their dormitories at night to attend a meeting.

Miss Marshall also indicated that morning meetings should not pose a major problem for students who have classes since going to class is non-compulsory. According to Miss Marshall, she is most doubtful that classes will be suspended.

So, maybe we should evaluate the premises underlying the decision for early hour meetings. Although one's classes are usually lighter on Tuesdays and Thursdays, still a majority of students have at least one class or lab on those days.

Is it a valid premise that more students would attend a student body meeting, say at 9 a.m. over an evening meeting?

And would morning meetings be an advantage to the students themselves, who more than likely will have to make a decision between going to class and the student government?

Since the plan for our first student body assembly is still in the preparatory stage, it is up to you to voice opinions on whether a.m. meetings are desirable. Miss Marshall has also said that last semester was spent trying to find answers to certain problems which the SGA now wants to share with the students.

And, if some of us want to find out these answers, we might miss them because of academic conflicts. The proposed scheduling of meetings is to have more students in attendance, isn't it?

No Liberated Women

All leading editorials are written by the editor of THE A&T REGISTER. Such editorials will not necessarily carry a byline and will not reflect the opinions of the University or the entire staff. Staff members are free to write dissenting opinions.

What is a liberated woman? What characteristics does she possess which make her different from the average woman, from the unliberated woman, from the traditional social conception of the role of woman? Is it work outside the home? Is it pursuing a career as a primary goal, as opposed to marriage as a primary goal? Is it sexual freedom? Do some perceive, as her most distinguishing characteristic, the fact that she hates men, supposedly?

Some of these questions have been raised amidst an attack on the current President of the SGA, Marilyn Marshall. C. Jackson has gone so far as to say that

the woman's liberation movement has been hurt by the behavior of the first female president of the SGA and that "women can't do a better job than a man."

It is not our aim here to defend the President. Even she admits that the charges have truth in them, insofar as her office hours and general student body meetings are concerned. The real truth is that she has done nothing while in office. Another part of the truth is that it had nothing to do with the fact that she is a woman. Lots of other presidents have done nothing that have announced while they

have been in office.

However, we have deviated from our main object.

Perhaps, one good answer to the question of what distinguishes a liberated woman is the fact that she does what she wants to do, goes where she wants to go, and is free to be her own person. All of this is done, by the way, without the traditional things happening to her that are predicted to happen to

females who deviate from the set role pattern.

The question might be asked, at this point, if women are not in fact free to be themselves. The answer is of course that no female has been free to be herself whether she is Black or of another color. Black females traditionally think they are free; however, we actually face a dual standard which the forced

labor of slavery did not eradicate.

It is the dual standard which restricts females not only sexually, but otherwise. Black females do not get positions of supervision over males any more frequently than white females. Black females, in fact, are at the bottom of the pay scale in terms of wages. Now that we know what a liberated woman is, we can answer that no woman is really liberated.

Analogy: Courthouse Is To Klan As Church Is To Black People

By Ted L. Mangum

If there is one area of American life that all Black people are thoroughly familiar with, it is the area of injustice. We have all experienced some kind of racial injustice in our lives. These incidents might have been major or minor incidents, but they were all directly or indirectly related to the fact that we are Black.

It speaks very poorly of either this country or our people when one considers that we supposedly

that the United States of American can redefine justice without redefining itself. Thus the results, since the death penalty was made mandatory for specific crimes, are the same as before; 16 of the 20 people scheduled to die in the gas chamber in North Carolina are non-white. These include a very close friend of mine and thus I share some of the personal despair that many Black families have had to suffer.

Also it should be noted that these states do not include the

University the Black community had already expected the "justifiable homicide" rap that means "something white don't killed something Black."

And if there ever were a case that shouldn't have been closed without murder indictments, it was the incident at Southern U. The local sheriff and State Police came on campus better equipped and armed than the U.S. Army in Vietnam. The following is a listing of the weaponry they thought necessary to deal with unarmed students: forty-four

Crises, Dissensions

Editor of the Register:

When will we ever learn that what the world needs now is love! Crises, dissensions, rumors, of war and wars are all due to a lack of the "agape" love on the part of the family of man. One may not approve of, or understand the attitudes and actions of others, and criticisms may be in order but love, constructiveness and authenticity of facts should temper the line of attack.

That the female president of the SGA, Miss Marilyn Marshall was censured by a fellow student and a brother, primarily on the basis of her gender, was uncharitable and discreditable. And that she was not given proper recognition for all the positive aspects of her Administration reveals half-truths on the part of those who would discredit her.

A campus-wide consensus of opinion undertaken in the fall semester, indicated that the members of the SGA have been appreciated for functioning on behalf of the students, and they have demonstrated a degree of compassion for the student body.

On the campus scene, Miss Marshall and Miss A&T also have

been towers of strength to many individuals with various problems and serve as good examples of sound character. Many other young ladies, for example our editor, have served the University well.

On the International scene, it is a fact that men have occupied a wider sphere of decision-making capacities and are to be heartily commended for strides made for the benefit of all mankind and we thank them and honor them. But it is also true, that women have made many major contributions, and increasingly so, and have performed meritoriously. Congresswoman Mrs. Shirley Chisholm can be cited as a classic example.

Much has to be done here and on a national scale to promulgate the fact that Black is positive, Black is progressive, Black is prudent, but we should first attend to some basics that will engender these attributes and make us lovelier human beings. Brothers and Sisters, let us be kindly affectionate one to another with brotherly love in honor preferring one another.

Sincerely
Lorna Lawrence

constitute only 11% of the population, yet we constitute over 47% of all people in penal institutions. Something must necessarily be rearranged, and I think that this rearrangement speaks more to the governing forces than to the victims of their repressive policies.

The death penalty has been redefined by the white power structure to take the politics and prejudices out of the decision to take a human life. When you consider that 3700 plus out of the nearly 4500 that have met death by execution have been of a non-white race, you can see the obvious necessity of such a redefinition. But there is no way

thousands of Blacks who were UNLAWFULLY lynched since America became the home of the free and the Brave. But we would have to get those states from the Grand Order of the KU KLUX KLAN when they come to Greensboro this Saturday to march downtown and hold a rally at the courthouse. You can see that the courthouse is to us; we would get saved in church and courts would send us to the gas chambers.

To bring the injustices of this racist system closer to home, we can look at the recent reopening of the Kent State case of 1970, while down at Southern

12-gauge shotguns, eleven 30 caliber carbines, three 37 mm tear gas guns, one 30-30 caliber rifle, two M-1 carbines, one 7.62 caliber rifle, two AR-15 rifles, one 35 caliber rifle and two Thompson submachine guns.

This list does not include regulation service revolvers and an armored personnel carrier the "law" bought onto campus. Yet over a year later nobody seems to know who fired the shots that took two lives without use of the Death penalty. Or should I say we know and they ain't telling?

Injustices is surely a part of our "American Heritage"; but we, as a people, can ill afford to allow it to remain in our future.

Nixon Says Cutback

Editor of the Register:

President Nixon and the nation finally confronted the fuel crisis. The President made a special TV appeal for voluntary

cutbacks in consumption and Americans responded by turning down its thermostats and easing up on the gas pedal to the speed limit of 50 m.p.h.

But the petroleum shortfall is only one aspect of the new scarcity economy. Everything from aluminum and tennis balls to salmon and zinc is scarce, and prices are climbing. The new equation will affect the American way of life for years to come.

There are several ways, in which we as students at A&T can cut-down on the usage of electricity and oil (heating). When you leave your rooms, please turn out all lights and close your windows. This will help to decrease the amount of heat needed by your room for your comfort.

By doing this the amount of fuel needed by the University to

operate everything can be decreased by your being a very conscientious and considerate student. Usually we will go to classes with our radios, tape players and sometimes stereos playing. These items use electricity, which can be used for more beneficial ways in which you can benefit from directly, as heat, lights and more extra-curricular activities.

Nearly every community in the United States and the world has some kind of energy-conservation program underway or being planned.

Let us help to conserve energy as much as possible.

It is affecting all of us, if we believe in it or not energy crisis. The cost of energy is high and going higher each day, with the temperature decreasing in the country to give us those snowy, cold, and wet days.

Be considerate. "A good place to find a helping hand is at the end of your arm". Help today, fellow Aggies.

Sincerely yours,
Lloyd Inman II
Vice-president of the SGA

Film Tribute To Amilcar Cabral Was 'Excellent' Documentary

By Rosie A. Stevens

The film which was shown Sunday in the Tribute to Amilcar Cabral was an excellent documentary on the struggle waged by the people of Guinea-Bissau. Opening with a quote from Julius Nyerere, the head of the nation of Kenya, the

film focused on the movement of the people in winning their freedom.

According to the film, the

movement was led by men from all walks of life, most of them primarily young. The leader of these leaders was of course Amilcar Cabral. Cabral was the only one among the group who had received a college education under the Portuguese dominion. He was one of fourteen such Guinea natives to do so.

Scenes were shown of the training of the troops, the excursions of the group in harrassing the Portuguese. The supplies, sent in from various

communist nations, were not the most modern of weaponry, nor the most adequate in terms of sufficiency and amount. However, they used what they had to enormous advantage.

Also a focus of the film was the health situation in the country. Most of the patients being treated were victims of the war, with wounds and burns. Medical supplies were in short supply.

Another medical problem (See Documentary, Page 8)

Carolyn Stanford pours forth deep melodies in an appearance here.

Mezzo-Richness Delights Audience

By Rosie A. Stevens

The lights dimmed, the music began, and a subtly vibrant, rich voice was heard flowing through the audience. The piece was an aria from G.F. Handel's Julius Caesar. "Priva son d'ogni conforti." The singer was the renowned Carolyn Stanford.

Throughout the 90-minute presentation, the audience was alternately saddened, serenaded, wonderfully delighted, and caught up in sympathetic identification with the portrayals in music and song of characters from the opera.

Though all of the pieces were well done, several stood out for their superb, undiluted excellence.

"Priva son d'ogni" has already been cited for the demonstration of the subtle vibrant richness of the voice of the mezzo-soprano. A very smooth, clear, solemnness is rendered by the singer in "En Sourdine," while the serenity and sadness come through in

"Clair de lune," as the singer pours out her song of love. Then the listener is caught up in the clandestine and the innocent of the scene in the moonlight of "Fantoche" in three arias from Claude Debussy's Fetes Galantes I.

This was followed by four short pieces arranged by Mina Monroe. They included "Pau' Piti Momzelle Zizi," a slave song of a woman who has lost the affection of her master. Also, Tan patate-la tchuite, "When your potato is done, it is time to eat it," was among the numbers.

A somewhat interesting note was found in a selection from Rossini's "The Barber of Seville." There is a touch of lightness and humor in "Una Voce Poco Fa."

The pieces most enjoyed by the audience were spiritual selections by Rosamond Johnson. "Deep River," "All God's Children Got Wings," and "My Soul's Been Anchored in Jordan," rendered by Miss Stanford in a soulful note.

On these selections, she received a standing ovation with cries of "Encore" and "More." There was a certain amount of identification in the audience when these numbers were done. Miss Stanford obliged by rendering a fourth spiritual, "Nobody Knows the Trouble I Seen," for which she received another standing ovation.

The singer, herself in an interview said she does not perform before Black audiences a great deal. "I don't have the opportunity, very often." However, she said that she wishes that she did have more opportunities to do this. She added that "While I was singing, the audience did not make me feel that they were of one color or the other."

She indicated that her next performance would be in the Virgin Islands. She confessed that she didn't know very many songs from the Virgin Islands. In fact, she said, "I would feel foolish singing to the people of the Virgin Islands."

ANSWERS

TO LAST

PUZZLE

SPORTS NOTEBOOK

By Blannie E. Bowen

With more than half of the current cage campaign already completed, the MEAC standings and national rankings are beginning to take shape. As the pre-season pick to win the conference race, Maryland Eastern Shore has surprised no sports fans.

The Hawks are blasting opponents for nearly 100 points per contest. Just last week, UMES scored 114 points twice and 113 MEAC foe Delaware State. The main item that is keeping the points in the board for Maryland is balance.

Maryland is lead by center Joe Pace, forward Talvin Skinner and guard Rubin Collins. Last year, the Hawks finished number two in the NIAA national tournament and only fourth in the MEAC tournament.

As simple as it may seem, the Hawks have a score to settle with MEAC foes. Currently, UMES has a perfect 15-0 record and no team appears to be able to knock the Hawks off unless it is Morgan State.

The Bears of Morgan are not doing too bad either as they possess a 12-2 record. When the two clash on Feb. 5, the game is expected to draw such a huge Baltimore crowd that the game will be played in the 12,000-seat Baltimore Civic Center, the site of the 1974 MEAC Tournament.

Howard University, the MEAC Tournament finalist loser to A&T, the past two years, holds down third place in the conference. The Bisons do not appear to be as sharp as in the past two years and as a result, A&T's Aggies are slowly creeping up on the 6-6 team.

A&T owns a 9-4 slate and appears to be the third best MEAC team although the Aggies were thrashed earlier in the year by fifth place Delaware State. South Carolina State and North Carolina Central are not playing up to MEAC standards, but both teams gave A&T all that the Aggies could ever want before bowing.

Unless Central State, Delaware, Howard and A&T begin to plan even better basketball, Maryland will be battling Morgan's Marvin Webster and teammates for the MEAC Tournament crown while the rest of the pact looks on with great admiration.

NOW THAT UCLA HAS LOST a basketball game, maybe the Bruins will settle down and win 100 straight games. Notre Dame appears to be the only team capable of beating the California team and its headmaster, "the Wizard of Westwood."

Since the Irish's 71-70 victory on Saturday, Coach John Wooden has heatedly promised that Bill Walton will be ready for Notre Dame this Saturday. But, according to "Big Red's" stats, he played a normal game, but John Shumate and company won the ball game and Mr. Walton was saddled with his first losing contest since 140 games ago.

Like it or not UCLA, Nortre Dame is number one - at least for this week.

Aggies Out Pace Vikings To End ECSU's Four-Game Winning Streak

By Blannie Bowen

A&T ran its record to 9-4 with a 79-69 victory over CIAA opponent Elizabeth City Tuesday night in Elizabeth City. The Aggies had four players in double figures, while the Vikings had three.

James Outlaw paced the A&T attack with 24 points with Sinclair Colbert and Bobby Godwin chipping in 11 each, while co-captain Willie Daniels tossed in 15 points.

Glenn Windley scored 20 points in the first half for the Vikings but he could post only one in the second half while leading Elizabeth City's scoring with 21 points. Windley also hauled down 13 rebounds or exactly half of the Viking total.

With a four-game winning streak on the line, Elizabeth City seemed ready to rebound from

seven early season losses, but the Aggies put a dent into Coach Bobby Vaughn's scheme of things.

From a slim 40-38 half-time lead, the Aggies put their defense to work and the result saw A&T spurt to a 50-41 advantage.

With Outlaw getting three steals that resulted in easy baskets, A&T had put its patient defense and offense together on one of the few occasions this season.

Guard Zane Leuter attempted to pick-up the lack of Viking scoring, but he could connect on only three of 15 attempts for the

floor and two of three free throws.

A&T's 6-9 center, Colbert, sprained his ankle with 6:24 left in the contest but he contributed nine big rebounds before departing. Daniels hauled down 11 rebounds to lead this department.

This victory improved the MEAC champs' record to 5-1 against CIAA opponents. A&T faces another tough CIAA opponent Friday night when the Winston-Salem State Rams play host to the Aggies in the Winston-Salem Memorial Coliseum at 8 p.m.

Spruill Selected MEAC Player Of The Week

By Blannie Bowen

Allen Spruill has received

another in a series of growing awards this week. A native of New Bern and an acrobat with a basketball, Spruill has been selected by the MEAC Sports Information Directors as the MEAC player of the week.

A foot injury in December nearly required the "Wizard", as he is popularly known to his fans, to sit-out the remainder of season. But, when A&T got some 15 points behind Fayetteville State, Coach Warren Reynolds called on Spruill to revive his club and to test his injury.

Spruill's injury was alright and so was his playing as he contributed five points in eight minutes of play to spearhead the Aggies 66-65 win.

Against J.C. Smith the following Wednesday, the 6-4 guard-forward tossed-in 18 points and four assists in a 94-90 loss. More importantly, he hit four straight shots and contributed two assists in a three minute span, but he did not do enough to prevent A&T's fourth loss.

Saturday night was also big for Spruill when he received a loud ovation while being introduced after not starting against S.C. State. He scored 22 points on some superb drives to the basket that excited a capacity crowd at Moore Gym that helped to cause yet another Aggie win.

In other action around the MEAC, the conference's executive committee voted to save energy by splitting the conference into a Northern and Southern Division in track and golf.

Maryland-Eastern Shore, Howard, Delaware State and Morgan State will compete in the Northern Division with the finals in these two sports slated to be April 14-15 in Dover, Delaware.

N.C. Central, S.C. State and A&T will compete in the Southern Division with Central hosting the golf on March 24-25 while State plays host April 14-15 for the track.

MEAC champions will be crowned in track, golf and tennis on May 4-5 at S.C. State. UMES will host the February 22-23 wrestling and swimming meets that will determine the MEAC champs in these sports.

Commentary

Player Transfers

By Blannie E. Bowen

A&T recruited one of the most sought-after high school basketball players in the country last year. A&T's roster does not list this player now because he has transferred.

Leon Dickens enrolled here at A&T because, at the time, the prep star felt as though A&T could offer him what he wanted.

Dickens was "all-every thing" in high school including all-State and the greatest scorer in the history of his high school in Roxboro. His services were

sought by over 50 colleges, but he chose A&T.

After being watched and courted by North Carolina, N.C. State, High Point College and many, many other prominent colleges, Dickens chose a Black school, A&T in this case.

The question to be answered now is why would a "Mr. Everything" come to a big name Black college and probably the best Black school in terms of a basketball program, and then transfer.

(See A&T's, Page 8)
