In Agricultural Development

A&T Will Assist East Africa

A&T has been named a partner with West Virginia University in a \$1.7 million project to assist in agricultural development in East Africa.

The grant, sponsored by the Agency for International Development, was announced Wednesday by Dr. Burleigh Webb, dean of the School of Agriculture.

Webb said that, in the new project, A&T will provide technical assistance to the Republic of Tanzania in developing trained manpower for that nation's agricultural industry.

"The government of Tanzania is deeply interested in upgrading the state of agriculture in that country," said Webb, "but has been handicapped by insufficient trained manpower. This is where we will come in to assist that government with technical assistance during this four-year project."

Webb, who visited Tanzania

earlier this year, said he expects the new project to make a significant difference in the productivity and agricultural economy of the developing nation.

"The general welfare of the villager in the countryside should especially be helped," said Webb.

He said a nine-man team from A&T will be assigned to participate in the African project.

A&T will assist in the development of agriculture programs at two of Tanzania's institutes, which are similar to this nation's community colleges. Special training will be provided in the areas of animal health, agricultural economy, soil science, agricultural engineering, agronomy and livestock management.

A&T has also been asked to assist in the development of a program in agricultural education at the University of Dar es Salaam, and to provide advanced

training here for faculty members of Tanzania's institutes.

Webb said A&T will provide some of the persons to teach specified agricultural subjects in Africa and will also furnish some of the technical assistants to study the capabilities of the African institutes.

The government of Tanzania has an announced goal of becoming self sufficient in agricultural manpower by 1980," said Webb. "This program should help them in a big way."

A&T recently completed a two-year agricultural development program with Ohio State and West Virginia University to assist the nation of Uganda.

Vice Chancellor Urges Students To Apply Now For Summer Jobs

Each year there are many more eligibles for summer jobs in Federal Agencies than there are vacancies.

According to Dr. J.E. Marshall

vice chancellor for student Affairs, now is the time to apply for summer jobs. Last summer there was only one eligible in four who obtained Federal employment in the Washington D.C. area.

Considering current Government-wide budget and hiring restrictions, it appears probable that employment opportunities will again be limited this coming summer.

Typists, stenographers, engineering majors, mathematics and computer science majors,

and accounting majors are more likely to obtain summer jobs in Federal agencies in the Washington, D.C. area.

Announcement no. 414, Summer Jobs in Federal Agencies gives detailed information about summer job opportunities, the requirements for the jobs and how to become eligible for them, according to information on summer employment received from Dr. Marshall.

Students that would like to have more information about summer employment should report to The vice chancellor's office.

Labor Director Makes Charges

National Labor Director Herbert Hill charges, in an article in the current Civil Rights Digest, that the Federal Government has

aided and abetted discriminatory racial practices in the construction industry.

"The relationship between the

U.S. Department of Labor and the various unions affiliated with the AFL-CIO (under both Democratic and Republican administrations)," Hill states, "is a prime example of how government policy can transform 'voluntary associations' such as labor unions into a private sovereignty."

Hill examines the lack of progress in opening up jobs in seven skilled trades in the article, which is entitled, "Evading the Law; Apprenticeship Outreach Programs and the Hometown Plans in the Construction Industry." Citing the most recent Government data, Hill asserts that racial patterns in the construction industry have not been altered.

Apprenticeship outreach programs (which train minority members to become journeymen) have failed, according to Hill. In his analysis—the first to evaluate the 10-year history of outreach programs—Hill concludes that such programs "have served the interests of restrictive labor unions but not the interests of black and other minority workers."

"While there has been an overall increase during the past decade in nonwhite participation

A&T Receives \$94,000 For Institute Study

The Transportation Institute has been awarded a grant of \$94,000 by the U.S. Department of Transportation.

The funds will underwrite the continuation of the institute's rural public transportation feasibility study.

Arthur Saltzman, director of the institute, will serve as principal investigator for the project. He said the rural transportation study, now in its second year, is designed to determine what kinds of transportation systems are appropriate for various types of local situations in rural America.

He said it is expected that the study will produce a manual that will aid local transportation planners and community groups interested in improving or implementing rural

transportation systems. Joining Saltzman in the study (See Public Page 2)

- The following students are to report to the newspaper office on Sunday, December 8, between 2 p.m. and 4 p.m.
- Miss Davida Wagner
 - Mr. Delton R. Baker
 - Miss Doris Batts
 - Miss Evelyn C. Boyette
 - Miss Maudie Davis
 - Mr. Thurmon L. Deloney, II
 - Mr. Brinkley Faulcon
 - Mr. Bennie Glover
 - Mr. Jackie Tyson
 - Mr. John C. Kerns
 - Mr. Ronald Penny
 - Miss Rochelle Thigpen
 - Mr. Linwood Pollard Jr.
 - Mrs. Rose Alexander

Minorities Must Climb Apprenticeship Ladder

(Continued from page 1)
 in apprenticeship training, little change has occurred in the percentages of Black journeymen admitted into unions controlling employment in the skilled occupations. Black workers remain concentrated in laborers' jobs and in the trowel trades."

The basic concept of outreach programs, Hill asserts, is a fallacy. "Even if full racial integration of all union-controlled apprenticeship programs were achieved, no substantial integration of craft unions would result because the overwhelming majority of white construction workers do not become journeymen through apprenticeship training. About 80 percent...are trained on the job."

"It is only Blacks and members of other minority groups who must climb the slow and often futile apprenticeship ladder."

While Labor Department

studies have noted the failure of apprenticeship programs, Hill charges the Department of Labor with financing and helping to perpetuate discrimination by funding meaningless outreach and related programs.

And, Hill says, "While the Department of Justice was suing building trades unions and contractors' associations...for violating the law, the Department of Labor was subsidizing them."

Hometown plans--which establish citywide goals and timetables for minority hiring in construction jobs--have also failed, Hill maintains.

"Although the legality of mandatory preferential hiring systems, as well as the Government's power to enforce them, has been repeatedly sustained in the courts, the Federal Government...has substituted voluntarism in the form of hometown plans."

Public Transportation Will Be In Demand

(Continued from page 1)
 will be Mrs. Joyce H. Johnson, who has already conducted studies on a number of rural transportation systems around the state, and Dr. Marion R. Blair, associate director of the institute.

"With increasing inflation and the accompanying shortage of fuel and other vital resources," said Saltzman, "public transportation in general will be in greater demand. This will be especially true for residents and industries of rural areas which will experience an even harder crunch from a fuel shortage as

they must travel greater distances to obtain needed distribution services."

He said that, except for the inter-state transportation services and a few demonstration projects, "there is virtually no public transportation regularly serving rural areas."

Saltzman said that Congress recently passed legislation and appropriated \$500 million for rural transportation systems.

"Even more funds and technical know how will be necessary to institute effective public transportation systems in rural America," said Saltzman.

100 Students Wait Until Last Day To Drop Undesirable Classes

By Barbara A. Bennett

According to a staff member in the Registration and Records office, all requests after the deadline were honored if the student brought a letter from the school dean requesting the Office of Registration and Records to honor the late drop. A good and sufficient reason had to be explained to the dean. However, this was for only a short time after the deadline.

There is no fee for dropping late. The staff tried hard to stick to the dead line. Hardship cases such as hospitalization, student practice teaching, death in the family, and cards sent by other students and not returned in these cases were approved by the dean of that school.

The office encouraged students to drop early, if they

planned to drop. On the last day of dropping, 100 students came

and this caused personnel problems.

President Ephraim Katzir Speaks On Israel's 'Nuclear Potential'

TEL AVIV AP-The newspaper Maariv quoted President Ephraim Katzir Monday as saying Israel has "nuclear potential," but it was not immediately clear whether he referred to potential for warfare or peaceful purposes.

The newspaper said Katzir made the remark Sunday to American science writers. Katzir was not available to confirm the report.

Israel is known to have two atomic reactors. American Scientists last visited the reactors in 1966 and reported then that the Israelis were not making nuclear arms. But they said one reactor was capable of producing plutonium, a basic component of nuclear explosives.

If the reference was to military applications, the report would reflect the first statement by a high Israeli official that

Israel is capable of moving actively into the field of nuclear explosives.

Maariv said Katzir was asked by the visiting science reporters whether the nuclear potential was a cause for concern. The president replied, "Why should it worry us. Let the world worry."

The newspaper said Katzir refused to disclose when Israel's nuclear potential might be realized openly. "You don't expect that here, in these circumstances, I would give you the date," the reporter said he told the science writers.

Katzir is himself a scientist widely known for work on molecules and membranes. He met the American and European science writers at his Jerusalem residence. A presidential spokesman said no copy of Katzir's remarks was available, and the president was out of town and unreachable.

The Israeli government in the

past has pledged repeatedly not to be the first country to introduce nuclear weapons into the Middle East, despite reports of Soviet atomic arms in the Arab world.

But many foreign reports have speculated that Israel had nuclear bombs, or at least nuclear components that could be assembled quickly in the threat of a nuclear war. The Israelis also have refused to sign the nuclear nonproliferation treaty, holding out for inclusion of the treaty in an over-all Middle East peace settlement.

Country Is Beset With Many Problems As The Holiday Season Approaches

By Mary Cropps

The Christmas season is supposed to be one of joviality and happiness and celebration. It is the time for giving and making others happy. However, this year the Christmas season is different. The country is beset with numerous problems that may have existed last year but were not so prominent as they are now.

People are beginning to face the reality that one day they may have to start worrying about where their next meal is coming from. This is a sad fact and a sad

fall from the former state of this country. How did it all come about? The answer to this question is hard to find. We can't blame it all on the corrupt government officials although blame does lie there. We have to put some of the responsibility on ourselves as individuals.

We have been much too apathetic about our own affairs. The energy crisis affects us; inflation affects us; the skyrocketing price of food affects us. We can't sit by and wait for things to get better

because they won't unless we act.

We have to make some adjustments in our lives concerning the conservation of energy. We have to adjust to inflation. Although times will eventually get better, they may get worse first.

This country has weathered a great many storms. The struggle will be hard but pulling together we will be able to defeat the troubles we face now. We must trust in God and our own ability to do something.

Summer School Abroad

Students Invited To Attend

College students from everywhere are invited to join Guilford College and UNC at Greensboro in either one of six summer schools abroad or a special two-month Seminar Abroad in 12 European countries in 1975.

Information may be obtained by contacting Center for Off Campus Studies, Guilford College, Greensboro, N.C. 27410.

Christmas with the folks might be a good time to hint that you would be ever so benefited by spending the summer learning and sightseeing in London, Paris,

Greece, East and West Germany, Italy, or Cali in Colombia, South America. Each offers eight credit hours.

Or perhaps you feel you really owe it to yourself to do the whole thing—visiting France, The Netherlands, East and West Germany, Austria, Italy, Switzerland, Greece, Turkey, Russia, Denmark and England.

This Seminar Abroad, which offers four credit hours, allows members to meet with college students in other countries and to question government officials about forms of government.

Under the summer school programs, students study languages and cultures for six weeks and then have three weeks for individual travel before regrouping in Europe for the charter flight to America.

The six summer schools and their courses are the following:

London—English history and art. Paris—French culture and civilization and the French language. Greece—"The Image of Greece in Contemporary Fiction" and Greek history.

East and West Germany—"A Cultural and Political View of East and West Germany" and the German language. Italy—"The Ideal of Humanism in Renaissance and Baroque Italy" and the Italian language. Cali—Geology and geography of South America and the Spanish language.

Faculty members will be from both Guilford College and the University of North Carolina at Greensboro.

Racial Overtones Charged According To Leon White

RALEIGH AP—Civil rights leader Leon White charged Thursday that a pattern of political discrimination with racial overtones has emerged in the firing of Black state employees.

He cited the recent retirement "which I think was forced" of Dr. John Larkins as director of youth development; the firing of Mrs. Juanita Baker as warden of the women's prison; and the suspension of Mrs. Deloris Clark as director of community programs at the women's prison.

All of them are Democrats. White said they are being replaced because the Republican Holshouser administration has

no more political need for them. The Republicans had hoped, White said, to sway Black votes in the recent election with promises of patronage. They failed, and the Black officials became expendable.

At the same time, he said, the elections left a number of white Republicans looking for jobs.

He said he will invite the major Black politicians in the state to a conference where they can "take a leave of absence for one day from their political affiliations and deal seriously with a Black agenda for 1975. If they don't come, then Black people will know who their leaders are," White said.

Orchestra Has Problems

By Byron Cotton

The University Concert Orchestra is a group of students who play symphony music.

The orchestra consists of 24 members and involves the course Music 309. Jimmie J. Williams, chairman of the Music Dept., said this course is designed to teach students the techniques of playing symphony music because "Blacks have a greater opportunity to play in professional orchestras."

One of the problems the orchestra is experiencing is the unavailability of students to be recruited. This is because most music students are being offered scholarships at other institutions.

Williams said that the project for the future is to develop a full-sized orchestra to complement the marching band.

The orchestra will provide music for the Christmas concert which will be held December 8, in Harrison Auditorium.

It's Santa Claus time again so all you Santas better have a sizable bank account. photo by Lance

Earnest McCoy

Counselor Will Retire

By Daryl Smith

Earnest McCoy will retire after seventeen years of services.

Originally from Norfolk, Virginia, McCoy first came to A&T in 1933 and graduated in 1937, majoring in Agriculture. Initially he started working with the building and grounds department, and from there he was employed at the Book Store.

From 1960 to 1967 he served as counselor for Scott Hall; from 1967 to 1971 he served in Cooper Hall. From 1971 to the present time he has served in Curtis Hall. This all comes to about 17 years of service.

Asked how he felt about A&T's future, McCoy replied, "The school looks like it's doing pretty good. I feel that A&T in developing, but we all need to support each other and help one another." McCoy continued by saying, "A&T needs to get the administration and faculty to work more with the students. They need to know more about the students. That's the only way things will be done right and fairly."

McCoy also stated that the students will show interest, but other people will have to show interest also.

The retiring counselor also had some revelations about the struggle concerning the veterinary school. McCoy said, "You read in the papers about all the money that different foundations donate to A&T but when are they going to start helping the Black students at A&T?"

McCoy continued by stating: "We are going to have to show more interest in ourselves."

Along with his services here at A&T, McCoy worked for 15 years with the North Carolina Extension Service in Elizabeth city, and taught high school for three years in Siler City.

Earnest McCoy

photo by Carter

Does UNC Have Faith In Itself?

Reprinted from The Daily Tar Heel

By Lee House, Jr.

I was so excited about the possibility of NCA&T getting a school of veterinary medicine as first reported in the DTH on Oct. 29 that I wanted to submit a letter then requesting support and highlighting this possible program as a real test of the Affirmative Action Plan we've all heard so much about for the last several months; but, I felt I really didn't have time. I talked to several people about this great new opportunity and was foolish enough to believe NCA&T had a decent chance to get the first and only school of veterinary medicine in North Carolina merely because it made a request and proposal for the school before any other institution, and because I dared to believe this state (and the UNC Board of Governors in particular) was actually concerned about equalizing educational facilities among the public schools of higher education in this state so as to promote full integration of students and faculty.

When I read the story announcing the unanimous recommendation of the board's committees on educational planning and budget to put the vet school at NCSU with little or no regard to the Affirmative Action Plan, I became so incensed and later depressed that I just had to express my reaction to this whole situation regardless of my rushed schedule.

I was encouraged a little, however, when I learned Friday evening that the board had tabled its decision on the placement of the vet school for a

month. Even, so, I'm now very apprehensive about the latest action. Considering the committee action and the news releases up to this point, I'm afraid to believe this postponement is any more than a ploy to further beguile those who want to believe in (much of) the system, or just more time for the board to develop credible excuses for putting the school at NCSU where it would definitely impede desegregation of the UNC Consolidated System. The board, having been petitioned from various sources to seriously consider rejecting the recommendations to put the new vet school at NCSU in light of the Affirmative Actions Plan and put at NCA&T as originally requested, has at least shown some sensitivity in doing what "in their hearts" they know is right. How could I let myself believe that the UNC Board of Governors was ever really serious about equalizing the facilities at traditionally Black schools and predominantly white schools in the UNC System or carrying out any other "commitments" in the so-called Affirmative Actions Plan? When certain campus critics of the Plan attacked it when it first came out as just some more double talk, and the brainchild of those who continue to speak with forked tongue, I dared (even with our history of race relations) to be optimistic and take a wait-and-see attitude hoping that fairness and equality had at last prevailed.

I concede the argument. The double talk is just more sophisticated and covert

(especially for Southerners) than before-designed to fool those who would like to believe that UNC is really interested in fully equalizing and integrating its consolidated system from both ends of the spectrum.

Integration is a two edged sword-it works both ways. Blacks cannot be expected to benignly integrate into predominantly white institutions and demand no change at traditionally Black institutions. Putting the proposed school of veterinary medicine at NCA&T in spite of any other alleged advantages of putting it at NCSU would go a gigantic way toward equalizing the facilities of at least one school in the system and allowing opportunity for integration of the campuses to occur both ways. Surely large numbers of white students would choose to go to NCA&T where the best (and only) vet school in the state could easily be located, despite the majority racial complexion of the institution. This still remains a perfect opportunity for the UNC Board of Governors to really do what they've said-or at least do what they've put on paper. The perfect test at hand, and what indications do we get thus far?

Query, what does this say about UNC's good faith to carry out the Affirmative Actions Plan? What does this say about UNC's faith in the abilities and

*Classes that meet "on the half hour" are to use the earlier hour for the purpose of determining time of examination.

A common examination for Chemistry 100 will be held Thursday, December 12th, 4:00-6:00 p.m. A common examination for Chemistry 101, 104, 105, 106, 107, and 221 will be held Friday, December 13th, 6:00-8:00 p.m.

Night classes meeting in three-hour blocks of time, and Saturday classes, will have their final examination the regular meeting night during examination period, December 12-18, 1974.

All examinations will be held in the regular classroom unless notified otherwise by the instructor.

All grades are due in the office of Registration and Records by 12 Noon, Friday, December 20, 1974.

The Point Is Pointless

By Rosie A. Stevens

It is pointless to belabor the point, a point made time and time again, but seldom internalized, or even considered. However, vainly, the point must be attempted again. This point is that many of us who can and do find material in Bluford Library because we know how and where to look find it damnably maddening when we discover that our peers have no interest in, or consideration for, the rights of others. This is especially true when after a long, exhaustive search of indices catalogs, and other materials, we have compiled our bibliographies tentatively, and receiving no warning before hand, indeed we've checked, that anything is missing, we discover that immediately after page 70 comes page 90, and that pages 71-89 are the pages carrying the material we need.

If we find the situation occurring three times on the same night, it is a bit more than merely damnably maddening. We find that we do not want to run into the person who even looks suspicious for fear of the results.

There are very few students on this campus who do not know it is not honest to mutilate or steal books, magazines, and journals from the library. Those who cannot make the distinction should not be here. However, some people just don't seem to care. These people can make a distinction and do not.

This kind of mentality is only reflective of an attitude of laziness, of "getting over" rather than making an effort to do what one should do to obtain an education and to become an intelligent educated person. It is the same kind of mentality that leads to the practice, all too common on this campus, of stealing tests for oneself or others, of trying to get other people to do one's homework, one's papers, or even to take one's tests for one. In short, it is a very stinking, rotten, pervasive kind of dishonesty that motivates one to do such.

Why does this pervasive dishonesty persist? Very simply it is because no one ever instilled the basic values of scholarship into the perpetrators of such acts. Such people do not seem to be aware of the meaning of an unplagiarized piece of writing, an honest term paper or anything else.

It is now time that students on a college, no a university, campus begin to behave as college students, not as criminals and thieves. Otherwise, considerable doubt will be cast on the integrity of the student body as a whole.

At Annual Festival

Choir Thrills Church Audience

By Jeanne Wakefield

A&T's own Fellowship Gospel Choir thrilled a packed Wheat St. Baptist Church audience during the second night of the Second Annual National Black College Gospel Festival that was held in Atlanta, Georgia, last week.

Five College Gospel Choir from the Eastern part of the country also shared in this great event. There were also Gospel music workshops for members of the various choirs.

The main purpose of this Gospel Festival are to reclaim the

beauty and richness of Black religious music, to get the participants to live gospel as well as sing, and to strengthen the bond between the Black campus and the Black Church. After the mass processional the Dr. William Holmes Berders gave words of welcome before the "meat" of the program.

Each choir had a performance time of 15 minutes.

The selections sung by A&T this year were A Balm in Gilead, 'Tis So Sweet To Trust in Jesus, and, by popular demand from last

year's festival, Savior Lead Me Lest I Stray. A&T's performance was the climax of the evening.

An unexpected altar call was held while the Fellowship Gospel Choir was singing the last selection. This left the audience in a relaxed state and the love that was in the people could actually be felt. During the stay in Atlanta memorial service for the late Dr. Martin Luther King, Jr. was held at Ebenezer Baptist which is a block away from Wheat Baptist Church.

Campus Haps

The annual Christmas Concert by The A&T State University Choir will be presented Sunday, December 8, 1974 at 6:00 p.m. in Harrison Auditorium.

Chapel Worship Service Sunday, December 8, 1974, 11:00 a.m. in Harrison Auditorium. Speaker: Rev. D. W. Browning, Presiding. Elder of the Durham District, Christian Methodist Church, Durham, N.C. Music by the Fellowship Gospel Choir.

Schedule Of Job Openings Beginning Spring Semester

To participate in the Cooperative Education Program, the student must have at least a 2.0 average and must have completed his freshman year of study.

All interested students should contact the Cooperative Education Office, Room 202, Dudley Building.

Your Attention, Please

ALL DECEMBER GRADUATES PLANNING TO PARTICIPATE IN THE COMMENCEMENT EXERCISE, MAY 4, 1975, PLEASE PAY THE RENTAL FEE AT THE CASHIER'S OFFICE AND BRING YOUR RECEIPT TO THE BOOKSTORE FOR YOUR MEASUREMENTS TO BE TAKEN

YOUR CAP, GOWN AND HOOD WILL BE ORDERED

AND AVAILBALE FOR COMMENCEMENT. YOU MAY ORDER YOUR ANNOUNCEMENTS FOR GRADUATION AT THE SAME TIME.

ASSOCIATE CAP AND GOWN RENTAL FEE IS \$5.75. BACHELOR CAP, GOWN AND HOOD RENTAL FEE IS 10.75. MASTER CAP, GOWN AND HOOD RENTAL FEE IS 12.00.

This Semester's Last Issue

Of The A&T Register

Will Be Tuesday, December 10.

In Taylor Art Gallery

Paintings Will Be Displayed

By Dorothy Payton

There are some 40 colorful displays of collages, oil printings, water colors, soap screen prints, pencil drawings and pastels on display in the Taylor Art Gallery in the lower level of Bluford Library.

These famous paintings were picked by Three Nationally Renau judges from the North Carolina Museum of Art Traveling Exhibition, with six members of the Artist League hailing from Greensboro, according to Mrs. Miller, director of the gallery.

Respectively the exhibition is divided into two areas where the Greensboro Artists have their

section, and the other artists from such places as Raleigh, Boone, Winston-Salem, La Grange, Albemarle, Hendersonville and Carrboro are also displaying a variety of styles of realism, abstracts, and non-objective scenes, explained Mrs. Miller.

Generally in the gallery, there are bulletins or brochures to explain the exhibition, therefore

it should be relatively easy for the public.

This exhibition will come down on December 18, and there are only two more weeks to stop by and observe these beautiful works of art. These paintings range from \$100.00 to \$1000.00

The gallery is open daily from 9:00 a.m. to 5:00 p.m., and on Sunday from 2:00 p.m. to 5:00 p.m.

Partytime Ain't Anytime

These Next Few Weeks!

SPORTS NOTEBOOK

By Blannie E. Bowen

Time surely has been flying this semester. One last column and the year is over. In certain respects, I am glad. In other respects, I do not care to answer.

But, can anyone remember the movie a couple years ago by the name "Diamonds Are Forever?" It was a swell movie, but the title of the movie is not what I am most interested in.

Last year, our basketball team had the famed "Diamond Offense." This year Coach Reynolds said he is using a modified version of the diamond.

I am wondering if the diamond is counterfeit, plaster, or just ole fake as we would call it down home.

The Diamond Offense has proven to be counterfeit in the Aggies' first two games. One was a one-point loss to St. Augustine's College and the other was by eleven points to Mercer College.

Before the season began, I said, if the team did not perform to great heights this year, it would not be from the lack of talent. I checked with the coach this week and he assured me he has the talent.

Now, we must look even further into the situation and find another reasonable excuse for those two losses. Coach Reynolds told me he now lacks team experience and consistency.

Excuses, excuses, and more excuses will result since no normal individual would want to take the blame. Some of the players have exhibited shades of brilliance on occasion.

Some of these same players have also made bonehead plays which inexperience will certainly bring about. It is too early in the year to start the usual gossip which goes hand-in-hand with Aggie athletics.

I must congratulate Coach Reynolds for the outstanding job he has done in staying two steps ahead of me this time. Gosh, I wish I had his talent to change adjectives so rapidly to describe the same basketball team.

* * *

COACH MELVIN PINCKNEY OF the wrestling team was firing mad the other day when I stopped by to chat as we normally do. Pinckney was so upset you could have cooked an egg on the top of his head.

He had a right to be mad. His wrestlers had just finished hosting the first annual A&T wrestling tournament and not a word about it appeared in the confines of this paper.

Only a couple of inches appeared in the city papers as well. Pickney brought some 12 colleges to Aggeland and only one team left here with a better record. Aggie Charles Simmons was the most outstanding wrestler in the match.

Pickney's wrestlers have compiled a 32-12-1 record over the last four years. He has the best program on campus and I congratulate him for doing a great job. Your program will get more ink from now on.

Hornets And Hawks Face Winless Aggies

Delaware State College and the University of Maryland on the Eastern Shore loom as the next foes for the winless Aggies of A&T.

Coach Warren Reynolds leads his team against the Hornets of Delaware Coach Ira Mitchell Friday night. Mitchell has a squad returning which won 17 and lost only nine games a year ago.

Leading the Hornet attack are guards Wade Pittman and Sam Shepherd. James Roundtree is the center and he is 6-8. The remainder of the team returns from last year.

Delaware blew the Aggies like the wind last year when the North Carolina team went to Dover, Del. The Hornets won by 20 points up there.

Maryland-Eastern Shore is the case of a team going from riches to rags in only one year. John Bates coached the team to the visitation as well as tournament championship in the Mid-Eastern Athletic Conference last year.

Gone from the nationally-ranked team of a year ago are the coach and four of the five top players. Talvin Skinner, Bill Gordon, and Rubin Collins have matriculated to the professional

For 1974 MEAC Season

All-Conference Team Named

Senior cornerback John Hampton of A&T has been named to the 1974 MEAC all-conference team. Hampton along with teammates Dexter Feaster and Walter Bennett were named to the select group.

Howard and North Carolina Central shared the second spot in the regular season race, but Howard got six men on the team. Morgan State finished third in the race, but the Bears got six men on the team as well.

Conference champion South Carolina State placed four players on the team. Delaware State and Maryland-Eastern Shore received two places each on the elite team.

On the offensive team were tight ends Bennett of A&T and Julius Gamble of Howard. Both

players were chosen when a tie resulted in the voting.

Tackles were Frank McQueen of Morgan and Warren Calhoun of Howard. William Thompson of Morgan was the guard and Dwight Pettiford of Central was the center.

Feaster was the split-end and Darius McCarthy was the flanker. McCarthy is from State. Big James Smith of Central and swift Bob Hammond of Morgan were the running backs.

Gamble was also chosen as the placekicker for the squad. Morgan's Steve Turpin won the punting spot on the team, while UMES's Mile Royale was the return specialist for the select team.

South Carolina State had one of the best defensive teams in the

MEAC and several Bulldog stars were rewarded for their outstanding year.

Defensive end Harry Carson of State was one of the top defensive players in the league and he received his reward by being named to the team. The other end position was filled by Central's Bubba Smith and UMES's Carl Hairston.

The tackles are Howard's Ben Harris and State's Robert Simms. Razzie Smith of State; Sam Jones of NCCU and Eugene "Superman" Simms of Morgan combine to form the linebacking corps.

Cornerbacks are Walt Tullis of Delaware and Hampton of A&T. Nate Dancy of Delaware and Richard Tyus of Howard are the safety men.

The life and loves of a wrestler or which end is up? Coach Pinckney's blood thirsty crew is getting ready for two matches this weekend.

Cagers To Play Preliminary Games In The Greensboro Coliseum

The A&T basketball team will play the preliminary game of two Atlantic Coast Conference games this season at the Greensboro Coliseum.

Athletic Director, Cal Irvin, announced that the Aggies will play Winston-Salem State on December 14 when national champion North Carolina State

meets Oregon State.

A&T will meet Catawba on December 28 when the University of North Carolina meets the University of Kentucky.

Irvin said that all A&T students will be admitted free to the five coliseum games, but will have to purchase tickets for the two preliminary games, since they are being sponsored by North Carolina State and UNC.

Admission for the Winston-Salem State game on Dec. 14 will be \$5.00 for students and \$7.00 for adults. Admission for the Catawba game on Dec. 28 will be \$3.50 for students and \$7.00 for adults. Tickets may be purchased from Latham Wallace in Campbell Hall.

ranks.

Returning for the Hawks are big 6-10 center Joe Pace and 6-5 swingman Mike Casey. The rest of the team is inexperienced and young. This might be a blessing under the cover for the Aggies.

Coach Reynolds leads his team to Princess Anne where his Aggies tasted defeat last year. Things might be different this time though.

"We can beat Delaware based upon the competition we have played already. We can go inside to Lon Smith and Sinclair

Colbert or we can go outside with Allen Spruill. Our personnel is now playing as a unit," explained Coach Reynolds.

Two things the coach is not short on are optimism and confidence. Coach Reynolds remarked:

"In terms of personnel, but not experience, if we can beat both Maryland and Delaware up there, that will be two great conference wins for us. If we can come back and beat North Carolina Central down here, then we will be well on the way to winning the MEAC championship.

SPORTS

Pinckney Elaborates On Team

By Blannie E. Bowen

"Generally speaking, we will have a better team this year than last year," remarked Mel Pinckney, coach of the A&T wrestling team.

Pinckney was speaking about his highly successful wrestling program which has netted him 32 victories, 12 losses and only one tie over the last four years.

The highly successful coach said he will be hurting for wrestlers in the heavy weight classes—167 pounds, 177 pounds, 190 pounds, and the heavy weight division.

Only two wrestlers are missing from last year's 9-6 team. Gone from that squad are 158 pound Donald Jenkins and heavy weight Danny Coleman.

Pinckney did not recruit any new wrestlers to replace Coleman and Jenkins. He must be hoping for a miracle or some good "walk-ons." Pinckney said his scholarship total reached only \$2,000 this past year.

He has already received part of that miracle since Arthur Boone and Ike Smith are now competing for him in the heavyweight class as walk-ons.

Many pictures were hung on Pinckney's office wall four years ago and now they are starting to collect dust.

Pinckney could afford not to spend excessive amounts of money this year because he has had banner recruiting years for three consecutive seasons.

"Charles Simmons will go the nationals this year," boasts

Defensive Player Of The Year

Named By Coaches

DURHAM, N.C. AP—Harry Carson, defensive end of South Carolina State, is the defensive football player of the year in the Mid-Eastern Athletic Conference.

He edged three others in the voting by the coaches and sports information directors of the conference.

The others were Eugene Simms of Morgan State, Carol Harriston of Maryland-Eastern Shore, and Charles Smith of North Carolina Central.

Important!

We are compiling a poetry supplement for the Paper. The deadline for submitting poems, and other materials is December 8..

Please contact Lance VanLandingham at THE A&T REGISTER; Box E-25; Campus or 119 Nocho Street.

The newspaper office is the "little house" located across the street from Graham Hall.

Pinckney as he starts to name his talented squad.

"Roosevelt Hilton will go the nationals as well, and he has a good chance to place high in the nationals since we are now in Division I of the NCAA," continued Pinckney.

"Mel Fair has been hurting; I do not know what he will do, but his attitude has changed for the better and this is a good sign.

"Darnell Glover has been a surprise; I believe he is one of the most improved wrestlers on the team and he will do a good job," Pinckney explained.

Eric Harris will be wrestling at

either 142 or 150 pounds, according to his coach. "Harris is the first Black to ever place in a Michigan wrestling tournament," Pinckney said.

"Horace McDonald was 17-1 last year; Sylvester Wilkins has improved, but I don't know how much he will help the team and Clint Bostic is the only wrestler Pinckney has at 190 pounds. How does Pinckney see this year?

"I will be satisfied with 100 per cent, that means winning them all since I am a positive thinker," Pinckney exclaimed with his confident smile.

Coach Melvin Pinckney

All kinds of people

At General Electric, all kinds of people with all kinds of talents and backgrounds contribute to our company's progressive programs in the space systems and environmental fields. We hire based on ability and willingness to contribute; it is our goal to be truly an "equal opportunity employer".

Our participation in the space program, from its inception to the present day, demonstrates our dynamism and flexibility. New, reliable techniques were needed to explore the unknown and we provided them. Today we are studying the application of the technology gained, for the practical solution of ecological problems on earth. We're researching and developing ventures in medicine, oceans, environment, housing and manipulators.

Clean Air . . . Pure Water . . . A Healthy Way of Life. Integral to achieving these ends is the need to broaden our staff

through careful selectivity. We're seeking individuals with a background in aerospace, mechanical, electrical and metallurgical engineering, as well as those with backgrounds in the related disciplines of physics, mathematics and computer science at the BS, MS and PhD levels. Ability is more meaningful to us than appearance; initiative and intellect more vital than impression or idiom.

We offer you the tools for growth — a professional environment, an unexcelled staff, and all the responsibility you are willing to assume. You bring to us your innate and educated capability. We will dedicate ourselves to improving the quality of life. TOGETHER we can change the world. Contact —
