Aggies, please help keep the campus clean. Place trash in the trash cans where it belongs.

Chiles Joins A&T Cluster

Robert S. Chiles, who recently joined the A&T Industry Cluster as Greensboro National Bank's representative, believes that there should be a healthy relationship between the university and the business community.

"I think that businesses ought to be interested in the students," said Chiles, "as they are the business and community leaders of tomorrow."

Chiles was recently named executive vice president of the bank. He formerly served as vice president and manager of retail banking for Wachovia Bank and Trust Company in Durham.

Chiles said universities like A&T contribute much to the development of small and medium sized businesses. He mentioned, as an example, the small-business seminar currently being conducted on Tuesdays for more than 25 small business owners.

The Greensboro National Bank executive added that he hopes his own firm will be able to participate in seminars and workshops from time to time.

A native of Charlotte, Chiles holds a B.S. degree in accounting from North Carolina Central University and the MBA degree from the Babcock Graduate School of

Management at Wake Forest University.

Chiles once served as a loan officer for the Small Business Administration in Charlotte.

He has taught commercial education, practiced accountancy, and served as a visiting lecturer for the American Bankers Association in small business lending and credits.

Chiles is an active churchman, a member of the board of trustees of the University of North Carolina at Asheville and the North Carolina Fellows Program, Inc.

"Business and corporate officials have much to share with students," said Chiles. "We can mesh the theoretical and the practical worlds."

Center Aids Graduates, Alumni

By Jacqueline D. Pender

"The Placement Center is designed to assist immediately graduates and alumni in finding jobs, to assist the student body to find summer employment and part-time jobs when available," stated Leon Warren, acting director of Career Planning and Placement.

"The function of the Placement Office is to publicize a schedule bulletin depicting the various companies coming each month. The schedule will also carry disciplines, which

the companies or governmental agencies are looking for," stated Warren.

This office gets companies to come and interview students by sending letters to particular companies. "Now the push is for minorities so the companies are contacting us instead of our contacting them," stated Warren.

"This office has contact with 80% of the Fortune Magazine companies and many of the smaller firms that do not belong to the Fortune Magazine. Last year we had contact with 634 firms and

Farm Provides Students Products And Research

By Rodney E. McCormick

Being an agricultural school, a question that often concerns and interests A&T students and faculty is whether the school farm produces products for use by the school cafeteria or for public consumption? In discussing this with Dr. Burleigh C. Webb, dean of the school of Agriculture, the answer to this question is both yes and no.

The university farm which is located on McConnell Road isn't a commercial enterprise and is a research facility.

With regard to agricultural production on the farm, there are livestock, poultry, and various crops. The milk produced on the farm during the school year is sold to Williams Cafeteria for consumption. Some of the milk is processed and packaged into ice cream in Ward Hall here on campus.

The eggs produced are also purchased by the cafeteria. Crops are primarily a source of nutrition and feed for the animals. Livestock such as swine and beef cattle are ship-

ped to slaughterhouses for their meat. Money generated from these sales are rerouted to the business Office which incorporates the receipts into the School of Agriculture's budget.

Even though this is an agricultural school, Dr. Webb feels that the farm's job is not to satisfy the cafeteria but fulfill the student's needs and requirements in obtaining an education.

Dr. B.C. Webb

Senior Class Gets Low Turnout

By Larry Jenkins

"It is a shame and a disgrace that I can not get seniors to show up for a meeting," said senior class

president Anthony Hines.

Hines' disappointment came after only nine seniors attended the class meeting held Monday at 7 p.m. in the Student Union

Ballroom. Of the 10 that were present, three were officers.

The major concern of the senior class is providing funds

for the up-coming homecoming activities. Hines said that

very few seniors have paid their dues. The lack of fund-

ing will also prevent certain speakers that Hines had hoped to obtain for the senior class.

These speakers include such dignitaries as Congressman Richardson Preyer and Governor Jim Hunt.

According to Hines, 65 seniors attended the first class meeting, as compared to the 10 that attended the meeting Monday. "This is a significant drop when you have 1260 seniors," exclaimed Hines.

governmental agencies. This was an individual count encompass to 1038 recruiters to come on campus," stated Warren.

To be a success with these companies' recruiters, Warren suggested that students follow these employment interview tips. "The employment interview is one of the most important events in the average person's experience, for the obvious reason that the 20 or 30 minutes he spends with the interviewer may determine the entire future course of his life," (See Warren Page 3)

Students See Change in Aggie Football

By Michael Eure

"Having been here three years, I've seen a drastic change in football momentum and desire to win," stated a female junior electrical engineering major. This was a reaction from one to seven people who were asked how they felt about A&T's 1978-79 football season. Because of fear of personal harassment, several refused to have their names printed.

"They seem to be unorganized in offensive and defensive play," she continued. "I hope to see an improvement in the men because they are big enough in physique to carry us through the season."

A freshman male electrical engineering major had this to say, "As a first year student, I was told that our team was up for a good season, but the outcome seems to be different. The team seems to need a lot of improvement. The game plans need to be changed."

"The coaches should realize that, if one thing doesn't work, then try a different way. The question is who is to blame? I am not in the position to say, but I think someone should check into the organization of our football team players as well as

coaches."

A male, senior, mechanical engineering major, said, "So far I am very much disappointed with results of the football team. Hopefully, the team will find necessary improvements to win some games."

Earl Bacoat, a senior animal science major, said, "First of all, from my point of view, the football team has the talent to be undefeated. After four games, the offense has to be given a great deal of credit because they have done their job as well as you can ask for. McKinley seems to have favorites on the team (Watson). If you're not winning one way, you should switch up." He continued, "For a coach he seems very ignorant of the game. Maybe Coach McKinley should come to the intramural games and pick up some offensive techniques from the Fayetteville Buckeyes, Son of Sam, and the Greensboro Panthers. What does he have to lose?"

A female sophomore electrical engineering major, said "I'm very disappointed in the Aggie football team thus far, but I'm sure and I have high hopes that the Aggie football team will come out close to the top."

Steve Moore, senior industrial technology major, said, "Looking at where the team is now which is one and three, I still have confidence in our team. Remember when Coach McKinley first came to

A&T, he was to bring a very potent type offense with him. So far the team hasn't shown any offense to brag about. I'm sure everybody wants to see points on the board and to see the team win the MEAC

this year.

Michael Wardlaw, a freshman electrical engineering major, exclaimed, "What's going on?! We have the talent. We have A coach but..."

MALE® plans for after-class activities with fashion-detailed flares of Cone Stacord® corduroy. This rugged blend of 84% cotton/16% polyester feels comfortable and stays neat. Rich fall colors for waist sizes 26 to 38, medium, long and extra long lengths. At your favorite campus store. **Cone corduroy**

A&T Graduate Program Has Room For Improvement

By Bonnie Newman

While A&T's graduate school is readily recognized and respected along with the nation's other leading Black institutions, according to Dr. Albert Spruill, dean of the Graduate School, there still stands room for improvement. And, due to a lack of adequate funds from the state and other federal agencies, Spruill feels that "We have a good distance to go yet in terms of what we're capable of doing," despite the fact that A&T recently became part of the Council of Graduate Schools in the United States.

Presently there are 27 graduate programs at A&T. Departments boasting the largest enrollments are Counselor Education and Guidance and Safety and Driver Education. "Coming up next is the area of Administration, Reading, and Early Childhood Education," said Spruill. "These are the waves of the future really."

Noting that Adult Education, Professional Biology, and English, concentrating in Afro-American Literature have

been added to the program over the past three years, Spruill said that English has been very sought after and was almost certain that no other program such as it exists in the state or in the South.

"One of the great problems Black schools face is there is not enough money in these programs," stated Spruill.

Author Paul R. Ehrlich in collaboration with psychologist Shirley Feldman have combined talents to produce a nonfiction book (destined to become a standard text for the general public on race and intelligence). "The Race Bomb" is a book that denounces the theories of genetic racism claimed in recent years by such scientists as Authur Jensen, H.J. Eysenck, and William B. Shockley.

The book reviews the history of scientific racism, demonstrates the human races are social, not biological units, and that there is no support for the inferiority of one race over the other nation. The meaning of intelligence, how it is defined and measured is discussed at length.

"Street crime, failing schools, decaying cities, high unemployment, soaring welfare costs... the fuse is lit. Ehrlich, Feldman, and Ballantine have defused "The Race Bomb."

This weekend the Blue and Gold Marching Machine turned it out in Charlotte at JCSU. The "Nifty Fifty" now "Tired Ten" was no match for the mighty Aggies. Fired up and kickin' the machine played "Smile," "Ride-O-Rocket," and then mellowed out with "There'll Never Be A Better Love". Not to mention the groove kept going throughout the game. Smile!

Warren Suggests Tips For Successful Interviews

(Continued from Page 1)

stated Warren. Here are some suggested things that you can do to get yourself ready: Find out the exact place and time of the interview, write the time and place down and keep the notation with you, get the full name of the company straight, along with its address, be certain you have your interviewer's full name and find out how to pronounce it if it looks difficult, do some research on the company interviewing you. This will give you something besides yourself to talk about during your interview and provide material to form the questions you should ask, and prepare your questions before you go in for the interview.

"The Placement Center offers many programs to the students. We just completed our annual "Career Day Program" in Moore Gymnasium. Next in October we will have Interview Clinic; the date has not been finalized at the moment. We will have Nurses Career Day in November and Career Day for Teachers in February. Every month we are going to various dormitories fraternities, sororities to talk about the various opportunities to be found in the Placement Office, stated War-

ren. "The companies do not relate to all majors. Most of the companies are looking for the technical people such as Accountants, Business Administration, Agricultural, Economics, Industrial Technology, and all of the Sciences. We encourage non-technical and business people to come over also. There are a few firms that will be looking for them too," stated Warren.

Stephen Sondheim Presents Dazzling Musical Anthology

It is not often that one of Broadway's own is honored with a show devoted entirely to him, but this is the case with "Side by Side Sondheim."

This dazzling musical anthology of Stephen Sondheim's greatest music opens its national tour in Stewart Theatre on the North Carolina State University campus on Saturday, October 7. Hermione Gingold, star of stage, screen and television, will head the splendid cast.

Composer/lyricist Son-

Chocolate Funk will be appearing Thursday night 7:00 p.m. in the A. and T. Bennett, U.N.C.-G. talent show in Harrison Auditorium.

A&T, Bennett, UNC-G Talent

The 4th annual A&T, Bennett, UNC-G talent show will be held October 5, at 7 p.m. in Harrison Auditorium. This year's show is filled with talent including dancing, poetry,

comedy, and music.

Dwayne Norris, who sang as the 'Barry White of Greensboro,' in last year's show will perform this year with a Teddy Pendergras style. Other performers in the show are Gwen Lindsey, Lydia Chambers, Tone, and many more. At press time there were already 18 acts ready to go.

Talent is something not everyone is willing to show off, but the groups performing in this year's show will really let their talent flow as they entertain the audience with sounds originally recorded by famous artists including Natalie Cole, LTD, the Chilites, and Stevie Wonder. Background music will be pro-

dheim's accomplishments read like a list of the greatest musicals to hit Broadway. "West Side Story," "Gypsy," "A Funny Thing Happened on the Way to the Forum," "Company," and "A Little Night Music" are just a few productions that have the magical Sondheim touch.

Originally produced in London, this musical revue was imported to America where it has been dazzling Broadway amidst a shower of brilliant reviews and standing ovations.

The Golden Rule

The Golden Rule, what does it mean today? This writer believes the rule went something like this, "Do unto others as you would hve them to do unto you," but like everything else rules seem to change with the fads and times around this campus.

There was a time when A&T officials enforced strict dress codes and curfews, but that time is gone. In these places today are the coed visitation rules and the policy of parking.

Speaking of parking, is it not true that every car parked on campus must have a sticker? I'm not speaking of visitors who are on campus for just a few hours, but the cars of the personnel, faculty, administrators as well as students on and off campus.

Students, do what this writer did last week, take a few minutes and walk through the faculty parking areas, especially on the north side of campus and up the hill by the Master's house.

If parking stickers are mandatory for students, I'm sure that the faculty and administrators around this campus should be the first in line to get them.

If the students' cars are getting towed away daily for illegal parking, why haven't some of these administrative officials around here been towed also.

Students, let's all become the watchful eye too, root out the faculty members who have been hiding behind their titles. If the security officers can issue the order to tow students' cars, students should be able to have administrators' cars towed also.

Leading editorials are written by the editor of the A&T REGISTER. Such editorials will not necessarily carry a byline and will not necessarily reflect the opinion of the University or the entire staff. Staff members are free to write dissenting opinions.

Cope With Responsibility

By Lanita Ledbetter

Responsibility is often a factor of life many of us choose not to cope with. As students at A&T we are often used to everything being handed to us on a silver platter; sometimes we become less responsible after we venture into this phase of life than we were prior.

Making sound mature judgements or decisions that you feel are right for you is perhaps the first step one takes in facing responsibility and accepting the

consequences thereof.

Many times one often regrets the route he chooses in life, but one must realize we learn from experience and life is always a game of chance, and we try to determine the right road on which to travel.

So let us not be afraid to make decisions, but let us refrain from making decisions without first weighing the pros and cons, that will more than likely be the result.

Don't Waste Your Time

By Sheila A. Williams

Being able to survive and succeed in college takes more than basic academic skills. It requires techniques which can be obtained only through experience and common sense.

Learning to cope with the finer points in education must be developed through goals which one must set for himself. Students should be able to answer the question, why am I going to college? If one cannot reasonably justify some type of answer, then nothing is being wasted but his time and money.

Have some idea of what you wish to accomplish during your years of academic study. It is during these most precious years (for, if you don't cherish them now, consider the fact that one

may never pass this way again) that the most important decision of choosing a career must be established.

Sometimes it makes this columnist wonder about those professional students, the ones who attend college for years and years. The decision for them has not been made as of yet, which field of interest they plan to work. Therefore they are afraid to reach into the last major step in life, the world of work.

Therefore plan each day's activity as if it were your last, and don't wait until the last minute to write a paper or do problems in math, but work toward educational opportunities that will make you an even better person than you are.

Twenty Five To Compete For Miss Men's Council

By Earry L. Jenkins

Twenty-five females will compete for title of Miss Men's Council Thursday evening, Oct. 5, in the Student Union Ballroom.

According to Charles Ingram, advisor to the Men's Council, this year's pageant

will be completely different from those held in the past. Each male dorm on campus—Scott A, B, C, Curtis, and Senior—will enter five females each. From the five females representing the individual dorms two will be chosen in a preliminary contest, which will be held Wednesday evening, Oct. 4, to compete in the final pageant.

"We do not want a situation where there will be a dual title in Men's Council," said Ingram. In the past, each section selected a queen and Men's Council was chosen from this limited group. The new approach will allow more females to participate and attain only one title.

The participants will be judged on poise, personality,

and their ability to answer questions. The judges will include three faculty members and five male representatives.

The participants in this year's pageant are Angela Monroe, Cynthia McMurray, Gail Cole, Patricia Stover, and Natalie Stanley, representing Senior Dorm; Carolyn Gaines, Bonnie McNeil, Pam Walters, Judy Tann and Cheryl Chavis,

representing Scott B; Oneida Burke, Wanda Packer, Toni Wilson, Pat Maye, and Gwyn Kenny, representing Curtis Hall; Kathy Jackson, Rhonda Gregory, Karen Jones, and Deborah Massenburg, representing Section A.

The public is invited to attend the preliminary and final pageants. Both will start at 8 p.m.

Comments Pertain To Dormitory Life

To The Student Body:

Now that I have your attention I have just a few things to say. Although most of my comments pertain to Scott Hall and its residents much of what I say will probably touch upon all campus residents.

A dormitory is supposed to be your home away from home. But I'm wondering how many of you empty trash cans from your window at home. I have noticed on several occasions this semester some disrespectful, low minded, non-college material beings that have been dumping their trash from certain windows of Scott B. This, in my opinion is one of the most self disgracing things a supposedly college student could do.

I am just wondering if this, dare I say person or persons know what they are doing for our university. If not, I will try to inform them. For beginners at the time this event occurred we had over 100 busines representatives and countless number of high school students visiting our campus.

What do you suppose was their opinion of the caliber of students we have here at A&T? Next we are constantly under attack by the media and I presume the eye witness news roving camera would love to get a shot of this scene. And, last of all, just think what it does for you because you are also a part of this university.

In closing, I would just like to say that I don't condone violence, but I hope that the concerned residents of Scott Hall would catch this disease and destroy it before it spreads to some of the other dormitories on campus.

Richard E. Gordon

With your degree, you can either wait for responsibility or...assume it.

There are a lot of good minds coming out of colleges and universities. And every year, the competition gets tougher for the good jobs—jobs with responsibility.

But, as a Naval Officer, you can assume immediate responsibility and leadership: a position that offers you an opportunity to put your skills and education to use in a job that will make the most of what you have to offer, while doing something for your country, too.

The job isn't easy, but if you're a self-motivated person, you can go as high as your ambitions and talent will take you. And you don't have to wait a long time to get there. We'll also start you off at a salary comparable to most corporations.

But a Navy commission also means benefits unrivaled in the civilian job market; 30 days paid vacation, low cost Servicemen's Group Life Insurance and free medical and dental care. And you still have access to the same leisure time activities you now enjoy.

So, don't settle for less than you're worth. Contact your College Placement Office to find out when a Navy representative will be on campus or send your resume to: Navy Officer Program, Code 312 (T189), P.O. Box 2000, Pelham Manor, N.Y. 10803.

In the Navy, you're valuable and we're ready to prove it. Call Navy toll-free 800-841-8000. (In Georgia, 800-342-5855.)

...or call your local Navy representative 800-662-7568

NAVY. IT'S NOT JUST A JOB, IT'S AN ADVENTURE.

Programs In English Get Money, Students

(Continued from Page 2)

"English is getting some money and draws a sizeable number of students because minority students are under-represented in English. Other programs are begging for support."

Spruill feels that not as much emphasis is placed on the graduate schools as is for doctoral programs. "The programs that are financed fairly well, not only in the South, but in the nation, are the Ph.D. programs," he stressed.

Another reason for the lack of state supporting funds, he says is that there are not enough students in the areas of science.

The graduate program at A&T has been operating since 1939 with the first student graduating from it in 1941. "Since then well over 3,000 students have graduated with M.S. degrees," said Spruill. "They have been a terrific force in American and higher

education. Many go directly to doctoral programs in the South and other parts of the nation." Spruill went on to mention the various achievements of the graduates, saying that they have done "quite well" in their chosen fields be it that as professor, dean, or administrator.

Spruill, who has been working in the field of

graduate study off and on for 20 years, obtained his masters degree from Iowa State University and later his Ph.D from Cornell University in Ithaca, New York.

"The graduate program is one that you can see develop and do not have to wait years to see grow," he said, adding that it helps also to be dealing with mature students.

Association Assigns Separate Department In Education

WASHINGTON, D.C.-- The National Education Association today described Senate passage last night of a separate Department of Education as a "historic achievement in making education a national priority." The vote was 72 to 11.

"The NEA and its 1.8 million members applaud the Senate for taking this signifi-

cant step in elevating education to Cabinet-level status," said NEA President Joyn Ryor. "We are particularly grateful to Senator Abraham Ribicoff who pioneered the effort in the Senate." Ribicoff chairs the Governmental Affairs Committee.

The Senate action paves the way for the House to consider its version of the Department of Education legislation. The House Rules Committee has approved a rule providing for floor action on H.R. 13778. NEA will press for adoption of the measure before adjournment in mid-October.

"NEA's nearly two million members are confident that members in the House will support this vital legislation," Ryor added.

Greensboro Bands To Perform

(Continued from Page 3)

vided by the Chocolate Funk band of Greensboro. Other bands include Just Funk from A&T, and Prime Factor, from UNC-G.

The public is invited to come out and enjoy an evening filled with entertainment. Admission is only two dollars.

CAMPUS HAPS

All applications, for the Organization Fair which will be held Saturday October 7, should be turned in to the SGA Office by Thursday October 5. This affair will be for all campus & community organizations & each group will be allowed to solicit set up display booths.

A Series of Study Skills Sessions will be sponsored by Counseling Services on Monday through Thursday, October 9-12, 1978, from 4:00 p.m. until 5:30 p.m. in the Student Services Center Auditorium, Murphy Building. These study skills sessions will focus on:

Series 1 Psychological factors influencing learning
Mon. Oct. 9 and time management: Planning and Managing efficient use of time.

Series 2 Guide to taking lecture notes: Notetaking
Tues. Oct. 10 techniques for improving notetaking and listening skills in the classroom.

There will be a meeting of the 9 members of the Student Judiciary Council Friday, October 6, at 6 p.m. at the SGA office.

The North Carolina Fellows will meet Sunday Oct. 8, 1978 in Murphy Hall Audit. at 5 p.m.

Senior Class Meeting Oct. 9th, at 7:00 p.m. in Union Ballroom.

All Animal and Food Science Majors, please See Mr. Boyd, Velveeta Bell or Denise Brown by Friday Oct. 6, 1978.

The Aggie Express Pep Club will meet in the Student Union, Rm. 213 at 7:00 p.m. Thursday, Oct. 4. Be There!!

Tutoring sessions for the National Teacher Exam (NTE) and the Graduate Record Exam (GRE) will be held every Monday from 4:15-5:15 p.m. in Crosby Hall Room 201. If you want to receive tutoring but cannot attend at this particular time please contact Professor Marguerite Porter or Prof. Robert Levine of the English Dept. Telephone (379-7485).

All Students interested in Becoming University Ushers should contact Demetria Staton or Mrs. Sandra Cook, assistant advisor at the office of the Art Department.

Attention: All campusqueens' pictures will be taken Oct. 10, from 1-6 p.m. at the A&T Register's office for the Homecoming Edition of the Register. If there is a conflict in time, please make appointments in advance with the head photographer for Oct. 12. It would be best, queens, if you have your pictures taken on the day scheduled.

Stanford MBA

REPRESENTATIVE COMING TO CAMPUS MONDAY, OCTOBER 9

A representative of the Stanford Graduate School of Business will be on campus to discuss with interested students the exceptional educational opportunity of the Stanford MBA Program.

Appointments may be made with Frankie Hughes through The Career Counseling and Placement Office

The MBA Program is a two-year general management course of studies designed for men and women who wish to develop management skills to meet the broad responsibilities required in both the private and public sectors today and in the future.

Aggies Defeat J.C. Smith

Rodney McCormick

Only time will tell. This past Saturday, A&T, won its second game of an already-old football season. They defeated what I find to be the CIAA equivalent of the UMES, Johnson C. Smith.

The most intriguing note about this game, however, is the somewhat misleading and fictional offensive statistics. A&T gained an incredible 321 yards rushing, their best output of the season by far. That plus the forty yards passing, the Aggies looked to solve their number-one problem of offense.

The defense for the umpteenth time this year did their job by allowing Smith no points and limiting them to 142 yards total offense. Now that that's all behind us, let's not forget that our opponent, last Saturday wasn't to worry. They haven't won a game all year.

A&T won, but they didn't improve nor prove anything. It was like the Ali-Spinks fight, the outcome was inevitable. The team they played was 2-6 in their conference last year and 12-7 overall.

By changing quarterbacks for the moment, Coach McKinley may have enhanced a new mode of motivation in Freddie Freeman.

By gaining 321 yards on the ground, A&T believes it has a potent and dangerous running game.

Lon Harris certainly proved himself to be one of the bright spots in this dismal season with impressive performance Saturday night. He has always shown himself to be an outstanding and talented player who gives a 100% effort every time out.

This Saturday we play a so

so Norfolk State team. They lost to WSSU last weekend by a score of 24-7. We lost to WSSU by a score of 25-7; therefore we have something in common and it should be quite a contest. Except maybe for a few graduations and new players the Spartans are basically the same squad we faced last year. A&T should be 3-3 by next Saturday.

It took the Aggies four weeks to do it, but they finally put all the pieces together. The football team used a balanced attack to shut off Johnson C. Smith's running attack. The defense, led by Dwaine Board and George Small, held the Bulls to 48 yards rushing.

The offense of the Aggies for the first time this year really moved the ball. The play of quarterback Freddie Freeman proved to be the key missing link. Freeman directed the offense on a number of long scoring drives.

Sophomore Lon Harris, mostly known for his long kickoff returns, gave the Aggies' fans another night of excitement. Besides running back punts, Harris rushed for 120 yards on ten carries, and scored two touchdowns on long runs. Lon also returned a punt over forty yards to set up another touchdown. With those statistics, he has to be one of the candidates for MEAC player of the week.

On the ground, the Aggies were able to rush for 321 yards, a season high. The Joyner brothers, Mike and William, gained 85 and 71 yards respectively. The offensive line opened holes for the backs to gain good sizeable amounts of yardage.

Coach Jim McKinley used a lot of backs in the game and they all played well. I don't know whether it was the inexperience of the Smith defensive line or the experience of the Aggie offensive line; but, whatever it was, it worked.

Let's see if the Aggies will be able to win two straight. They will face an always tough Norfolk State team this week. The Spartans have lost two straight and are having their problems. They have lost to Elizabeth City State and Winston-Salem State 23-7 and 24-7, respectively.

The defensive unit of A&T will get another stiff test from the Spartans offensive unit. Norfolk has a running back who in two years has rushed for over 2000 yards. They will rely on their ground attack. The defense of the Spartans in the last two games has given up over 600 yards in rushing.

The Aggies will still have to work on their passing attack. In the last two games A&T's secondary has been burnt by opposing teams' passing. Norfolk's secondary has been known to be tough against the pass. A&T was intercepted three times in the last game. There was also a lot of passes dropped.

The offense has finally reached the breaking point. The attack led by Freeman proved they could do what needed to be done. The whole line blocked the way they were supposed to. They missed a lot of scoring opportunities, but they bled out Smith's defense.

If there was anything wrong in the game, I'm sure Coach McKinley will correct it. Now it is time to win about six straight. We can do it because it has been done in the past.

Aggie Time

Intramural Sports Program Provides Healthy Activity

One of the most important student programs functioning here on A&T's campus is the intramural sports program. Headed by new director, William Sheffield, the program is designed to provide the athlete, male or female with a structural as well as a beneficial activity. Secondly, the program's intentions are to provide the average student who isn't a varsity caliber athlete to participate in a sports activity competitively.

According to Sheffield the program last year was very successful. By successful, he means in the form of overall participation. Last year was a banner year. There were more football and basketball teams than ever before in the intramural program here at A&T. This year he feels the program is going to duplicate last year's record performance and the main goal he and his staff are aiming for is to im-

prove. The various sports that have been planned for this school year are flag football, volleyball and basketball (male and female), swimming and diving meet, co-ed volleyball, softball, horseshoes, tennis, backgammon and wrist wrestling tournament. At the end of the year a intramural awards banquet may be held to recognize outstanding individuals and their achievements.

Like most departments around here the intramural program isn't under any fantastic budget. Its budget is derived from your student fees and bills. Therefore the intramural program can only be as good as you want it to be.

You can pay your bill and, by participating, get your money's worth. So come on out and earn yourself a trophy or a medal. Support the intramurals!!

THERE ARE BETTER WAYS TO GAIN RECOGNITION

We have maintained leadership in Systems Engineering based on our performance, not fanfare and fireworks.

VITRO is not exactly a household name, but for the last 30 years now, we've been a leader in using state-of-the-art engineering and innovative technical applications to solve problems concerning the nation's defensive posture. We offer continuing opportunity for challenge and professional growth in the fields of electrical and mechanical engineering, physics, math and computer science.

FIND OUT MORE ABOUT US. WE'LL BE ON CAMPUS OCTOBER 11th

We urge all eligible students to register with your placement office. For additional details you may write to Dave Anderson, College Relations Coordinator for:
