Urban Affairs Assistant

By Benjamin Forbes

Special Assistant to President Gerald Ford on Urban Affairs, Arthur Fletcher, addressed students here Wednesday night in the Student Union.

Speaking before a group of approximately 40 students, Fletcher said there is a lack of quality in environment in large cities. When attacking the problem of poor environment in cities, Fletcher said he goes by a specific formula. This plan he said will work for anybody in any situation.

Fletcher stated that the following formula must be used before taking action on any goal. First, he said, before taking action, set a goal. Before acting on the goal, do some training. After training, he said one must develop a strategy. Upon the goal, do some training. After training, he said one must develop a strategy. Upon developing a strategy, one must set up certain policies. Planning follows policy planning, then set up certain policies. Developing a strategy, one must develop a strategy. Planned policies will work for anybody in any situation.

In closing he said Blacks have been victims of the government because "we were not there to participate."

Practice Teachers Begin Work

By Maxine McNeil

Dr. Frissell Jones, student teacher coordinator, said 36 education majors from various departments at A&T began doing their practice teaching Monday.

The Students were placed in five different schools in Alamance and Guilford counties, said Dr. Jones. Of the 36 students practicing, only six are males. Dr. Jones stated that they were all elementary school women. Not many men major in early childhood education, I encourage more men on A&T's campus to major in early childhood, he said. They will be able to find a job easily. Children need the male influence.

"If you notice," Dr. Jones said, "most of your teachers in elementary school were women. Not many men major in early childhood education, I encourage more men on A&T's campus to major in early childhood, they will be able to find a job easily. Children need the male influence during the early years."

The three factors which influence where a student is placed for practice teaching are: the student's choice, the department's wishes and the will of the school board in question, said Dr. Jones.

Chief Witness Admits Perjury

WILMINGTON (AP) - "There's no justice in Wilmington and there's no justice in the state of North Carolina," said Allen R. Hall, chief prosecution witness in the trial of the Wilmington 10, during a press conference Wednesday in Wilmington.

"There's no justice in Wilmington ... Black or white," said Allen R. Hall, 22, says he perjured himself as part of a deal with the prosecutor during the trial and called Wednesday for the immediate release of the Rev. Ben Chavis and the other nine members of the group.

Chavis, eight young Black men and a white woman are serving lengthy prison sentences for their convictions on charges of firebombing a grocery store during Wilmington's 1971 racial violence.

Charlotte attorney James E. Ferguson II, representing the group, has petitioned for their immediate release on bail, saying he believes evidence "Bobby Six" the state used perjured testimony to secure the petitioners' convictions, which the state knew or reasonably should have known was perjured."

Allen said he complied after being told his family had been threatened by Chavis.

Police Chief D. L. Bruestle said Hall distributed a separate handwritten statement Sept. 24, which also told of lying under oath. He did so because of threats made against his 15-year-old girlfriend, Bruestle said, adding that Hall told police an anonymous caller warned him to change his testimony and pay $5,000 or he would be safe.

Hall confirmed filing a missing report on the girl, but Hall said he does not know where she was at the time he filed the report.

New Food Committee Meets To Discuss Cafeteria

By Anthony Motley

The Student-Faculty Food Committee met Wednesday evening to discuss their observation of the cafeteria. Bill Pettiford, vice-president of the SFA, remarked that, at one point, it appeared that the cafeteria situation had improved and then started to return to normal.

After careful observation by the Food Committee, Pettiford stated that they were still impressed. The committee spoke with Mrs. Laura Thornton, acting director of the dining hall, and received encouraging statements. Mrs. Thornton told Pettiford and the committee that she wanted to serve the students and, if any student had a complaint, her office was open to them.

The committee learned that the salad bar was empty a lot at lunch time because of students on work-study leaving to have lunch at various hours. Mrs. Thornton is hoping to obtain sodas again in the future. Pettiford added that the dining hall is now cleaned very well at night and three times a day.

Mrs. Thornton explained to the committee that the reason they run out of food sometimes is that she does not believe in cooking food overnight. She added that, in the future, her staff will wear name tags thereby giving students an opportunity to learn the staff by name; and, when making a complaint, they can point out the person responsible.

Pettiford expressed his desire to work with Mrs. Thornton in the future. He added that he felt a lot can be accomplished and survey of food preferences among students will be taken at a later date.
HENNING, Tenn. (AP) - Alex Haley, author of the best-seller "Roots," came home Thursday, back to the front porch where his grandmother first told him stories of the family.

"It makes me feel very humble and sentimental, sitting on the very same porch. My grandmother would sit and talk about the family," he said.

"Swinging in the porch swing, the 55-year-old Black writer saw the small town dying in America."

"There's a saying I've heard that every time a small town dies, a little bit of America dies with it. I believe that."

He sees Henning dying.

"Henning is now diminishing. The cities are being fed by these little towns. We grew up dreaming of going north.""Haley, whose book traces his family back through his mother's side to Africa in 1750, had returned to Henning so the United States Information Agency could film his former home, the New Hope CME Church where he is a steward, and the cemetery where his grandmother, Cynthia Palmer, is buried.

Henning, located in West Tennessee's Lauderdale County, between Covington and Ripley, a mile off U.S. 51, has a population of 642, 100 of whom are Black. Like most small Southern towns, the businesses and offices are lined up on either side of the main street.

The people, according to Haley, are the small town's charm.

"These towns had a softer culture than the cities. I don't believe a person coming to this town hungry would leave hungry. Someone here would feed him." Relations between the races, Black and white, were relaxed, he remembered.

Pointing across the street to a church, Haley said:

"We used to sit out in that church yard and feel sorry for those white people because they didn't know how to sing and their preachers didn't know how to preach. Our preacher could lift the roof off the church.

"After seeing several old friends and making a speech at his church, Haley left Henning for Memphis and Atlanta and a hectic schedule promoting his book.

He sails December 13 from Seattle on a freighter bound for Japan. Aboard ship, he'll work 16 hours a day on his next work, "My Search for Roots," which will describe the 12 years he spent researching his best-seller.
Band To Perform At U.S. Capitol

The 180-piece A&T band, conducted by Robert Williams, will present a special concert on the steps of the U.S. Capitol on Saturday, Oct. 23.

The band was invited for the performance by North Carolina Congressman Richardson Preyer. The band was recommended by George Russell, an A&T graduate and aide to Preyer.

The concert, from 10 to 10:30a.m., will feature "Stars and Stripes Forever", "National Emblem", "Just to Be Close to You", "En tro", and "Get Away".

Williams is a graduate of Alabama State College and holds the master of music degree from the University of Michigan.

The band will also play Sunday for the League of Women Voters at the old train station, and will participate in the appearance of presidential candidate Jimmy Carter in Winston-Salem next Tuesday.

Three Students Participate In Evaluation Contest

By Rodney McCormick

Recently, three A&T students were invited to participate in the 55th collegiate Dairy Products Evaluation Contest. The students were Melanie Leak, Rob Jarman, and Rodney McCormick, all of the School of Agriculture.

The aim behind this contest is to have students act as judges in scoring them on flavor, body, texture, and appearance. The five products judged were milk, cheddar cheese, butter, ice cream, and cottage cheese. The A&T team was somewhat successful in the competition; but the experience was of great value and knowledge to them.

Accompanying them were Leon Boyd, instructor in Food Science Department and Jorge Starlitz, assistant professor in the Dairy Department.

This was A&T's second appearance in the competition; its last was in 1975. Professor Starlitz appeared in the contest in 1947, representing the University of Connecticut.

A&T Student Union Rents Rooms

By Anthony Motley

Mrs. Margaret Faust, program director for the Memorial Union, states that the union is not only culturally and socially oriented, but it has rooms for rent.

The cost of a single is $6.24 and $7.28 for a double. The rooms are limited because of the utilization of some rooms for office spaces.

When the Union was built, the athletic department wasn't supposed to be housed there; but, because of a lack of space in the gym, they were moved to the Union. Mrs. Faust commented, that the rooms contain bathrooms, bed, televisions, wall pictures and are fully carpeted. They can be rented by students faculty, relatives, staff or anyone who has affiliations with A&T.

Some activities held in the Union are lectures, films, banquets, fashion shows, games, and meetings. There are several religious activities and seminars held also, said Mrs. Faust. She added that students can obtain top magazines to read and relax in the canteen. The Union is in operation 7:30a.m. to 11:30p.m. Monday thru Friday and 7:30-12:30 weekends.

McGEORGE SCHOOL OF LAW UNIVERSITY OF THE PACIFIC

SACRAMENTO, CALIFORNIA

May 1, 1977 is application deadline for first-year students seeking Juris Doctor degree in 3-year Day or 4-year Evening program beginning in September 1977. Accredited: American Bar Association. Member, Association of American Law Schools.

PRE-LAW DISCUSSION FOR PROSPECTIVE LAW STUDENTS

DATE: TUESDAY, OCTOBER 26, 1976
TIME: 9:00 am - 11:00 am
PLACE: Ms. Sharon Richard, Administrative Assistant Career Planning & Placement North Carolina A&T

FOR APPOINTMENT OR FURTHER INFORMATION
The Year Of The 'Shaft'

This is beginning to seem like a year of "Shaft" for The A&T Register. First of all we started out the year without an operating budget (but then again most if not all organizations did the same). When we finally got the first budget, it was so small, we all thought it was a practical joke. Later the administration decided to add a little more to the joke for us to operate with.

The funniest part about the above incident was this organization submitted a budget request to the Dudley Building long before the end of the past spring semester. "Unfortunately" the copy of the budget was mysteriously destroyed this summer. It was destroyed when A&T's version of "The Towering Inferno" made its debut in Matthew King's office. King is the vice-chancellor for fiscal affairs.

We were latershafted by the physical plant. During the summer rains, the outer office space of this organization's building was flooded with water. Numerous request were made to buildings and grounds to repair the front door through which the flowing waters came. When someone was finally sent to check on the door, approximately three weeks had elapsed. The person sent to repair the door was the door it. I have never seen anything get repaired by staring at it.

When those calls were made to the physical plant, it was explained in detail that, if the door were not repaired soon, then the building would be needing a new floor. Well last week it rained again—and guess what happened? That's right, we temporararlly had a small pool. Now we not only need a new front door, but a new floor as well.

Where are the maintenance men on this campus? Certainly this building stands in need of repair more than the ground in front of Vanstory and Zoe Barbee Halls. There are people on this campus who supposedly work for buildings and grounds that spend most of the day like they are convalescing after major surgery.

Maybe the staff of this organization will have to let the entire building fall before help arrives. Then we would need the Red Cross. Is there anybody listening out there?

Leading editorials are written by the editor of THE A&T REGISTER. Such editorials will not necessarily carry a byline and will not necessarily reflect the opinions of the University or the entire staff. Staff members are free to write dissenting opinions.

The A&T Register

Published twice weekly during the school year by students of North Carolina A&T State University.

To receive THE REGISTER, please send $7.50 to THE A&T REGISTER, Box E-25, Greensboro, North Carolina 27411 to cover mailing and handling costs.

Member: Associated Collegiate Press.

By Mary E. Cropps

If you are wondering what is being constructed in front of Vanstory Hall, then you are not alone. The students do not know; the construction workers do not know; and even the director of the physical plant, Gerard Gray, isn't sure.

All we know for sure is that a cement circle with four cement sidewalks leading to it is being built. What is going to be in the circle is still a mystery.

Gray said the construction is being built to be a center of attraction for the campus. He also said something will be put inside the circle such as a fountain. He said this landscaping device is intended to be attractive.

This is all well and good, but what is the center of attraction? Is Gray saying this landscaping device is intended to be attractive? Or is this landscaping device intended to be a center of attraction for the campus? Or is this landscaping device intended to be attractive for the campus?

What is really a mystery is why time, manpower and money are being spent on a landscaping device with no purpose except to look attractive. Having an attractive campus would be very nice, but not at the expense of the students. There is a need for improvements that need to be made to make life at A&T more comfortable for the students. An attractive campus can wait until students have a decent place to sleep, eat and work.

The new center of attraction should be finished before the winter sets in, said Gray. So all the residents of Vanstory and Zoe Barbee Halls can have something nice to look at while they sit and shiver in cold rooms. But, that's progress.
The A&T Register on October 5, 1976, did a grave injustice to several persons. These persons are the checkers that were and are not guilty of the claims made in The Register. It was not fair to class all of the checkers by one person and one incident. The persons that this happened to should have been gone to Mrs. Thornton and told her who the checker was and what was said, since she is in charge of the cafeteria.

We are not saying that the incident did not happen; we are saying that, as students and checkers, that the overall attitudes of the cafeteria employees are very good. Whom do you know that would put up with the foul language and abuse the way that we do without retaliation? No one.

We believe that some of the A&T student body have forgotten what good manners and courtesy are all about. Never in one place have there been such attitudes by supposedly adult young men and women. There are students here who have very limited vocabularies. They consist of four-letter words and merchant seaman dictionary and deck-words really foul. The golden rule says “Do unto others as you would have them do unto you.” Are you prepared to be cursed out and called filthy names? If not, why do this to the cafeteria checkers and other employees?

You know that you are allowed only one, dessert, so why try to sneak another by the checker, or come back saying that you forgot it, or that someone stole yours from your tray? You are only causing your fellow Aggies that come after you in line not to have any. They deserve dessert just as well as you do. We are not saving the dessert for ourselves; we are trying to make sure that everyone has a fair chance at getting some. The cafeteria checker has his or her job to do, which is: 1. Receiving students at each meal when leaving the line by checking each student’s ID card (both sides) and doing a physical count. You are counted because this is the way to let the cooks know how much food to prepare. If you would go through the line designated you by your meal sticker number, and one by one be checked off and counted, instead of panicking up on the checkers, perhaps you would not have to stand in line and wait for more food to be prepared. 2. Keep bread and napkins out, provided they are under the counter. The checker is not required to run down these items; they are to be within easy reach.

For any general’s plan of action to work, his troops must each do their individual jobs, in other words, be a team. Aggies get together, be a team. Each one work with everyone else and let’s do unto you.” Are you prepared to be cursed out and called filthy names? If not, why do this to the cafeteria checkers and other employees?

AFROTC Receives Offer To Appear On Television

By Robert E. Beaslev

The Air Force ROTC Drill Team, has been contacted by Ernie Heater, a representative for WTV-D-TV of Durham, to be filmed for a televised performance. However, the film cannot be produced until new uniforms have been completed and sent to the drill team by the Glendale Industries of Cresthill, New Jersey. There are approximately 22 persons on the drill team and they will be in action on October 30 for the Aggie Homecoming parade. It is understood that the filming of the drill team will be during that time.

The acting commander is Cadet/Captain George Speed, and Captain Leslie Davis is the advisor of the drill team.

Area College Editors Meet At GC

By Benjamin T. Forbes

A meeting of area college newspaper editors was held Tuesday on the campus of Greensboro College to discuss publicity problems of the Greater Greensboro Consortium.

Dr. William J. Lanier, executive director of the consortium, said that such a meeting has been needed for quite some time. The primary purpose of the meeting, he said, was to make students more aware of the consortium.

The Greater Greensboro Consortium is comprised of Bennett College, Guilford College, Greensboro College, High Point College, UNC-G, and A&T. An agreement is being set up to enable students from area colleges to cross-register for any courses not available at their particular institution.

Presently the Regional Consortium (Bennett, Greensboro and Guilford Colleges) has established a shuttle system that transports students to and from the three campuses. Lanier said he would like to see UNC-G and A&T incorporated into the shuttle system.

According to Lanier, a central point of transfer would be set up in the vicinity of downtown. A bus would bring students from their campuses to a central location where they would be taken to other campuses.

The reason the plan has not materialized is the lack of cooperation between the schools. The primary materialized is the lack of cooperation between the schools.

Presently, no fee will be charged for open access to courses in the host institution. In cases where special courses are taken, each student may obtain permission from the designates coordinating officers on his home campus to take a course at another institution; a student will present an approved course registration or to the registrars on the host campus in order to complete any details involved in registration.

Also the host campus will supply all grades through the registrars for each campus. There is no limit to the number of courses that a student may take at another institution.

Students will have access to all research and library resources at another institution if they are registered.

It is not known how much of an impact the meeting will have on those participating because only UNC-G and A&T were represented.

The organizational queens October II, at 7:30 p.m., to announce their themes. The registration fee of $35 will be paid by 5:30 p.m., Monday. You may pay the money to the SGA treasurer or to Miss A&T. The meeting will be held in the SGA office.

A set of keys with the name Karen attached to it was found in Moore gymnasium about two weeks ago. Thw owner can pick it up at The Register office, across the street from Graham Hall.

There will be a chess club meeting Tuesday from 1 p.m. to 4 p.m. in the Student Union in Room 100. All interested persons are asked to attend.

The Student Association will be sponsoring two Continental Trailway buses for the Howard Game. Roundtrip ticket to the game and back to Greensboro is a total of $10.00 dollars ($7.00 for trip and $3.00 for game ticket). Tickets will go on sale Tuesday, October 19, at 1:00 p.m. in the Student Union Information Center.

The Future Alumni Activity Committee will meet Monday, Oct. 18 at 8:00 p.m. in Room 213, Student Union. All students are urged to attend.

The Torchbearer's Club of the Tau Gamma Delta Sorority will Sponsor a disco at the Cosmos I Sunday, October 17, from 9 p.m. to 1 a.m.

The Richard R. Harrison Players' production of "Tambourines to Glory" has been rescheduled for Oct. 21, 22 and 23. The production will be repeated on Oct. 28, 29 and 30. Curtain time is 8:15 p.m.

SPORTS NOTEBOOK

By Craig R. Turner

Despite what you may read or hear about A&T's football opponent for this weekend, Maryland-Eastern Shore is not a very strong football team.

For the last two years the Hawks have put together the worst record that any college football team possibly can. Their record stands at 0-22 over that time period.

The Hawks dominate no category except in the area of points allowed defensively (28.5). Maryland has allowed over 200 yards a game rushing, and has given up nearly 300 yards a game in total offense.

Now, Maryland is not helpless. It would be a fatal mistake to write the Hawks off without a fair "trial by fire." They have given A&T some of the roughest times that Aggies can remember.

But this is a year that the two teams are far apart in the direction that each has taken. Maryland is struggling in the midst of another season where victory is a fantasy and defeat is inevitable.

A&T, on the other hand, has had an almost perfect year thus far by winning four of its first five contests. A&T could have split this season if they want.

Maryland, at one time, enjoyed the same success that the Aggies enjoy today. Once they defeated A&T soundly in Greensboro, took a share of the conference honors and even represented the MEAC in the Orange Bowl Classic against Florida A&M. Seems like years ago, right? It was in 1973.

So how in the world did the athletic program, in all facets of sports, disintegrate in just three short years? I do not know the answer. No one at A&T can say for sure and even some UMES people don't understand all the circumstances in that situation. Can anyone really say for sure what happened?

This is a game that a lot of people have suggested will be easy to predict. If you go on past records you can obviously pick one team over another. But, if you look at a game on an eye-to-eye basis, the outcome is always in doubt.

That is usually the case. This week is no different. A&T should rebound strongly from its poor showing against Norfolk State. A&T by 24 points.

Norfolk State is a team that has been doing well against A&T teams in recent years. They have given A&T some of the roughest times that Aggies can remember.

S.C. State's Jesse Prather Increases Scoring Lead

Jesse Prather of S.C. State increased his lead in the scoring department. Prather, who scored one touchdown last week, now has scored six TD's for 36 points. Ellsworth Turner ranks second with 26 points.

Turner saw his passing average drop after compiling only 134 yards in the airways last week but the A&T field general still leads the league passers with an average of 200.0 yards per game.

Dexter Feaster of A&T increased his lead in the pass catching department with four receptions last week while runner-up Mark Durden was idle last week. Feaster now has caught 22 passes for 446 yards. Durden has been on the receiving end of 17 passes for 356 yards.

Five DuPont plants depend on me for design of electrical equipment and instrumentation.

-Rodney Haynes  BS, Electrical Engineering

"I've been an energy control design engineer since shortly after my graduation in 1974 from Lamar University. At the moment, I'm working on projects totaling almost a quarter of a million dollars.

"What I like most about my work is the variety...getting into other phases of engineering...plus the responsibility for everything I do."

Rodney worked part time while in high school in a Du Pont-sponsored Minority Manpower Resources Project. Today, he is helping to recruit blacks through the MMRP at Texas Southern.

Rodney's story is typical of many Chemical, Mechanical and Electrical Engineers who've chosen careers at Du Pont.

We place no limits on the progress our engineers can make. And we place no limits on the contributions they can make—to themselves, the Company or to society.

If this sounds like your kind of company, do what Rodney Haynes did: talk to the Du Pont representative who visits your campus. Or write: Du Pont Company, Room 25243, Wilmington, DE 19898.

At Du Pont...there's a world of things YOU can do something about.
