Creating Communication Gaps

Government regulations designed decades ago to improve entertainment in America as well as aid our economy may now be having the opposite effect.

These Financial Interest and Syndication Rules of 1970 were developed based on a view of the television marketplace in which the combined strength of the networks was perceived to threaten the competitive position of small, independent producers. The Rules prohibit the networks from making efficient financial investments in the programs they broadcast. Today, given the phenomenal growth of independent stations, cable, first-run syndication, pay-per-view and other program buyers, that view of the marketplace is completely out of date.

Recognizing this, in 1983, the FCC itself concluded that the Rules were no longer needed and should be repealed. The Federal Trade Commission and the Department of Justice and Commerce agreed. Nevertheless, they're still in force.

These Rules create enormous problems for the networks and their affiliates—and therefore for the country's economy—in several respects:

- They accelerate the buy-out of America's entertainment business—our third largest export—by major foreign media conglomerates;

- They favor foreign media giants at the expense of U.S. competitors;

- They handicap free over-the-air television programming in its competition with cable and other pay systems;

- They undermine the long-term economic health of local television affiliates who deliver free TV to the home.

The rules even prohibit the U.S. networks from aggressively competing abroad against the very foreign competitors that are so active in this country.

Many Americans, concerned about the country's economy and their own, are asking their legislators to look into this matter. Anyone can write Congress on either side of this or any issue at the U.S. Senate, Washington, D.C. 20510 and the House of Representatives, Washington, D.C. 20515.

A&T bound for space

If the United States fulfills President Bush's challenge to place a manned vehicle on Mars by the year 2019, researchers at A&T will play a major role in the feat.

Through the schools of engineering and technology, A&T is working with researchers from nearby N.C. State University under an \$8.4 million NASA grant to build a light-weight substance for a Mars - bound vehicle.

Through the schools of Engineering, A&T is operating a Mars Mission Research Center under the direction of Dr. V. Sarma Avva, a professor of mechanical engineering. The project includes nine professors and fourteen students. When a full-side engineering research model of a proposed vehicle was unveiled by N.C. State in Raleigh for NASA on September 14, A&T scientists from the School of Technology were beaming too.

A&T's Thurman Exum and four of his students had built the transport cradle for carrying the HL-20 personnel Launch System (PSL) and which can be used to position the system in a vertical position for takeoff. In addition researchers at A&T:

- * played a minor role in fabrication of the HL-20

- * have already received a contract to do the interior of the personal launch system.

"We are quite excited about our involvement in this,"

said Exum, a 1969 A&T graduate, who was formerly employed by General Motors for 10 years. "We were given the criteria for constructing this cradle in May, and we designed it and fabricated it in a short period of time," said Exum. He said he was selected by NASA for the Project because of his expertise in fabrication.

"We are quite pleased with the contribution of our superb scientists to this national priority of sending a manned space vehicle to Mars," said Chancellor Fort. "We believe that this historically fine institution, if given the opportunity, can make an even greater contribution to the nation's goal of regaining its competitive economic edge."

Exum said he and his students hope to complete fabrication of the interior with special aluminum panels and composite materials by late October. The HL-20 PLS will be on display at A&T on October 3.

Through its Mars Mission Research Center in the A&T School of Engineering, Avva and his research colleagues are trying to develop lightweight shuttle. "It will take about 30 years to develop the technology," said Avva.

A&T is scheduled to dedicate a Center for Composite Material Research on the campus on Friday, September 28, with NASA administrator, Adm. Richard Truly as the keynote speaker.

New Orleans style mock funeral was one of the activities that took place during Drug and Alcohol Awareness Week.

Mock funeral held at A & T

By Teresa Washington
Special to The A&T Register

"Drugs can kill" was the message conveyed by the mock funeral which took place on the campus of North Carolina A&T State University on Tuesday, Sept 25, at 4p.m.

The mock funeral was organized by the Student Health Center and the Counseling Center, and according to Linda Bowling, director of Student Health, the mock funeral was designed to warn students about the dangers of drug and alcohol use. "The purpose was to bring attention to the use of drugs and alcohol and what will happen if you're not responsible. We wanted to think of

something creative to bring attention to it," she commented.

Many A&T students participated in the "funeral" procession, which began at the Sebastian Health Center and ended at the Student Union.

Among the participants in the procession were the Dudley High School Marching Band, the Beta Epsilon Chapter of Alpha Phi Alpha Fraternity Inc., the Alpha Nu Chapter of Kappa Alpha Psi Fraternity Inc., and the Alpha Phi Chapter of Alpha Kappa Alpha Sorority Inc.

Many of the participants were wearing T-shirts that said, "Real Aggies Don't Do

Drugs", while the band played "When the Saints go Marchin' In." The procession was led by a horse drawn carriage carrying the body of a drunk driving victim.

The funeral itself started in front of the Union with the carriage in the background while the "Rev." Zander Bryant preached the eulogy. "Drugs will do this to you," Bryant shouted, while pointing to the casket. "Drinking and driving is a sin that can kill," he added, while the mourners shouted "Amen!"

After the funeral the Rev. Bryant and members of the congregation paid their final respects.

Miss A&T wins Miss NBCA

Sharron Jenkins, a Senior majoring in Chemistry at North Carolina A&T State University captivated a sell-out audience and nine judges, winning the title of Miss National Black College Alumni Hall of Fame September 14 in Atlanta.

Susan Reine, a Senior Math Communications major at Xavier University in New Orleans was runner-up. Rounding out the Queen's Court were: Dawn Harris, a Senior Economics major at Spelman College in Atlanta; Jolie McKeel, a Senior Math Communications major at Prairie View A&M University in Prairie View, TX; and Lori Scales, a Senior Telecommunications

major at Morgan State University in Baltimore.

For winning the competition, which is now in its fifth year, Ms. Jenkins received a \$2,500 scholarship from the National Black College Alumni Hall of Fame Foundation. Additional prizes and scholarship grants to the runners-up totaled an additional \$10,000. The competition was underwritten by Hardee's restaurants, American's third largest fast food hamburger restaurant company.

In all, 26 women representing America's black colleges and universities from on dozen states, vied for the honor of Miss NBCA Hall of Fame.

Photo By Wade Nash

Thomas W. Dortch, Chairman of the National Black College Alumni Hall of Fame (center) with the candidates for Miss Hall of Fame 1990, which was won by Sharron Jenkins of North Carolina A&T State (back row, fourth from right.)

Each candidate was chosen from their respective institution and competed in the categories of speech writing and delivery, talent, and poise and projection. As such, each was scored on their abilities, personalities, talent and intellect.

Many celebrities including Louis Gossett, Jr., Janet

DuBois, Felton Perry, Kene Holliday, Donna Cheek, Tasha Scott and Mendy Lee appeared at the competition. Kim Fields and Vince Williams served as masters of ceremonies.

"We salute Sharron Jenkins and all who participated in this year's competition," said Bill Prather, Presi-

dent and CEO of Hardee's. "Graduates from black colleges and universities has made outstanding contributions to the world. This is our third year sponsoring this noteworthy event and we look forward to a long and continuing association with the Foundation."

COLLEGE PRESS SERVICE

PUZZLE SOLUTION

COLLEGE PRESS SERVICE

Whose parking idea was it anyway?

By Robin Alston
A&T Register
Managing Editor

Numerous issues and complaints have been raised at North Carolina A&T State University regarding on-campus student parking this semester.

Parking problems started when A & T officials created a new university parking policy in the fall of 1989 to supplement campus revenue.

The policy was developed by a faculty traffic committee after a survey revealed that A&T parking permit prices were the third lowest in the University of North Carolina campus system, according to A & T police chief John Williams.

"Our ticket prices were rather conservative," said Wil-

liams. "That's when a decision was made to increase the parking permit fees."

In the fall of 1989, the price of a permit for a commuting student was \$15. The price was increased to \$60 for the fall '90' semester.

The higher prices have caused many students to park off-campus and walk to their classes. As a result, campus parking lots are not being fully utilized.

"We know the lots are half-full all during the day," said Williams. "The new policy is an experiment to see what would happen if students didn't park in certain areas."

Many students feel that it is not worth the price to park on campus.

"I think the parking is ridiculous," said Fatima Makenta, senior Public Relations major. I think they created more of a problem, its truly inconvenient."

A policy that both achieves the needs of the university and satisfies the students can be attained, if both sides are willing to work together, said Dr. L. Milton Glisson, traffic committee director.

Glisson added that if modifications are not made to the policy there is chance that A & T could lose student enrollment.

"We have got to have the students," said Glisson. "Without students, we don't have a university."

Dr. Nita Dewberry conducting Spanish conversational group, "La Mesa Espanola."

Spanish conversation group formed

By Corey Cartwright

Hola Aggies! The Spanish Club has elected officers and is setting the plans in motion to raise funds to support a super semester.

The president and Spanish major, Alisa Taliadero says, "The club is to help students develop a greater appreciation for the Spanish language and culture." Vice President Garry Patterson hopes to "make the club an established organization on campus." Other elected officers include treasurer, Sherrye Evans and Secretary, Celia Steward.

Advisor to the club, Dr.

Dewberry comments, "Students do not have to be enrolled in a Spanish course to participate." She also stated the club will function on a, "committee type" basis, thus contributing to "providing a unique opportunity for individuals to experience cultural activities."

The Spanish club is also sponsoring "La mesa Espanola" a Spanish conversation group that meets once a week to talk about current events and political issues while at the same time getting experience using the Spanish language outside of the classroom setting.

Sophomore communications major Maysa Walington commented, "La mesa Espanola" is an excellent vehicle for meeting other students interested in the Spanish culture."

A major goal of the organization is to send some of its interested members to Spain or Mexico on a summer exchange program.

Meeting time for the Spanish Club are Tuesdays at noon, room 322 Crosby Hall, and for "La mesa Espanola", Wednesdays, noon Room 305 Crosby Hall. For further information, contact Dr. Nita Dewberry, Room 306 Crosby Hall.

Honeywell program gives full aid to students

Officials of Honeywell in Minneapolis, Minn. have announced an innovative scholarship program which will mean thousands of dollars in assistance to students at North Carolina A&T State University.

At a press conference held earlier this month, Honeywell announced the first grants, which would mean a total of \$187,000 to eight students, who have been designated as Honeywell Scholars.

According to Jerry Hess, vice president, corporate financial audit for Honeywell, the students, who are majoring

in electrical engineering, accounting, mechanical engineering, chemistry, and computer science, will have all of their tuition and fees paid for by the company. In addition, the students will be provided with employment each summer.

"The dedication of A&T to educational excellence and to the personal growth of these students will serve them well in their future career, said Hess."

"This is a superb program of a contributing partnership we have enjoyed with Honeywell," said Dr. Norman Handy, vice chancellor for

Development and University Relations. "In addition to providing scholarship aid for

worthy students, it will provide them with practical internships with one of America's most successful hightech

companies. It is also significant that this new program comes at a time when many outstanding students would not be able to remain in college

without some type of financial assistance, including employment." Handy said that Honeywell is expected to continue the program for some time.

U.S. Marine band to give free concert at A&T

The world famous United States Marine Band, conducted by Colonel John R. Bourgeois, will appear in a free public concert in the Richard B. Harrison Auditorium on Thursday, October 4, at 8 p.m.

The concert is being sponsored by the A&T Department of Music. "Securing the band for this concert is a real plus for the university and the Greensboro community," said Dr. Clifford Watkins, chairman of the A&T Department of Music. "We hope all of our

friends will take advantage of this magnificent cultural opportunity."

Founded more than 190 years ago, the band has performed for royalty, heads of state and the general public. Although excelling in patriotic music, the versatile musicians are highly competent in their performance of many types of American music, including marches, symphonies, folk dances, and conventional pieces.

The Marine Band cur-

rently performs over 600 commitments annually. These performances range from a solo pianist or harpist to the full concert band.

Watkins said admission to the concert will be by ticket. Persons may secure tickets by sending a self-ad-

ressed stamped envelope to the Music Department, Frazier Hall, A&T State University, Greensboro, North Carolina 27411.

I'd never have believed that one little computer could make such an incredible difference in my academic and working life.

Miriam Stoll
B.A. History, Dartmouth College
M.B.A. Stanford Graduate School of Business

"I became a Macintosh convert in business school. At our computer lab I'd always find lines of people waiting to use the Macintosh computers, while other computers just sat there. So I had a choice: wait for a Macintosh, or come back at 6 A.M. to grab one before they'd all be taken. After business school, I took a job at a large bank and used my Macintosh for producing everything from spreadsheets to a company newsletter.

"Today I use Macintosh to help me run my own management consulting firm. When I give a presentation, I can see in people's faces that they're really impressed. And that makes me feel great.

"Sometimes I take Friday off, put my Macintosh and skis in the car, and head for the mountains. I ski days and work nights. It's perfect.

"You know, I can't say where I'll be in five, ten, or fifteen years, but I can say that my Macintosh will be there with me."

Black business firms up

The number of Black-owned employer firms in the United States increased from 308,000 in 1982 to 424,000 in 1987, a 38 percent rise, according to a survey by the Commerce Department's Census Bureau.

All U.S. firms rose 14 percent, from 12 million to 13.7 million during the same period, the survey showed.

Receipts for Black firms increased by 105 percent, from \$9.6 billion to \$19.8 billion. Receipts for all firms rose 106 percent, from \$967.5 billion to \$1,994.8 billion.

About 3 percent of the nation's firms were Black owned in 1987, and generated 1 percent of U.S. business receipts for that year.

Some 94 percent of Black firms were sole proprietorships in 1987. Partnerships and subchapter S corporations each comprised 3 percent. (A subchapter S corporation is a special IRS designation for legally incorporated businesses with 35 or fewer shareholders who, because of tax advantages, elect to be taxed as individual shareholders rather than as corporations.)

Receipts per firm averaged \$47,000 for Black-owned firms, compared with \$146,000 for all U.S. firms. Fifty-four percent of Black firms had receipts under \$10,000; fewer than 2,000 had sales of \$1 million or more.

The survey also shows that 17 percent of Black-owned firms which had paid employees, accounted for 71 percent of gross receipts. The 189 firms with 100 or more employees accounted for \$2 billion in gross receipts or about 14 percent of the total receipts of all Black-

owned employer firms.

Service industries made up about half of all Black-owned firms and 31 percent of gross receipts, while retail trade businesses accounted for 16 percent of firms and 30 percent of receipts.

The 10 industry groups with the largest dollar volume of receipts in 1987 were automotive dealers and service stations (2.2 billion); business services (\$1.6 billion); health services (\$1.4 billion); business contractors (\$1.3 billion) miscellaneous retail (\$1.1 billion); eating and drinking places (\$1.1 billion); personal services (\$1.0 billion); and wholesale trade, nondurable goods (\$700 million).

The 10 metropolitan areas with the largest number of Black-owned firms accounted for 36 percent of the national Black total and 36 percent of gross receipts by Black businesses. The following table shows data for these 10 areas, comparable statewide totals, and each metro area's proportion of its state total.

The report contains information on number of firms, gross receipts, number of paid employees, and annual payroll. These data are presented by geographic area (the nation; states; and selected metropolitan areas, counties, and cities), industry, size of firm, and legal form of organization of firm. Large corporations are not included in the survey.

Separate reports on businesses owned by women, Hispanics, and a combined report on Asian Americans, American Indians, and other minorities, will be issued later.

Environmental gasoline is a hot topic right now. But at Amoco, it always has been. For decades, we've built our reputation by producing the cleanest gasoline available. LaTunja Jackson is a chemical engineer who's helping us maintain that reputation. Just five months out of school, she's working on a vitally important project—producing a new high-octane additive that will dramatically reduce the carbon monoxide emissions of Amoco gasoline. The project calls for major design

modifications to one of our largest refineries. It's given LaTunja a chance to work with state-of-the-art technologies in catalytic processing and computer simulation. If you're smart, capable, and ready to take on a challenge, you'll find Amoco is full of opportunities like these. Projects that enhance not only your future, but everyone's. So stop "talking" and start doing, at the global energy and chemical enterprise where you can make a difference.

Amoco Corporation
Choose the big business that makes a big difference.

Move 10 years ahead of the class.

The new HP 48SX and a free 'library card' can get you there.

With over 2100 built-in functions, our new HP 48SX Scientific Expandable calculator takes a quantum leap into the 21st century. Buy an HP 48SX between August 15 and October 15, 1990, and HP will send you a free HP Solve Equation Library card (a \$99.95 retail value).

The plug-in application card alone contains more than 300 science and engineering equations, as well as the periodic table, a constants' library, and a multi-equation solver. It's like having a stack of reference books right at your fingertips.

The HP 48SX calculator is so advanced, it will change the way you solve problems forever. It integrates graphics with calculus, lets you enter equations the way you write them, and does automatic unit management.

Check your campus bookstore or HP retailer for HP's range of calculators and special back-to-school offers. Then check out the calculators that are years ahead of their class.

There is a better way.

Our People, Our Pride

African American Heritage, Poetry and Community News

411

By Eric Short

In 1957, the African nation of Ghana gained independence from the oppressive colonial system of the British government. A man instrumental in the organization and overall movement of the grass-root people of Ghana was the revolutionary, Kwame Nkrumah. Nkrumah became an international spokesman for not only Ghana, but all African nations being exploited by the economic and political make-up of the existing British colony governments.

Nkrumah was born a native of Ghana on September 18, 1909. Nkrumah was a student of the system that he lived and grew up in. As a native of Ghana, he saw first hand how the exploitation of his people was manifested through economic and political manipulations by the ruling government. The overt elements of racism were also observed by Nkrumah. At a young age, Nkrumah dedicated his life to the upliftment of his people in Ghana.

In 1935, Nkrumah traveled to the United States to attend Lincoln in New York. During his time in America, Nkrumah began to develop a true working framework for organizing his people once he returned to Ghana. In addition to his academic studies, Nkrumah also was a student of established revolutionaries like Hannibal, Napoleon, Gandhi, Mussolini and Hitler.

Another revolutionary that had a deep-rooted effect on Nkrumah's philosophy was Marcus Garvey. Nkrumah stated in his autobiography that, "I think that all of the literature that I studied, the book that did more than any other to fire my enthusiasm was, The Philosophy and Opinions of Marcus Garvey, published in 1923." Nkrumah adopted the philosophy of "Africa for the Africans." This started a movement towards Pan-Africanism. Pan-Africanism is the belief that all Africans and all African descendants spiritually are genetically and spiritually connected. Included in this philosophy is the feeling that Africans should be concerned with the affairs of all other Africans throughout the world.

In 1947, Nkrumah returned to Ghana and eventually founded his own political party called the Convention People's Party (CPP). The goal of this party was to create a totally independent government in Ghana. Nkrumah used non-violent forms of government resistance such as strikes, boycotts and political education through newspapers. Nkrumah created so much trouble for the ruling government that in January 1950 his was arrested and imprisoned. He did not stay in prison for long however because in February 1951 national elections were held and the CPP won. As the leader of this organization, Nkrumah was released from prison and eventually became prime minister of Ghana.

Finally in 1957, Ghana gained its independence. Nkrumah served as president of Ghana for nine years from 1957 to 1966. Nkrumah was not only an organizer and worker for his people but he was a prolific writer. Nkrumah was the author of eight works that deal with colonialism, revolution and Pan-Africanism.

Kwame Nkrumah died on April 27, 1972 after a life dedicated to the social and political freedom of all African descendants the world over. Nkrumah is well-respected as a true revolutionary with a unshakable sense of commitment and vision. To find out more about Kwame Nkrumah, check The Autobiography of Kwame Nkrumah. Also, Great Black Leaders: Ancient and Modern, edited by Ivan Van Sertima should be consulted.

The basic philosophy of Kwame Nkrumah can be summed up in his statement from "Toward Colonial Freedom."

"The African national liberation movement in the African colonies has arisen because of the continuous economic and political exploitation by foreign oppressors. The aim of the movement is to win freedom and independence. This can only be achieved by the political education and organization of the colonial masses."

Lift Every Voice and Sing

Lift ev'ry voice and sing
Till earth and heaven ring,
Ring with the harmonies of Liberty,
Let our rejoicing rise
High as the list'ning skies,
Let it resound loud as the rolling sea.
Sing a song full of the faith that the dark past has taught us,
Sing a song full of the hope that the present has brought us,
Facing the rising sun of our new day begun,
Let us march on till victory is won.

Stony the road we trod,
Bitter the chast'ning rod,
Felt in the days when hope unborn had died;
Yet with a steady beat,
Have not our weary feet
Come to the place for which our fathers signed?
We have come over a way that with tears has been watered,
We have come, treading our path through the blood of the slaughtered,
Out from the gloomy past,
Till now we stand at last
Where the white gleam of our bright star is cast.

God of our weary years,
God of our silent tears,
Thou who hast brought us thus far on the way;
Thou who hast by Thy might
Led us into the light,
Keep us forever in the path, we pray,
Lest our feet stray from the places, our God, where we met Thee,
Lest our hearts, drunk with the wine of the world, we forget Thee,
Shadowed beneath Thy hand,
May we forever stand,
True to our God
True to our native land.

Lobby for aid to Africa

By Frank Dexter Brown

This is an emergency appeal. Our African comrades are again in need of assistance, both material and economic. War, drought, famine, apartheid and other natural and human-made disasters continue to ravage the continent. African-Americans, therefore, have a job to do. We must make our voices heard and lobby the White House and Congress.

The Congressional Black Caucus (CBC) is sponsoring the Mickey Leland African and Caribbean Development Act of 1990 (H.R. 443), named in honor of the Texas congressman who died last year delivering food to Ethiopia. The measure calls for \$1 billion in aid to Africa next year (Fiscal Year 1991) and \$233 million to the Caribbean.

A letter-writing campaign supporting the bill was begun last summer. This effort must escalate now, because Congress will soon vote on foreign-aid appropriations. The

needs of Africa are being ignored even more than before because of the recent changes in Eastern and Central Europe, Nicaragua and Panama. The White House and Congress have already agreed to finance the redevelopment of these areas and nations. Millions are being allocated, and there is talk of a new "Marshall Plan."

We must make even greater demands and insist on a "Marshall Plan" for Africa. Such a plan should include a moratorium on all international debt payments; an end to the restrictive lending measures of the World Bank and the International Monetary Fund; and increased funding to the African Development Bank.

Undoubtedly the United States has as responsibility to provide assistance, in particular to Panama and Nicaragua, as both have suffered from U.S. economic and military destabilization. But Africa's suffering is also due, in part, to the destabilizing poli-

cies of the United States and its Western allies.

Nearly half of the 628 million people of Africa live in poverty; about 68 percent of the world's least developed nations are in Africa; and the continent's foreign debt exceeds \$240 billion. Despite these conditions more than half of U. S. foreign aid (11.7 billion annually) goes to five "earmark" countries: Israel, Egypt, Pakistan, Turkey and the Philippines.

We must support the Mickey Leland Act, which will become law only if we demand its passage. As Frederick Douglass said more than 100 years ago; "Power concedes nothing without a demand. It never did and never will..."

MY HOMELAND

Africa is my homeland
and somewhere inside of me
I miss that part of her
that generations of my forefathers
so unwillingly left behind.
Deep within my soul,
I hear the resounding cato
of an unseen drummer.
My being sways to the soulful rhythm
of a distant jungle beat and I am caught up in all
that is Africa,
from the color of my skin
to the longing in my soul
though my eyes have never seen
the sun rise over her distant horizon,
non have my feet touched her warm and
sunny shores,
that cannot be denied.

- Ursula M. Jones

The Big Score

A&T Aggies "trap" Morgan State Bears for a 49-0 victory

By Charlina Arrington
A&T Register
Sports Editor

"The pride is back," and the Aggie football team is loving every minute of it. A&T continues to hold on to their undefeated record as they trampled the Bears of Morgan State 49-0.

The Aggies took over early in the first quarter when wide receiver, Jarmal Leitzey rushed 65 yards for a touchdown. Quarterback Connell Maynor made a complete pass to Russell McClain for a nine yard touchdown. Also, Maynor

rushed 15 yard for a touchdown to raise the score 21-0. Maynor threw a pass to Anthony Carrington as he rushed 3 yards for the touchdown. The score was 28-0 with 6:40 remaining in the second quarter. A&T's offense continued to dominate as they added two more touchdowns to end the first half 42-0.

The second half was pretty calm. Tight end Craig Thompson rushed 10 yards for a touchdown with 2:20 remaining in the third quarter to boost the score 49-0. Neither team scored in the remaining min-

utes of the second half. The final score was 49-0.

The Aggies were proud of their victory and to remain undefeated at a record of 4-0.

The defensive and offensive lines have shown alot of improvement this season Maynor says. "I think we have improved on our passing game and the running game. I feel the running back is running harder this year than last year. Our offensive line is young but they're improving every week."

Defensive end, Robert Graham said he expected the Aggies to be undefeated at this

point of the season. "I think this year our offense is much better. The guys came together during Spring ball and they came together to learn the system versus last year. Defensively we came back with depth on the defense and line-back position and with an overall effort, I think we can beat anyone on our schedule," he said.

A&T will journey to Norfolk State this weekend. It will be a tight match up. Both teams are undefeated at a 4-0 record. The Aggies believe that confidence will bring them

a victory. Fullback, William Cooper says "I think it's going to be a pretty evenly matched game, they've got some good talent and they are pretty experienced but.... I feel if we go in with our minds right and ready to play football, we will definitely come out on top."

Coach Hayes adds, "Norfolk State has an excellent running game and an aggressive penetrating type defense. We will have to play our best game in order to compete with their size, strength and speed. This should be a great game."

Chris Williams runs for yardage as A&T explodes past Morgan State.

Annual Homecoming Tournament scheduled

Golfers and tennis players from several states have already signed up to participate in the 13th Annual Aggie Homecoming Golf and Tennis Tournament.

On Friday, October 26, more than 250 participants are expected for the tournament.

The early entries include players from North Carolina, Virginia, New York, Georgia, South Carolina, Maryland, Illinois and Florida.

"We predict the largest field ever for this tournament," said Dr. Richard E. Moore, tournament chairman.

Proceeds from the event will benefit the athletic program at North Carolina A&T State University.

The golf competition this year will be held in the newly renovated Bryan Park Golf

Course and will get underway at 9 a.m. The flights will include a championship flight, senior flight, women's flight and first, second, third and fourth flights.

The Homecoming tennis competition will be held at Oka T. Hester Park in Greensboro. The tournament will include play for singles, doubles and mixed doubles. Entries for both tournaments must be received by October 1.

Information about the tennis tournament may be secured from Lottayne Widemon at (919) 334-7686 and the golf tournament from Dr. Richard Moore at (919) 334-7582. Sponsors at the tournament include Pepsi Cola Company, R. H. Barringer Distributing Company, Inc. and Shaw Food Service.

WHY SPEND MONEY WASHING YOUR LINEN?

Your University issued linen can be exchanged for clean linen once a week. This is a service provided exclusively through the current fee structure, so take advantage of what you've already paid for!!!

The Campus Laundry also offers a full line of other laundry services at prices, for both on and off campus students.

We're concerned about the abuse of our products. And we're doing something about it.

Know When To Say When

This nationwide consumer education and awareness campaign began in 1983 and is designed to encourage responsible consumption of beer. A series of prime time television commercials and other promotional materials reminds consumers not to overindulge, and provides suggestions to bartenders and hosts on responsible serving. "Know When To Say When" has allowed us to apply our marketing expertise and deliver a message of personal responsibility to a broad cross section of the American public.

Pit Stop

This program was developed to encourage responsible behavior by college students during Spring Break and other school vacation periods. In cooperation with local and state governments, "Pit Stop" personnel provide coffee, doughnuts and, to those of legal drinking age, a message of personal responsibility and caution at state-owned rest areas along major highways. "Pit Stop" has been so successful that it has been expanded to other travel occasions.

Good Sport

As the world's largest sponsor of sporting events, we are committed to seeing that they continue to be enjoyable, family entertainment. "Good Sport" is a program that brings facility management, team owners, and concessionaires together to actively encourage responsible fan behavior. It provides a comprehensive action plan carefully designed to help keep sporting events fun and safe for all fans.

S.A.D.D.

We are the major corporate sponsor of S.A.D.D. (Students Against Driving Drunk). This independent organization has used the power of the students themselves to fight the drunk driving problem among teenagers. The program encourages a healthy dialogue between parents and their teenagers on drinking. While not condoning underage consumption, S.A.D.D. provides a real-life solution to a serious societal problem. We have provided a special grant to expand the program to colleges and universities. Write, S.A.D.D., P.O. Box 800, Marlboro, MA for more information.

I'm Driving

We support the designated driver concept through sponsorship of the "I'm Driving" program. "I'm Driving" is promoted with counter cards, table tents, buttons and other educational materials. This program is not a substitute for responsible drinking, but it offers a sensible option in potential drunk driving situations.

Your Alcohol I.Q.

This program is designed to educate consumers about alcohol use in an easy-to-understand, entertaining format. A video starring "LA Law's" Michael Tucker and Jill Eikenberry takes the viewer through the truths and myths surrounding alcohol. Anheuser-Busch has developed this program in the belief that education is the best tool available to encourage responsible consumption and reduce abuse. "Your Alcohol I.Q." is available as a free rental at 25,000 video outlets around the country.

At Anheuser-Busch we, like any responsible manufacturer, are concerned by the abuse of our products.

The vast majority of the 80 million Americans who enjoy beer do so responsibly. But those few who abuse it can have an impact far beyond their numbers. An impact that reflects on us as a company, on our products and employees, and on the much larger population of responsible beer drinkers.

On this page you'll find a brief introduction to a few of the programs we've helped create, or help sponsor, to lessen that impact.

The absolute solution to the abuse of alcohol isn't on this page. That's a challenge our society as a whole has before it. We must all continue to take the problem seriously, as parents, hosts, friends and citizens.

As a brewer we feel an added responsibility. The ancient craft we practice is designed to produce a beverage of friendship, refreshment and moderation. We brew beer to be enjoyed responsibly.

If you have comments or suggestions, please let us hear from you. And please take a few moments to see if you can play a role in any of the programs mentioned here. We'd welcome your help.

We brew our beers to be enjoyed... responsibly.

CITY OF GREENSBORO
**HOUSEHOLD
HAZARDOUS WASTE
COLLECTION DAY**

SATURDAY, SEPTEMBER 29, 1990

GREENSBORO COLISEUM

PARKING LOT

8 AM - 4 PM

FOR INFO: 373-2196

HOUSEHOLD HAZARDOUS WASTE PROGRAM

Many household products are potentially hazardous to our environment if improperly disposed of. Particularly vulnerable is our water supply, which can be easily polluted. Plants, animals and humans can all be affected by careless disposal of everyday chemicals. To reduce these dangers, the city of Greensboro will dispose of your household hazardous waste for you. All materials will be carefully checked and packed by professional teams and transported to a safe disposal site. With your cooperation we can significantly reduce the potential hazards to our environment.

COMMERCIAL WASTE WILL NOT BE ACCEPTED

HOW TO PACKAGE ITEMS

- * Each item should be kept in its original container.
- * If it is not in its original container, be sure to label the container that it is in.
- * If at all possible, put the container in a cardboard box lined with newspaper or biodegradable plastic bags.
- * Never mix two household chemicals in the same container.

WHAT TO BRING

Household hazardous waste can be found in many different places in and around your home. You may want to check these areas:

GARAGE/WORKSHOP: Paint, paint thinner and other solvents, solvent-based glue, paint stripper or primer, antifreeze, used motor oil, furniture strippers, acids/bases, fuel oil, transmission fluid, degreaser, gasoline or kerosene, photographic solvent, lighter fluid, or autostarter or brake fluid, battery acid and batteries, varnish or shellac.

KITCHEN: Oven cleaner, bug spray, cleansers, furniture or metal polisher, or drain cleaners.

GARDEN: Pesticides, fungicides, herbicides and other poisons used to kill pests.

WHAT NOT TO BRING

The City's collection day will not accept the following: Biologically active or infectious wastes, aerosols, compressed gas cylinders, explosives or shock-sensitive materials and ammunition, unknown materials, radioactive materials, dioxin, kepone, tri-tetra- and pentachlorophenols (wood preservatives) and their chlorophenoxy derivative acids, esters, ethers, amine and other salts (i.e., sodium pentachlorophenate, 2,4,5-T, silvex and 2,4,5-TP).

The collection day will NOT accept hypodermic needles or syringes from homeowners. These materials must be disposed of with great care in the regular everyday trash.
