Cadet Corps Collects Food Items For Drive

Members of the Air Force ROTC Det 605 collected over 1500 cans of non-perishable food items valued at over \$600.00 during their recent Thanksgiving Food Drive.

Cadet Major Calvin Jackson, project director for the food drive, stated that in addition to the food items, enough money was collected to buy turkey for the ten families that the food was distributed to.

Jackson said that he was pleased to have worked with the project. The food drive was very worthwhile and should be continued next year. "I could see Aggie pride coming out as the members of the Cadet Corps, freshmen, sophomores, juniors and seniors alike, as they all worked together to make the project the huge success that it was," Jackson stated.

He wasn't aware of the conditions that some people were being forced to live in. It was very rewarding for Jackson to be able to help them. One lady

could only say, "God bless you, child," as tears filled her eyes. Another elderly gentleman remarked that he had been retired since 1962 and was beginning to think that no one cared. "I'm so glad to see that someone does care." One lady exclaimed that receiving the food must be a miracle. "There are eight in my family, I'm out of work, and we recently experienced death in the family."

Cadet Jackson believes the food drive was successful because of the detailed planning and organizing that went into it. But he added that it would have been impossible to canvas a city the size of Greensboro without the support of the Cadet Corps. "I think the cadets knew they were working for a worthwhile cause and they certainly put forth a maximum effort. It is very rewarding to be able to help others during the holidays. I want to issue a special thanks to all those that participated."

Boone Discovers Punctures

By Keith Butler

On Wednesday, November 15, approximately twenty cars located in the southside parking lot of Scott Hall Section C were discovered with tire punctures. The discovery was made by Philip Boone of Scott Hall after receiving a complaint from a student that his car tire had been flattened

Dean Boone notified campus security and two campus officers, and an investigation was conducted. It turned up little or no information as to who or why the acts were committed.

Evidence was revealed that a sharp pointed instrument was used to puncture the tires. Most of the punctured tires were located on the right rear of the cars, indicating that the criminal or criminals might have entered the area from the back of Laurel Street. The tire punctures were estimated to have occurred between the hours of 7 p.m. Tuesday and 6 a.m. Wednesday.

In an interview with the director of campus security, Major B. Chavis, it was indicated that the investigation is continuing. It was pointed out that, in criminal matters of this nature, little evidence is left behind, so students having

Mrs. Anne Graves presents a portrait of her husband, the late Dr. Artis P. Graves, to Dr. Arther Hicks, chairman of the Biology Department at N.C.A&T State University. Dr. Graves headed the department 27 years. At left is Dr. Durel Long.

Department Sponsors Workshop

The Department of Business and Administrative Services at A&T sponsored two workshops on Interpersonal Communication. These sessions were held from 10:30

a.m. to 12 noon and from 4 to 5 p.m. on Wednesday, November 29, in Merrick Hall Auditorium.

The speaker was Mary T. Newman, instructor of speech-communication at Pennsylvania State University. The topics that were discussed included Developing Supervisory Skills, Overcoming Resistance to Change, Increasing Worker Satisfaction and Productivity, and Communicating: Verbally and

Nonverbally.

Newman is an experienced speaker with varied interests. She has presented numerous workshops on a broad spectrum of subjects to diverse groups from Texas to New Jersey. In addition to Interpersonal Communication, her workshops include programs on Women: Moving into Management, Communication Between the Sexes on the Job, The Transition from Secretary to Supervisor, Public Oral Communication, and Self-Assessment. She is presently a Ph.D candidate at Pennsylvania State University where her doctoral research is concerned with women and their public communication.

The Department of Business Education and Administrative Services offers three degree programs--Comprehensive Business Education, Basic Business Education, and Administrative Services. A limited number of scholarships are available for qualified students.

For further information about these programs or the Interpersonal Communication Workshops, please contact Dr. Meada Gibbs by writing the Department of Business and Economics, North Carolina A&T State University, Greensboro N.C. 27411, or by calling 379-7657.

any knowledge of this matter should contact campus security.

Physical Science Lab To Support Reactor

By Joe Chavis

One of the lab floors in the physical science building is being re-enforced. It needs to be extra strong in order to support an unusual amount of weight.

The source of the unusual weight is an object of curiosity and concern to many. It is a nuclear reactor. The reactor is now just lying around, not being used and collecting dust.

Dr. Thomas R. Sandin, professor of physics, said, "The reactor is super duper subcritical." It will be used for instructional purposes only

and there should be no reason to cause alarm.

Once the reactor is moved to its new home, students will be able to learn from it. But now, it is useless. Most students do not know that we have a nuclear reactor on campus.

The new lab will be the reactor room. The lab and the reactor are considered safe.

If properly used, the nuclear reactor will be just another learning tool. Only misuse or intentional sabotage can cause any problems concerning the reactor.

SGA Requests Funding, Student Fees 78-79

Richard Gordon, SGA (Student Government Association) president here at A&T, made a request to Plummer Alston, vice-chancellor for fiscal affairs about student fees and the methods of funding of certain campus programs.

The proposed funding for the new stadium is \$2,300,000. A&T is expecting to receive \$500,000 from cash and pledges from friends of A&T, and the balance of \$1,800,000 from issuance of bonds. The bond will be paid back by an increase in the student's tuition in order to help fund the building of the new stadium. An annual fee estimate of \$40 will be paid, assuming a desired bond rate is accepted for 25 to 30 years.

A&T is also negotiating with HUD (Housing and Urban Development), on increased lending commitments to the amount of \$3.3 million for total dormitory renovations. If this loan is made available, it would necessitate annual fee increases of \$75 to \$125. But this is only if A&T moves at the full scope of the

project.

The total amount of student fees that go into the athletic program is from (1) student athletic fees of \$40 per student per academic year (2) gate receipts received during the year, and (3) contributions from the auxiliary enterprise (bookstore). Relative to the student fee portion of the athletic program for 1978-79, the estimated charges are \$180,000. And the \$180,000 of the student fees goes to the funding of the total athletic program.

As to the amount paid by the Athletic Department for room and board, and to the amount that covers the number of athletes that actually live and take meals on campus, it is paid by the department. It is the same as regular students and is paid through athletic awards or scholarships. In strict theory, the Athletic Department is supposed to pay for all athletes registered and attending classes. Some awards are full and others are of lesser degrees.

NOMENCLATURE	1977-78 FEES	APPROVED INCREASE	1978-79 FEES
I. Tuition and Academic Fee - Resident Student	\$ 310.00	\$	\$ 310.00

University Leaders Form Equal Education Committee

Five prominent university and civil rights leaders, several of whom had clashed sharply in the Bakke case, have formed a Committee for Equal Educational Opportunity to work toward expanded access to higher education. The new committee's joint statement of principles outline broad areas of agreement about goals and approaches, while acknowledging that the participants still have some differences about how best to expand educational opportunity.

The formation of the committee was announced by Larry Lavinsky at a session of the Anti-Defamation League's four-day national commission meeting at the New York Hilton Hotel. Lavinsky told the ADA leaders that the committee "could mark the beginning of a new era of cooperation in the search for equal opportunity in higher education for all Americans."

In their statement, the committee members said, "Barriers to equal opportunity must be attacked wherever they remain, but in no area is it more crucial to do so than in education. No where else is the tragic waste of human potential so obvious, the fulfillment of that potential so charged with hope for a better future."

The committee listed four areas of agreement on how best to work toward equality of educational opportunity: --The importance of assuring that elementary and secondary students are well prepared academically and encouraged early in their schooling to aspire to higher education. --"Institutions of higher education have a major responsibility

to help get younger students into the pipeline to advanced learning," the committee stated. --The necessity for colleges and universities to search for and actively recruit students from groups which have not had adequate educational and cultural opportunities. --The need for increased emphasis on individualized ad-

missions procedures, despite the greater costs these may entail. "More attention needs to be given to a wide range of individual qualities, background, experience and accomplishments in addition to quantitative data such as grade-point averages and test scores," the committee said. --The importance of adequate student support services such

as financial aid, academic assistance and counsel. The committee said it will welcome the participation of other groups because of the advantages of mutual support and joint action. ********* "Neglect nothing that can increase your stature." Stendhal

AIR FORCE ALWAYS NEEDS MORE LEADERS.

We're looking for pilots... navigators... missilemen... engineers... math majors... people managers... doctors... scientists... journalists... and more. And the Air Force ROTC program is a great way to get into a job like one of these which can help you improve your leadership ability and your professional competence. As a commissioned officer in the Air Force, you can be proud of the role you play in your community and the contribution you make to your country's security. You can know that you're doing a job of importance, a job with responsibility. The Air Force ROTC program offers a way to help you achieve these goals. As an AFROTC cadet, you'll learn about leadership, management, and more. You'll learn about benefits of being an officer later on, like an excellent salary, medical and dental care, housing and food allowances, and 30 days of paid vacation each year. You'll discover a whole new world open to you in the Air Force. And you can get there through AFROTC. Look into it right away. You'll be glad you did.

AIR FORCE

ROTC

Gateway to a great way of life.

★ ★ ★ ★ ★ RICKEY'S NOTES ★ ★ ★ ★ ★

Geoffrey Hitch is guest director for the Festival Stage Company production of Charles Dickens' **A CHRISTMAS CAROL** which will be presented Dec. 5-10 at 8:00 p.m. at the High Point Theatre.

A CHRISTMAS CAROL is the final production in the first season of the Festival Stage Company. Malcolm Morrison is artistic director; Stuart Brooks, resident director and Mark Weeks, producer. For further information contact High Point Theatre box office at 887-3001.

"Le Freak" the new single by Atlantic recording group Chic has been certified gold by the RIAA. **C'EST CHIC** the LP is also a bulleted pop and R&B chart item. Also watch for Chic in tonight's **Midnight Special** on NBC-TV, at 1 a.m.

The Brides of Funkenstein began their European Tour on Nov. 27 and is to last throughout Dec. 15.

Evelyn "Champagne" King was honored at a recent special reception at RCA Records where the young recording artist was presented a pair of RIAA certified gold records-one for the single **SHAME** and one for her first LP **SMOOTH TALK**.

Greenhill Art Gallery presents **Small Things**, Dec. 1-22. A number of artists are exhibiting their works including our own Leroy Holmes, chairman of the Art Department.

New music this month includes Diana Ross, **ROSS: Aquarian Dream, FANTASY**; Cheryl Lynn, **GOT TO BE REAL**; Evelyn Champagne King, and The Pips.

The Brothers of Nu Gamma Alpha present the **ADC Band** in Moore Gym, Friday Night, at 8 p.m. Tickets are \$4.

Single Spotlight

You Can Never Go Back.....J. Cirt Gill, III, Sho-Nuff Music

Around City With Jam-A-Ditty

By Richard B. Steele

From 1949 to 1960 a Black radio personality brought the sounds of the times to an eager audience.

"Around the city with Jam-A-Ditty" was the phrase used by the late J. Cirt Gill, Jr. The first Black radio personality in the southeast, Gill spent the records prevalent in the younger days of rock and roll. The audience, Blacks and whites, tuned in religiously; thus he became very popular as he played requests and spread his good cheer throughout the air.

J. Cirt Gill, Jr. was a 1938 graduate of A&T College. While at A&T, he was business manager of **The Register**, alumni editor and secretary of the Y.M.C.A.

Gill was known for interviewing celebrities such as Louis "Satchmo" Armstrong on WGBG Radio.

In the spirit of "reaching out to everyone" Jam-A-Ditty's son and nephew are now reaching people again through the Jam-A-Ditty recording enterprise in Greensboro. J. Cirt Gill, III, and cousin Earl Gill are associates in the Sho Nuff Music operation on the Jam-A-Ditty label. The musical talents of Cirt, spawned by both parents since the age of six, and the marketing, advertising and public relations expertise of Earl have molded a successful partnership.

Earl Gill, a political science graduate of A&T, is also the editor of the "Black Business Awareness Magazine" published bi-monthly by Gill's Publishing and Professional Consultant Firm located in Greensboro.

During a recent interview with musician/writer, J. Cirt Gill III, the question arose concerning the disco trend in popular songs.

"We are not making music in one category; we are trying to do something for everyone," he said. This is evident in the single released recently entitled "You Can Never Go Back" which is a ballad. This version is instrumental, written by Cirt in 1976 for The Mighty Majors. The artist worked with The Majors from 1975-77 and earlier (1974) with Chocolate Funk.

"This was a very valuable experience," said Gill. While on the road with the groups, he got a taste of what the people jammed to.

"There are two kinds of musicians basically those who imitate and those who create," he said. The first Black to graduate from the UNC-G In-

PHOTO BY PERSON

strumental Music Department (1973) is more of a 'Quincy Jones of Greensboro'.

Jam-A-Ditty is a "vehicle to show some of the talent in the Greensboro area."—Some of that talent is incorporated in Geno Edwards, Drums; Coffee Yourse, keyboard; Charles Carlton, guitar; Jerry Jeffries, sax; Al Clinton, congos; Bob Kelly, recording engineer; some young ladies from the Bennett College Gospel Choir; Lowell Hopper, guitar

and Talib Abdul Bassit, keyboard, (from A&T) and the Ellsworth Turner Singer. ETS helped promote the flip-side of the current single, entitled "Don't Lose The Grove", a disco tune.

Local DJ's, "Cookin" Ty Miller, "Big Daddy" Dave Thomas and "Smokin" Tony B. (WEAL, WQMG) and friends around the country have been helpful with the promotions.

The Gong Show Auditions have been cancelled until a later date. The Pep Club is sorry for any inconveniences caused.

There will be a Student Alumni Council meeting Dec. 4, at 8:30 p.m. in the Student Union. All members are urged to attend.

Attention: Seniors if you want your baby picture in the yearbook, please bring it to the yearbook office in the Student Union by Tue., Dec. 5, before 5 p.m.

The A&T University Choir, conducted by Sam Barber, will present Handel's "The Messiah" at the choir's annual Christmas concert Saturday, Dec. 2, at 8 p.m., in Harrison Auditorium. Admission is free.

Attention: Queens, your pictures are back. Please come by Room 210 of the Student Union to order them by Dec. 5. Prices are as follows: \$2-3x5, \$3.50-5x7, \$6.50-8x10. Payment is necessary when ordering.

The Student Home Economics Association along with the Home Economics Alumni Association will have its annual Christmas party and Fashion Show on Dec. 6, at 7 p.m., in Benbow Hall Lobby.

An 'I'? Well Too Bad!

The dietetic department which is housed under the School of Agriculture made the local newspapers twice last week.

One would think from the publicity that the area is getting, that some new experiment (or project) had been finished which would triple the worlds' food supply or at least be favorable for the school.

From what this writer can interpret, the entire situation is that the dietetic department laboratory equipment is outdated and is not being replaced quickly enough to satisfy the instructor of this particular class, which requires both field and laboratory work to be mastered by the students.

Until the equipment is replaced, Mrs. Eula Vereen says that she cannot and will not give out any grades for the class, which consists mainly of juniors.

If these students are given incompletes for the course, and if the equipment is not purchased and set up by the time the six weeks are up for removing incompletes, they will automatically turn into F's and these students will have to repeat the course.

Who is to be blamed for this injustice which is being suddenly placed on the shoulders of a few junior students? Looking at the situation from the students' view point, it's not their fault that the equipment is outdated and if the school didn't have the proper facilities, it shouldn't have offered the course.

Secondly, looking at it from the instructors position the students don't have the proper equipment to achieve the experience that they will need when entering the world of work later on and I'm not going to cripple them by letting them slide by now.

Lastly, looking at the situation from the dean of agricultural department and the chancellors' possible viewpoint, why was the equipment not requested all along to keep the laboratories constantly working with updated equipment instead of allowing everything to become outdated all at once?

Who's to blame or in fault for this injustice placed on the students in the dietetic classes?

Is it fair for the students to be penalized for mistakes made by the university personnel years before these students arrived at this university?

When I ask a couple of the students the form of and interview or even a "Letter to the Editor" they refused out of the fear of the repercussions.

Everything Will Be All Right?

By Sheila A. Williams

Severe burns or double pneumonia seems to be a recent issue on the yard. It all stemmed from an episode where a student had been scalded while showering.

After this incident, there was seemingly a lowering of water temperatures, and many of the students were forced to take ice cold showers.

A drastic change in temperature, as this writer is sure that we at some time or another may realize, can cause damaging things to the body especially if one's resistance is not up to par.

One wonders why is it that the water temperature cannot be regulated, and it ends up with the student suffering in the end.

Several girls from Cooper Hall, mar-

ched to Jesse Marshall's office, vice-chancellor for student affairs, to get to the root of the problem. His answer, stated one of the students, "everybody calm down; everything will be all right."

In the mean time what do the students do? They are being made to wait while the university goes through a 'that's your job' routine.

Sooner or later students will become fed up with the administration continuously running them around in circles, or giving them a 'we'll get to it later attitude. For as tuition cost rise, and so do the problems that come from these inflammatory prices, then so will the students who will no longer take "give me time" for an answer.

Apathy Becomes A Disease

By Richard B. Steele

"I look over out activities and see a great blank space" were the words of Glenda George, president of the sophomore class. This article was concerned with, among other things, the apathy of a class.

It saddens this writer to know that this same apathetic mood once again exists throughout the campus. We've gotten to the point where we no longer give a hoot about our clubs, class meetings and other related functions. Without participation from the members of a club, it dies. When this occurs, other clubs and activities are inadvertently affected.

A given club sponsors an event to entertain the entire campus. Only one person shows for the auditions. The program is then cancelled until a later date.

We can not go on cancelling events that take months of red tape to plan. Few know the heartaches of planning activities in advance only to find out so-

meone else has the same building on that given time; then, if that weren't enough, only one participant shows.

It's too late for this semester; we, the students, have killed it. Hopefully we may gain some insight in the responsibility we have to our university or will we let it die also?

Each member has an important part to his or her given organization. True, "one monkey don't stop no show," but one would be surprised at the seemingly reversed evolution going down this semester. Please become active and support your clubs or (forget) the whole thing.

Movement Draws Concern

Editor of The Register:

There is a movement growing in America of the utmost concern to all people who consider themselves free.

One of the main bases of this movement, the Nazi Party is located in San Francisco, a city of recent controversy itself. Many people believe that the recent murder of the San Francisco Mayor was made possible by the passive atmosphere within the city. Some feel that the liberal policy of the political system made possible the attitudes which created a nightmare like slaying of the two city officials.

The city of San Francisco houses the people, ideas, and buildings of the People's Tem-

ple. This organization flourished and reached its all-time high while in San Francisco.

To most of the world, the Peoples Temple was unknown; and, in any other city, the cult would probably have been less successful. But here again the tolerant and "anything goes" attitude of San Francisco allowed the cult to grow without any real opposition.

If there had not been an interest in the religious group by an individual, the Peoples Church might have grown unchecked to an uncontrollable force. Although the now nationally known mass suicide occurred in Guyana, South

America, the ground work was laid in San Francisco. Who would believe that over 900 Americans would die, at the suggestion of one "madman".

San Francisco is not the only city of its type. There are others throughout the country. But San Francisco is the one city now that is in the national limelight.

The Nazi program on channel 4 has aired before. But the seriousness was doubled by the recent occurrences in San Francisco. The Nazi group shown in the network telecast was located in San Francisco. This was my second viewing of the program. But the statements made seemed to have more teeth this time.

The first time I saw the Nazis was on 60 Minutes. The attitude was one of let them have their freedom too. They still deserve freedom, but not unobserved activity and growth. What seemed unreal at first, appeared to be a real physical threat the second time around.

I only hope that responsible people will not let this group of the most dangerous and racially prejudiced fanatics in the history of the world prosper and attain too much influence, as did the People's Temple.

However, San Francisco may be the best place for all the Nazis. If nothing else works, we could create a complete Nazi state. Since it is my understanding that California is sinking into the ocean, I believe that our Creator, in his infinite wisdom, would know which section to sacrifice first.

By Joe Chavis

Christmas Mail Wanted For Sick Children

Editor of The Register:

Do you think your readers can provide some mail for sick children, especially for the up-and-coming holidays?

This Christmas the children we are cheering are listed Nationwide. They can use a bit of encouragement for some of the illnesses are Cancer, Cerebral Palsy, Leukemia, Muscular Dystrophy, Multiple Sclerosis, etc.

A number of them are not only ill but lonely and a little cheerful mail can minimize that loneliness to a degree. Having an illness is a disaster, but being lonely at the same time is a hardship that no one should have to bear.

Anyone wishing to help will

be assigned a child on a one-to-one basis. We shall furnish a stationary item, a list of children and check the name of one child on the list, so that each of them have a somewhat equal amount of mail. A few suggestions about what to write about should make their letters interesting and a delight for a child to receive.

Any attention you can give them would be appreciated. We will encourage every one to participate in cheering some adults as well for they can use some loving care also. Thanks for your help, and may God bless.

Sincerely,

Edmund G. Burns
President, MAIL FOR TOTS

Booklet Lists Summer Jobs

Do something really exciting this summer! Be a camp counselor in upstate New York or a ranch hand in Montana—a tour guide at the Grand Canyon—an office temp in New York city—work in beautiful Olympic National Park in the Northwestern tip of continental United States or go way up north to a resort in Alaska—work in Aspen, Colorado, Stowe, Vermont or at a little theater in Massachusetts.

The 1979 Summer Employment Directory of the United States (Writer's Digest Books, \$5.95) gives details on more than 50,000 summer jobs all over the United States. For over twenty-five years, The Summer Employment Directory has been the definitive summer job guide for students, teachers, or anyone else who

wants a summer job..

Each entry is updated annually, and entries contain a brief description of the job, the number of openings, conditions of work, salaries, hours and names and addresses of people to contact.

Carowinds Records Excessive Attendance

For the second consecutive season, Carowinds has recorded an attendance in excess of a million people with 1,041,460 guests passing through its turnstiles in 1978.

The 73-acre theme park, which ended its 1978 season on Oct. 15, recorded net revenues of \$12,375,198

Summer camps, resorts, temporary office services, national parks, amusement parks, summer theaters, dude ranches, conference centers and seasonal businesses and industries are all listed.

with per capita spending at \$11.88.

In 1977, Carowinds had an attendance of 1,124,745. Net revenues and per capita spending were \$12,330,566 and \$10.96 respectively.

For the 1979 season, scheduled to begin in late March (See Carowinds Page 8)

Ghouls of Guyana

Dead Bodies Lay,
Live Bodies Pray

Damned our souls for Sacrifice.
Rev. Jones - our only vice

Flying back nestled in coffins by day,
Dumping us out, our bodies turn gray

Maggots and flesh barely cling to the bone
Barely clinging, horror ringing - we will not go down alone!

Governmental Graveyards we will invade
Neither dead nor alive, our bodies will parade

The light of day shines - no more
Dreaded Darkness like our bloody Souls reign and abhor

Now, at the twilight hour,
Disease Radiates, the Stench is sour

America let us slip and slide into discontent
Now dear WORLD we the living dead harbor
malicious resent

This nightmare unthinkable is about to begin,
Rising from graves here and Giana these half living
souls will forever seek revenge

Saints beware, the cross is null
Gorish tales of gouls will lull.

Dead Bodies Lay - not for long,
Live Bodies BETTER Pray - Zombies know no right,
Zombies Know No

WRONG!!

Itsa Performs Sparkling Entertainment at Cosmos

"We're on Cloud 13, zooming on higher. We are the best, we are the greatest!", were the words of Clarissa Hedding, co-ordinator of Itsa Extravaganza. The evening of entertainment at its best was exhibited this past Sunday night at the Cosmos I.

Itsa has been in existence for only six months and has been involved in many activities and fashion shows here at A&T; presently they are presenting their abilities to the community.

The lovely Ms. Hedding announced the theme "Baby We've Got Style", as the gels and spots began to form a kaleidoscope of colors and movements.

As she appeared on stage in a black vest, white blouse with black tie, slacks and derby for a touch of class, she tipped her brim and introduced the first scene of fashions. 'Hats off to the women of the world'; with a free-spirit, rust satin pants and blouse, accented with jingling gold accessories—just right for disco. For the carefree woman, entertain at home or a night out in soft and feminine pastel. The loose fitting evening dress was pinkish-green foral print touched off by a sheer shawl.

The Itsa models are theatrical models. "We love to perform," said Hedding. The performers included Rene Wilkins, Cheryl McNeill, Cathy Ghant, Yvonne Thomas, Donna Staley, Cynthia Widmill, Patricia Walls,

Gretta Shaw, Linda Neidral, Randall Malichi, Joe Murphy, Curtis Carrington, Jr., Ray Fields, and Julius Leake.

The Shaft scene followed with trenches, boots, leather and corduroy. The ladies of Shaft were decked out in black blouse and pants with silver/black scarf, blue shimmering dress tied at the top, silver shoes, red top and black skirt. The main lady with the gun bedazzled the audience in a shimmering double split silver three-piece dress attire.

With a rose in hand the handsome male models of Itsa eased across the stage in an array of stylish suits and coordinating dress outfits, presenting some lucky ladies with a rose and a kiss.

What's Happening Hollywood, with Bootsy himself styling in black and white, the player, cane, hat, the works. Other players came to play in satin, silver, furs, trenches, and the entire Hollywood scene.

We take you now to an airplane flight from Greensboro to the Big Apple, NYC. Upon arrival, the fashion world of the city emanates all around in plaids, suits, three pieces, furs, ponchos, and the like. Hats and brims are definitely in. Styling on the streets were a variety of people; the businessman, disco goers, ladies of the evening, newspaper carriers, pimps and even a man selling watches (in an original GQ casual.)

Sponsors were Diana's,

Slack Shop, T. Edwards, R.J. Riggins, Thom McCann and other local merchants.

Entertainment was provided by MIST, better known as Sugar, Deborah 'Passion' Young, and Debra 'Coco' McCoy.

The talented young ladies performed the hits, Smile; an original entitled Never Let

You Go, written by Michael A. Boston and Coco; Love Changes, Angel In The Sky, Love Don't Live Here

Anymore, I'm Every Woman, and Let's Start The Dance.

Band members are Vernon Mills, bass; Gary Purcell, lead guitar and vocals; Michael A. Boston, keyboards; and David 'Teddy Bear' Kellum.

Dixon To Lecture At State

The title of Mrs. Dixon's lecture is "Looking Through the Spiritual Heart of America to the Futures of the Universe." She is the author of a daily column carried by over three hundred newspapers and the author of a number of books including "My Life and Prophecies," "A Gift of Prophecy" and others.

Jeanne Dixon once said,

"When God has you in his heart you have an instantaneous identification with every human soul that is born." It is an unusual statement made by a very unusual woman with a firmly established reputation for predicting major world events with remarkable accuracy.

A press conference will be set up for the news media. For information please contact the

University Student Center Program Office 737-2451.

There will be an admission charge to the public for the Jeanne Dixon lecture, Tuesday, December 5, at 8 p.m., located in the Stewart Theatre, at the University Student Center at North Carolina State University.

"Ridicule is the test of truth."
William Hazlitt

Aggies On Way To Bowl

By Dennis Bryant

When Head football coach Jim McKinley first came to A&T, he promised bigger and better things to come in the way of Aggie football. Well, for the first time in over thirty years, the team is on its way to a post-bowl game.

With a 7-4 record and a 6-5 won last year and this year respectively, the team will represent the MEAC in the Gold Bowl against Virginia Union. "It was a successful year," McKinley said. "We finished with a winning season and a chance to play in the Gold Bowl."

A&T played three of the best teams in the nation during the season. Two of those teams, Winston-Salem State (11-0) and Delaware (10-2), will meet Saturday for a chance to play in the Division II finals next weekend. South Carolina State appears to be still waiting for the outcome of the Florida A&M and Grambling game Saturday for its chance at a Division I-AA playoff spot.

"We played a tough schedule," stated McKinley. "There wasn't another team in the conference that played a schedule like ours." The coach did mention that the real disappointment of the year was the loss to Delaware State.

For most of the season, the blame seemed to focus on the quarterback Coach McKinley said. "We have two young quarterbacks and everyone expected them to be like Ellsworth Turner. Turner was one of the top quarterbacks in the country. It takes a lot to forget about Turner. Watson got a lot of bad publicity," he stated.

One of the most important jobs around is that of coaching a college team. When the play doesn't work, it is his job to find out why and how to correct it. "We have one quarterback who does things better than the other. They both made sophomore mistakes. They are not veterans," McKinley said.

The Gold Bowl will give the coach a chance to look ahead. "A victory over Virginia will make the season. They have more talent than WSSU. They only lost against the Rams because they had a lot of injuries," said the coach. "They are a much more veteran team and have a lot of seniors."

"The Gold Bowl is a young bowl and the conference will benefit from it. If we can draw a big crowd, it should be a big affair. We have the ability to attract crowds and we proved that during the season,"

Tomorrow afternoon, the A&T Aggie football team will participate in its first post season bowl in over thirty years. The Aggies will face the Panthers of Virginia Union in the Gold Bowl in Richmond, Virginia. A&T carries a 6-5 record into the match, while the Panthers are 6-4-1.

On paper, it looks as though Virginia is stronger than the Aggies. They have one of the strongest running backs in the country. Despite having a 6-4-1 record the team is strong offensively. A number of key injuries hurt the team during the middle of the season.

For the second time in as many weeks, A&T will be facing a spectacular passer. In the last regular season game, the defensive backs were having to contend with NCCU's quarterback Alvin Cauthorn. Cauthorn threw for 339 yards in a 21 of 37 passing attack.

Coach Jim McKinley will start quarterback William Watson. Watson, despite playing inconsistently during the season, will try to work out of a slump and go out a winner. He has shown the ability to really move the team and will need one of his good days Saturday, if we expect to win.

The team will rely on the running of runningbacks Charlie Sutton and William Joyner. Sutton set all kinds of rushing records in the season finale against the Eagles of NCCU. The offense will once again need some of that heavy running.

The game will give the seniors a chance to really go out on a good note. A victory over Virginia Union and The Gold Bowl title would make it rewarding for them. There will be a number of scouts on their way to Richmond and they will have their eyes set on these ten men and some of the rest.

There are close to fifty men in Richmond who will wake up Saturday morning and have one goal in their minds. I'm pretty sure it will be to win the game. The defense should be more than ready. They have played great all year, especially against the run.

If you aren't on your way to the game by now, you'd better get started. The game starts at 1:30 p.m. and it is a four hour drive to Richmond. Be on time because the game should be very exciting. Look for the Aggies to become gold bound. A&T should win if the defense holds. If Watson can't run the offense, maybe Freddie Freeman can come in.

In the world of basketball, it appears that the A&T men's basketball team ran into too much snow in Syracuse. It looks like they won't slip up on anyone this year. The Redmen used a balanced attack and the bench proved to be stronger than A&T's. The Aggies got into foul trouble and never got into the game after the half.

The 102-77 defeat was the worst in two years, but came at the hands of a good Syracuse team. If Maine, Providence, and UNC-Charlotte are anywhere as tough as Syracuse, watch out Aggies. But the team still has the talent to finish with 20 victories, but it may have to start after the Christmas break.

Tonight the men's basketball team will face a good Maine team that last weekend lost a 75-74 overtime game to Providence. So Maine will be no pushover. Next Saturday the team will face

PHOTO BY JONES

Ahh! Let me rehearse this love scene on you, baby.

he said.

The Panthers will counter one of the most explosive offenses in the school's history, paced by running back Judge Thomas and quarterback Garfield Mizzell. Thomas has rushed for over 3700 yards in his career at Virginia Union. Mizzell has the arm and the moves to break open a game. The team is in the best condition since the start of the season, and it will be ready to play in the Gold Bowl.

"Our line will certainly get a test from Virginia Union this weekend because they probably have the best overall speed of any team we've faced

this season," said McKinley.

A&T has one of the tallest front fours in college football starting Lucien Nibbs (6-7,262); Ulysses Thompson (6-6,250); Gerry Green (6-5,240); and Dwaine "Pee Wee" Board, (6-5,245).

The Aggies' trademark during the course of their 1978 season has been a tenacious defense, led by All-America defensive end Board. The contest has the making of becoming one of the most exciting of the early post-season classics. The kickoff is scheduled for 1:30 at the Richmond, VA. facility.

Butler Believes Coach Knows His Players

By Michelle R. Turner

When Kim Butler was asked what type of player he was, Butler said, "I don't know; that's the type of question you would have to ask Coach Little. What type of player do you think I am?"

I can safely say that Butler is a modest player. The 6'1" senior, from Burlington, N.J., was the man who sank those five foul shots in the fourth breath-taking quarter for the MEAC championship game against Morgan State. He feels that his game has improved since last year.

"I was adapting to a whole new situation - a new team, a new coach and a new school. But now that I've been here awhile, I've adapted to the change and it's been nice."

Butler transferred from Miami-Dade Junior College in Florida. "They had a very good junior college circuit there. I got to travel and meet people besides playing a little ball." At Miami-Dade, Kim was voted MVP of the Florida Holiday Classic.

The physical education major was recruited by George

Carowinds Manager Says Park To Add Attractions

(Continued From Page 5)

ch, Carowinds General Manager Lew Hooper stated that Carowinds will be adding

Grambling, Hampton Scout Butler

(Continued From Page 7)

Felton, assistant coach for the Aggies. But, he also had other offers. Grambling and Hampton Institute were also scouting Butler. So what brought him to A&T?

"It's a lot closer to home than Florida was," he laughed. "Believe me, that was a long way from home." Butler has a two-year scholarship to A&T. He feels although this season's schedule is tough, it should prove to be very successful. "If everyone plays up to his potential and realizes what we have to do to win, we'll be on the ball."

His best experience since he's been playing basketball? "Winning the MEAC," he smiled. "That was a good time for the whole team. I think it's something that none of us will ever forget. That was it!"

He hopes to contribute more to the team this year. "I handled the ball in a lot of key situations last year. I hope I can do more for the team," the soft-spoken Pices stated.

A&T Soccer Battles Henderson

By Boris Mvusi

Sunday, November 19, A&T soccer team played Henderson at Winston-Salem. Having become the champions of the Eastern Piedmont the team has lost only the second time, after playing more than eight games this semester.

Although we lost 3 to 1, all three goals scored against us were questionable. The last clear and deliberate handball was declared a goal by the referee (the player later admitted handling the ball).

The second was also a clear handball by one of our players.

The referee's decision on the third, a penalty, was undoubtedly biased.

Our only goal was a spectacular flying kick by John Allen.

This game and others before it have aroused strong questions about soccer ethics in North Carolina.

An inquiry on possible racial prejudice on the part of soccer officials against A&T is to be launched.

several new attractions to the park to further increase the entertainment value of Carowinds for its guests.

Carowinds, located on the North Carolina/South Carolina border 10 miles south of Charlotte, is a joint venture of Taft Broadcasting Co. and Tjop Value Enterprises, a Kroger Co. subsidiary.

Sports Notebook

Sports!

Winston-Salem State in the new gymnasium. The Rams are presently 3-0 and appear to be on their way to another winning season.

Tonight, in the new gymnasium, the women's basketball team will battle with the Bearlettes of Shaw University. Saturday night they will face the Falconettes of St. Augustine's. Both contests will follow games between the Bennett Belles, St. Augustine's and Shaw in each order Friday, then Saturday night.

THE FACTS:

1 HUNDREDS OF THOUSANDS OF WOMEN USE ENCARE OVAL™

Encare Oval™ was introduced to American doctors in November 1977. Almost immediately, it attracted widespread physician and patient attention.

Today, Encare Oval is being used by hundreds of thousands of women, and users surveyed report overwhelming satisfaction. Women using Encare Oval say they find it an answer to their problems with the pill, IUD's, diaphragms, and aerosol foams.

2 EFFECTIVENESS ESTABLISHED IN CLINICAL TESTS.

Encare Oval™ was subjected to one of the most rigorous tests ever conducted for a vaginal contraceptive. Results were excellent—showing that Encare Oval provides consistent and extremely high sperm-killing protection. This recent U.S. report supports earlier studies in European laboratories and clinics.

Each Encare Oval insert contains a precise, premeasured dose of the potent, sperm-killing agent nonoxynol 9. Once properly inserted, Encare Oval melts and gently effervesces, dispersing the sperm-killing agent within the vagina.

The success of any contraceptive method depends on consistent and accurate use. Encare Oval™ is so convenient you won't be tempted to forget it. And so simple to insert, it's hard to make a mistake.

If pregnancy poses a special risk for you, your contraceptive method should be selected after consultation with your doctor.

3 NO HORMONAL SIDE EFFECTS.

Encare Oval™ is free of hormones, so it cannot create hormone-related health problems—like strokes and heart attacks—that have been linked to the pill. And, there is no hormonal disruption of your menstrual cycle.

Most people find Encare Oval completely satisfactory. In a limited number

of cases, however, burning or irritation has been experienced by either or both partners. If this occurs, use should be discontinued.

4 EASIER TO INSERT THAN A TAMPON.

The Encare Oval™ is smooth and small, so it inserts quickly and easily—without an applicator. There's none of the bother of aerosol foams and diaphragms. No device inside you. No pill to remember every day. Simply use as directed when you need protection.

You can buy Encare Oval whenever you need it...it's available without a prescription. And each Encare Oval is individually wrapped to fit discreetly into your pocket or purse.

5 BECAUSE ENCARE OVAL IS INSERTED IN ADVANCE, IT WON'T INTERRUPT LOVEMAKING.

Since there's no mess or bother, Encare Oval gives you a measure of freedom many contraceptives can't match.

The hormone-free Encare Oval. Safer for your system than the pill or IUD. Neater and simpler than traditional vaginal contraceptives. So effective and easy to use that hundreds of thousands have already found it—quite simply—the preferred contraceptive.

© 1978 Eaton-Merz Laboratories, Inc. Norwich, New York 13815 EA 1617

The most talked about contraceptive since the pill.
