# THE A&T REGISTER

"COMPLETE AWARENESS FOR COMPLETE COMMITMENT"

VOLUME I, III NUMBER 24 NORTH CAROLINA AGRICULTURAL & TECHNICAL STATE UNIVERSITY, GREENSBORO, NC Tuesday, January 26, 1982

Kennan Smith (right), Exxon business service administrator, presents a check to Chancellor Edward B. Fort. The grant will be used to recruit more minority engineering majors.

## Engineering School Gets Grant

An A&T program designed to recruit more minorities as engineering majors, will be aided by a \$20,000 grant from the Exxon Research & Engineering Company of Baytown, Texas.

"We are highly appreciative to Exxon for this grant," said Chancellor Edward B. Fort.

"The funds will be put to good use as we want to make certain that our Engineering School maintains its involvement as far as minorities are concerned."

Announcing the grant for Exxon was Robert L. Hirsch, manager of the Baytown Research and Development Division, and Kennan Smith, business service administrator for the division.

Dr. Suresh Chandra, dean of the School of Engineering, said the recruiting effort will be coordinated by Dr. William J. Craft, associate dean.

Craft said A&T will seek potential engineering majors among high school juniors and seniors.

These students, he added, will be encouraged to complete the necessary upper level high school mathematics and science courses.

He said both audio and visual programs will be used to enhance the recruitment effort.

The Engineering School currently enrolls more than 1,000 students, an increase of more than 194 percent during

the past six years.

It offers majors in electrical, mechanical, architectural and industrial engineering.

The school has been

approved by the state Board of Governors to plan programs in civil and chemical engineering.

A&T also offers graduate programs in engineering.

## Workshops To Help Students Get Financial Aid

By FRAN PRIMUS

The Financial Aid Office will conduct workshops Feb. 8-19 to help parents and students complete 1982-83 aid forms.

By attending the workshops, students can complete forms correctly and file early to ensure an early response, said Alberta Dalton, director of Student Financial Aid.

By filing early, parents and students can determine how much they must contribute to the student's education.

"In the wake of budget cuts in aid programs, it is now more important than before for all students to attend financial aid workshops," Dalton said.

She added that because of the cutbacks, it is anticipated that applications for financial aid will be more carefully screened by the processing contractor, and more students will be required to provide information (from a completed 1040 income tax return) concerning the family's or student's financial situation.

This year all students will be required to file a Needs Analysis in order to be considered for campus-based aid programs, such as the Supplemental Educational Opportunity Grant (SEOG), Campus Work-Study, National Direct Student Loan (NDSL) and the Guaranteed Student Loan.

The Financial Aid Office will conduct workshops on:

- Monday Feb. 8, 4-6 p.m.
- Tuesday Feb. 9, 10-11 a.m. 1-5 p.m.
- Wednesday Feb. 10, 4-6 p.m.
- Thursday Feb. 11, 10-12 a.m. 1-5 p.m.
- Friday Feb. 12, 3-5 p.m.

The following week, (Feb. 15-19), the staff will be available in the Financial Aid Office to assist students who have special problems in completing the forms.

All students are required to bring a 1982-83 Financial Statement, a completed 1981 Income Tax Return (1040 or 1040A and State Local Tax Information), information on non-taxable income.

## McCraw Found Innocent Of Mail Opening Charges

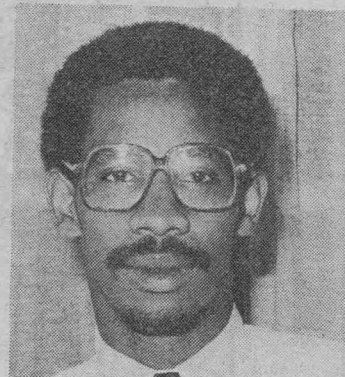

By ROSALAND STINSON

Leonard McCraw, former Kent Court dormitory counselor, was recently found innocent of unauthorized mail opening charges.

McCraw, who was arrested last December when Campus Security officers allegedly found other students' mail in his room, said that someone tried to set him up.

"I was framed because I have a big mouth where complaints against the school are concerned, and I will continue to voice my opinions."

McCraw said he complains when he sees problems at A&T and that is why some people say he has a big mouth. For example, he said Campus Security has many problems and he was going to write a letter to Dr. William Friday, president of the University of North Carolina System. He has not done so, but said, "I will before I leave A&T."

Leonard McCraw

In the case of N.C. A&T S.U. vs. Leonard McCraw, McCraw says, "According to Judge Pete Hunter, the state had no evidence against me." McCraw said the phrase, "A man is innocent until proven guilty," is a lie. "You're guilty until proven innocent," he said.

Campus Security officers were issued a search warrant on Nov. 24, but McCraw did not see it because he had gone home for Thanksgiving holidays. Campus Security called Scott Hall dormitory counselor to open the room, McCraw said. After officers completed the search, McCraw said Officer Linn Winston left a key in the door to lock it.

McCraw explained that Campus Security doesn't have pass keys to dormitory rooms. Twelve letters allegedly found in his room were brought to

court and were used as evidence against him. McCraw said when he left A&T on Nov. 24, the only mail in his room were letters he left on his desk.

"The janitor, Mr. William Parker, adjusted a shelf in my room and there was no mail then, or when I left for Fayetteville that day," he said.

He said Bobby Perara, an A&T student, saw Larry W.D. Lewis, investigator for campus security, come out of my room at 5:50 p.m. on Nov. 24, but the search warrant inventory sheet has 6:33 p.m. as the time of the search. According to Lewis, he was at the Magistrate's office from 5:30 to 6:06 p.m. that day.

McCraw said the fluorescent coated mail that security officers addressed to his room was not recovered during the investigation, but it appeared the night of the search.

He added that an instructor in Noble Hall told him of a comment Lewis made the night of the search. According to McCraw, Lewis said, "I have to hurry up and make copies of the search warrant before the evidence is destroyed."

Lewis was unavailable for comment.

McCraw said, "I feel they (campus security) are trying to find a scapegoat for missing mail."

When he heard about the search, McCraw said he returned to Greensboro Nov. 25 at 6pm. McCraw claims that two students, Keith Mattison and Michael Eure, lied about finding mail in his room last April when the investigation began in Scott Hall. Mattison's testimony was not enough evidence to convict McCraw.

"Eure was not at the trial and if he saw so much evidence in my room last April, why wasn't he there?"

The case was heard as a misdemeanor because, after mail is released by the United States Postal Service to the University, the campus acts as an agent of the addressee.

"I was surprised at the faculty and administration behind me. I was concerned with clearing up the matter.

(See McCraw Page 6)

## James Colston Former A&T Professor dies

Funeral for Dr. James Allen Colston, a nationally prominent educator who served a total of 31 years as president of four colleges, was held Monday at St. James United Presbyterian Church, where he was a member. Burial was in Lakeview Memorial Park.

He was retired from the presidency of Bronx Community College, New York, N.Y., in 1976. In that position, he was the first Black to serve as president of a college in New York State.

After leaving New York City, Colston served as professor and chairman of the Department of Administration, Supervision and Post Secondary Education at A&T for three years and as director of fundraising for the A&T Foundation for a year. He had also taught at A&T for a short period in the 1950's.

He also served as president of Bethune-Cookman College, Daytona Beach, Fla., from 1942-46; Georgia State College, Savannah from 1947-49 and Knoxville College, Tennessee from 1951-66.

Colston graduated from Morehouse College, Atlanta, Ga., held the M.S. degree from Atlanta University and the Ph.D. degree from New York University.

He was a member of Phi Beta Kappa and held several honorary degrees.

In his professional career, Colston also served as director of public relations at Hampton Institute, and taught at Atlanta and New York Universities.

He served on the board of trustees at Princeton Theological Seminary, New Jersey; Johnson C. Smith Theological Seminary, Charlotte; Galloude College, Washington, D.C.; and Bennett College, Greensboro. He also served on the board of directors of the United Negro College Fund and the Board of Regents of the State University of New York.

He was a member of Alpha Phi Alpha Fraternity, Beta Epsilon Boule of Sigma Pi Phi Fraternity and the Greensboro Rotary Club.

Surviving are wife, Mrs. Wilhelmina White Colston; daughter, Mrs. Jean Alliee Foster of San Diego, Calif.; brother, Dr. Nathaniel Colston of Miami, Fla.; sisters, Mrs. Callie Greene, Mrs. Allie Price, Mrs. Josephine Nicholas and Mrs. Celeste Parris of Winter Park, Fla.; three grandchildren.

Working on a problem in the computations lab in Graham Hall is industrial engineering graduate student Golgen Bengu. Golgen is from Istanbul, Turkey, which she calls "a nice city." (Photo by Tyson)

# WINTER PROMISE

In the winter, you can be certain about two things—cold weather and hot PTA pizza. And you can forget the cold.

PTA pizza arrives steaming hot, every time.

From store to door, hot PTA pizza is always in season.

When it comes to pizza, PTA comes to you.

## Fuller Makes Colonel

Monroe Fuller, a native of Greensboro, has been promoted to the rank of

Colonel in the United States Air Force.

Fuller is professor of aerospace studies and head of the A&T Air Force Detachment No. 605.

He is the son of Mr. and Mrs. James R. Fuller Sr. of 4306 Belfield Drive and the husband of Mrs. Barbara Morman Fuller.

Fuller is a graduate of Dudley High School and holds the B.S. degree in physics from A&T and the M.S. degree in education from Pepperdine University in California.

Fuller has served in the U.S. Air Force 20 years. The Fullers have four children, Tamara, Daryl, John, and Sheri.

To show that the military life does have its rewards, Monroe Fuller receives a kiss from his wife Barbara in honor of his promotion to Colonel.

## 717 Students Make Honor Roll

By VALERIE L. HILL

More than 700 students have been placed on the Honor Roll for the fall semester 1981 at A&T, according to officials in the Registration and Records Office.

The Honor Roll consists of 717 undergraduate students who completed a minimum of 12 semester hours and have earned a minimum semester grade point average of 3.00.

According to Dr. Rudolph D. Artis, director of Registration and Records, 4,909 undergraduate students enrolled at the University the fall semester 1981 and approximately 15 percent made the honor roll. Out of that number, 46 had a GPA of 4.0.

The University will honor these students at the Spring Semester Convocation scheduled for March 24. This convocation is devoted to giving recognition to those students who have an overall average of 3.00 or higher for the period of time that they have attended A&T.

When computing a student's GPA to see if he is eligible for the honor roll, Dr. Artis said, "All grades that the student has made are a part of the computation." If a student has repeated courses, each grade received is included in the computation.

The Office of Registration and Records plans to send academic departments and schools a list of their students who have an overall average of 3.00 or higher.

## Koontz To Address Black Women's Luncheon

Dr. Elizabeth Koontz will be the keynote speaker at the Fourth Annual Black Women's Luncheon sponsored by the Greensboro YWCA.

The luncheon, which honors all Black women in observance of Black History Month, will be held Tuesday, Feb. 9, from 12 until 2 p.m. in the Memorial Student Union Ball Room.

Dr. Koontz is the assistant superintendent of the North Carolina Department of Public Instruction in Raleigh. She will speak on the theme, "Leadership and Courage: The Black Woman-A Role Model for Our Youth."

In 1969, the President

appointed Dr. Koontz Director of the United States Department of Labor-Women's Bureau. She subsequently served as Deputy Assistant Secretary for Labor Employment Standards and as a delegate to the United Nations Commission on the Status of Women.

In North Carolina, Dr. Koontz has served as coordinator of the state nutrition programs with the Department of Human Resources. She was elected the first Black president of the National Education Association in 1968 and is a member of Zeta Phi Beta Sorority, Inc. and Phi Delta Kappa.

## Moore Wins Computer Scholarship

By TRUDY JOHNSON

Cheryl Lynn Moore, a sophomore computer science major, is making headlines now but she got the credit last semester.

Cheryl L. Moore

Moore, who received a \$1,000 scholarship from Sperry-Univac Company (based in St. Paul, Minn.), was chosen for the award on merits of high scholarship,

career interest and department recommendations.

She was awarded the scholarship in October because she maintained the highest departmental grade point average, a 3.40.

"In addition to winning the award, Moore has been guaranteed summer employment with Sperry-Univac, beginning this summer.

"One of my most memorable moments about the selection was when I received a message to report to Dr. Wendell Jones' (the chairperson of Mathematics

Department/director of Computer Program) office immediately," she said.

After entering his office, Moore said she got her "surprise."

Moore noted that, when she was in high school, her uncle's career as a computer analyst made her investigate computers as a possible career. She was always asking him questions and this further sparked her interest.

She said she takes her classes serious and has no time for extracurricular activities. Moore said, "My classes are

my activities."

After graduation, she hopes to become a computer analyst or programmer and would like to work with Sperry-Univac or IBM.

Even though she has been fascinated by computers for a long time, her most exciting experience with computers was watching athletes training for local olympics.

Moore is the daughter of Master Sergeant Shepard Moore of Hampton, Va. and Shirley M. Hunter of Carrboro, N.C. She graduated from Kecoughtan High School of Hampton.

BEGINNER OR ADVANCED Cost is about the same as a semester in a U.S. college: \$2,989. Price includes jet round trip to Seville from New York, room, board, and tuition complete. Government grants and loans available for eligible students.

Live with a Spanish family, attend classes four hours a day, four days a week, four months. Earn 16 hrs. of credit (equivalent to 4 semesters taught in U.S. colleges over a two

year time span). Your Spanish studies will be enhanced by opportunities not available in a U.S. classroom. Standardized tests show our students' language skills superior to students completing two year programs in U.S.

Hurry, it takes a lot of time to make all arrangements. FALL SEMESTER - SEPT. 10-Dec. 22 SPRING SEMESTER - Feb. 1 - June 1 each year. FULLY ACCREDITED-A program of Trinity Christian College.

This Week!

## Just tell us what you want.

Your ArtCarved representative will be on campus soon to show you the latest in class ring designs. With dozens of styles to choose from, you'll be proud to select your one-of-a-kind design. Just tell us what you want. And be on the lookout for posters on campus to get you where you want.

Date: **January 27, 28, 29**

Location: **Student Union**

# Reach For It!

"Rent gone up, food gone up, student fees gone up." These are not the exact words to the Peter Tosh song. But if brother Tosh were in college today, he might echo these sentiments. Once again, inflation and Reaganomics are elevating prices everywhere and many Aggies wonder if they can afford school next year. But many scholarships are available from private sources and the *Scholarship Bank* will reveal these agencies.

The bank is a Los Angeles-based referral service that lists private financial aid opportunities available for students who use its services. Graduate and undergraduate students may apply to the bank, and it is the only complete source of private aid in the United States, according to Steve Danz, director of the bank. It also has listings for graduate grants, internships and work-study.

Danz estimates that more than 25,000 private aid sources are available. The average scholarship is valued at about \$750 and many are renewable annually. Each subscriber receives at least 20 different sources that he/she is potentially eligible, Danz said. Eligibility is determined after students complete a questionnaire and financial need is the most important factor in about 30 percent of the scholarships.

Subscribers receive the name of the grant, eligibility factors, the amount of money available and where to write. If requested, the bank will send the actual scholarship application. Funding is available for every discipline, but interested students should apply soon because each agency has its own deadline.

Send a business-sized stamped addressed envelope to *The Scholarship Bank, 10100 Santa Monica Blvd, No. 750, Los Angeles, Ca. 90067*. The cost is \$17.50 when two students apply and this investment could help you reach the apple of your financial eye.

## Send One Your Love

By John Michael

Time in the small building located at 119 Nocho St. is slowly ticking toward dawn.

It contains eight dyed-in-the-wool Aggies, busy in a semi-weekly, all-night ritual of publishing a newspaper, that will reach the minds of all who read it.

The dedication of these students is not unusual, and the understaffed, poorly-financed *A&T Register* staff has served its school.

The problem with this year-after-year struggle to publish a creditable newspaper is simple.

Many students do not realize that with a minimum effort, any Aggie who can pass English 101, can write at least one publishable article a year for the paper.

There are 5,400 students enrolled here as either full or part-time students and each has some praise or complaint

about the school.

So, if you want to express yourself, don't talk a lot of junk.

Write it down and drop it by the *Register*.

Many of you are thinking, "I can't write well enough to be published, but I would like to lend a hand."

Well, the *Register* has more than just writing jobs.

One can distribute the papers, edit copy, type or just drop by to offer food and encouragement.

1982 will bring many changes to campus, and the *Register* must continue its commitment to the truth.

The slim number who pay the price of sleepless nights and long days could use some help.

If anyone in Aggieworld has a talent to lend, please come forward and show your care.

## Behavior

By Audrey L. Williams

Psychologists have found many ways for the tense and frustrated to relieve their tensions.

But here in Aggieworld, some students developed a new solution for relieving frustrations and tensions. It's called destruction and terrorism.

Maybe this description of students who constantly vandalize and frighten residents is a little harsh.

But until someone finds a better one, they'll be called terrorists and vandals of the "Aggie" kind.

When the telephone booth was invented it had one sole purpose: communication. It should not be used as a temporary watering post.

When man came up with the concept of a mirror, he intended for one to see his image, not for people to write grotesque sayings on, or steal.

God created woman as a companion and a source of love for man. She was not created to be terrified by the outcries of man.

To sum it all up, there is a constant and deviant lack of respect for the young women here by their male counterparts who come into their dormitories, destroy their property and harass them.

The city of Greensboro has a Crisis Control Center for those of you who need professional counseling. Please contact them immediately!

# Explore Your Mind For Unlimited Success

**Editor of the Register:**

Students, wake up. We're here for a reason.

During your four years at A&T, you can explore and challenge your mind or just waste your time.

New ideas, concepts and knowledge surround you that you can explore if you use your resources (F.D. Bluford Library, administrators, faculty, counselors, etc.).

One of the least used resources is the preregistration booklet. This booklet contains various information, such as the campus directory,

university calendar, exam schedules and preregistration instructions and procedures.

It also contains information on department codes, general information concerning A&T procedures and policies, trial schedules and course listings.

This booklet is not fully used because we do not take advantage of all the information provided for our use.

We also fail to see if other departments offer courses that would give us diversified skills

and make our services more marketable.

The job market is limited and we must prepare ourselves for the job.

During your four years here, you can learn as much or as little as you want.

It has been said that, "Opportunity and engineering equal success."

I disagree and would like to redefine this statement to say, "When opportunity and preparedness meet, they equal success."

For Blacks and other minorities, life has been a continuous struggle against oppression, racism and other obstacles.

As Black people, we must teach our history to our youth so they will know about our struggles and see how we got where we are today.

We must teach our youth of our present conditions and show them that the struggle is still alive.

I think sometimes we forget

that after you win the battle for something, you have to maintain strong forces to keep it.

This is where our generation and past generations fit into the struggle: by remembering past achievements and by moving forward.

Let's take advantage of the chance to progress and continue to join the lifetime struggle.

**Carl Locus, Secretary of Academic and Community Affairs**

## Snow Bad News For Aggieland

**Editor of the Register:**

Snow! Ice! Bad news for A&T students, faculty, elderly people and pregnant women.

I realize that it was too cold for the Physical Plant workers to shovel the snow, or put sand or gravel down when it first snowed two weeks ago. However, there were no excuses for not shoveling or sanding major pathways on A&T's campus. The ice had actually started melting, due to temperature increases.

I realize that this is a Black institution without much money. But can't we afford shovels, sand or gravel?

If the University refuses to do the necessary shoveling or sanding, give the equipment to the students and we'll do it.

A&T's lack of concern for the students and other people during winter weather will result in continued decreasing revenues for the school, and accidents and injuries for those who dare walk on this campus.

Sincerely,  
**Denise Brown**

**OOPS!** The Friday Jan. 22 issue of the Register contained an error. The Letter to the Editor entitled, "Snow Shall Return," was written by Nannetta Durnell. The Register regrets this error.

**Attention!** The deadline for submitting campus haps, stories and other material to the Register is 2 p.m. Mondays and Thursdays. We will not accept any late material.

# JUNIORS! EARN UP TO \$10,000 WHILE COMPLETING YOUR COLLEGE DEGREE.

If you're a junior in good academic standing and of good moral character, the U.S. Coast Guard can help you pay for your senior year of college. Through the *Enlisted College Student Program* the Coast Guard will pay you while you complete your education. Among other benefits you get:

- Free medical and dental care
- Tuition assistance for post graduate education
- Thirty days paid vacation per year
- Seniority for those who make the Coast Guard a career

**How It Works:** You apply for this program during your junior year. If you are selected to attend Officer Candidate School, you will be enlisted into the regular Coast Guard for four years. During the summer following your junior year, you attend eight weeks of basic training at Cape May, New Jersey, as an enlisted person drawing full pay. You advance to the grade of Seaman Apprentice upon successful completion of recruit training, then return to college for your senior year. During your senior year you will be in the Coast Guard, on active duty and drawing full pay and allowances (approximately \$895 per month). Wearing a uniform to class is not required and your only duty will be to earn your degree, whereupon assignment to the next available OCS class follows. The 17 week-long school is conducted at Yorktown, Virginia. Upon graduation from OCS you receive your commission as an Ensign in the Coast Guard Reserve to begin serving a three year active duty commitment. Your commissioned starting salary will be at least \$16,000 per year while you accomplish some of the most important work in the country—performing search and rescue missions—protecting our coastlines, waterways and environment—regulating our 200 mile economic control zone—intercepting narcotics traffic.

**How To Apply:** To see if you qualify for this program, call Lt. (jg) Stephen Jackson collect, Monday-Thursday, 6:30 A.M.-4:30 P.M., at 202-426-1823, or you may write him at: Commandant (G-PMR-3), U.S. Coast Guard 2100 2nd Street, S.W., Washington, D.C. 20593.

HELP OTHERS. HELP YOURSELF.

# THE U.S. COAST GUARD

Lt. J.G. Jackson and Lt. J.G. Blake will be on campus Jan. 26, to answer questions concerning the enlisted college student program.

The Computer Center will conduct DECsystem-10 workshops Feb. 1-19, Feb. 22- Mar.12 and Mar. 15-April 2. All sessions are from 8-9 a.m., on Monday, Wednesday and Friday. Introduction to DEC-10 is a prerequisite for Introduction to DBMS and Introduction to SPSS. Workshops will be held in Room 110, Graham Hall. Contact Carolyn Wright, extension 7856 to register for these workshops.

Persons seeking to become registered as professional engineers in North Carolina are invited to participate in an engineering fundamentals review course at A&T State University through April 7. The course will be held on Monday and Wednesday evenings at 6:30 p.m. in Room 226 Cherry Hall.

Additional information about the course may be secured from Dr. Ronald Smith at 379-7810 or Dr. William J. Craft at 379-7549.

The Behavior Modification Seminars on Weight Control, sponsored by the Outreach Centers, will be held through April 8, in Barbee Hall Lounge. Students, faculty and staff may participate in this program. If you have any questions, please contact Marylou Bowers, 1078 Scott Hall, ext. 7870 or Marva Watlington, 109 Barbee Hall, ext. 7955.

### Physics Department Hosts Contest

The Physics Department has initiated a monthly statewide physics question contest to increase the interest of high school students in the study of mathematics and science.

The contest, enhanced by a grant from the A&T/Industry Cluster, will provide interested students with an opportunity to react to physics questions selected by faculty members at A&T.

Winners of the contests will each receive a scientific calculator and a calculator mathematics book.

The prizes were donated by Texas Instruments Inc.

Dr. Thomas Sandin, physics professor and contest coordinator, said the contest questions will be sent to the physics and science departments of all North Carolina high schools.

Winner of the initial contest was Robert Edward Jeier, a student at Asheville High School.

### McCraw

(Continued From Page 1)

"I believe students who didn't know me thought I was guilty, and the ones that know me knew it wasn't true."

McCraw noted that he did have some animosity towards some people, but the rumor about his suing A&T is false.

"On Feb. 1, I will begin my student teaching in Fayetteville and I'll graduate in May. A new dorm counselor will replace me and I want everyone to know I'm not leaving because of this."

He added that, if this were not clarified, the rumor would have him put in jail.

# CAMPUS HAPS

Tutoring sessions for the National Teacher Exam (NTE) and the Graduate Record Exam (GRE) will be held twice a week throughout the spring 1982 semester 5-6 p.m. Monday, 4:30-5:30 p.m. Wednesdays in Crosby Hall 201. The Monday session will be conducted by Dr. Robert Levine and the Wednesday session by Dr. SallyAnn Ferguson. These tutoring sessions are sponsored by the English Department.

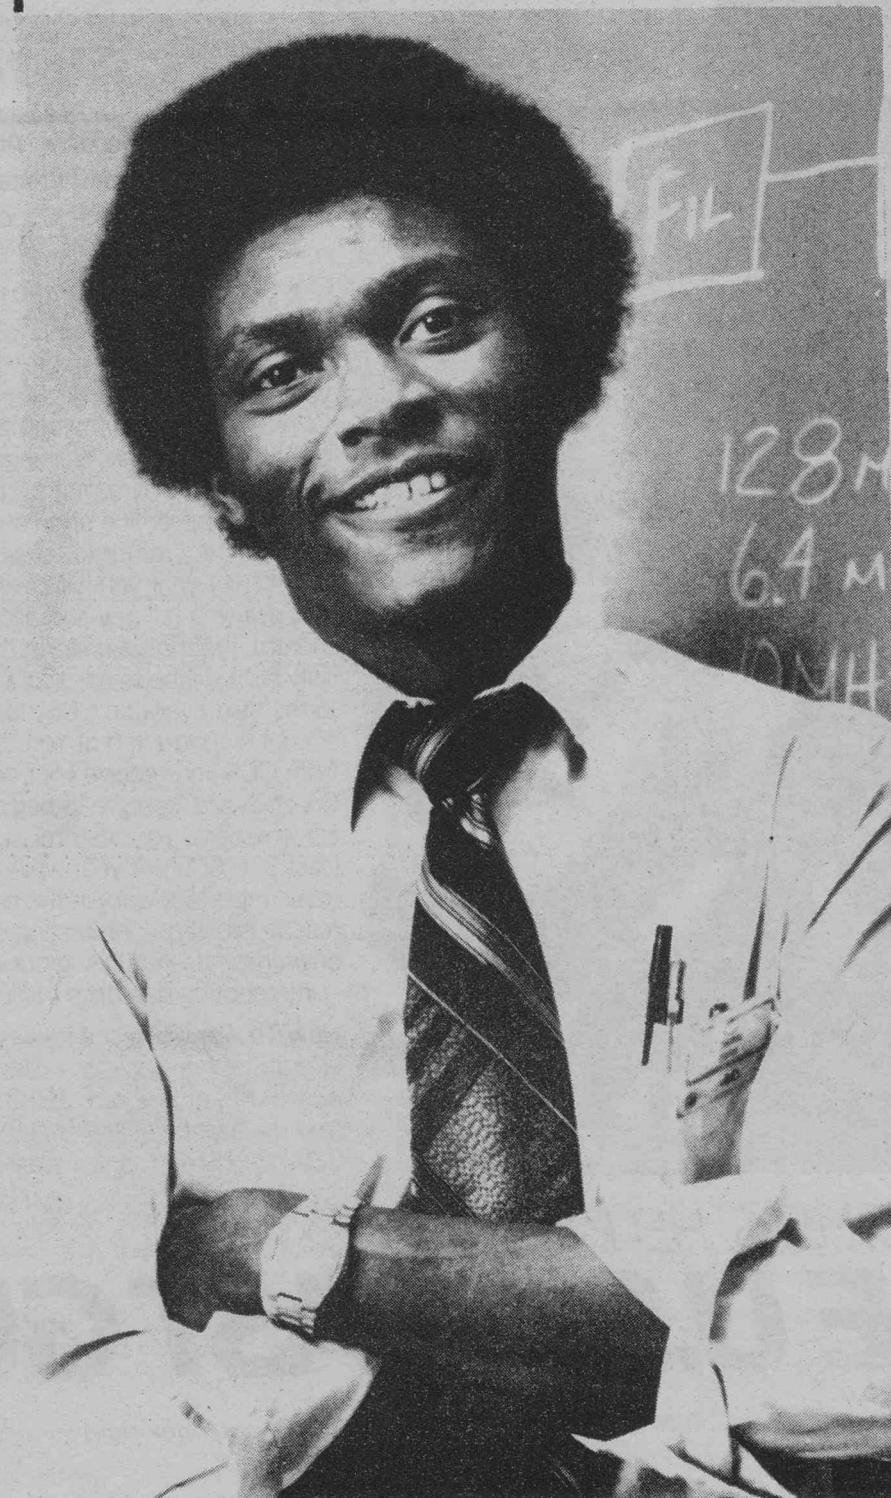

All Mass Communication students, concerned about the welfare of the program, are asked to attend a meeting 7 p.m. Feb. 3, in the Paul Robeson Little Theater.

The South Carolina Aggie Club will meet 8 p.m. Feb. 4, in Gibbs Hall, Room 123. We are asking all members to attend. Important business.

The Southeast Branch Library will feature the film *To Be Young Gifted, And Black* 7 p.m. Wednesday. This film is a portrayal of the late playwright, Lorraine Hansberry's struggle from her first visit to the South, to the streets of Harlem. Call the Southeast Branch Library for more information.

Turning Point: Rape and Family Abuse Prevention Services, located at 1301 N. Elm St., has a 24-hour rapeline. 273-RAPE.

## Imagine yourself in the job of your choice ... then ask for it.

That's what Burnell Thomas did. "I started in software at Hughes, but found I would rather be in hardware, designing the individual components of a system and seeing it all come together. So I asked for a transfer and now I'm developing test procedures for a unit I helped build - a reference generator for a satellite."

### Imagine yourself studying for your M.A. or Ph.D. - and Hughes paying for it.

"One company I spoke with told me I would have to be with them a year before they would send me back to school. When I asked about graduate study at Hughes, they handed me an application for their fellowship program at U.S.C. and they're paying my way."

And if you would like to continue your education without returning to school, ask about our in-plant, graduate equivalent courses.

Tell us what you imagine yourself doing and we'll tell you where at Hughes you can do it, at any of our twelve Southern California or Tucson, Arizona locations.

Write to:

Hughes Space & Communications  
P.O. Box 92919, Dept. NC, S41/A300  
Los Angeles, CA 90009

At Hughes, your future is limited only by your imagination.

# THE SPORTS REPORT

By WADE NASH

This is the time of year that shows the versatility of Moore Gymnasium.

At present, there are at least four different teams using the facility to prepare for their upcoming seasons.

Intramural Director Ralph Brown is coach and adviser for A&T's "A" and "B" Soccer Club Teams.

The "A" team is composed of Nigerian students who will join the Carolina Soccer League in the spring.

It has competed successfully with club teams such as Wake Forest University, Duke University, N.C. State University and the University of North Carolina at Chapel Hill.

Because the "A" team was very competitive, it was asked to join the Carolina League.

The Nigerians held tryouts last fall and right now they are running and getting in shape.

A group of Iranian and Kuwaiti students form the "B" team that will compete in Elon College's Indoor Soccer Tournaments.

Brown said, "Both teams are good because of their different backgrounds. It might be best to keep them separate. The "B" team is strictly an indoor group and it hasn't decided whether or not they'll play outdoors. I'd hate to have to pick the better squad because I haven't watched the Nigerians indoors or the Iranians outdoors. I'm eager to see them go at one another in the future."

Coach Mel Groomes' 1982 baseball team is using the Moore facility to get in shape.

Groomes has 35 players trying out for the 25-man squad.

The team is exercising and throwing to prepare for the upcoming season. This could be one of the school's best baseball teams in recent years as numerous starters return.

The track programs also use Moore Gym when Corbett is unavailable.

The men and women use the facility daily in preparing for the upcoming season.

The Aggiettes use both Corbett and Moore, and the hard work of Coach Joyce Spruill has produced another banner season.

A&T will battle for the state championship and they now are 8-6 overall.

The Aggies dropped their first conference game to S.C. State in Orangeburg, with a score of 72-55.

The Aggies got behind and, after rallying to tie the score at 38, the squad suffered an untimely scoring drought.

They moved on to the University of Maryland-Eastern Shore before returning to Greensboro with key conference games between Howard and Delaware State this weekend.

The wrestling team, coached by Mel Pinckney, will be without the services of Barry Venerable for the remainder of the year.

Venerable was injured and lost for the year. Pinckney still has junior James Mosely, a Camden, N.J., native, to count on.

Mosely is 28-0 in the 158 pound weight class, is the top North Carolina wrestler and one of the leading candidates to win the nationals.

The A&T athletic budget has been cut \$42,000, but Chancellor Edward B. Fort plans to continue in Division 1A.

In an effort to show their desire to have January 15, Dr. Martin L. King Jr.'s birthday made a national holiday, these Aggies take part in a march to honor the slain humanitarian. (Photo by Nick Reid)

## Attles Wins 500th Game

Al Attles, head basketball coach of the Golden State Warriors of the National Basketball Association, won his 500th game of his career recently when the Warriors defeated the Dallas Mavericks 119-100.

Attles, a 1960 A&T graduate, still holds three A&T records including the most assists in a single game (17 versus Winston-Salem State University); most assists in a single season (200, 1958-59) and most career

assists (581).

During his collegiate career he was the primary source behind A&T's success. During the 1958-59 season when the Cal Irvin-coached team finished with a 26-3 record and became the first predominately Black team in the nation to participate in the National Collegiate Athletic Association basketball tournament.

Attles was inducted into the A&T Sports Hall of Fame in 1971.

He led the Warriors to the NBA title in 1975.

In addition to his head coaching duties, Attles also serves as the team's general manager.

The Newark, N. J. native is currently in his 13th coaching season with the Warriors, the only team for which he has coached or played professionally.

The 500th win places him fifth among active coaches.

His last year as a player was 1970-71.

## Who will be first to telecast directly from space to homes?

Our Surveyor spacecraft transmitted the first television pictures from the moon. We've built 85% of all the commercial communication satellites that circle the earth. We are the world's space communication leader.

Our Hughes Aircraft group's labs near Los Angeles International Airport can transform your ideas from the theoretical to the practical. Our five-story simulator can put them to the tests of space. Bring us your BS or MS degree in EE, ME, Computer Science, or Physics. We can introduce you to people, ideas, and jobs that could change your world. And ours.

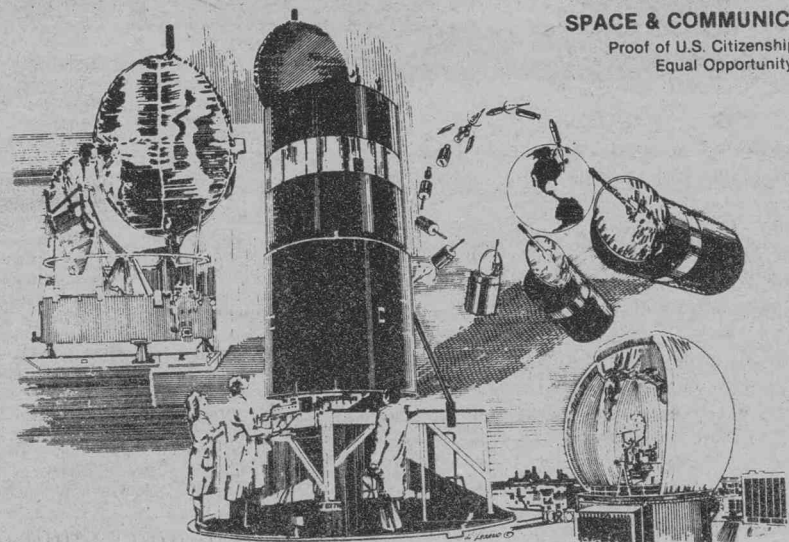

It could be you and Hughes

# Dogs Give Aggies First MEAC Loss

By RICHARD WILLIAMS

A&T surrendered its first Mid-Eastern Athletic Conference loss Saturday night to South Carolina State in Orangeburg, when the Bulldogs defeated them 72-55.

The Aggies fell behind early in the contest and fought an uphill battle until they tied the score mid-way through the second half.

The Bulldogs, who have always offered tough opposition, closed the Aggie rally by successfully shutting down their inside game.

"We didn't execute and experienced too many breakdowns," said Coach Don Corbett.

The Aggies, who trailed 34-28 at the half, began the second half with a 10-4 spurt to tie the score at 38-38 with 14:04 remaining on the clock.

Joe Binion, who scored 15 of his team high 19 points, kept the Aggies within striking distance until the Bulldogs' last outburst of eight unanswered points.

Most of the Bulldogs' baskets came from the outside in the second half.

"We didn't get the ball inside after that (rally) and couldn't find a combination of players," Corbett explained.

The Aggies were out

rebounded by a 49-22 margin. They shot 40 percent from the floor and missed eight of their free throw attempts.

James Anderson was the only other starter in double figures. He finished with 15 before exiting via fouls.

A&T's usually strong bench went 3-13 from the floor and was outscored by States' bench 26-6.

Seldom unsteady, Eric Boyd had a terrible day from the floor as he converted on only 1 of 8 attempts.

The Aggies fell to 3-1 in conference action and 8-5 overall.

S.C. State upped its mark to 7-6 and they are 5-1 in the MEAC.

Perhaps if things moved more smoothly at the tray belts, more people would be willing to remove their trays from the tables. (Photo by Nick Reid)

## 'Flag' Team: INCF Semi-Finalist

By MONICA GRAVES

The Intramural Flag Football Team, coached by Ralph Brown, placed in the semi-finalist position at the Intramural National Collegiate Flag Football Tournament held at the University of New Orleans, Dec. 27-31, 1981.

Three players, Dick Martin, Bobby Shaw and Steve

Pridgen, were named All-Americans.

*"Our Flag football team paved the way for other Black universities."*

*Coach Brown*

Brown attributes the teams' success to the speed of the players. However, Brown also added that the team's unfamiliarity with the rules

and lack of equipment may have prevented them from performing even better.

The Flag Football Team competed against such schools as the University of Kentucky, the University of South Carolina and Pitt University.

"Our Flag Football team paved the way for other Black Universities," Brown said.

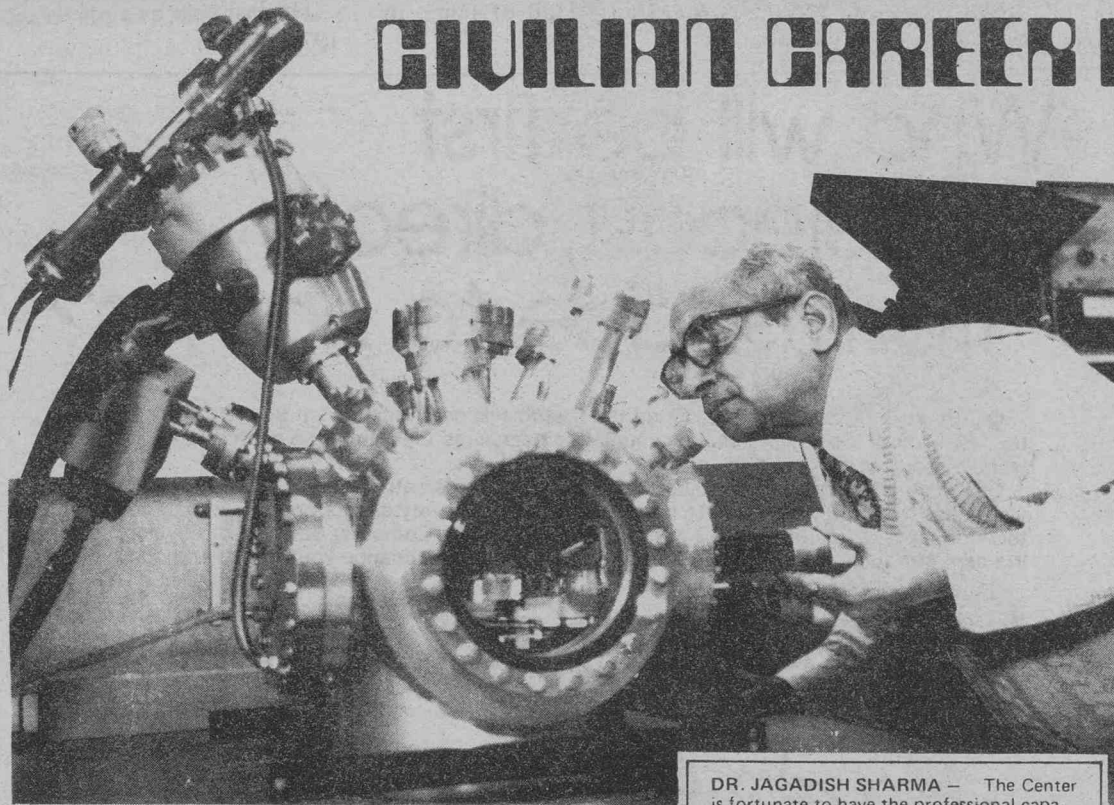

Bobby Shaw, quarterback

for the team said, "The tournament was enjoyable, but there should have been more Black teams participating."

Shaw is now training for the varsity football team.

Added Brown, "Shaw is an example of some of the raw talent we have walking around here on campus that is not being recognized."

## CIVILIAN CAREER OPPORTUNITIES

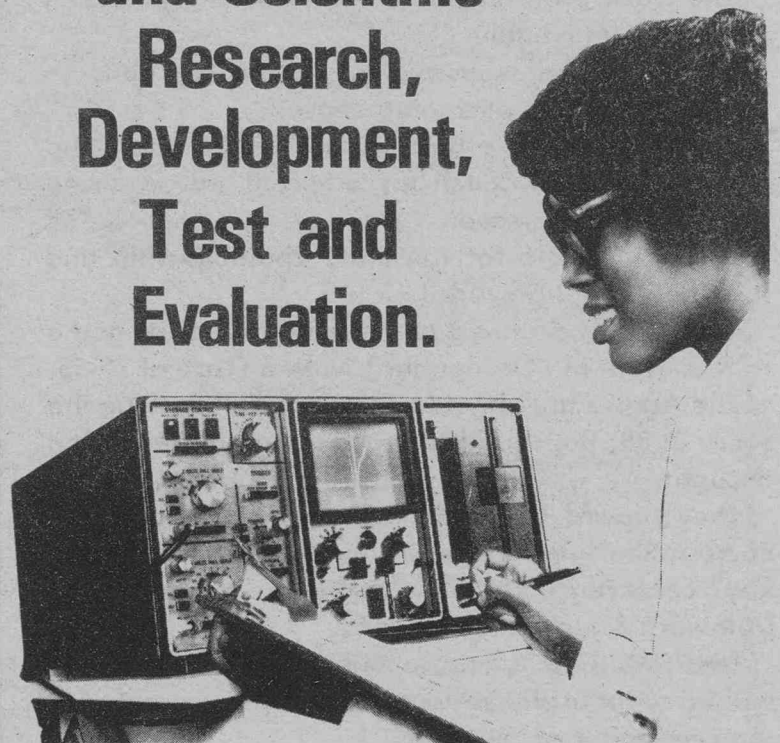

**DR. JAGADISH SHARMA** — The Center is fortunate to have the professional capabilities of Dr. Sharma who recently joined the Surface Evaluation Facility. Originally from Calcutta, India, Dr. Sharma was a protegee of H. N. Bose, an Indian physicist, who developed the Bose-Einstein statistics (one of the fundamental concepts of modern physics). He has served on the faculty of the Science and Engineering Institute, Kharagpur, India; was a research associate at Princeton University and at Brookhaven National Laboratory; a Research Fellow with the National Research Council of Canada. At Picatinny Arsenal, Dr. Sharma developed the techniques in X-Ray Photoelectron Spectroscopy (XPS) to examine explosives and propellants. He has also worked with Professor Siegbahn, who invented the XPS technique. This experience inspired Dr. Sharma's later development of the XPS techniques now used to investigate energetic materials.

The Naval Surface Weapons Center in the Navy's largest research, development, test and evaluation center, consisting of two main sites located at Dahlgren, Virginia and White Oak, Maryland. The scope of work assignments is broad and varied; the Center's many tasks form creative challenges, which provide almost unlimited opportunities for you in engineering and scientific development.

We look to our professional staff for creative solutions to the Navy's needs. You can join our team and do the things you have been educated to do, with all the advantages of the Navy's largest development center at your fingertips.

### In Engineering, and Scientific Research, Development, Test and Evaluation.
