"COMPLETE AWARENESS FOR COMPLETE COMMITMENT"

VOLUME XLIX NUMBER 32 NORTH CAROLINA AGRICULTURAL AND TECHNICAL STATE UNIVERSITY GREENSBORO, N.C. FRIDAY, JANUARY 20, 1978

## Hunt Speaks On T.V. About Wilmington 10

Raleigh (AP) - Gov. Jim Hunt indicated Wednesday he hasn't made up his mind what to do about the Wilmington 10 yet but is still studying case records and "continuing to think and reflect in my own heart and mind."

Hunt has been under pressure from supporters of the 10 to pardon the group, and some have indicated they will continue to fight for a pardon if Hunt chooses to commute the sentences or do nothing at all.

"I'm going to make my decision regardless of what they might think or do," Hunt said at a news conference Wednesday. He added that he didn't expect his decision, whatever it might be, to end the story of the Wilmington 10.

The governor has scheduled a 30 minute speech at 7:30 p.m., which will be carried by the University of North Carolina television network as well as some commercial television and radio outlets.

Hunt said he is not seeking advice from anyone on the

case now, but has received a lot of calls about the case.

Tuesday, Anne Sheppard Turner, the only member of the group now out on parole, held a news conference and said she was "concerned" that Hunt might grant a less than full pardon. If so, she said, the 10 and their supporters would continue their fight for a full pardon.

Hunt said the speech was being offered to television and radio stations because a few stations had asked for it. It will be televised from Hunt's Capitol office.

"I think the people of North Carolina have a right to hear their governor announce his decision and why he's decided," Hunt said. "And I think they have a right to hear it first hand."

The Wilmington 10 include nine Black men convicted in 1972 of conspiracy and unlawful burning following racial strife in Wilmington, in 1971. All but Mrs. Turner, who was convicted only of being an accessory, are still in state prisons.

Approximately 800 students participated in the first Annual Summer Job Fair.

## 800 Take Part In Job Fair

By Anthony Boyd

The first annual summer job-fair came to an end yesterday after approximately 800 students came through its door seeking employment.

The job fair, which began

January 18, was designed to provide interested faculty and students with an opportunity to explore summer employment possibilities.

The job fair focused on internships, faculty exchange programs, cooperative education and employment in non-technical disciplines.

At the dinner held in the Hilton Inn, faculty members were given a chance to discuss the career opportunities available to their students. Those not teaching for the summer were given a chance to seek summer employment.

Beginning at nine the next morning, students began filing past the doors of the Student Union Ballroom to seek interviews for summer employment. Fifty-two representatives of 35 state, local, and

national companies were on hand.

Harold Lanier, director of cooperative education and co-chairman of the planning committee, said, "This is the first time an endeavor of this nature has been attempted." He also said, "The job fair provided exposure to students, faculty, and non-cluster companies of the industrial cluster concept."

The summer job fair was sponsored by the committee of the University Industrial Cluster with the cooperation of the Cooperative Education Department and the Career Planning and Placement Center.

Lanier said, "We are hopeful that this will be the first of a number of such job fair activities and that we will get greater involvement."

## A&T Homebase For Experiment

A national experiment which promises to beam classroom instruction via satellite to two colleges, 3,000 miles apart, will be held at A&T State University early next month.

A&T has been selected by the National Aeronautics and Space Administration (NASA) to test the feasibility of curriculum and research sharing by means of satellite.

Leo Williams, professor of electrical engineering and director of the project, is being kept quite busy these days preparing for the test demonstrations to be held on the campus February 7 and 9.

According to Williams, the project is being watched with interest by educators and scientists across the nation.

He said the February demonstrations will consist

of the passing of information between A&T and California's Stanford University; an exchange between A&T and Jackson State University, the transmission of information from the Bell Northern Research Limited of Ottawa, Canada to A&T and to California.

Williams said Stanford will be sending information about its research in solid state technology. A&T last February opened the Rockwell Solid State Electronics Laboratory in its Engineering School.

A&T and Jackson State University will exchange information about the two universities' mass communications programs.

The idea, says Williams, is to see if it will be practical for universities to share their curricular offerings and

research projects via satellite.

A portable earth terminal will be set up just outside Crosby Hall, which contains A&T's television studio.

Williams said the programs originating at A&T, will be beamed to NASA's Communication Technology Satellite (CTS), located more than 22,000 miles above the

(See Satellite, Page 8)

## Dowdy Plans WNAA Policy

By Johnny O. Hunter

Chancellor Lewis C. Dowdy coordinated the WNAA-FM policy-making meeting held Tuesday in the chancellor's conference room. He plans to present the format of action to the

N.C. University Board of Governors, January 25. Upon receiving the Board's approval, A&T will be a step closer to initiating a new student-operated radio station.

A team of representatives

comprising a cross-section of students, faculty and administrators spent nearly two weeks formulating the policies and guidelines for the station. Special care was taken to insure that the sta-

(See Students, Page 2)

# McKee Calls Flood Ridiculous

By Richard B. Steele

"It's ridiculous, every year a flood!" exclaimed Roger McKee, assistant director to the Student Union. "I can not remember a year that passed when we did not have a flood in the basement."

This time it was not rain that caused the flood, but a back-up of all the commodes and latrines in the Memorial Student Union. Many students, while attempting to get books had to "wade in the water."

"A flood in the bookstore was avoided by sweeping water back away from the entrance," said James Meachem, bookstore manager. "We had to serve students through the back door. There should be some emergency help in a situation such as this," he added.

During a hard or continuous rain, the same problem occurs. It has happened before.

Damages were minimal. The storage room and behind the bowling lanes recieved the worst of the flood.

## Students To Operate WNAA-FM

(Continued From Page 1)

tion be student-operated. A renewed emphasis on establishing positive community relations will be reflected in the station's program format.

Serving on the Radio Committee were Dr. Albert E. Smith, vice chancellor for development and university relations (represented by Mrs. Shirley Frye); Dr. Frank White, dean of the School of Arts and Sciences; Dr. Jesse Marshall, vice chancellor for student affairs; Dr. Glenn Rankin, vice chancellor for academic affairs; James Wright, acting director of student activities who has been very instrumental in expediting the technical and legal procedures required to operate the station; Richard E. Moore, information services director; Omega Wilson, coordinator of mass media program; Tony Graham, SGA president; and students: Videtta Brown, Norris Turner and Johnny O. Hunter.

The first broadcast will be announced soon.

The physical plant was notified of the incident at approximately 1 p.m. An hour later, the crewman arrived and the water was shut off by 3 p.m.

For the past 12 years the flooding problem has existed. Sewer backups or frozen pipes have not been replaced or repaired as well as the countless other repairs needed for the Union.

Lists have been drawn and sent to the physical plant requesting work on lights, windows, bathrooms, screens, handrails, electrical outlets and many others. These lists of 22 repairs were sent to the physical plant April 25, 1975, and acknowledged May 1 and 15. The following year, a list was sent March 5 and acknowledged by the physical plant December 3. The more recent list sent

September 23, 1977, contained 36 repairs with only a fourth being completed.

"In a meeting with Dr. Dowdy, Sullivan Welborne, director of the Union, and Matthew King, former vice chancellor of fiscal affairs, Dr. Dowdy suggested we ought able to go out and get a bid to do our own repairs since the union is a self-liquidating building," McKee said.

"Also, funds for a security officer for the union are taken out," said McKee. McKee feels that it would seem that the inspectors would take a closer look at the problems concerning the union before a serious accident occurs.

"Maintenance crewpersons are to be commended for the good job they are doing in the upkeep of the union," said McKee.

Oh no! More ice!

Hayes C. Taylor Art Gallery presents its 10th Annual African Art Exhibit. The exhibit is a "Touch and See" display programmed for the blind. Photo by Love.

### Exhibits For Sightless

## Art Show Uses New Concept

By Donald Graves

The Hayes C. Taylor Art Gallery presents its 10th Annual African Art Exhibit. The exhibit is composed of art derived from the African Culture. Also present are six contemporary Egyptian painters' works.

The exhibit is a "Touch and See" display programmed for the blind. The description cards are written in English for the sighted and in braille for the sightless. Blind individuals are invited from other cities to attend. Various groups have already

come to experience the new style of art shows.

Drums, masks, sculptures, and other exotic pieces of art highlight the African exhibit.

Each piece of fine art reveals the creativeness and craft talent designed. The Egyptian painting "is a delight to the eyes."

Mrs. Eva Miller, curator for the Taylor Gallery, states "This is the first art exhibit programmed for the blind here at A&T. I first got the idea from a similar exhibit in Raleigh."

## IT&T Names Graves To Board Of Directors

**New York** - Election of Earl G. Graves, publisher of Black Enterprise Magazine, to the board of directors of International Telephone and Telegraph Corporation, was announced by Harold S. Geenen, chairman and chief executive.

In addition to publishing, Graves is president of radio station KNOK AM and FM in Dallas, Texas, and also heads his own marketing research company. He founded Black Enterprise Magazine, a national monthly magazine specializing in issues affecting economic conditions and business development for Blacks, in 1970. Previously he had been president of his own management consultant firm.

Prior to launching his own businesses, he was administrative assistant to the late Senator Robert F. Kennedy where his primary efforts were in setting up pilot urban development programs throughout New York State.

Named one of the ten most outstanding minority businessmen in the country by the President in 1972, Graves has been similarly recognized by Ebony Magazine as one of the 100

most influential Black leaders in America, and by Time Magazine as one of 200 future leaders of the country.

He was the recipient of the Silver Beaver Award,

scouting's highest recognition for volunteer work, and of honorary doctor of law degrees from several colleges and universities, including

his alma mater Morgan State College where he received a B.A. degree in economics in 1958.

Graves serves on the boards of Tuskegee Institute; the Corporate Fund for the Performing Arts at Kennedy Center; the Advertising Council; the Magazine Publishers Association; and numerous others.

He is a member of the advisory council of the University of Notre Dame Center for Civil Rights, and a trustee of the American Museum of Natural History and Planetarium Authority, and is Commissioner of Scouting for the Greater New York Council of the Boy Scouts of America.

Graves served as a captain in the U.S. Army from 1958 to 1960. He is married to the former Barbara Kydd and has three sons: Earl, John Clifford and Michael.

### Entertainment

## Lanita's Rap

Lanita Ledbetter

If you heard the name "Lovermen Limited" what would come to your mind?

A little over a decade ago, a few Black guys from North Carolina purchased an old car and headed for The Big Apple. Their ultimate goal was to become a n overwhelming success in the music world.

The group of guys found out that to be successful was not the world of glamour they may have thought it to be, but rather a field in which it took much dedication and determination.

After adding a female voice to the group they changed their name to "Love Limited". Does that sound familiar? During this time there were thousands of groups with the word "love" in their names, so they decided to drop the "love" and came up with the name LTD (standing for Love, Togetherness, and Devotion).

LTD's first big break came with their hit 45 "Love Ballad". Since that time LTD has still been growing strong. One of their last achievements is a disco hit "Party Hearty," but that is not the end. Their latest album, "Something To Love" is the first of a trio, which attempts to express the theme of Love, Togetherness, and Devotion.

"Party Hearty" did exceptionally well in the south (I guess that can be attributed to many soulful qualities we possess). The group seems to feel that if you are not accepted in the south, then more than likely you will not be accepted on a national basis.

LTD is moving no where but up, and the future holds inviting promises for the groups; and with love, togetherness, and devotion they are sure to make it!!

## Brown Hall To Open Soon

Many students are wondering when Brown Hall Cafeteria will open for this semester.

"Brown Hall will open hopefully Monday or Tuesday," said Mrs. Laura Thornton, cafeteria director.

"It depends upon the Montgomery Greene Company to check the new dish machine

which has malfunctions," she said.

Anyone will be allowed to eat in Brown Hall. Mrs. Thornton said that almost 400 people have already signed up. Once a person signs to eat in Brown Hall that person cannot eat in Williams Cafeteria, except on

weekends and breakfast meals daily.

The menu will be the same as it is in Williams cafeteria consisting of one sandwich line and the regular meal. Hours for the Brown Hall cafeteria will be basically the same, but Brown Hall may open and close later.

## Seche Tes Pleurs!

There will be a meeting of all French students who have studied the above mentioned poem. (All students before January, 1978)

Place - Merrick Hall Auditorium

Time - 2:30 Friday, February 10, 1978

Please bring writing (note taking) materials.

Thank you,  
Joyce M. Woodbury

# Prisoner Of Knowledge

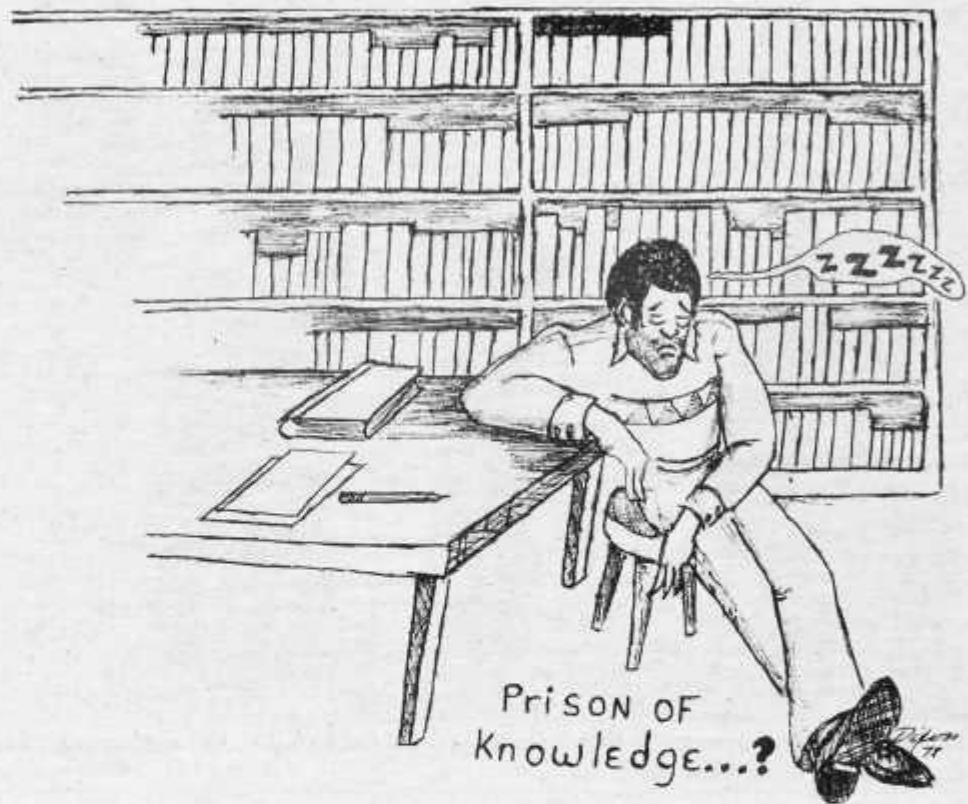

What happens on those nights when the library closes early due to bad weather or unbearable studying conditions? One example is when the library closed early last semester because it had no heat. If the librarian or maintenance personnel does not feel up to checking the floors for students who were not informed of the change in schedule, what happens then?

The simple solution to this problem seems to be for the microphone in the library to be enlarged, or some means of communication be established to inform the people of schedule changes and to remind them that the closing time is near so they can prepare to leave.

Until something is done to remedy this situation, it is advisable that those people who constantly forget about the time while studying or like to go to the stacks to sleep, be careful. It is a possibility that you could become a prisoner of knowledge for a night.

In the past, the library did page all the floors to inform the students that it was about to close. The intercom the library used for these purposes in the past is no longer working efficiently. In order for the new intercom to be wired to be heard in the stacks, the microphone would have to be widened. This has been requested but nothing has been done as of yet.

Have you ever been seriously trying to study late at night in the Bluford Library stacks? Maybe you forgot your watch and had no means of telling the time, so you were not aware of the fact that the library was about to close. Unless there was a nice librarian on duty, who didn't mind walking on all of the floors to see that no students were in the building, there is a possibility that you would have been locked in the library.

# Youth Cast Your Vote

By Catherine Speller

The legal age for voting purposes in the United States has been lowered to 18 for several years now, but has it really been taken advantage of by American youth?

Have the youth of America really accepted their responsibility as citizens by registering to vote?

In many areas, this writer is sure that the answer to this question is no. Many presume that their votes wouldn't really matter either way. But this is not really true. It was proven in the last presidential election that a group of ordinary citizens who usually didn't cast their votes for their favored candidate,

brought a land slide victory for Jimmy

Carter, a southern peanut farmer. Carter seemed to be the answer to the American dream; a country where everyone has an equal chance to reach the top.

The youth vote could bring about a noticeable change in the make-up of national and local government.

Students of this university have a record of not voting for class officers and student body representatives, but lets not carry this over into our local and national government elections.

As we all know, this is another election year for congress and other public offices. We, as the youth of America, should go out and cast our vote for a favored candidate.

# Where Do Aggie Values Lie?

By Sheila Williams

A&T could very well be losing its name as one of the top Black universities in the nation. Being an Aggie should mean being Number 1, which the person saying it feels proud and honored. Not only are your grades important when you leave here, but where you received your education also.

Whenever A&T goes to games or to some out-of-state event, this reporter has heard people say "There were so many Aggies, it looked as if they were coming out of the walls."

But bit by bit students as well as administrators are leaving this university. If not for retirement, it's because of personal reasons.

Does it make you wonder? Is A&T

slowly falling apart? One reason may be that the university is doing this to themselves, not working together as a community. Some students left this semester because their work-aid was cut. Thus, because of late grades, they were not able to receive their grant money this semester and didn't know whether or not their grade point average (GPA) was high enough to keep their grants.

Problems of this nature as well as other situations are causing A&T to lose it's quality. Day after day, this reporter hears "I can't wait to leave here," or "I'm transferring next semester."

It makes one wonder what does it feel like to be a "true Aggie"?

# A&T Questions Attitude Of Media To University

## Editor of The Register:

Much has been written and televised about A&T State University on the negative side, yet, I do not believe anyone from the media has really sat down and given the situation serious thought.

The President of the United States wanted Bert Lance as his budget officer and thought that he was an upright and honest man. He hired him, but not until his background was investigated did he find out otherwise.

When an employer hires a person based on his qualifications and recommendations of his peers, he is accepting the person, hoping that he will measure up to the ethical standards (in this case the State) and continue that way. All the employer can do is hope that the person remains loyal and carries out his responsibilities in a manner that will bring credit to himself and to his employer.

It would be nice, I guess, if a person could live a week beforehand as actors rehearsing a play, and then go out and live a week, but we must get up each day and go out and live an untried day. We all know that there is a risk in everything that we do, even if we love one another, but we accept this as part of our being on this planet earth.

Several years ago when the campus was in turmoil, it involved many more people than are involved today. Chancellor Dowdy was our leader then and the issues were resolved. I am sure we do not face insurmountable problems today.

Recently, a reporter and camera crew went to a surrounding community and purchased fireworks, knowing that the purchase of such items was illegal for everyone. Although the fireworks were turned over to authorities in that county, subsequently, they were arrested. The report and camera crew reportedly felt that they should not have been arrested on the charges because they were doing investigative reporting and that the law did not apply to them in that case or perhaps in

other cases they have or plan to investigate.

The question that is asked by a large segment of the community, is what action did Charles Whitehurst take against his employees after they pleaded "no contest" in the case? Is WFMY-TV above the law? Under man's law, there are different degrees of law breaking and sometimes the outcome depends on the socio-economic background, race, creed or color of the person involved. In some cases, the exposure is short and others in the media will squeeze every ounce of substance until nothing is left.

It has been said that the "good that men do is often interred in their bones, while the evil lives long after."

We, here at North Carolina A&T State University, have a great deal of pride in our University, our work, our students and everything we have accomplished. Regardless of our adversities at the present, we shall continue to produce a high calibre of students and serve the people of this State and Nation, not just from Dare to Cherokee, or from Greensboro, North Carolina but throughout the world, just as we are now doing.

Roger McKee

Photo by Love

Construction on A&T's campus has caused many problems for drivers.

## Students Question Population

By Richard B. Steele

How many males and females were on campus last semester? Many students have asked this question as the growing number of Aggies continues to rise and dormitory space becomes crowded.

The total on campus enrollment for undergraduates last semester was close to 5,000 persons. The men totaled 2,558 with the women running a close

2,293 which were 53 percent male and 47 percent female.

"The trend for the past three years has basically been 50 percent-50 percent," said Mrs. Geneva C. Bullock of Registration & Records.

"Last year the percentage was a 51-49 as compared to 70 percent male, 30 percent female in 1950. The statistics reveal that more females are enrolling at this university."

Chances are that you'll find a date before Valentine's

Day. There are more than 5000 individuals enrolled at A&T but a vast majority have moved off campus or are graduates of the university.

Aggie men, fear not, there are still four ladies to every man with the help of area colleges and universities.

### ENTERTAINERS WANTED

The Old Country, Busch Gardens, Williamsburg is looking for 150 Singers, Musicians, Dancers, Jugglers, Technicians, and Costume Characters for an exciting season of full time summer employment.

All applicants will be taken on a first-come, first-serve basis. An Accompanist, record player, and a cassette recorder will be available.

# Ms. Shaw Speaks In Merrick

By Wilbert Ingram

"I would encourage all accounting majors to look into the jobs we have to offer because they are really 'gray jobs'." This statement was made by Ms. Dorothy Shaw who is an assistant Regional Equal Opportunity officer with the IRS.

Ms. Shaw went on to tell the students present at the special meeting of the Alobaem Society, that as minorities we should strive to give our employees a little more than they expect in order to reach the top.

Joy Moore, chief of the Audit Division in Winston-Salem, explained that he was really interested in accounting students to become Revenue Agents in the Audit Division.

"Revenue Agents require 24 hours of accounting and their training qualifies them for the CPA examination," stated Moore.

Larisha Moore, a former A&T student who now works with recruiting, went on to tell about the training needed to become a Revenue Agent. She said that as an appointee, one would have in-class as well as on-the-job training.

"Almost all of our jobs are filled through the U.S. Civil Service Commission and this means you must apply to them in order to get your name on the register," said Mrs. Libby Haynes who is a Personnel Staffing Specialist. She also explained that the register would be closed January 19 and that it could be a year before it was opened again.

Ms. Moore commented that the salary of a Revenue Agent is as competitive as that of an accountant working for

a large corporation.

"You start out at \$9,959 and after three or four years you are making \$21,000," said Ms. Moore. She also told the students that the IRS had many other jobs to offer in addition to that of Revenue Agent.

She stated "We offer jobs as Special Agents, Revenue Officers, Tax Auditors, Internal Security Specialists and many others, but no matter what the job I feel that our jobs are just as competitive as others."

## Students Seek Careers As Professional People

(Continued From Page 5)

students went on to graduate, medical, dental, pharmaceutical and veterinary schools. Others pursued careers as laboratory specialists, state and federal government officials, teachers, lawyers and college presidents.

As director of several National Science Foundation Workshops and Institutes, Dr. Graves wrote proposals that led to a federal grant of close to one million dollars to

A&T during 1960-73.

With the establishment of this memorial, many potential doctors, teachers, lawyers and specialists will have the chance to continue studies in their fields of service to humanity.

Contributions may be sent to The Artis P. Graves Memorial Scholarship Fund, P.O. Box 21753, Greensboro, N.C. 27420. Make checks payable to, The Artis P. Graves Memorial Scholarship in Biology.

# GC Sponsors Program

The Office of Minority Student Relations of Guilford College in cooperation with Triad Sickle Cell Anemia Foundation will sponsor a two-day program on careers in the health area for minority students. The program will begin at 7 p.m. January 30 in the Gallery Room of Founders Hall at Guilford College.

The keynote address

"Preparation for Careers in the Health Field" will be delivered by Dr. Daniel Savage from the National Institutes of Health, January 30. Dr. Gilchrist, also from N.I.H., will present information on health careers within N.I.H. during this first evening session.

The second day of the institute will be designed for individual conferences with the

staff members from N.I.H. and students interested in careers in the health area. We welcome and invite your participation in the two-day program.

For additional information, contact either Office of Minority Student Relations, Guilford College or Triad Sickle Cell Anemia Foundation, Greensboro.

## Campus Haps

**Men's Council** will meet at 7:00 p.m. Monday, January 23, Scott A, second floor lobby.

**Director of Housekeeping**, Mrs. Mary Dalton, will speak in Scott A, Second floor lobby, Thursday, January 26, at 7:30 p.m. Topic of discussion is "Housekeeping Problems".

**Wallace Peppers, instructor of English**, is seeking people fluent in the languages of Italian, Latin, Danish and Swedish. All interested applicants should see Peppers in 102 Crosby Hall or call 379-7468.

**ATTENTION: Women's Council Officers** there will be a meeting at 7 p.m. on January 25, 1978, in High Rise.

**Black Ideas Forum of Guilford College** presents an open discussion on "The Judicial System and Political Prisoners". The forum is scheduled for January 26, at 7:30 p.m. in Room 203 of Founders Hall.

**Rape-** The next victim could be you. A seminar sponsored by the Psychology Department will take place Wednesday, January 25, at 7 p.m. in Room 212 in the Student Union. Everyone is invited.

**There will be a Student Alumni Council's meeting** on Wednesday, January 25, at 8 p.m. in Room 213 in the Student Union. All old members and students who would like to become members are urged to attend.

**Biology Club Members!** There will be a meeting at 6 p.m. Wednesday, January 25, in Barnes hall.

**There will be a Women's Council meeting** on Wednesday, January 25, at 7 p.m. in the East Lobby of High Rise.

**There will be a Social Service Club meeting** Tuesday, January 24, at 6 p.m. in Room 212 of the Student Union. The reorganization of some committees will take place.

**The Beta Kappa Chi Scientific Honor Society** will have a meeting January 25, at 6 p.m. in Hines Hall, Room 101. All members are asked to attend.

**The A&T Register** will have its weekly meeting Wednesday, January 25, at 7:30 p.m., at the Register office.

## Sports Notebook

By Archie Bass

Tuesday night at the Greensboro Coliseum will always be a time for remembrance on the part of head coach Gene Littles.

In previous outings, whenever the Aggies were close, it was always an unfavorable ruling on the part of the officials or a costly turnover that was detrimental to the Aggies.

The former Carolina Cougar may have chewed all his finger nails off as a result of his "Cardiac Aggies," but the unheard of Charles Thompson, who played the role of the surgeon, managed to help the Aggies to nervously hang on.

The game, throughout the second half, reached spurts of uneasiness and boredom, not to the point that it had signs of the Virginia Commonwealth game where the fans were totally out of the emotional feel of the game but there were restless times during long dry scoring spells.

Watching Sparrow fly and Pipkin sky on the court is indeed athletic versatility. However, it is a proven fact that, once the fans are behind you, things can and do happen.

Besides having an excellent athletic program here at A&T, athletes should be extremely happy to have the best fans ever to be found at any university. The emotion that A&T fans have is absolutely incredible.

The role of a fan is sometimes disheartening especially when there are those nonchalant and, more importantly, intervals. Without the yelling and the screaming, there would be no athletic program here at A&T nor at any other university.

This writer salutes the faithful fans that take the time out to drive in the rumble-jumble traffic to the coliseum.

Just how important are you? Imagine "Bird" scoring on the jumper, slam-dunking and throwing an assist to Pipkin between the legs of five defenders. Sparrow looks around to hear the popular chant--"Bird"--and suddenly discovers there are no fans.

Now do you see how important you are?

The famed "New York Connection" featuring James Sparrow and Harold Royster were honored this week as the MEAC players-of-the-week.

Sparrow, who was the player-of-the-week, compiled 71 points, 11 rebounds and 13 assists. Royster, who was tagged as the rookie-of-the-week, accounted for 59 points and 25 rebounds.

\*\*\*\*\*

This weekend could really put the Aggies in the driver's seat in the MEAC with a win over S.C. State.

S.C. State, since the last game with A&T, has been hit by academic ineligibility of seven players.

Currently, the Bulldog have a roster of only eight players. So, Gene Littles who stresses the patience aspect of basketball may change his strategy a little bit by letting "The Bird" fly.

Even though running-and-gunning cramps Littles' coaching style, he would not be a coach if he failed to take advantage of wearing the eight-man team down by running.

Running-and-gunning should bring Sparrow to his greatest peak ever this weekend. I'm sure if it were up to Jim McKinley, he would strongly urge Littles to let Sparrow go to compensate for the bitter football shellacking.

### Team Gets Better

## A&T Victories Get Bigger

By Craig R. Turner

"The wins get bigger and we seem to get better. I'm real happy with the way our team has come along." Gene Littles was all smiles as he stood outside his club's locker room following a dramatic 75-70 overtime victory over the Seahawks of UNC-Wilmington Tuesday night.

A&T, a team that usually relies on a quick running tempo for offense, shunned that tactic against UNC-W for a more deliberate and patient offense to help control the tempo.

"They use a very deliberate style to cut out turnovers. They overload quite a bit to lull you to sleep and hit the backdoors on the weak side. They are in trouble when they get behind because of it but that doesn't happen too often. They are a very smart ball team," said Littles.

Both squads opened the game in a very tense mood as evidenced by several turnovers and missed opportunities on fast breaks. A&T set the mood for the bulk of the game by building a 28-17 advantage with 6:50 left in the half. However the Hawks' 3-2 zone held the Aggies scoreless for three minutes as 6-8 center Denny Fields led the visitors back at halftime to a 34-33 deficit.

Littles decided to go with the little used reserve guard Bubba Thompson in place of regular Joe Brawner for the duration of the contest.

"We weren't getting a lot from Joe so I decided that a change would probably get us going into our patterns. The steal by Thompson in the overtime was the biggest play of the night."

That steal came with just 1:13 left in the game (overtime) as Thompson stole the ball from UNC-W's Ralph Peterson and drove for the layup to break the regulation score of 67-67.

Wilmington missed two straight outside shots while the Aggies converted on two one-and-one situations by Brawner and forward L.J. Pipkin in the final seconds. Littles had used a three-guard offense in the overtime to offset the full court pressure of the Seahawks.

"We went to the three guards (Sparrow, Brawner, and Thompson) because we knew once we had the lead that they would take quick shots and press us all over the floor. The fouls were coming.

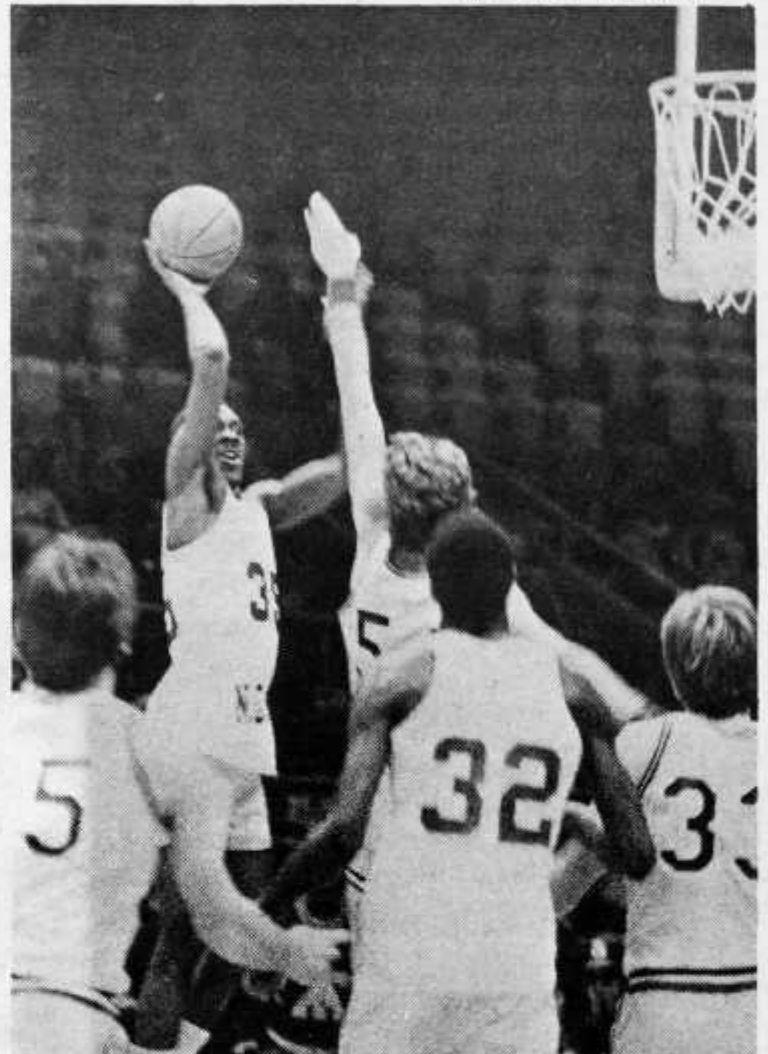

Littles also remarked that his club showed a great deal

of poise after Wilmington gained a six-point lead midway in the second half.

"Down there we were in the same type of spot but we rushed ourselves into some bad shots, committed some turnovers and got blown out in overtime. I told them not to panic, be patient, and take the best shot possible."

Wilmington had a chance at victory in regulation after gaining control of the ball with eleven seconds left. The Seahawks tried inbounds play to Fields but were bottled up inside and guard Bobby Martin tried a 35 footer over 6-6 James Sparrow that was well off the mark. Mar-

### S. C. State - NCCU Game

## Top Contest Last Weekend

By Craig R. Turner

It appeared to be the top contest of the season almost a week ago. A&T had just knocked defending champion S.C. State off in Greensboro. The Bulldogs had an impressive record of 7-1 before meeting North Carolina Central last Monday. A great rematch was certain.

However, the Eagles were not going to play dead and rose up to swat the Bulldogs 82-76 in Durham and temporarily erased S.C. State from the title picture. Even more strange was the fact that Central had lost two nights before to bottom dweller Delaware State by seven points.

The MEAC has gotten off to a wild start where all seven clubs can defeat each other on any given night. Undoubtedly, the surprise in the conference is A&T, who was

picked no better than fourth in preseason after last year's 3-24 record.

The Aggies have run off a 3-0 record in league play and appear to be the team that everyone will have to catch. A great deal of the Aggie success is because of the return of James "The Bird" Sparrow, a 6-6 guard from Brooklyn, N.Y. He sat out last season because of eligibility problems.

His 20 point scoring average, five rebounds, and as many assists have been a large plus for the youthful Aggie contingent. Sparrow has had considerable help from freshmen Joe Brawner and 6-8 Harold Royster. L.J. Pipkin, the 6-9 forward turned center, has dropped off in scoring but his rebounding and shot blocking has increased dramatically.

 (6-8), Larry Bonner (6-6), and Keith Davis (6-7) have

## Coaching Move Wins Game For Littles

(Continued From Page 7)  
 tin is only 6-2.  
 UNC-W Coach Mel Gibson acknowledged that the game was probably won because of a coaching move by Littles. "We had the momentum or way until they went to a man-to-man. They forced us out of our pattern offense and that had a profound effect. We played well but A&T has a fine basketball team."

A&T's win was its fifth straight and its sixth in the last seven ball games. The winners were led by L.J. Pipkin, the 6-9 junior, with 25 points, 14 rebounds, and three blocked shots. Sparrow was next with 19 points and six assists, and Joe Brawner made 14 for the night.

Wilmington, which led the nation in field goal percentage, shot a miserable 40 percent. The Hawks average over 56 percent per outing but A&T's sticky man-to-man caused some 20 turnovers.

UNC-W was led by Denny Fields with 27 points and Bobby Martin with fourteen.

A&T now stands at 7-7 overall and 3-0 in the MEAC.

## Satellite To Relay Decision

(Continued From Page 1)  
 earth.

A signal will then be relayed by the satellite to the three out-of-state locations.

Williams said the transmission could be received by stations located in almost two thirds of the United States.

Working with Williams on the project are Varice Henry of the Goddard Space Flight Center, Guy Gurski of NASA's Lewis Research Center and officials of Rockwell International in California.

Two recent A&T graduates, Robert Copeland and Walter Lowe, now at Stanford, will assist with the project.

carried the weight in the frontcourt. Marvin Brown, the 6-7 transfer from Temple, is still healing from a freak automobile wreck, and will probably rejoin the squad in time for the crucial Howard-Morgan series the first of the month.

Kim Butler, the point guard for most of this year, should be ready after

recovering from ankle problems as should 6-10 Mel Palmer. Both play instrumental parts in Gene Littles' free style substituting moves.

S.C. State will host the Aggies this coming Saturday in what appears now to be a do-or-die contest for the Bulldogs. With two losses in the MEAC, a third such defeat would make it prac-

tically impossible for the SCSC team to repeat as regular season winners.

Once averaging 96 points per outing, SCSC has slacked off considerably during the last three games due to lack of point production by Arthur Snipes and center Carl Green.

Most of the burden has been on 6-1 Harry Nickens and 6-5 Willie Brown. Bruce

Beasley is the point man but has been silent scoring wise.

Coach Tim Autry was very vocal about his team's inability to defend A&T in a man-to-man defense in the loss to A&T. He undoubtedly will try to force a much faster tempo in Orangeburg, S.C.

Gametime is set for 8 p.m. on the campus of S.C. State Saturday evening.

# OUT IN FRONT

## CHALLENGING CAREER OPPORTUNITIES WITH THE INDUSTRY'S LEADER

### Anheuser-Busch, Inc.

Engineering Students! If you are aggressive and looking for a career-oriented position, consider putting yourself OUT IN FRONT with Anheuser-Busch, the Industry's Leader. We will be on campus looking for individuals with Engineering degrees to join our Engineering and Operations Departments on Tuesday, January 24, 1978.

**CENTRAL ENGINEERING:** B.S.M.E. M.E.'s will gain experience in such diverse fields as material handling, equipment layout, piping system development, steam generation, compressed air systems, ventilation, heating and air conditioning and high-speed bottle and can packaging.

**B.S.E.E.** E.E.'s can expect to be working in such areas as electrical machine design and application, power distribution, sub-station layout as well as industrial and commercial lighting, electrical control circuits and systems control.

**PRODUCTION MANAGEMENT:** Our Operations Department is offering opportunities in our Production Management Training Program for individuals with leadership ability and Engineering degrees. This 12-month course is designed to cover all phases of operation and administration and prepare trainees for a career in Production Management.

FOR FURTHER INFORMATION AND SIGN-UP, CONTACT YOUR PLACEMENT OFFICE.

**ANHEUSER-BUSCH, INC.**
