Advisory Commission Discusses Biennial Budget

By Sheila A. Williams

The Advisory Budget Commission met yesterday afternoon in the chancellor's office to discuss the biennial budget request for the years 1979-1981.

Chancellor Lewis C. Dowdy's presentation included future projections and general information about expanding opportunities and services for A&T.

"We want to expand our horizons, vertically and horizontally," he stated, "to meet the needs of students in every area of education." He also said that he hopes to prepare teachers for community colleges in counseling and administration.

The university requested $41,762,072 for capital improvements, and $5,673,412 for strengthening programs and improvements within support areas.

Dr. Lewis C. Dowdy, discussed some of A&T's proposed projects with the board of directors and trustees.

Black Student Coalition Holds Press Conference

By Richard B. Steele

"That is not an isolated situation. We have been aware for some time that Black students are turning down everywhere," stated Byron Horton, III, executive vice president of the North Carolina Black Student Coalition at a press conference held in the Carolina Union on the campus of the University of North Carolina at Chapel Hill, this past Thursday. Horton was referring to a statement made by Associate Dean Thomas Dear in 1978 that Blacks were admitted to UNC-Chapel Hill in 1978 than in 1974 in spite of the larger pool of qualified applicants.

Human Rights Activist Addresses Capacity Crowd

By Catherine Speller

"Black institutions were acceptable as long as they kept Blacks out of white institutions. But now, when Blacks are allowed to attend white institutions and still choose Black institutions, why do we keep Black institutions," said Dick Gregory.

Human rights activist Dick Gregory addressed a capacity crowd of students and members of the local community Thursday night in Harrison Auditorium.

Gregory began his lecture by commenting on the Muhammad Ali versus Leon Spinks fight held recently in New Orleans, La., which received a lot of boos from the crowd. "I'm just another jive boxo," retorted Gregory. It's because of Ali and the things that he stands for that you students are so arrogant today," explained Gregory. "Ali came along during the time when niggas didn't even like each other and said Hey, look at me. I'm fine," said Gregory.

"During the Vietnam war I was standing up for myself and others who couldn't afford to run away, and we should look up to Ali as a positive representative of the Black image," exclaimed Gregory.

"Travel all over the country speaking on college campuses, said Gregory and the biggest complaint I hear is that the education and food, problems, stressed Gregory. "Students, once you realize that the universities exist because of you instead of your existing because of them, you will be able to bring about the change that you desire," said Gregory.

College students tolerate a lot of things that high school dropouts wouldn't, like cramped living spaces, bad food, and poor transportation. (See Sex Page 6)

Campus Interviews Important

By Larry L. Jenkins

"The campus interview is probably the single most important event in a student's career," said Dave Arterburn, group director of personnel management in the Atlanta office of Coopers and Lybrand.

Arterburn spoke to the A&T students on "The Campus Interview" Monday evening in Merrick Hall. Coopers and Lybrand is one of the Big Eight firms in the United States.

"The first phase of a job search is the pre-interview," continued Arterburn. Students were encouraged to ask questions and to read materials concerning the company they plan to interview with. Emphasizing the importance of Career Day, he stated that representatives came to A&T trying to identify students that will benefit their companies.

The second phase of the campus interview is the selection process. From the employer's point of view, according to Arterburn, the selection process is the interviewee's selling himself to the interviewer. Being relaxed, oneself, and preparing for the interview were essential pointers mentioned by Arterburn. "The basic objective of the campus interview is to sell yourself," said Arterburn.

Attention: all executive board members of the Pep Club, there will be a very important meeting at 8 p.m. on Oct. 2, in the Student Union Lobby.

There will be a Social Service Club meeting Tuesday, Oct. 3, in Room 212, of the Student Union at 7 p.m.

Attention: All campus queens' pictures will be taken Oct. 10, from 1-6 p.m. at the A&T Register's office for the Homecoming Edition of the Register. If there is a conflict in time, please make appointments in advance with the head photographer for Oct. 12. It would be best, queens, if you have your pictures taken on the day scheduled.

All students interested in becoming University ushers should contact Demetria Staton or Mrs. Sandra Cook, assistant advisor at the office of the Art Department.

Class portraits will be taken October 2-13, from 8:30 a.m. until 5:30 p.m. by appointment only. Please come to the Yearbook office, Room 210 Memorial Union to set up an appointment. Proper attire for seniors will be provided.

Applications are now available for all organizations to take pictures for the yearbook. Applications can be picked up in Room 210 of the Memorial Union between the hours of 8:30 a.m. and 4:30 p.m. Mon. thru Friday.

Tutoring sessions for the National Teacher Exam (NTE) and the Graduate Record Exam (GRE) will be held every Monday from 4:15-5:15 p.m. in Crosby Hall Room 201. If you want to receive tutoring but cannot attend at this particular time please contact Professor Marguerite Porter or Prof. Robert Levine of the English Dept. Telephone (379-7485).

WHAT'S ARMY ROTC ALL ABOUT?

Developing leadership in you. Building your self-confidence. Challenging your abilities. Giving you an edge on your classmates. Teaching you something you may never thought you could learn on a college campus.

Learn more about you. Learn more about Army ROTC.

Army ROTC.
Learn what it takes to lead.
A. Engineering Society Begins Fall Projects

As the fall semester gets under way various organizations are trying to get their ideas and plans off the ground. One such organization is the Architectural Engineering Society (AES). Donn L. Booker, president of AES, said, "We have already started on different projects: (1) tutorial sessions, (2) reading and (3) job careers.

The tutorial sessions began in the earlier part of September. The purpose of the sessions is to create a working atmosphere with an interested group of students.

"We have tutors that are enthusiastic in helping other students with their courses and I feel the sessions are a great advantage to study time and consistency in homework," stated Tim Stoddard, vice president. "As of now, there are five courses being tutored; but we are planning to add to the list as they are needed.

Tutors are available for the following courses: A.E. 111, A.E. 456, M.E. 210, M.E. 335, and M.E. 336. As the semester continues, we would like to see more students involved in the sessions."

Ulysses Hester, treasurer, said, "The society has gotten off to a good start, but we need more participation from the freshman class so that they may gain exposure to all Architectural Engineering Society's related activities and be actively involved in project planning throughout the 1978-79 academic year."

"We have set up various committees in the society, and the chairpersons are working consistently. We hope the steady flow of communication between the chairpersons and members will continue. One of these committees is the Jobs Career Committee and they are trying to keep the society aware of Job Opportunities and new happenings in the Architectural Engineering Field," stated Shuron Peterson, secretary of the AES.

As an initial project for this year, Ms. Vivian Logan, assistant director of Career Planning and Placement, will give a seminar involving interviewing techniques as well as an orientation to the services and resources provided through the Placement Center. Another project of the AES is the learning lab. At present, the learning lab is in the planning stage.

The faculty of the Architectural Engineering Department have open doors to any students that may have concerns or problems related to the course of study in the Architectural Engineering Discipline.

Chandra, "in terms of the number of minorities entering engineering schools and in the number of them graduating," said the A&T dean approximately 30 percent of the nation's students are minorities, and the goal is to graduate engineers in that proportion.

Chandra said the IBM funds, payable over a five year period will be used to provide tutorial assistance, financial aid for the students and to support a unique summer program which brings recent high school graduates to the campus for some pre-engineering study.

"We shall also use the funds to provide well-trained faculty and additional laboratories and equipment," he said.

Chandra said the funds from General Motors will be used for faculty development and for the enhancing of laboratories and for student scholarships. The money will be paid over five years.

Chandra said in some instances students coming to college lack the necessary training in mathematics and science.

"Provided with good teachers and facilities, these students develop into fine engineers," he said.

Chandra said A&T has witnessed a steady increase in engineering students and graduates since 1974. At that time the school enrolled 340 students. Today the enrollment is over 700.

Four years ago the graduate engineering enrollment was 16; there are 50 graduate students enrolled this year.

Officers of the A.E.S.

Break Enrollment Record

By Shakespeare Maya

The foreign students office has revealed a record-breaking enrollment of foreign students this fall at A&T. The new students, totaling 70, bring the number of foreign students to over 200. For the first time in its history, A&T has received students from the United Kingdom and South Africa.

Ten students from the South African countries of Zambia, Zimbabwe, South Africa and Namibia arrived at the beginning of this semester under the auspices of the Phelps Stokes Foundation. The Tanzania Aid Manpower Assistance Program has six students in the university, and the Nigerian Aid Technical Assistance Program has sponsored fourteen students.

Recent statistics show family groups in the enrollment. From Bermuda are the Durhams with four members on campus. The Safavis from Iran are a group of one sister and two brothers.

Many other students come from Guyana, Venezuela, Nigeria, Kenya, Kuwait, Qatars and many other countries.

Mrs. Anne C. Graves, advisor of the International Students Program, said that there are a good number of things needed to provide better services for the international students. Among these needs are office accommodations, office facilities and office equipment. Also very significant is the need for year-round housing on campus for those students who have no where to move to during vacations and breaks.

Engineers Are Hard To Find

The employment situation for engineering graduates at A&T is ideal for the students, but not so good for the prospective employers. There aren't enough students to go around.

According to Dr. Suresh Chandra, dean of the School of Engineering, some 600 companies annually engage in intense recruiting for 60 graduates.

However, the school has received two grants totaling $200,000 which Chandra will use to improve the retention rate for engineering graduates. Ultimately, he believes that more students will enter the school, and more of them will graduate.

The largest grant, $150,000, has been approved for A&T by IBM to assist the university in improving its retention rate. The other grant for $50,000 has been made by General Motors. Chandra said these funds will be used for general faculty and student development, which should also help to improve the retention rate.

"The nation's aim is to achieve parity by 1982," said Chandra. "In terms of the number of minorities entering engineering schools and in the number of them graduating," said the A&T dean. Approximately 30 percent of the nation's students are minorities, and the goal is to graduate engineers in that proportion.

Chandra said the IBM funds, payable over a five year period will be used to provide tutorial assistance, financial aid for the students and to support a unique summer program which brings recent high school graduates to the campus for some pre-engineering study.

"We shall also use the funds to provide well-trained faculty and additional laboratories and equipment," he said.

Two members of the Wilmington Ten and one of their lawyers were guest speakers on Sounder on Tuesday morning. They answered questions of the public about the things that they have been involved in since their paroles, about their plans for the future, their time spent in jail, how they feel about Governor Hunt's decision, the effects that it had on the entire group and their leader Ben Chavis.

After the radio program a luncheon was held in the Red Carpet Room for the group sponsored by the Student Government Association.

When the voter registration drive was mentioned, everyone thought that it was a good idea to encourage more young Blacks to take an active part in politics and vote. It was stated, even if the Blacks don't vote, if we get them to register in numbers, that will be enough to make whites worry about the elections.

When asked about their time spent in prison, they replied because theirs was a highly publicized case they often received little privileges that other prisoners didn't, but nothing elaborate. They were given a chance to continue their education while in prison and plan to finish their schooling now that they are out.

"Even though we have been paroled we are still going to continue to work towards clearing our names", said the two members of the 10.

Other subjects such as the future of Blacks in society, competency testing, and the future of Black institutions were discussed. The members of the Wilmington 10 group who are on parole have been in contact with Ben Chavis still in prison and are planning speaking engagements for the near future.

"The fate and destiny of the Black institution are determined by us. These words were spoken by Dick Gregory last evening to a packed auditorium of students and faculty. His speech aroused the audience as he spoke on issues dealing with racism, sex discrimination, politics, education, health, and moral values. Usually when a speaker deals with basic issues such as these, he uses euphemistic phrases and terms to get the facts across. However, Gregory broke these issues down to the point.

There are so many issues and problems that we as young people are faced with today. Drugs, alcohol, and suicide are but a few number on killers among teenagers. These killers cannot always be solved by tangible measures. Gregory, therefore, argued that we should get our spiritual lives together, become health conscious individuals and become aware of the tricks of the racists system."

"Black institutions, were first built in order to keep you out of the white schools. But now that you have the privilege to choose on your own, they want to wipe them out." This columnist has stated this kind of idea before in various other articles about the freedom to choose things on your own. It can get to where the Black point of view may not have any significant or particular value. Being able to speak for us all. The government, then his voice would be able to speak for us all. The government is where our voices are so desperately needed.

But this will not and can not happen until you exercise your voting rights. If you don't appreciate what you have, you may not miss it until it has been taken away.
19 Blacks Denied Admission

(Continued From Page 1)

By the same token approximately 750 qualified Blacks applied and only 200 were selected. This does not include the mistakes made that denied 19 other qualified Blacks admission to the university.

Horton, a Goldsboro native, said, "Our motto is 'In Unity Power Prevails.' " A question was raised during the conference concerning the extent of that 'power.' The NCBS is composed of 14 public and private colleges and universities, with at least two student representatives of the coalition. The coalition is working with the community as well as the student; (1) educate parents and community as well as the student; (2) aid present students in passing these tests and (3) educate future students to a degree where there will be no need for competency tests," said Netarltn Best, assistant coordinator of Neo-Black Society at UNC-G, also executive committee NCBS.

There are 14 participating colleges and universities in the coalition: NCCU, A&T, Duke, Guilford, UNC-W, UNC-G, Appalachian, UNC-CH, Elon, Gaston, Campbell, Fayetteville State, Bennett, and Barber-Scotia, commented Mike Quinn, president of the Brothers and Sisters in Blackness at Guilford College, executive committee.

Kevin Buncum, vice-president SGA A&T State University, executive committee, NCBS, announced upcoming events. "There will be a NCBS conference on the campus of A&T State University November 10," said Buncum. Topics and discussion leaders include Dr. Stone, chairman of Afro American at UNC-CH, Dr. Mizelle, competency testing commissioner, and the Bostic-vs-Byrd case.

This, the power lies within the students in North Carolina.

September has been designated as Senior Veteran Month throughout the State, according to a joint announcement by Ken McDonald, director of the Veterans Administration Regional Office at Winston-Salem, and Governor Jim Hunt.

McDonald said that, "Generally, a veteran is eligible for pension if he had 90 days or more honorable wartime service (unless separated earlier for service incurred disability), is 65 or over or permanently and totally disabled at a young age, and his income is within the limits prescribed by law. These income limits are $3,770 annually for a veteran without dependents or $5,070 for a veteran with dependents. Ten percent of social security or other retirement benefits, others may not be receiving assistance because they are not aware of its availability to them. "This month we will be conducting special outreach efforts to locate and offer help to them," he said.

Hines Gets Standing Ovation

By Jacqueline D. Pender

"It's a Pity to Say Goodnight" and "Tea for Two" were some of the compositions performed by Earl "Fatha" Hines, jazz musician in Harrison Auditorium on September 27.

"Fatha" Hines performed many selections from yesteryears to the present time. He was greeted with a standing ovation from the "Aggie" family and other guests.

"Fatha" Hines added humor in the concert. Later in the concert he urged those who feel like the late Duke Ellington. "Duke and I had a lot in common. We exchanged ideas, music and girls," stated "Fatha" Hines. He performed tunes by Ellington such as "Black and Tan Fantasy," "Take the Eighth Train," "Things Ain't What They Used to Be" and many others.

The last part of the concert lead singer Marva Josie serenaded the audience with a medley of tunes from "Show Boat".

His co-workers consisted of three gentlemen and one young lady who also caught the eyes of the audience. They were Wesley Brown on bass, Eddie Graham on drums, Eric Scheider on reeds and Marva Josie, lead vocalist.

"Fatha" Hines added humor to the concert throughout the evening. The audience chuckled when "Fatha" Hines asked Eric, the reed player, "What page are we rehearsing it?" He continued by saying that he was the more likely to get boogalooing and jiving around to realize that things are over 78 years old, who need constant aid and attendance because of their health, or who are housebound.

We have to be reprogrammed and evaluate our values," said Gregory.

The spank, freak, and Patti Duke are still the ones that they're doing in the discos. . . .

HAPPY BIRTHDAY. LIBRAS! !!!!

Food, Sex Discrimination Go Unnoticed In Nation

The deadline for submitting poetry of all types and themes for the fall poetry supplement entitled "Aggie Creations Express Emotions" is Monday October 16, at 6 p.m. Your cooperation in meeting our deadline will be greatly appreciated. The A&T Register staff.
Wyle Harris, former A&T assistant coach, is now the coach at Johnson C. Smith. I am pretty sure he would like nothing more than to defeat A&T in his first year at Smith. To do this, he will have to throw a lot of tricks at A&T. The Aggies, with a 1-3 record, are finding it hard to score points. There seems to be a lot of weaknesses in the Aggie lineup. The veer has not provided the team with any success. Only once this season have the Aggies really let the defense and offense work together in one game.

When A&T faces Johnson C. Smith Saturday, the team will be trying to get back on the right track. In the last two years, the Aggie have rebounded from bad starts on their way to 8-3 and 7-4 records. But this year it won't be that easy.

Quarterback William Watson has been the one who seems to get all the boos and bad mouth, but it isn't his fault. He wants a winning team like the last two years, the Aggies have rebounded from injuries. So, in spite of all the criticism, Watson deserves a hand for trying.

As for the rest of the team, you have to go out and fight for what you want. You can overcome the weaknesses in the Aggie lineup. The veer has not provided the team with any success. Only once this season have the Aggies really let the defense and offense work together in one game.

When Watson started his first game against Winston-Salem State, he thought he would have ten and fight for what you want. You can overcome the weaknesses in the Aggie lineup. The veer has not provided the team with any success. Only once this season have the Aggies really let the defense and offense work together in one game.
