"COMPLETE AWARENESS FOR COMPLETE COMMITMENT"

VOLUME XLIX NUMBER 4 NORTH CAROLINA AGRICULTURAL AND TECHNICAL STATE UNIVERSITY GREENSBORO, N. C. FRIDAY, SEPTEMBER 9, 1977

The basement of the Memorial Union, which houses the university bookstore, flooded Thursday night. Damage is estimated to run into the thousands. Photo by Smith

## Rain Floods Campus Bookstore

By Archie Bass

Even though the rain that reached across Greensboro was needed, the only location that didn't welcome it was the campus bookstore.

According to James Mechem, bookstore manager, the rain began to make its way to the basement of Memorial Union around 10 a.m. Thursday morning following a leak in the back door directly behind the

bookstore.

"It happens every year," said Mechem in regard to the annual floodage since 1969.

"When it happened last year, Building and Grounds didn't do or say anything about the flood," declared Mechem.

Mechem noted that the past floods in the bookstore resulted in thousands and thousands of dollars worth of lost merchandise.

## Humanities Instructor Becomes Advisor To SGA

By Maxine McNeill

Miss Annie Herbin, humanities instructor, is advisor to the Student Government Association (SGA). This is the first time Miss Herbin has held an advisory job with a college organization.

"I'm looking forward to a successful term with Tony Graham," said Miss Herbin. "One reason I accepted the job is I had talked with most of the students in the SGA and they know how I feel. I express myself and students know I'm interested in the students, faculty and administration becoming united," stated Miss Herbin.

To this date, Miss Herbin has experienced no challenges as advisor to the SGA.

Though Miss Herbin is new at this job, there are some activities she feels the SGA should be responsible for this year. One

activity mentioned was that SGA should ask Chancellor Dowdy to speak to the students on various occasions.

"I advised the SGA officers to utilize the intellectual resources right here on the college campus rather than bringing in so many outsiders," said Mrs. Herbin. She also said deans and administrators should be asked to meet with students.

Miss Herbin hopes the image A&T students portray will focus more attention on the academic aspect of college life in the future.

"I hope we can develop among our students a consciousness of class distinction of college students that the overall behavior of A&T students will be above reproach and second to none. I believe the SGA staff bears my sentiment of moral values," stated Miss Herbin.

"I would like to see the bookstore out of here," suggested Mechem. "Anywhere-but out of here where rain annually damages and destroys valuable merchandise," he said.

Mechem estimated damages at \$1500 in books alone. The books that are wet will be thrown away says Mechem.

"This not only stops the marketing of the bookstore, but it provides so many inconveniences for the students," concluded Mechem.

The bookstore is expected to remain closed at least until Monday afternoon.

## Science Program Helps Undergraduate Students

By Richard B. Steele

The Minority Biomedical Sciences program has existed on the A&T campus since 1972. During this time, the program has been funded at a total level of \$626,722 with more than 111 undergraduate students participating.

The MBS program at NIH (National Institutes of Health) grew out of a concern, principally that of Black scientists, of the lack of federally funded research programs in the basic sciences at predominantly Black institutions.

A competitive program was designed for Black institutions to include funding necessary to conduct work based on scientific merit. Funds for scientific equipment, faculty release time, travel; and, most importantly, student stipends were soon forthcoming.

Research projects in biology, chemistry, and electrical engineering were initially funded

for a five-year cycle ending in 1977. A supplemental program was begun in 1974.

"At the peak of our program in 1974, some 11 individual projects were active and included 35 student participants and 12 faculty members in the departments mentioned," says Dr. Richard Bennett, Jr., program director.

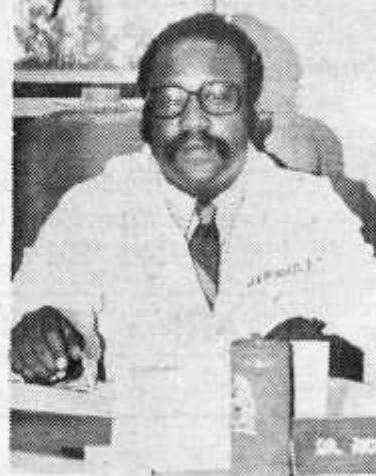

"The undergraduate student participation is a key component of the MBS program. We actively seek to include as many students as possible at a given time. We are able to provide stipends (salaries) at the level of \$1200/academic year and an additional \$1200 for 12 weeks during the summer.

"The student is actively engaged in the research project and becomes an integral part of the research team.

"A national MBS symposium is held each year (in New Orleans, La., for the past five years) so that students and faculty throughout the country are provided a forum for the presentation of their findings. Our MBS students have attended American Chemical Society meetings and have journeyed to scientific installations such as The Center for Disease Control in Atlanta and the Oak Ridge National Institute.

"Scientific projects that are funded must fit the scope and interest of the NIH and must be biomedically oriented. We have had such diverse projects as The Use of Computers in Biomedical

# Vet Association Creates Bond

By Catherine Speller

The Veterans Association is an organization dedicated to creating a common bond between veterans who are now in school and veteran dependents.

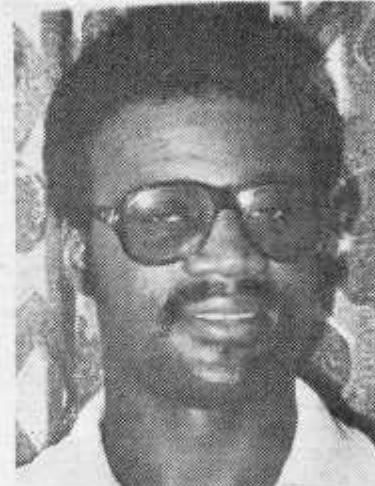

It helps people to relate their experiences to others about the armed forces and their travel experiences.

The club is affiliated with the Veterans Affairs office. They work together in meeting the needs of veterans and making the adjustments on the university campus and in the community.

This year the association's purpose is to overcome some of the negative images that the community and fellow students

at the university have assumed about the veterans.

Members of the club hope to take an active part in the community.

Jerry Murray

The association's project plans for the year include an extensive membership drive and the issuing of membership cards which can be used to enter all veteran sponsored events free, homecoming queen and other events and a calendar for spring

'78. Meetings are held each Thursday from 12-1 p.m. in the Student Union Room 213.

President of the organization, Jerry Murray, a senior economics major from Rose Hill, also an army veteran, is in the process of getting the club registered with the university.

Murray feels that, once the club has been registered, it will have a positive start and will be able to concentrate more on campus activities and recruiting people to participate in the association.

## Computer Causes

### Summer School

### Grades Delay

By Delilah Perkins

The summer school grades haven't been mailed out yet because of computer problems.

In a previous article it was explained that the computer center, located in Graham Hall, was upgraded with the installation of a new computer system named the Dec-System 10.

Angus Small, director of the new computer center, stated that the computer system was not broken down. He explained that the summer school grades were turned in; however there was a problem of converting data from the old computer system, which had to be modified and converted to the new Dec-System 10.

J.N. Armstrong, director of summer school, states that he is solely responsible for recruiting students and promoting the university, and not in charge of grades.

Armstrong is a co-ordinator with the office of Registration and Records, in charge of all grades and student records.

During summer school students were told that grades were to be mailed after August 15; but, due to the installation of the new computer system, and the time it takes to convert previous grade-point averages with the summer school grades in the new system, grades were delayed.

When grades have been completely processed it will be announced.

## Organization Seeks Volunteers

By Catherine Speller

Students and faculty Involved Concerned Aggies Responding to the Environment (I.C.A.R.E.) is a new organization sponsored for the first time this semester.

ICARE was started by a group of concerned students who were dissatisfied with the image that A&T had in the community. Often people think of college students as party people, dope addicts, and shoplifters.

"We felt that A&T's shoplifting publicity had lowered the university in the eyes of the public," explained Annie Bullock.

"Our major purpose is to rebuild or establish a tie between the students on campus and the Greensboro community," said Bullock.

This is a volunteer organization that is asking for complete student involvement.

### Yearbook Editor Announces Schedule

By Richard B. Steele

Charles N. Freeman, editor in chief of the yearbook, would like to welcome all students to Aggeland for the 1977-78 term.

The yearbook works on a specific deadline which does not allow for mistakes. Each class section is laid out, in advance, by the number of photographs and names given to the staff to go into the yearbook. If a student's picture is taken more than once, it causes a space conflict. Thus, an entire class section has to be redone. This causes extra work for the staff and delays the completion of the yearbook. Also this causes the name to fall after its corresponding picture.

All Greek and Non-Greek organizations that wish to have color pictures in the yearbook should contact the yearbook staff no later than September 26.

All information should be in the yearbook office by this date.

For those of you who are interested in community involvement and the betterment of others, there will be a meeting Monday night, September 12, at 7 p.m. in the Student Union, room 212.

There are no special requirements other than that you be a properly registered student here at A&T. You don't have to pledge the organization and no

dues will be collected.

James Wright, head of student activities, is the advisor.

The officers of the club are Kelvin Buncum, president; William H. Council, vice-president; Annie L. Bullock, secretary; Craig Turner, treasurer; Carroll Boone, business manager; and Morgan Deane, parliamentarian.

### Entertainment:

## The Leach Line

By Albert Leach

I have four books for you this week. First, from Ballantine, there's "Adolf Hitler" by John Toland.

Toland describes Hitler as "a warped archangel, a hybrid of Prometheus and Lucifer." Toland deals with the myths that evolved around Hitler's lifestyle. He also tells of Hitler's many love affairs especially with Eva Braun whom he married just before they committed suicide.

The book contains 1440 pages, with 64 pages of photos, maps and charts.

The next book is "No Fault Marriage" by Marcia Lasswell and Norman M. Lobsenz.

"No Fault Marriage" shows couples how to adapt to the techniques of trained marital therapists and put them to use for successful self-counseling.

Marcia Lasswell is a professional marriage and family counselor, in addition to being associate clinical director of the graduate program in marriage and Family Counseling at the University of Southern California. She is also a professor of psychology at California State University, Pomona and a Fellow of the American Association of Marriage and Family Counselors.

Next, from Holloway House Publishing Company, there is "Street Games" about Bobby Jones, 14 years old and the problems he encountered from being Black.

Bobby's mother had died of unnamed disease which was said to be Black oriented and his father had been shot down during a cocaine bust.

Lastly, there is "The Last Toke" by Amos Brooke.

# The Program of the Year isn't on TV. It's in the Air Force ROTC.

Look into Air Force ROTC. And there are 4-year, 3-year, or 2-year programs to choose from. Whichever you select, you'll leave college with a commission as an Air Force officer. With opportunities for a position with responsibility... challenge... and, of course, financial rewards and security.

The courses themselves prepare you for leadership positions ahead. Positions as a member of an aircrew... or as a missile launch officer... positions using mathematics... sciences... engineering.

Look out for yourself. Look into the Air Force ROTC programs on campus.

## Put it all together in Air Force ROTC.

# Flies Take Over

There seems to be a physical war going on in Williams Cafeteria between A&T students and one of their well known adversaries, flies. Though school has just begun, it seems that, at this point, the flies are winning the battle.

It is not uncommon in the cafeteria to notice students fanning their trays with one hand while trying to eat with the other. It is disturbing to be in combat with flies while eating, but it is even more disturbing to develop the impression that the cafeteria workers are insensitive to the problem.

The other day flies were witnessed attacking the desserts that were placed at the end of the serving line. These desserts, by the way, had no cover over them. When the cafeteria workers who were serving the food were informed of this they looked at the flies on the desserts and then resumed serving the main course meal.

The students in that line said the workers did not care because they had already eaten their meal. At any rate, whether or not anything was done about the situation that particular day, this reporter does not know.

If students were not forced to eat their meals on campus, the attitudes of the workers might not have been so shocking. It was shocking, though, because attitudes like those make students feel as if no one cares, although students are constantly told by this administration, "we care."

How are students supposed to believe one thing when they see the opposite of what they are told to believe practiced everyday?

# Just A Practice Run

By Sheila Williams

On watching the Aggies "battle" the Rams here at the Greensboro Memorial Stadium last Saturday night, it's a wonder they scored at all. The defense was ragged and a majority of the passes were turnovers.

At times this reporter often wondered where, "not to whom," the quarterback was passing the ball. After all, McKinley had stated that his team was ready for the Ram attack and this would certainly be an 11-0 season leading us all the way to the MEAC conference.

But, as of now, this reporter is wondering

will they actually make it to mid-season. One of the coaches stated on the A&T Aggie report that losing the game was a "very shocking experience which just goes to say, if they couldn't stand up against Winston-Salem, a team which hasn't beaten us in 18 years, how are they going to survive against South Carolina State. There was even a reply by an Aggie alumnus to his friend to get a football team while he was out buying a soda.

But I'm just looking at this past game as a practice run, and maybe the next time the Aggies will be ready.

# Old Traditions Fade Away

By Catherine Speller

A&T's defeat on the football field last Saturday brought an end to two long cherished traditions of the Aggie family.

First of all, the Aggie blue and gold team lost to the Winston-Salem Rams, a feat which hadn't been accomplished in 18 consecutive attempts. Well, defeat is hard to accept; but that's not my main gripe.

It had become apparent to most of the Aggie fans by half-time the outcome of the game; but we all waited for a glimpse of the head drum majors as the A&T Blue and Gold Marching Machine approached the field.

As our band marched onto the field there was no pep, steam or the old Aggie spirit. There was something missing from

the band. Even though it consisted of many new members, the band had decreased, it seemed to this reporter, to less than half its number.

If one didn't know that the band was from A&T in advance, he couldn't have recognized it by any of its traditional routines or by the lack of enthusiasm of the crowd.

In past years, even if the team lost, one knew that he could depend on the band to do a good job. It's been said that a lot of the fans only came to hear the band play not to watch the game. But this year unless there is a great improvement by the band as well as the team, the stands will be empty at home games.

# Militant Flies Attack Coed

Editor-of-the Register:

Please permit me a space in "The Register" to publish this article entitled "A Battle With Flies." It briefly narrates my experience with flies in the Williams Cafeteria on campus.

It was hot and humid one Wednesday afternoon one of those horrible days when I have only one hour, from which I spend fifty-five minutes in the long line and just five minutes to rush over my lunch in Williams Cafeteria on campus.

This day, I really needed more than just five minutes for my lunch since every successful mouthful I made, I had to manipulate my biceps and triceps in order to stand the attacks of three militant flies. Each time I raised my head to make a mouthful, I saw them hovering over my supposed ration. With my "no-nonsense" blows, I was able to send two of them to Utopia and had only one to face.

From what I encountered with the remaining fly, I guess, it must be a worthy captain in the Fly Airforce. After three successful escapes from my Foreman-like blows, it called for a truce. This time, I fooled myself for being happy, thinking that I was victorious. But just a moment after it left, a battalion of very

energetic flies came to me. As I tried to swing my hand to clear the way for a mouthful, one struck me on my upper lip. I then picked a napkin to wipe my lip before too much contamination was done.

On trying to resume eating, guess what my eyes saw. Anyway, your guess is as good as anybody else's. A fly was displaying its beautifully netveined wings right inside my drink. It was then I declared them the victors and I packed up because my next class was already in session.

I could not believe myself facing such a horrible battle with flies in a cafeteria where a combined multitude of staff and students of the university eat about six thousand rations daily. I wonder how many people can endure such an ugly battle, if not even thrice daily. The earlier something is done about this situation by those concerned, the better for the health of those who patronize the cafeteria. The dirty and the filthy are meant for the flies and not the cafeteria.

Eddie Oamen

## The Leach Line

(Continued from Page 3)

"The Last Toke" describes how the death of a hooker sends two young pimps out into the night to find out who committed the murder before the police.

Go to your nearest bookstore and check out these four books. I think you will find them to be good reading.

The envelope for the A&T's top ten will be located on the door of the A&T Register's office. All record suggestions must be in before Wednesday. The Register Office is located across the street from Graham Hall.

"No great man ever complains of want of opportunity."  
Ralph Waldo Emerson

## Student Dislikes Eating In Mezzanine

Editor-of-the Register:

I am a student at A&T who is very much dissatisfied because, without any explanation, a group of students were forced to eat in the mezzanine in Williams Cafeteria. I ask, why? There's little space and I find it inconvenient. Anywhere you go the lines are long including mezzanine. I feel, instead of trying to shift us around the kitchen should become more organized and devise a system that would be more speedy and easy for all.

I can sympathize with the problems of the cafeteria, but still the problem of long lines persists. It discriminates and separates us from our friends and makes for an unpleasant surrounding to eat in.

I think it's an unsanitary condition for the trays to be stacked on the shelved carts and punch from the cups spilled onto the floor.

I would like for whoever this concerns to answer why we have to eat in the mezzanine.

Vanessa Spells.

Association Of Childhood Education

# Organization Has A&T Chapter

By Karen Williams

The Association of Childhood Education (ACEI) has formed its first chapter on A&T's campus. The organization has been in existence since 1930.

This organization was started in the Education Department and hopes to attract Early Childhood Education majors. Mrs. Peggy Branch, Early Childhood Education instructor, is advisor to the ACEI.

Mrs. Branch said the purpose of the ACEI is to work with various organizations and communities. It works toward the well being of children and it advises the students concerning writing papers (term papers, language arts papers and others). Working with disadvantaged children and working with parents. This club stresses student involvement in activities for all types of children. Mrs. Branch feels the students get an extension of their education experience.

The membership dues for this year are \$9.00. This money will be used for the various services

the organization will be providing.

Though the ACEI tries to attract Early Childhood Education majors it is open to

anyone who has an interest in children.

The ACEI presently has 20 members. Meetings are held the third Thursday of each month in Hodgkin Hall.

## Science Program Receives Yearly Funds For Studies

(Continued From Page 1)

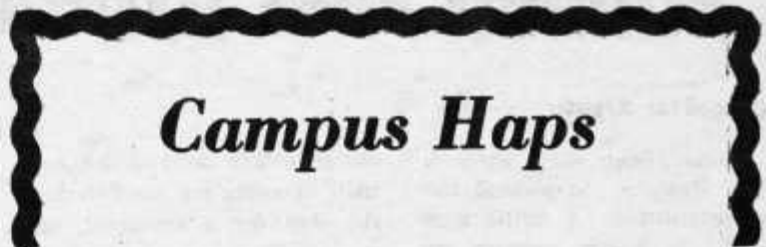

Research; Electronic Instrumentation in Research; Systemic Insecticides for Control of Oriental Flea on White Rats; Fluorescence in Serum Albumins; Kinetics of Hydrolytic Enzymes; The Chronology of Hemaglobin Horeties; The conversion of Uric Acid into a Soluable, Exeretable Form; and Structural Analysis of Glycoproteins," he continued.

The current MBS program is budgeted at \$177,300 for June 1, 1977-May 31, 1978 and includes studies on a Solid Phase Colorimetric Reagent for

Cholesterol- Dr. Jothi Ramasamy; Nuclear Magnetic Resonance Spectroscopy Studies of Several Anticancer Drugs-Dr. Eddie Mooberry; Carbon 12 NMR Studies of Blood Group Polysaccharides-Drs. Eddie Mooberry and Richard Bennett, Jr.; and Structural Analysis of Mucins, Glycoproteins and Mucopoly and Mucopoly Saccharides-Dr. Richard Bennett, Jr.

The MBS program at A&T has been refunded for a three-year period beginning June 1, 1977 and ending May 31, 1980. Total funds awarded by the NIH for this period amount to \$341,174.00

Many important scientific instruments have been afforded through this project. The university has acquired a variety of spectrophometers, DH meters, gas chromatograms, an electroanalytical balance, a spectrofluometer, refrigerated centrifuges, and a preparative analytical centrifuge among others. NHR spectrometer whose cost range is about \$70,000 has recently been ordered.

## Campus Haps

The North Carolina Fellows will meet in Murphy Hall Auditorium Sunday, September 11, at 5 p.m.

The Business Administration Club will meet Wednesday, September 14, in Merrick Hall Auditorium at 4 p.m.

The Business Administration Club is sponsoring a bus trip to the A&T-Bethune-Cookman football game on September 24. The cost of the trip is \$50, which includes ticket to game, hotel and bus fare. For information, contact the Business Administration office in Merrick Hall.

The Recreation club will meet in Room 212 of the Union, Wednesday, September 14, at 8 p.m.

Alpha Kappa Mu will hold its first meeting Tuesday, September 13, in Room 212 of the Student Union at 7:30 p.m. All members are asked to be present and on time.

Dr. Wayman McLaughlin, professor of history and humanities, will be guest speaker at the chapel worship service in Harrison Auditorium, Sunday, September 11 at 11:00 a.m. Music will be provided by the Gospel Fellowship Choir.

Ticket prices for the A&T-South Carolina State game will be \$5 general admission and \$6 reserve. There are no student tickets for this game.

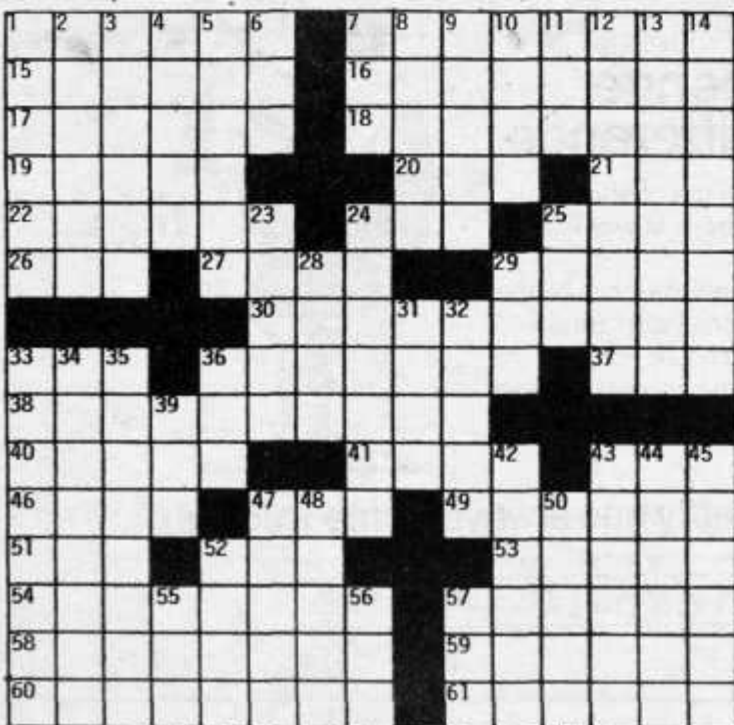

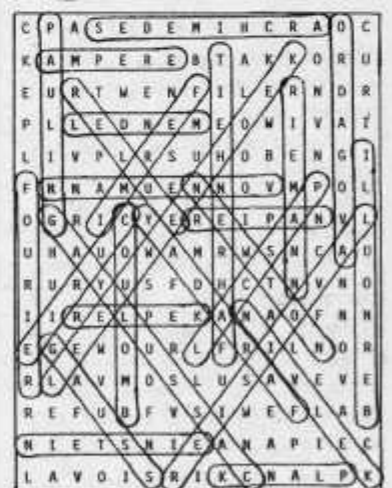

The Freshman campaign speeches and elections which were scheduled for September 8 and 9 were postponed until September 15 and 16.

Alpha Phi Alpha Fraternity will have its Fall Smoker Saturday, September 10, at 7:00 p.m. in the Memorial Student Union. All young men interested in pledging this semester are urged to attend. Neat Dress Required.

## Answers To Last Puzzles

# Sports Notebook

By Archie Bass

A bragging, confident crowd in excess of 20,000 paraded in Memorial Stadium, Saturday night, with hopeful assurance of crushing Winston-Salem State University, thus holding on to prestigious bragging rights mounted from a commanding 18-0 series lead by the Aggies.

Unfortunately, bragging rights and the string of impressive wins over the Rams were halted by the team in "red."

Well, what went wrong?

Remember the Super Bowl game between the old Baltimore Colts, featuring the famous Johnny "U", and the underdog New York Jets, starring football legend, Joe Namath?

Recall how Johnny "U" took the Jet team so lightly that he really didn't have to pump himself up mentally nor work out on the practice field.

Yes, Johnny Unitas is a living legend in the tough sport of football; but, he figured that the Jets were "roll overs."

Despite the greatness of the living legend, Joe Willie Namath geared himself up mentally to beat the over-confident Colts.

And, believe me, Johnny Unitas could give an educated lecture to the Aggie gridironers on under-estimating, and taking a team too lightly. Unfortunately for Coach McKinley, it would be a week too late!

\*\*\*\*\*

Jim McKinley made his debut Saturday night with hopes of supporting his perfect season prediction.

Billy Hayes, head coach at Winston-Salem State, made his debut in Greensboro. It turned out that Hayes left McKinley holding the bag of prior statistics that figure out to an average of 35.8 points for the Aggies compared to 8.3 points for the Rams in the previous eighteen games.

There were obvious reasons why we were defeated 33-14 by the Rams. We didn't execute as the Aggies are capable of executing and the defensive pass coverage was weak. But, the key to the defensive unit's looking bad was the misticakes.

And, of course, an offensive unit can't give the ball up three times inside the 30-yard line.

\*\*\*\*\*

The word on the practice field this week has been "Aggie pride." The coaches are instilling within the players that Aggie pride makes them hit harder, run faster, and never-ever stop hustling.

\*\*\*\*\*

The uniqueness of this team still prevails despite the lopsided defeat. The players still have that confident enthusiasm that portrayed them during the past seasons.

Coach McKinley normally oversees the rest of the coaching staff, but this past week was a little different as McKinley really got involved in the action and made players do things that normally he hasn't done on the practice field.

I haven't lost faith in the Aggies because I know Rome wasn't built in a day. The talent is there along with the coaching staff; but, the points were not!

Next time out will hopefully be a great showing for the Aggies. Unfortunately, the other Bulldogs will attack us. In the mind of McKinley, it doesn't matter because he anxiously awaits that first triumph.

## Gaskins Is Intramural Director

By Archie Bass

Varsity athletic sports have already been launched for the year and intramural sports will also begin in a few days.

Marvelous participation by the students in the intramural sports resulted in A & T's first full-time intramural director.

Ernie Gaskins takes over the role as intramural director with hopeful expectations of a productive intramural year.

"The purpose of the intramural program is to give the students, both male and female, who are unable to compete on a varsity level, a chance to participate," said Gaskins.

According to Gaskins, intramurals have been long confused because of the foul up with the sexes.

"I am extremely proud to say that our program will be open to both the males and females in all sports," declared Gaskins. "However, my main objective this year will be to get stronger female participation in all the sports," he added.

The major problem that blocks the intramural program is a location to house the different activities. "We were hoping that the new gym would have been completed so we could have Moore Gym to house our indoor fall activities," stated Gaskins. But since we don't, we are still planning outdoor recreation activities to keep the students in a competitive athletic mood," he

added.

With the varsity gridironers already into their season, intramural flag football will launch the intramural year.

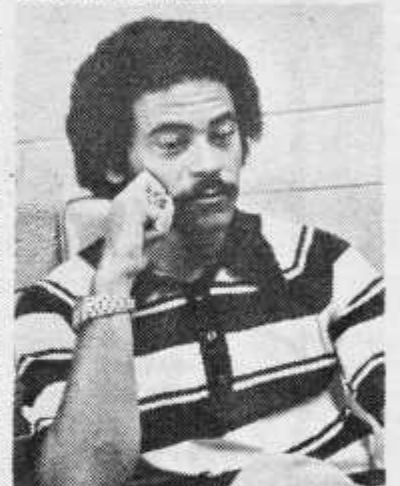

"Things look good again this year for flag football because the students are showing impressive signs of enthusiasm of wanting to compete," said Gaskins.

Gaskins proposed some tentative intramural sports for the year and promised others if the students showed signs of wanting a more variety of sports.

These sports proposed included volleyball, tennis, basketball, skating, and bike rental riding.

"At this particular time, everthing is not at full blast, due

to inadquate facilities and other major reasons, but I can assure the students that the intramural sports will create a lot of competitive spirit," stated the confident Gaskins.

Ernie Gaskins

Last Saturday was a bad day for the Aggies.

The average American eats 1/2 ton of cheese during a lifetime.

# This is the semester to get your programmable.

The TI-57. Its self-teaching system gets you programming fast.

The TI 58 and 59. Both use revolutionary plug-in Solid State Software™ libraries.

**TI Programmable 57.** The powerful superslide rule calculator you can program right from the keyboard. Comes with an easy-to-follow, self-teaching learning guide—over 200 pages of step-by-step instructions and examples. Quickly learn the value of making repetitive calculations at the touch of a key. Recall entire instruction sequences. Display intermediate results at any point in a calculation. Eight multi-use memories provide addressable locations to store and recall data. Program memory stores up to 150 keystrokes (50 program steps). Editing too: Singlestep. Backstep. Insert or delete at any point in a program. Also a powerful slide rule calculator with logs, trig functions and advanced statistics routines.

**\$79<sup>95\*</sup>**

addressable locations to store and recall data. Program memory stores up to 150 keystrokes (50 program steps). Editing too: Singlestep. Backstep. Insert or delete at any point in a program. Also a powerful slide rule calculator with logs, trig functions and advanced statistics routines.

**The TI-58 and TI-59 combine three major innovations to bring the power of programming to you—even if you've never programmed before:**

1. Extraordinarily powerful—at remarkable low prices.
2. Revolutionary plug-in modules put complex formulas to work at the touch of a key.
3. Step-by-step learning guide that takes you from the basics of programming through advanced programmings—language you can understand.

**TI Programmable 58.** Up to 480 program steps, or up to 60 memories. Master Library module contains 25 prewritten programs in math, engineering, statistics and finance. Also increases number of steps—up to 5000. Library programs may also be addressed from the keyboard or inserted as subroutines. Can also be used with TI's new PC-100A printer/plotter. It lets you plot,

**\$124<sup>95\*</sup>**

print headings and prompt—messages.

**TI Programmable 59.** More powerful than the TI-58. Up to 960 program steps or up to 100 memories. Magnetic cards store up to 960 steps. And, record and protect custom programs. Also 10 user flags. 6 levels of subroutines. 4 types of branches.

**\$299<sup>95\*</sup>**

**Optional Libraries.** Applied Statistics, Surveying, Real Estate/Finance, Aviation, Marine Navigation. \$35.00\* each.

## FREE.

When you buy a TI Programmable 58 or 59 you can get this 19-program Leisure Library.

A \$35.00 value if you act now.

**Football Predictor.** Forecast score, point spread. **Bowling Scorekeeper.** Track 90 bowlers. **Golf Handicapper.** Update handicap from latest round's score. **Bridge.** Computes points from tricks made and bid. **U.S. Chess Federation Rankings.** Wins, losses, draws. **Codebreaker.** 3,024 possible codes make this a unique challenge. **Black Jack.** **Acey Ducey.** **Craps.** **Mars Lander.** Pilot to a safe landing. **Jive Turkey.** Guess mystery number—tells you if you're high or low—but is it jiving you? **Nim.** Play the machine, each time it gets better. **Sea Battle.** 15 missiles to sink sub. **Quarterback.** Call plays. **Photo 1.** Compensate for change in photo enlargement magnification. **Photo II: Fill-in-flash.** Computes correct lens f-stop in strong ambient light. Use it with a PC-100A and have even more fun. **Computer Art.** **Hangman.** Put in a word, second player guesses or hangs. **Memo Pad.** Write, enter messages. Print and record them on 59's mag card. Use the card to replay the message. **Biorythm.** Plots all three cycles.

Leisure Library comes with: Plug-in module. Library manual. Quick reference guide. Label cards. Library wallet.

Offer good from August 15 to October 31, 1977. Here's what you do. Fill out this coupon. Return it to TI with your serialized Customer Information Card (packed in the box), along with a copy of a dated proof of purchase showing the serial number. **Important.** Your envelope must be postmarked no later than October 31, 1977.
