"COMPLETE AWARENESS FOR COMPLETE COMMITMENT"

VOLUME XLI NUMBER 15 NORTH CAROLINA AGRICULTURAL AND TECHNICAL STATE UNIVERSITY GREENSBORO, NC OCTOBER 30, 1979 TUESDAY

## IBM To Conduct Interview Clinic In Merrick Hall

On Thursday, November 1, employees of International Business Machines (IBM), from Boston, Massachusetts, will conduct an interview clinic in Merrick Hall auditorium to help prepare students for their future by bringing real world experiences into the university setting.

Topics to be discussed are "How to Succeed in Industry", 9-10 a.m. and 3-4

p.m.; "Time Management", 10-11 a.m. and 1-2 p.m.; and "The Employment Interview" 11-12 noon and 3-4 p.m. The discussions in the morning and afternoon sessions will be the same.

"How to Succeed in Industry" will be a discussion of basic preparation and company awareness. When discussing basic preparation, four areas will be highlighted:

viable summer programs, co-op program, an understanding of company operations and the importance of a positive attitude when location is a question. The session on company awareness will be discussed from the viewpoint of the logical and procedural steps leading to individual success in industry.

"Time Management" session will deal with the concept

of Managing by Objectives (MBO). Special attention will be paid to the effective utilization of the work day, e.g., productive versus unproductive activities, means of measuring time usage, as well as case study analysis.

"The Employment Interview" will highlight various techniques that can be used to get the most out of employment. The discussions will in-

clude preparation for the interview, dressing for the interview, what recruiters look for, and what the applicant should look for.

The interview clinic is coordinated by the Career Planning and Placement Center at A&T, assisted by the Student Cluster Activities Council and the Student Government Association.

There are no requirements to attend this clinic. Any student may attend. Students attending at least two sessions will receive, by mail, a certificate in recognition of their participation.

The Career Planning and Placement Staff encourages students to use the services available to assist them.

### DeLauder Directs

## Honors Program To Motivate Juniors

By Sheila Snow

A two-year honors research training program has been planned for highly motivated and outstanding rising juniors.

Dr. William B. DeLauder, program director, says purposes of Minority Access to Research Careers (MARC) are to increase the number of minorities that go into Ph.D.'s in Chemistry, Biological Sciences or related areas, and to develop strong curriculum research opportunities in these fields to prepare students for careers in biomedical research.

This research is directed towards solving health related problems.

William B. DeLauder

The departments involved in the program are Animal

Science, Biology, and Chemistry. Any student majoring in these areas is eligible to apply. Students will be selected on a competitive basis by a steering committee, composed of Dr. DeLauder, other faculty members, and MARC honor students, based on their overall and major grade point averages, statement of career goal, letters of recommendation from science faculty, and personal interviews.

Students must have maintained a minimum grade-point average of 3.0 overall and a 3.25 in their major courses. They must express an interest in pursuing a Ph. D. degree in

biomedical science in the statement of career goals.

Those who are selected (See Winners Page 6)

## City Council Grants To Help Low, Moderate Homeowners

By Prince Reed

A total of 2,400 houses were brought into compliance with Greensboro Housing code and another 540 houses were condemned last year, according to Chief Housing Inspector Clay Gordon.

Gordon said approximately 300 of the 540 houses condemned were also brought up to standard. The primary problems in houses failing to meet the code were leaking, plumbing, exteriors in need of painting, bathroom floor tile in need of repair, and unsafe wiring.

"Our purpose is to arrest, remedy, and prevent the decay and deterioration of places of habitation," Gordon said. "Also it is to eliminate blighted neighborhoods by providing minimum requirements for places of habitation for the protection of the life, health, welfare, safety, and property of the general public, owners, and occupants," concluded Gordon.

Stating that occupants whose dwelling are condemned receives a 30-day hearing notification with a list of repairs that need to be made after the 30th day hearing, occupants are given another 30 to 60 days to bring the dwelling up to standard.

Unless there are unusual circumstances, such as a tenant on fixed income, the housing office will allow the maximum of 270 days to meet the housing code standard.

"We notify occupants of the improvements needed and, if they don't comply withing the time period specified, we have no other alternative but to order them to move," stated Nadine Buchanan, a (See Several Page 2)

### Committee Holds Drive

By Florina G. Byrd

On Saturday, October 27, the voter registration committee at A&T held a voter registration drive at the student union and Williams Cafeteria.

"The drive was a big success in comparison to the first one we held which was in September," said Bobby R. Hopkins, chairman of the voter registration committee.

"We registered approximately 300 students this year. In September we registered only 34 A&T students who were residents of Greensboro," added Hopkins. The 300 students who registered Saturday were out- (See Students Page 3)

### One Hundred-Five

## Aggies Make National Dean's List

By Larry L. Jenkins

One hundred and five students at A&T State University have been selected as inductees into the 1978-79 National Dean's List.

These students have demonstrated their abilities to excel in academic responsibilities. They were selected for this recognition by academic vice presidents, respective deans, and registrars.

Over 37,000 biographies of outstanding students from approximately 1200 colleges and universities throughout the country were selected.

The following students from A&T have been selected for this recognition:

Johnny Allen, Joseph Anstead, Kathy Anderson,

Angela Barnes, Glendia Black, Clementine Boyd, Videtta Brown, Charles Burch, Melba G. Butler, Glenn Caldwell, Warren Campbell, Sandra Carr, Sharon Carrington, James Carrothers, Wiley Cash, Vanessa Chance, Dolores Clarke, Kay Covington, Clifton Craig, Audrey Davis, Deborah Davis, Emma Davis, Melissa Davis, and Della Reese DeLoatch.

Other students are Cheryl Deloney, Daryl Drew, Regina Duren, Janaka Edirisinghe, Herman Edwards, Peggy Faison, Reeda Frink, Bobby Fuller, Barbara Fulmore, Karen Funderburk, Loretta Gallishaw, Robin Giles, Ina Goocharan, Callie Graham, Debbie Grant, Gwendolyn Green, Virginia L. Green,

Barbara Gregory, Sheila Guion, Maude Hall, Jo Ann Halsey, Montanette Harrison, Cynthia Haywood, Beverly Henry, Gloria Hicks, Jerial Hicks, Cyril Howell, Larry L. Jenkins, Mudirat Jinadu, Donald Johnson, Maria Johnson, Audrey Jones, Karen Jones, and Karen A. Jones.

Continuing, the list includes Julia Kendall, Keith Lindsay, Richard Ling, James Locus, Nathaniel Lyles, Nancy Lynch, Michael Makotsi, Mary Mallory, Eric Martin, Tyrone Massey, Mollietta McBride, Angela McCain, Willie McCauley, Evelina McIntire, Betty McNeill, Bonnie McNeill, Cynthia Miller, Venay Mills, Mary Mims, Cassandra Mitchell, and (See A&T, Page 2)

## Several Thousand Houses Brought Into Compliance

(Continued From Page 1)

housing inspector. Tenants are given 30 days to find a place to live after they are ordered to move, she said.

To help low and moderate income homeowners rehabilitate their houses, the City Council has made grants and low-interest loans available to them, according to Bill Chambliss, chief of community development planning. The money is funded through the Federal Community Development Block Grant Program.

"The term of the loan can be up to 20 years with a cost of \$5.55 per month for each \$1,000 of principal that is borrowed," said Chambliss.

"The interest rate is only 3 percent and a maximum of \$20,000 can be borrowed," he said.

To be eligible, a homeowner's family income must fall within the following limits: one person, \$9,400; two persons, \$10,800; three persons, \$12,200; four persons, \$13,600; five persons, \$14,600; six persons, \$15,600; seven persons, \$16,800; and for eight or more persons, \$17,800.

Homeowners who have an annual income less than \$5,500 can receive a grant up to \$6,500, but not to exceed the cost of repairs. If the rehabilitation work will cost more than \$6,500, the owner may combine the grant with the 3 percent loan.

The Housing Administration reported that most of the substandard houses were found in the southeast and southwest sections of the city. They include areas surrounding Lee Street, Logan Street, Asheboro Street, and the Glenwood community, west of Lee

Street. The Brightwood community, located in the northeast section of Summit Avenue also has a high proportion of substandard housing.

But much of the housing in most of these areas has been brought up to standard, according to Gordon. He said the major cause of the poor conditions in these areas is the dwellings are rented and neither the tenants nor owners invest enough in the up-keep of them.

"We found that multi-family units consisting of one to four persons were in worst conditions than those units consisting of one to eight persons," Gordon said.

Through September of this year, the Housing Administration has reported 2,117 homes that have been brought into compliance; 433 units have been condemned and 56 homes were in dilapidated condition. Out of the 433 units condemned, approximately 150 have been actually vacated and all of the 56 homes reported in dilapidated condition were demolished.

## Grant Helps Nursing School To Expand Lab Facilities

By Thomas E. Harris

The A&T School of Nursing has received federal monies that went towards major renovations.

Naomi Wynn

An AIDP (Academic Improvement Developmental Program) Grant was recently implemented at Noble Hall. This grant allowed for renovations primarily on the third floor of the building, which houses a spacious laboratory for student utilization.

Through this grant Noble Hall has additional personnel on the staff. Naomi Thomas is a nurse technician hired through the grant. Her primary job is to offer "assistance in the lab for any student having difficulty,"

Trick or treating starts early for some.

## Freshmen Aspire To Be Best

By Larry L. Jenkins

Stressing identification and unity as its organization objectives, the 1979-80 officers of the freshman class anticipate to become the best freshman class as compared to previous ones.

Believing that students are searching for something to identify with, the freshman class officers feel that they could be a part of that needed leadership. The officers have

attended meetings pertaining to campus issues to become better informed, thus enabling them to better serve as leaders.

Wanting students to "recognize who and what they are all about," the officers hope to instill in students a type of unity, "as far as bringing themselves together."

"Before things can be dealt with on this campus, people have to get themselves together," said Parris Bryant, president of the freshman class. The Buffalo, New York native continued by saying that, once changes are made from within, the atmosphere on this campus will improve. People will start respecting each other.

The first meeting of the freshman class will be November 16, at 7 p.m., in

Merrick Hall Auditorium. This will be a rap session type meeting with topics surrounding unity as the key issue.

The class has presently participated in the rally and voter registration drive sponsored by the Student Government Association. The freshman class will sponsor a disco Friday, November 2, from 10-2 a.m., in the gym. The class is also working closely with the religious institution on campus, and also plans to provide services for the needy as a project.

Other officers for the 79-80 school year are Norbert Hopkins, vice-president; Zebrick Jones, secretary; Greg Hall, treasurer; Regina Poteat, Miss Freshman. Faculty advisor is Thomas Boyd.

## Counseling Service Boosts Student's Study Habits

By Trudy Johnson

The Counseling Services, under the directorship of Dr. Robert Wilson, will sponsor a series of study sessions to boost study habits for A&T students.

The study skill sessions are designed for four consecutive evenings. Each session is complementary to the other. For best results, all four sessions should be attended.

For busy students who want a little more improvement than their schedules allow, two attended sessions are better than none.

The study skills sessions are for undergraduate and graduate students' attendances.

"These sessions are conducted at different intervals throughout the academic year," said Miss

Marilyn Burnette, one of the Center's counselors.

The four study skill sessions will focus psychological factors influencing learning/management; guides to taking better lecture notes, reading comprehension and writing skills, and how to take examinations.

A word for examinations--they are an essential part of a course study, but learning to keep calm and not to panic alleviates last minute errors. These usually rise from not proofreading the copy to be turned in to the instructor.

All interested students who want to improve learning techniques and study habits are invited to attend all four sessions.

These sessions are sponsored November 5-8, from 3:30-5 p.m., in Room 103 Murphy Hall.

## A&T's National Dean's List

(Continued From Page 1)

Haywood Morrison.

The list concludes with Linda Newkirk, Glenwood Norris, Teresea Peeples, Robert Perry, Lance Peterson, Michael Prioleau, Wildra Ray, Gwendolyn D. Roach, Juliet Sampson, Belinda Simmons, Linda Smith, Carlton Spencer, Darlene Stephens, Donna Streater, Michael Suggs, Robin Thompson, Larry Thorpe, Linda Trevathan, Keith Tyler, Mary Tyson, Ricky Valentine, Gerald Vaughan, Carolyn Watkins, Mary Williams, Joyce Withers,

"I've Been Looking For You... Haven't You Heard?"

Patrice Russin's new smoker is blasting the charts away and getting prime time air play. This little lady packs a voice like an "Emotion" with a message that's totally love and a beat that is totally disco.

Seems like duos are "it" this fall with Curtis Mayfield and Linda Clifford's new LP, "Between You And Me Baby." Issac Hayes and Millie Jackson have another duo together; the album is "Royal Rappins."

Also new and wide open are a few guys by the name of Sugar Hill Gang with a take-off from Fatback Band entitled "Rapper's Delight"; 15 minutes of disc jockey jargon. However, rumor has it, a lawsuit is in the making from Chic for the background music used in the song (Good Times.)

The O'Jays album "Identify Yourself" is doing well, ranking number 19 in the charts of *Record World*. The group will be in concert on November 10, at 8 p.m. in the Greensboro Coliseum. Also billed on the same show are GQ with their latest success "I Do Love You" and the Jones Girls "you Gonna Make Me Love Somebody Else." Tickets are \$8 and \$9.

The Bar-Kays are right on time with another killer! The album "Injoy" features a cut (that will rock your mind) called "Move Your Boogie Body."

Archie Bell & The Drells, Smokey Robinson and Gloria Gaynor are a few who have "been around" as it were, and are still producing the contemporary sounds of today. Consecutively, their hits are: "Strategy," "Where There's Smoke," and "Let Me Know."

There are tributes to the late artists Minnie Ripperton and Donny Hathaway, as performed by Stevie Wonder and The Whispers.

Something that is still a novelty and a good jam is the Yellow Magic Orchestra - "Computer Gamer." A series of computer sounds incorporate this sci-fi-rock.

# HAPPY HALLOWEEN

## Answers to Last Week's Puzzle

How Did

You Do?

Ntozake Shange, poet-playwright-director and author of the highly successful "For Colored Girls Who've Considered Suicide When The Rainbow Is Enuf" and "Spell No. 7," is the subject of a profile on CAMERA THREE, a series on the arts, Thursday, November 11, at 9:30 p.m. on UNC-TV.

## Coleman Proclaims Fun Day

By Florina G. Byrd

Saturday, November 3, has been proclaimed as High School Day on the campus of A&T, according to Mike Coleman, director of athletic promotions.

The purpose of High School Day is to give students from other high schools in North Carolina an opportunity to tour the campus, meet friends from other schools, watch the A&T vs. Tennessee State football game, and go to a disco at the Cosmos II.

### Students Put Forth 100% Effort

(Continued From Page 1)  
of-state, in-state and residents of this city according to Hopkins. "I feel that the success of this registration was kicked off mainly by the participation of students on campus. They put forth 100 percent effort. These students asked me if they could help and therefore they became a part of the voter registration drive. Without their support I believe we might not have registered that many students," asserted Hopkins.

Hopkins stressed concern for the next drive which will be held November 17 from 9 a.m. - 5 p.m. in front of Williams Cafeteria.

"I would like to thank all students and Alpha Kappa Alpha Sorority for their support and service rendered on Saturday," concluded Hopkins.

There is no admission charge for those high school students who have an identification card from their school. The students are also asked to save their ticket stubs from the game for admission to the disco at the Cosmos II from 5-9 p.m., Saturday.

Persons or organizations

interested in serving as volunteers are asked to please report to Corbett's Sports Center (new gym) at 10 a.m., Saturday morning for further assistance.

For more information please contact Florina Byrd at 379-7700 or Minerva Johnson at 379-7591.

## EXCEPTIONAL MANAGEMENT OPPORTUNITIES

### WE OFFER

- \*starting salary up to \$15,000 increases up to \$26,000 in 4 years
- \*30 days paid vacation annually
- \*fully financed graduate programs
- \*superior family health plan
- \*more responsibility and leadership opportunities
- \*worldwide travel and adventure
- \*prestige and personal growth potential

# 'Only The Strong Survive'

When the going gets tough, the tough get going! This saying could mean different things to various people. This writer will interpret it in this way; "only the strong will survive."

Many of you have classes that you must pass. You cannot in any way fail the course, but obstacles have been put in your way. Failing tests, can't complete work on time, and putting work off until the last minute all seem a part of the curriculum.

Can you figure out the problem? No one person really can, but "only the strong survive."

You do not walk alone as you go through your classes and to get to the point where you don't understand the teaching material, aids such as study groups and tutors in some areas are provided to aid you in your studies. Working together is the only way that you will be able to get something done.

Don't give up, however, if everything starts to slow down, or it looks like it wants to stop. Learning how to deal with difficult situations is all a part of college life. As one student so bluntly stated, "If A&T students leave this institution and don't learn anything educational, they do learn how to deal with life.

In many cases, such as SGA meetings where student support is constantly needed, organizations that you may be a member of an officer are always in need of constant support.

Remember to support your cause, yourself and what you believe in, and you as a part of the strong, able bodies of society will survive.

Leading editorials are written by the editor of the A&T Register. Such editorials will not necessarily carry a byline and will not necessarily reflect the opinion of the University or the entire staff. Staff members are free to write dissenting opinions.

### LATE SEMESTER BLUES

## Campaign Successfully Eliminates Smallpox

By Larry L. Jenkins

In a campaign that started over 12 years ago, the nation has successfully virtually eliminated the disease smallpox. Realizing that smallpox, along with many other diseases, could possibly increase and become a deterrent to the population in future years, the national disease control council started this campaign.

Using the advertising media, as a primary source, this campaign informed people and made them more knowledgeable about the disease. It also made them aware of the proper medication needed to prevent the

spreading of smallpox.

According to reports, the United States will save approximately \$100 million annually because it will no longer have to allocate as much money for checking passengers as they enter this country.

This is just one of many classic cases revealing that once goals have been set they can be attainable through diligence and hard work. This campaign was not only held in the United States but was perpetrated internationally. This proves that countries can communicate effectively and unite for a common goal.

## Who Is Really Competent For President?

By Jacqueline D. Pender

Do you feel your reigning President Jimmy Carter is incompetent to handle the nation's problems? If so you and many others along with Senator Edward M. Kennedy feel that Carter is really handling the nation's problems very impecuniously. In other words Carter just isn't doing his job as well as anticipated.

Senator Kennedy who became a Democratic candidate for the presidency last Friday decided to run only because of Carter's failure to do something about the rapid rise of inflation in this country.

This writer feels this is not the only reason a man should run for president of the United States a prosperous and prominent nation. There should be

other reasons within his agenda such as the Salt II Treaty, oil industry et cetera.

We all know that Carter has not lived up to all of his expectations and most men who have been in his position have not. But, if Kennedy could have given better reasons supporting why he thinks he can do a better job than Carter, he would probably convince this writer if he should be our next president.

As for now this writer sees no man qualified to untangle the chains that Carter and past presidents have gotten this nation into.

Although there have been predictions made that Carter will win the Democratic election, this writer still feels that none of the present candidates are germane for the 1980 presidency.

# Black Unemployment Higher Than Overall Rate

By Norman Hill

This article was taken from the AFL-CIO News, Washington, D.C.

Most economists and government officials readily agree that Black people suffer disproportionately from unemployment. At the present time, the unemployment rate among Black workers is 11.3 percent, compared to an overall rate of 6 percent. For young Black workers, the situation is even worse—about one-third of all Black teenagers lack decent jobs. These dangerously high unemployment levels among Blacks prompted Alfred Malabre of the Wall Street Journal to remark that "amid America's prosperity, a

depression is in progress."

Malabre, who is certainly not prone to exaggeration or overstatement, has identified one of the most perplexing and potentially explosive problems of our economy—the stubborn persistence of an economic depression within the Black community. For at least 10 years now, the economic condition of Black Americans has been relatively static. And Black unemployment rates have remained at least double the national average.

While I note the enormous differences here between the national and Black unemployment rates, I am not suggesting that the problem is exclusively or even primarily a racial one. True, some Blacks

are jobless because of racial discrimination on the part of employers. But the vast majority of jobless Blacks are the victims of color-blind economic policies which destroy thousands of unskilled, semi-skilled and service jobs irrespective of racial considerations.

As happened during other recessions, workers in construction, manufacturing, and unskilled positions experience the highest unemployment rates. Consider these statistics: In June the unemployment rate for construction workers (Black and white) was 9.6 percent, the rate for manufacturing workers was 7.7 percent, the rate for

common laborers was 10.3 percent, and the rate for service workers was 7.2 percent. By contrast, the

jobless rate for white-collar workers was 3.4 percent, and the rate for technical and professional employees was only 2.5 percent.

These statistics, I think, unmistakably demonstrate that unemployment discriminates by class rather than color. In short, Black unemployment is so high today because the vast majority of Black workers are concentrated in occupations and industries—automobile manufacturing, services, retail trade, apparel, and construction—that are

especially vulnerable to drastic cutbacks during economic slowdowns.

How can the Black community best approach the unemployment issue? First, we must begin by recognizing the class-nature of the problem. Such a recognition leads us to advocate a broad-range of economic policies designed to reduce the unemployment of all blue-collar and service workers.

It makes little sense, for example, to talk about solutions to high Black unemployment when the Federal Reserve Board deliberately tightens the money supply or when both Democrats and Republicans commit themselves ritualistically to a balanced budget irrespective of the prevailing economic conditions, or when our government enters into trade agreements which destroy thousands of jobs in manufacturing industries, jobs which are the hopes of many Black people.

All of these recession-creating policies emerge from (See Community, Page 6)

## Inmate Needs Friends

Editor of The Register:

The spirit motivating this letter is purely humanistic. I feel neglected, extremely lonely, and in desperate need of a warm and caring friend, someone with whom to share love and correspondence. I am in prison but such are the ways of fate. Today you are lifted gently into the saddle and tomorrow the saddle is placed on your shoulders.

At the age of 29, I am a gentle person but I am also bold enough to believe in the possibility of the impossible. I am now painfully aware of the "American Dream", its elusiveness and how it can appear to be within reach, yet somehow you can not touch it.

My exile here is temporary and caused by my own hands but my loneliness is caused by the inadequate lack of companionship...so please write to me!!!

Sincerely,

James D. Phillips

## LET'S TALK OPPORTUNITIES

General Dynamics, a Fortune 100 company, will be visiting your campus this fall to talk to you about our broad range of high-technology programs at our 15 operating divisions throughout the United States.

At General Dynamics you will have the opportunity to work with top professionals on state-of-the-art projects like the F-16. Cruise missiles. Trident submarines. LNG tankers. Sparrow missiles. Digital telephone equipment and more. Plus, depending upon your

discipline, your career could start at one of our many locations shown above.

To find out more about high-technology opportunities with one of the high-technology leaders in Telecommunications, Electronics, Data Products, Shipbuilding, Aerospace, Tactical Weaponry and other fields, contact your Placement Office. Or, send your resume to: Corporate Director, College Relations, GENERAL DYNAMICS CORPORATION, CN 26 Pierre Laclède Center, St. Louis, MO 63105.

**NOVEMBER 14**

An Equal Opportunity Employer M/F

The Pan-Hellenic Council will meet Wednesday, October 31, at 6 p.m. in the Student Union Room 213.

Phi Alpha Theta will meet Thursday November 1, at 7:30 in Room 108, Hodgin Hall. Career and graduate opportunities for History and Social Science majors will be discussed. All students are invited to attend.

Delta Sigma Theta will be trick or treating on October 31, for UNICEF. They will be collecting aluminum cans for recycling. Please save cans and bring them by Zoe Barbee Hall suite 209A. Proceeds will go to needy.

Games & Tournaments of the Student Union Advisory Board are sponsoring Tournament night, Nov. 1, 1979, from 7-10 p.m. in the Student Union Ballroom. Prizes will be awarded to the winners of Backgammon, Bingo, Spades, Dominos, Bid Wisk, and Po-ke-no.

The National Society of Pershing Rifles (P/R's) will sponsor a Disco in Moore Gym Saturday, Nov. 3, following the A&T vs. Tennessee St. game, from 9-1 a.m. Admission is \$.50 with A&T I.D. \$1.00 with other college I.D.'s.

All Young Ladies interested in being a charter member of the National Society of 'CAPER's (Co-ed Affiliates of Pershing Rifles) are asked to meet in Campbell Hall Thursday, Nov. 1, at 8:00 p.m. All interested are urged to attend. Neat Dress Please.

The Pershing Rifle Society (P/R's) is having an interest group meeting. Any interested persons are asked to attend an organizational meeting at 8:00 p.m. Thursday night in Campbell Hall Room 102. Neat Dress Please.

The A&T Agricultural Extension Program has announced series of workshops in November to demonstrate budget ideas for Christmas. All workshops will be conducted in the assembly room of Coltrane Hall at A&T from 10 a.m. until 12 noon. The public is invited to attend. Monday, November 5 Microwave Cooking Demonstration; Tuesday, November 6, How to Prepare Inexpensive Gift Ideas from the Kitchen.

North Carolina Fellows will meet Sunday, November 4, at 5 p.m. in the Memorial Room in the Student Union. Urgent business will be discussed.

The Business Administration Club (B.A. Club) will give \$10 to the person who can come up with a design for an effective emblem to be used by the club now and in the future at A&T. The deadline for the emblem design is Nov. 12, 1979. Designs may be turned into the B.A. Club office Room 309 Merrick Hall. This is open to anyone who may have an idea.

Any Student Interested in the position of Student Government Secretary should come by and sign up in Room 218, Student Union. The deadline is November 9.

Griot Society (History Club) will meet Monday November 5, at 12:00 in Room 313 Hodgin Hall. All History and Social Science majors, please attend.

The Richard B. Harrison Players will be sponsoring a Halloween masquerade dance October 31. in Moore Gym from 10-1 a.m.

Some people are still trying to enjoy what little warm weather we have left. (Photo by Woody)

## Part-time

# Jobs Available In Southeast

ATLANTA (AP) Workers looking for part-time jobs may find them more easily in the Southeast than elsewhere next year because of the growth of retail and wholesale industries in the region, a Federal Reserve Board economist predicted Monday.

"I suspect that part-time voluntary employment will be more available in the Southeast because of the retail and wholesale factor," said Charlie Carter, a business economist with the Federal Reserve Bank of Atlanta.

Voluntary part-time workers--traditionally

homemakers and students are those who do not want full-time work, Carter said. They usually are employed in service-related jobs in restaurants, department stores and the like.

Carter said the service-related job market is more robust in Southeastern states

because the region has experienced a greater increase in demand for commodities than in other parts of the nation. But while they will be more available in the Southeast than elsewhere, part-time voluntary jobs

generally will become more scarce in all parts of the nation during the next economic period, he added.

Carter said part-time employment often provides advance indications of changes in the overall employment rate. But he said the Southeast's healthier voluntary employment situation does not necessarily indicate that unemployment will be less severe in the region.

Carter also predicted that joblessness will rise more dramatically nationwide over the next economic cycle than was expected. He based that prediction on figures concerning "discouraged workers."

"Discouraged workers" are persons who are not currently seeking work because they believe they cannot find a job. The number of such workers rose sharply in the second quarter of 1979, while the overall employment rate remained roughly the same. Carter said a "rise in discouragement" usually precedes economic contractions.

In addition, a low ratio of voluntary part-time workers to involuntary part-time workers--those who work part-time because they could not find full-time work--usually indicates that unemployment is on the upswing, Carter said.

Based on this ratio, Carter said he expects unemployment to rise more in the next year than it did during the recession of 1974-75.

The ratio of voluntary to involuntary part-time workers fell 7 percent prior to the 1974-75 recession, but dropped about 9 percent from December 1978 to June of this year, he said.

## Community Must Approach Problem In Political Way

(Continued From Page 5)  
community must approach the problem from a political standpoint.

### Winners To Receive Full Tuition

(Continued From Page 1)  
receive full tuition and a \$3,000 stipend per year. Students selected this semester are Mary M. Monk, chemistry major; Dwaine Smith, Cyril Howell,, Valeria D. Knight, Shirlean A. Smith, and Eva L. Goins, biology.

Heavy emphasis is placed on training the students to do research. Each student is required to conduct an individual research project and to write and present an undergraduate research thesis. The training includes a special on-campus summer program for research orientation, special honor courses in animal science, and a natural science honors colloquium with faculty and visiting lecturers.

All of these recession-creating policies emerge from the political process; they are the result of conscious decisions made by elected of-

ficials. Thus, it seems to me that we in the Black community must approach the problem from a political standpoint. In other words, we must begin now to build a strong, united political constituency, we must increase the political muscle of the Black community by registering people to vote and by stressing the importance of supporting candidates who are unambiguously committed to the goal of full employment.

We must press our demands every day; we must organize and out-lobby the political groups that oppose full employment policies. And we must constantly strengthen our political power at the community level so that both our friends and enemies will be aware that the Black vote counts.

N.C. A&T's search for a championship came to an abrupt end Saturday, losing to a tough Morgan State team 29-9. The Aggies have now been mathematically eliminated from the MEAC conference championship.

All year Aggie followers have been wondering what happened to the powerful team which defeated WSSU 14-7 in Winston-Salem. Since its opener, A&T has struggled offensively and, at times defensively, failing to jell as a team. Football fans should learn from the Aggies' season that one game doesn't make a season. After A&T's victory over WSSU, the Rams came together as a team and are now nationally ranked. I can't seem to locate A&T on any poll. Wait till next year, right?

In A&T's loss to Morgan, the Aggie defensive backfield was constantly tested. Gerald Johnson's loss hurt the defensive backfield tremendously, yielding 276 yards in the air. Henderson and Holzendorf, Morgan's talented receivers caught eight passes for 136 yards and three passes for 108 yards, respectively. Morgan leads the league in passing offense and Saturday, against A&T, the Bears proved worthy of their No. 1 ranking.

The defensive line and linebackers played extremely well defending Morgan's running game. The Bears could net only 44 yards a game; maybe you don't need a running game. Anyway, after Morgan beats Howard, the MEAC will crown new champions. Hail to the Bears.

This year, a year that was supposed to be A&T's rise to the top of the conference, is the worst year an Aggie football team has suffered in the last five years. And with the lack of depth plaguing Coach McKinley, he'd better have a good recruiting year because next year's team will be loaded with seniors.

So now what's in store for A&T? Their season is practically over with only three games remaining. The best they can finish is 6-5 and with Tennessee State invading Greensboro Saturday, it's doubtful the Aggies can finish any better than 5-6.

Coaching Tennessee State is John Merritt, who is closing in on his 200th career win. Right now he has 194 and you can bet he's expecting win number 195 against A&T. He's coached Tennessee State to a 136-27-5 record in his 17-year coaching career there.

Merritt is known for his high caliber of football players he sends to the pros. As a matter of fact, Tennessee State University ranks third among all college teams in the number of pros it has turned out since 1964, with 145.

**MEAC**

**Race Turns Into Nightmare**

By Raymond Moody

What was supposed to be A&T's opportunity to get back into the MEAC race, turned into a nightmare Saturday as Morgan State ripped the Aggies apart for a 29-9 win.

A&T's loss completely eliminated them from contention for the MEAC crown. The defeat left the Aggies with an embarrassing 3-5 record, 1-2 in conference play.

Morgan is now 6-1, while ranked No. 6 in the NCAA Division II poll.

The Aggies had plenty of opportunities to put more points on the board, but this afternoon they were denied from the goal line. Five times A&T drove inside Morgan's 10 and could manage only three points. Twice A&T was intercepted; then they fumbled, missed a field goal and eventually connected on a field goal.

Morgan was known for its explosiveness and against the Aggies Morgan's big plays came through.

Morgan's first score came

on a 21-yard punt return from Curtis Henderson which gave Morgan possession on A&T's 28. Six plays later Angelo Proctor scored from two yards out. The two-point conversion made it 8-0.

Proctor enjoyed a good day against the Aggie defensive unit. On eight carries, Proctor gained an impressive 71 yards.

The next score came later in the first quarter when Darrell Coulter passed 70 yards to Clarence Holzendorf.

The play was quite peculiar since Coulter, throwing to another receiver, had his pass deflected. But Holzendorf caught the deflected pass and raced for the score. Later, Coulter put the final points on the board when he connected 32 yards with Michael Henderson for a score with 29 seconds left in the game.

The Aggies scored on their next drive when freshman "sensation" Waymon Pitts galloped 31 yards for a touchdown.

For the day Pitts carried 27 times for a total of 124 yards. It was the second week, consecutively, Pitts accomplished this feat.

A&T's next score came in the second half when Morgan was intercepted by Dennis Coit which placed the ball on Morgan's 35. On first down, Myers hit Frank Carr for 34 yards down to Morgan's one. After three unsuccessful plays, A&T's Keith James booted a 22-yard field goal. The remainder of the game was completely dominated by Morgan State.

A big play in the game which broke the back of the Aggies came when Coulter pumped, then he threw long to Curtis Henderson for a 75-yard score.

**Morgan State Moves Closer To MEAC Championship**

By Raymond Moody

Morgan State took one step closer to the MEAC championship Saturday, pounding NCA&T 29-9 in Baltimore.

Morgan State's Darrell Coulter passed for 276 yards, including touchdown passes for 70 and 75 yards. The Aggies were led by rookie Waymon Pitts's 124 yards rushing. But it wasn't enough as the Aggies suffered their fifth loss in eight games.

Howard recovered from their 29-0 setback to the Aggies last week to whip Hampton Institute 28-12. Raymond Cryer led the way, rushing for two big touchdowns on runs of one and nine yards.

Howard, leading at the half 14-6, clinched their victory when Brain Thomas passed 15 yards to Greg Banks. Later in the fourth quarter, Banks recovered a fumble in the end zone. Banks was the leading rusher with 112 yards on 11 carries.

Delaware State crushed Kentucky State 16-2 as Anthony Beamon gained 165

yards and scored one touchdown. Kentucky State entered the contest as heavy favorites, but the Hornet defense played tough, holding Kentucky's offense scoreless. Their only score came when Delaware's Rod Lester was caught intentionally grounding the ball in the end zone.

S.C. State, apparently not as strong as its leading its in the year, had to play catch up football against NCCU Saturday. The Bulldogs scored 17 fourth-quarter points to win 26-6 over the Eagles. Tailback Chris Ragland led the Bulldog attack which netted 307 yards. Ragland had 181 yards in 35 carries.

U. District of Columbia's freshman quarterback Michael Young ran for three touchdowns Saturday and passed for another as they defeated UMES 28-21.

Chisley, who leads the Firebirds in receiving, caught five passes for 96 yards with one of his catches in the third quarter setting up Young's one yard run.

# We have positions to fill.

President Carter has called the fight for tomorrow's energy the "moral equivalent of war." The front-page industry that's tackling the nation's greatest challenge needs superior engineering graduates.

We can put your skills to work NOW. Kansas City Power & Light has choice career openings that place you now where your classmates will be in five years: at high levels of authority and responsibility with earnings and benefits to match.

Kansas City Power & Light Company is a billion-dollar utility and energy supplier to over a million people in a major commercial and industrial center encompassing 23 counties in two states.

Because of growing energy demand, expansion, and promotions, we need engineers with leadership capabilities to take over in these key areas:

### Fossil Plant Construction and Engineering

Two Mechanical Engineers, one Electrical Engineer and one Civil Engineer are needed to review the work of and coordinate with Consulting Engineering firms involved in designing coal-fired power plants. These engineers will also design modifications to existing plants and at times will supervise contractors.

### District Commercial Operations

We need two Service Engineers with degrees in Electrical or Mechanical Engineering (or Engineering Technology) to deal with representatives of our large customers and with Engineering and other departments of the Company. In addition to having good engineering skills, the graduates must be able to remain personable, articulate and poised under pressure. These positions require extra savvy.

### System Planning

One Mechanical, Electrical or Industrial Engineer (or Engineering Technology graduate) is needed to perform studies of the cost benefit trade-offs of designated projects involving generation capacity. This individual will need course work in Economics and the ability to program in FORTRAN. Communication skills are also important as this involves interface with other departments. Familiarity with econometric modeling is an asset.

### Energy Management Services

We need two Engineers with degrees in Mechanical or Electrical Engineering (or Engineering Technology) to explain electric heating, air conditioning, conservation techniques, and renewable sources of energy to customers, builders, contractors and consulting engineers. This involves constant research to remain current with the state-of-the-art. Candidates must communicate accurately and tactfully.

### Generating Stations

Three Maintenance Engineers with leadership skills are needed for trouble-shooting, special studies, efficiency tests, and overseeing contract crews. This is a "fast-track" into supervision and management. Graduating students who will have degrees in Mechanical or Electrical Engineering (or Engineering Technology) are invited to discuss with us the following locations, some in congenial small town locales:

- Iatan Station — live in Kansas City
- LaCygne Station — live in Louisburg or Paola, Kansas, 20 to 40 miles from Kansas City
- Montrose Station — live in Clinton, Missouri, about 60 miles from Kansas City

### Distribution Engineering

One Electrical Engineer who has taken power engineering courses is needed to design both overhead and underground distribution systems. Some field work is involved with opportunities to promote into Construction and Maintenance or technical supervision.

### System Power Operations Staff

The Manager of Generating Stations is seeking an exceptional Mechanical Engineer for top level staff. Electrical Engineers as well as Electrical and Mechanical Engineering Technology graduates will also be considered. This person will assist in administration of the Preventative Maintenance and Efficiency Programs and the Materials Management Systems. Candidates must be good at planning and, due to the nature of the liaison work, must be persuasive. This is a unique and very challenging opportunity requiring a sharp individual able to work with all levels of the Company. It also affords good exposure to top management.

Our representatives will be interviewing on campus in the near future; please contact the placement office.
