"COMPLETE AWARENESS FOR COMPLETE COMMITMENT"

VOLUME XLIX NUMBER 20 NORTH CAROLINA AGRICULTURAL AND TECHNICAL STATE UNIVERSITY GREENSBORO, N. C. TUESDAY NOVEMBER 8, 1977

## SGA, Administrators Discuss Campus Issues

Why is this the first Student Government Association Meeting? This question was asked by a student of SGA president Tony Graham at the Monday night's meeting.

"You don't understand," answered Graham. "We have a limited staff. We have been concentrating on homecoming. We were trying to give you a descent homecoming show."

When Graham was asked by a representative of the Student Coalition for Justice and Rights if the SGA would support its Wednesday rally, Graham said, "This is not the time for us to go out and rally; at least this administration will not."

According to Graham, "The time is to work within the system and get something done."

Graham told the coalition that he nor his administration will rally in the Holland Bowl. It was revealed earlier in the meeting, however, that Toby Bryant, vice president of the SGA, has already said he will support the Coalition.

Vance Gray, director of Financial Aid, addressed the students concerning the

question of a financial aid shortage this year.

"We never have enough money to give to all the students," Gray said. "The money just isn't there."

We only receive 40 percent of the money we ask for to meet the needs of the students at A&T." Gray also said that the amount of money the students receive for National Defense Loans depends on the repayment records of the past students.

He said presently the students have a poor repayment record.

Mrs. Lucille Piggott, dean of women, addressed the problem of the absence of washers and dryers in certain dormitories. She told the students that washers and dryers will be replaced Thursday. Mrs. Piggott warned that this does not mean that they will be operating Thursday.

"You shouldn't leave everything up to the SGA," Graham said. "The student legislature is the governing body on campus which controls the student body as well as the SGA. I will wholeheartedly support the student legislature."

Tony Graham talks to students during the first Student Government Association meeting.

## Dr. Vick To Study Phosphates

As an industrial waste, heavy doses of phosphates dumped into streams can destroy valuable aquatic life.

An A&T State University biology professor believes that phosphates may prove to be less harmful if converted into a soluble form before discarding.

Dr. Alphonso Vick is studying the reactions of more than 500 fish in an effort to prove his theory.

Vick's research grant is being funded by a \$63,780 grant from the United States Department of Agriculture.

He said the idea is to find out where the harmful materials go within the fish

and where they are concentrated.

Periodically, the water in the tanks where the fish are kept, are doused with concentrated particles of  
(See Does Page 3)

## Dr. Benjamin E. Mays To Lecture In Harrison

Dr. Benjamin E. Mays, chairman of the Board of Education in Atlanta Ga., will be the featured lecturer at Harrison Auditorium on Wednesday November 9.

A noted scholar and educator, the lecture is scheduled to begin at 8 p.m. and admission is free to the public. The event is sponsored by the university's Student Union Advisory Board.

Mays was elected President Emeritus of Morehouse College in Atlanta in 1967 after 27 years of distinguished service.

He has written seven books "The Negro's Church," "The Negro's God," "Seeking to be Christian in Race Relations," "A Gospel for the Social Awakening," "The Christian in Race Relations," "Disturbed About Man," and "Born to

Dr. Benjamin Mays

Rebel." He has been a frequent contributor to magazines, writing articles dealing with race relations, religion, politics, and education.

Mays received more than 210 awards including eight Doctorates of Divinity, 13 Doctorates of Humane Letters and 13 Doctorates of Law.

Dr. Alphonso Vick, an A&T biology professor, is studying the reaction of more than 500 fish in an effort to prove his theory.

# WNAA-FM In Planning Stage

North Carolina A&T State University's 10 watt FM Educational Radio Station is presently under construction on the 2nd floor of Price Hall. Completion of construction of the radio station is scheduled for the last week of November.

The radio station will be staffed by students. The philosophy of the radio station will be to serve not only North Carolina A&T State University but the surrounding community and the whole of Greensboro.

In order to aid in preparing potential student staffers, the Mass Communications Program is sponsoring a Radio Station Management Workshop for students interested in working for the radio facility: Part I will be held from 9:00 a.m. to 2:00 p.m. Saturday, November 19, in Crosby Hall, Room 327. Dr. Robert Snyder, General Manager of WRST-FM

## Computers

## Yield Cardless Registration

By Richard B. Steele

A&T's computer system is a cardless system. Eventually, computers will be installed to yield a completely cardless registration with only opscan sheets for students to fill out.

Ms. Geneva Bullock, assistant director of registration and records, said that the present system is in the students' favor. With this procedure a student does not have to run back and forth across the campus in order to drop courses. All the materials needed to drop a course were located in one central place, Dudley Building.

The materials consisted of three schedule cards and a computer print out slip. The slip required the circling of the letter(s) beside the class(es) the student wished to drop.

If a student needed a class dropped before the new procedure, he obtained a drop card from the instructor. He filled out a series of cards and then took them to be processed. Under this system, the student made several trips across campus (depending upon the locations of the instructors' offices.)

The new procedure was produced out of necessity.

Radio at the University of Wisconsin in Oshkosh, Wisconsin, is serving as consultant in A&T State University's effort to set up WNAA-FM Radio. Dr. Snyder's services are made possible by a special grant from the W.K. Kellogg Foundation in Battle Creek, Michigan.

Only those persons who have completed an application for WNAA-FM Radio

will be eligible to participate in the workshop. Applications for staff positions are available in Crosby Hall, Room 226. Those interested in applying for radio staff positions must complete applications by Thursday, November 10, at 12:00 noon. Students who have 2nd and 3rd Class Radiotelephone Operators License are encouraged to make application.

# Film Views Lesbian Mothers

"In the Best Interests of the Children," a newly released film about lesbian mothers and child custody, will be shown on Thursday, November 10, at 7:30 p.m. at the Law School Building on the UNC campus in Chapel Hill. There will be no admission charge and the public is invited. Two of the filmmakers, Frances Reid and Elizabeth Stevens, will be present for discussion. Childcare will be provided, although children are welcome. This will be the only showing in the area; it is being sponsored by Women in Law, UNC-CH.

The film, made in 1976-77, is a presentation of eight Lesbian mothers talking about their experiences as Lesbians and mothers. According to Iris Films, their children are shown in interaction with their mothers and in a rap group with each other. Also presented are an attorney and a clinical social worker, both of whom have done extensive work with Lesbian mothers. They offer their professional opinions around the issue of Lesbians' right to maintain custody of their children. The others talk about what being a Lesbian means to their children, how they have talked about Lesbianism, how it has affected their friendships.

What the film says, ultimately, is yes, Lesbians are mothers, yes, Lesbians are good mothers, and yes, Lesbian mothers do have problems, but that those problems stem from society's and the courts' attitudes towards them. The solution to these problems is not to take children away from Lesbians, but to change those attitudes. The film is a direct challenge to the prevailing myth about the Lesbian as mother.

Iris Films, who produced the film, is a feminist film production and distribution group, committed to presenting films and discussion geared towards organizing women and showing our struggles and strength. The filmmakers, who are traveling around the country with the film this fall, are two of the three women who made the film as a collective. Because of the extensive research done for the film, they are prepared to speak both about the making of the

film as well as the situation for Lesbian mothers facing child custody battles. In addition to showing "In the Best Interests of the Children," they will also be showing one other short woman-made film selected from several that they are distributing.

Women in Law is an organization of women law students at UNC-CH. They are working with Cerridwen Productions, a collective of women from Durham and Chapel Hill, on this project, so that all interested persons in the area will have the opportunity to attend the showing of "In the Best Interests of the Children."

"A Lesbian who is public has very little chance of winning a custody case, but if a woman is willing to change her lifestyle for the purpose of a custody case, her chances are much better. So the happiest, healthiest Lesbian has the worst chance of winning the custody of her children."

## Entertainment

# The Leach Line

By Albert J. Leach

Anyone that didn't attend the Rose Royce Concert missed the best show, since the Commodores concert.

Confunkshow, which is a group not well known, performed its hit song "Fun". The group also performed two more selections from their new album.

The next group to perform was LTD which got most of the large crowd there on the floor.

LTD performed "Love Ballad," "Back In Love Again," "Party Hearty," and many more selections from both of their albums. Most of the selections came from the second album "Something To Love."

When the group began to perform "Party Hearty," most of the people on the floor started jamming. LTD's introduction costumes were red and black capes which they had taken off before they started singing.

Then came the highlight of the show when Rose Royce came on stage. When the group appeared, the people in the stands began to come on the floor.

Rose Royce performed "Ooh Boy," "Wishing On A Star," "Do Your Dance," and the last song they did was from their first album "Car Wash" which was entitled "Car Wash."

All three groups put on a dynamite show and the audience behaved as if they enjoyed every minute of it.

## Does Phosphorus Provide Harmful Isotope To Fish?

(Continued From Page 1)  
phosphorus, while water in other tanks is supplied with phosphorus in a soluble form.

"We shall attempt to determine if the fish wind up with more of the harmful isotope in their bodies when taken in the solid form or in the liquid form," said Vick.

Vick said he believes his studies will be of special interest to industrial firms, such as those making detergents and giving off phosphates as waste materials.

"If we are correct," he said, "it may be better to make sure all of our waste is in a soluble form before disposing of it."

Vick's project is scheduled to run at least three years. He holds a B.S. degree from Johnson C. Smith University, an M.S. degree from North Carolina Central, the A.M. degree from the University of Michigan, and the Ph.D. degree from Syracuse University.

# We Question The Logic

"You are our main problem," said a member of the Student Government Association, to the editor of The Register staff Monday night after the initial SGA meeting for this year.

Though that SGA member seemed angry when he made that statement, his feelings seem to express those of the majority of the SGA members' feeling. What this year's SGA members do not seem to understand is that it is the press's prerogative to print issues which the SGA might be in opposition to. In a sense, the media's purpose is to keep the government on its toes.

These two bodies are almost always in opposition to each other. If various national news writers never questioned any statements made by government leaders, the American people would receive only a one-sided view of the government's functionings. This would, of course, be the view of the leaders.

There is nothing personal involved when newspaper members disagree with some of the SGA's actions. We just question the logic used when deciding on them.

The most discussed issue in this newspaper concerning the SGA has been its reason for not having a meeting before November 9. This meeting, if for no other reason, could have served the purpose of introducing the leaders to those freshmen and upperclassmen who did not already know them.

As human beings, SGA members, we have all of the respect in the world for you. As SGA leaders, we question some of the reasoning you use in making your decisions.

Leading editorials are written by the editor of THE A&T REGISTER. Such editorials will not necessarily carry a byline and will not necessarily reflect the opinions of the University or the entire staff. Staff members are free to write dissenting opinions.

We must be very careful with this one because it is a rare specimen.

# Learn To Conserve Energy

By Margaret L. Brown

With 51 percent of the university's students living off-campus, one feels that this would be a good time to give them some points to conserve energy and save money on utility bills.

In most homes and apartments, cold air comes through doors, windows, walls, floors, and ceilings. This causes heat to escape. You can reduce the cost of electricity by insulating-the more, the better.

Install storm windows and doors; fill the cracks around windows and doors with caulking. True, these will cost; but, if you're renting from realties they may pay for having this work done. If not, an investment of this nature will be paid off in the form of lower heating and cooling bills.

During the day or when no one is at home, it would be wise to cut your heating system off and keep blinds, shades, and draperies drawn.

When thermostats are turned down, a three percent daily fuel savings is realized for each degree of reduction in the home. Therefore, one-third of the day a one percent fuel saving is realized for every degree of reduction.

Isn't it great scientific knowledge that has made it possible for you to sleep warm and save money on your home

heating bills?

By turning down a household thermostat 10 degrees each night for eight hours, one can still keep comfortable by using an automatic blanket. This will put money in your pocket and will contribute greatly to the nationwide energy conservation.

You can also conserve energy by investing in an electric blanket. This is a matter of preference. Some feel these items are unsafe. But statistics show few cases where a fire starts by the use of an electric blanket. Most of the time when a fire starts from an electric blanket it's because it was very old (20 years or more) or misused.

The cost of operating an electric blanket is very small, averaging about three cents per night. When the cost of an electric blanket is taken into consideration the average person saves a substantial amount on his or her annual heating bill.

Some final suggestions are wear a sweater or extra clothes to stay warm, do not open refrigerators, and freezers frequently, conserve hot water by running cold water first then adding hot; and, whenever possible, avoid using your dishwasher, clothes dryer, and other electrical appliances during the busy hour of the day.

# Citizens To Voice Opinions

By Darlene Staton

Citizen's Day '77 will be Saturday, November 12, in Moore Gymnasium from 9:30 a.m. until 2:30 p.m. This day is set aside to provide the opportunity for all citizens to speak their opinions on the needs and "future directions for our community."

This event is being sponsored by Gateways, a local organization developed to improve communications among citizens, agencies, organizations, and government. Their purpose is to find out the feelings and opinions of all citizens, to express these concerns to the appropriate agency or group, to follow the progress of these concerns, and to promote a feeling of community.

The Gateways staff is composed of a 45-member Citizens Advisory Council. Members come from all areas of the city and county. Also included in the Gateways staff are a paid coordinator and a part-time secretary. All other participants are volunteers.

Areas of discussion will in-

clude criminal justice, children and youth, senior citizens, family services, arts, housing, recreation, and energy. One may choose his area of interest.

Gateways' Citizens' Day '77 will give citizens an opportunity to be heard. This program is for the purpose of convincing the community

that people care and that the government cares about what they think.

Another advantage of this program is that it allows people of different races and backgrounds to come together respecting their differences rather than waiting for some explosive issue to polarize the community.

## Campus Haps

Seniors who don't turn in both proofs for their pictures will be charged an extra five dollars, which will be added onto their bill.

There will be a Men's Council Meeting Monday, 8:00 p.m. in the Student Union Room 212.

The Student Legislature of the SGA will meet Monday, November 14, at 8:00 p.m. in the Student Union.

## Internship Office Announces

### '78 Plans

The North Carolina Internship Office has announced plans for the Spring '78 Internship Program in state government. The goal of the program is to provide service-learning internships within state government.

The Spring '78 Internship Program will begin mid-February and end mid-March. However, with agreement between the intern, intern supervisor and/or faculty advisor, the internship may be extended to meet the particular needs of the intern or state government agency. Interns will be required to spend at least 15 hours a week "on the job" thus enabling students to carry regular course loads. Interns participating in the program will not be eligible for stipends but instead will be expected to make arrangements for receiving academic credit. Brochures explaining the Spring '78 Internship Program are available at college and university placement offices.

Any student attending a North Carolina college or university as well as any North Carolina resident attending an out-of-state college or university is eligible to apply.

# A&T Initiates Plant Project

A first-rate center for the identification of poisonous plants is the goal of a new project initiated at A&T State University.

A gift of more than 200 herbarium specimens to A&T by the Texas A&M University helped to launch the project, according to Dr. Arthur Hicks, chairman of the Department of Biology.

Hicks said the goal at A&T is to develop a regional herbarium with a research collection of from 10,000 to 20,000 specimens.

An herbarium is a collection of dried plants mounted on special paper and arranged in a systematic order.

"We have already offered our services to two area

hospitals," said Hicks. "We would like to assist them in identifying poisonous plants.

We can match up plants with their identifying characteristics. It will be a poisonous plants identification center."

A&T will also be assisted in the development of the center by a gift of 500 specimens from the Colorado State University.

Hicks said the A&T center will be especially interested in classifying and identifying plants of the Southeast and specifically in Guilford County and the western part of the state.

Dr. Hicks said the center will not simply be another research project, but will be

designed to provide instruction for the university's students. "We want our students to become proficient in plant taxonomy, that is, the identification of plants."

In their studies, he said, students will gather, classify, press, dry, and mount the plants with which they are working.

Hicks, a native of Jackson, Miss., has served a post-doctoral year in plant museum management at the Botanical Gardens in St. Louis.

He holds the B.S. degree from Tougaloo College in Mississippi and the Ph.D. degree in botany from the University of Illinois.

## Campus Haps

Mike Clelland, director of personnel, Touche Ross & Co. will speak on "The Organization Of A Public Accounting Firm" Thursday, November 10, at 4 p.m. in Merrick Hall Auditorium. A reception will be held at 3:30 p.m. in Merrick Hall Faculty Lounge. All accounting majors are urged to attend.

The Aggie Express Pep Club is now selling "Get Off A&T" buttons. Show your school spirit and purchase one from a club member.

Senior Class meeting will be held Wednesday, 7 p.m. in Rooms 213-215 in the Student Union.

(ACEI) Association for Childhood Educational International will hold a meeting Thursday at 7 p.m. in Room 106.

The English Department's tutorial sessions will be held Wednesday, November 9, at 3 p.m. Hereafter the sessions will be Wednesdays from 4-5 p.m. in Crosby Hall, Room 201.

Dr. Hicks looks for the identification of poisonous plants.

# SPORTS NOTEBOOK

By Archie Bass

Who says that A&T is not ready to compete against Division I football powers?

And, who says that Eastern Michigan has the so-called "high-caliber" football quality to be distinctly regarded as a Division I power?

Well, the small-but, loud Aggie crowd of supporters who hid themselves under umbrellas to avoid the rain, was not particularly overwhelmed nor impressed with the play of Eastern Michigan.

Despite the rain and despite Eastern Michigan's being a Division I team, the Aggie gridders took it to the Hurons, and almost came away with the greatest football win in Aggie history.

Even though the final score pictured defeat for the Aggies, the rain, which caused the field to be soggy, was conducive to the thoughts that the Aggies tried to soak into the minds of the Hurons- "We want respect."

"We weren't even given a chance as to matching up with Eastern Michigan," said Jim McKinley in a postgame interview. "We had a chance to win it, but it just slipped through our fingers."

This game on paper had figured to be a lopsided breather for Eastern Michigan, but Ed Chlebek left Memorial Stadium after a big scare with respect for the Aggies.

Jim McKinley and Ed Chlebek who were former college roommates and coaching partners may have shaken hands after the tough-fought battle, but McKinley knows that he represented A&T, the MEAC, and all Black colleges with pride and dignity.

So, this brings us back to the initial question concerning whether or not A&T can compete against Division I teams. Luckily for Eastern Michigan, they had a young, gifted, and Black star by the name of Bobby Windom.

If by judging on pure talent alone in order to be a Division I team, Eastern Michigan wouldn't even be considered.

Judging by the Aggies' performance on Saturday, A&T is ready for the "big boys." The question is - Are the 'big boys' willing to jeopardize their prestigious rank by playing A&T and other small colleges?

\*\*\*\*\*

The debut of A&T's playing its first Division I team brought a few prominent sports personalities to Memorial Stadium, Saturday. Among the most noticed was Al Oliver, outfielder for the Pittsburgh Pirates, and Dr. Frank Bannister, National Black Network sportscaster.

Bannister was promoting Doug Williams, Grambling's quarterback, as the best college athlete for the Heisman Trophy. "If Williams does not get the award, then I won't ever say anything about the Heisman Trophy again," says Bannister

\*\*\*\*\*

Ernie Gaskins, A&T's first full-time intramural director, resigned at his post Friday as to what he calls for personal reasons.

As of press time, there had not been a replacement for Gaskins

\*\*\*\*\*

A quick look at the Ken Norton-Jimmy Young fight and the only thing this writer can say is that Norton received a special "rabbit foot" from Rev. Ike.

Oh, how lucky can you get!

Members of Eastern Michigan and A&T pile up after a play. A&T lost to Eastern Michigan in the final seconds 21 to 20.

## A&T Loses In Final Seconds

By Craig R. Turner

A&T came within one play and 24 seconds of the biggest upset of the season but fell short in the end as Eastern Michigan escaped with a 21-20 win over the Aggies.

"It's a hard pill to swallow. I thought we played well enough to win, but they had all the breaks. We are still best team playing right now," said a drained Aggie mentor Jim McKinley.

The rookie coach, visibly numb from the game's dramatic ending, was reserved in his assessment of the Aggies' first loss in six games

"They ran the hardest play possible against a goal line defense. I am not pleased with our general performance."

"We had some mixups out there that I haven't seen since the first of the season. I'm not taking anything away from Eastern, but we didn't play as well as we could have."

A&T scored the only points of the first half on a one-yard touchdown run by Glenn Holland late in the first period. The scoring play was set up on a pass interference call against EMU's star deep back Ron Williams. That play set the tone for the rest of the day.

The key for A&T in that half was the outstanding play of defense in three key situations. On three occasions, the Hurons managed to drive inside the A&T five.

Twice, the visitors missed close field goals and were stopped cold on another fourth down attempt short of the endzone.

A&T put together its only real drive of the day on its initial possession of the second

half.

The 77-yard march took just six plays with the big gainers being the two pass completions of Ellsworth Turner to flanker Allen Thomas for a net 57 yards.

Turner ran it in from five yards out with 12:39 to go in the quarter that gave A&T a 14-0 lead.

The Hurons came right back with a 78-yard drive of its own as Bobby Windom circled left on a five-yard score of his own. Craig Motzer added the first of three crucial points after.

A&T appeared well on its way to seal a victory, when

reserve quarterback William Weston took a pitchout from turner and heaved a 5-yard touchdown pass to flashy Lon Harris at the 4:27 mark in the third quarter. However, A&T's Nolan Jones' kick hit upright and bounced back.

Then again, EMU came back with another lengthy ground-oriented drive as Windom scored again from four yards out.

The rest of the game was a see-saw affair until the 4:30 mark in the last stanza.

The Hurons used the passing of Steve Rakolvits and (See Penalty Page 8)

### Unique Management Intern MBA Program

This outstanding educational plan involves six months of classes; followed by a six-month internship of paid professional work experience; then nine more months of classwork.

The internship concept, which Northeastern pioneered, gives you practical, real-world experience in your own field of interest. It helps you pay for your education. And it often leads to important contacts for the future.

Classes being in June and January.

# Penalty Key To Aggies' Loss

(Continued From Page 7)

the assistance of holding penalty to set up the winning play.

With a fourth and goal at the A&T two, fullback Doug Crisan was hit in his backfield but fell into the endzone. Motzer added the extra point and Eastern had made the comeback complete.

"There wasn't any real turning point. I felt we had to get two first downs to win the game. We got only one

of them," stated McKinley. "No one had really run on them and we had intended to pass more but we were slipping and sliding all over the place."

"I don't think it will hurt us mentally. Our players knew it would be tough. I'm proud of them. They have nothing to be ashamed of."

McKinley was asked how A&T's initial try against Division I competition stood after the game.

"There isn't any question

that we can play with the Division I clubs. We're the youngest team in the conference and have only five seniors. I want to play some more of the larger schools. We proved we belonged on the same field today."

## Sports

On a muddy Sat. afternoon, McKinley proved that A&T can stand up to a Division I school.

# "In my first month at DuPont, I was assigned a \$50,000 project"

—John B. Taylor BS, Mechanical Engineering

"I was recruited from the University of South Carolina in 1974 and hired as a design engineer at the Textile Fibers Department's May Plant in Camden, S.C. In my first month I was assigned a \$50,000 project. I was proud to be trusted with such a task right out of school.

"I chose Du Pont because I saw the opportunity to expand and grow. If you have

the ability to make decisions, the opportunities are there."

"JB" has worked also as a power results engineer and power maintenance relief supervisor at Camden. He is now on his fourth assignment—a group supervisor at Du Pont's Pigments Plant in Wilmington, Delaware.

"JB's" story is typical of many Chemical, Mechanical and Electrical Engineers who've chosen careers at Du Pont.

We place no limits on the progress our engineers can make. Or the contributions they can make—to themselves, the Company or to society.

If you'd like to work for a company where you can expand and grow, do what "JB" Taylor did. Talk to the Du Pont representative who visits your campus. Or write: Du Pont Company, Room 35971, Wilmington, DE 19898.

At Du Pont...there's a world of things YOU can do something about.

An Equal Opportunity Employer. M/F
